MICHAEL & WILL

ON THE LAW RELATING TO

GAS AND WATER.

SIXTH EDITION.

BUTTERWORTHS'

STANDARD LAW BOOK SERIES.

No. 1.—Chaster's Law Relating to Public Officers

Having Executive Authority. By A. W. Chaster, LL.B. (Lond.), Barrister-at-Law. Royal 8vo, 900 pages. Price 37*s.* 6*d.* ; for cash, post free, 30*s.* 7*d.* 1909

"It is a work that will at once take its place as a standard book of reference."—*Law Notes.*

No. 2.—Hamilton's Company Law.

Third edition. By W. F. Hamilton, K.C., LL.D. (Lond.). Royal 8vo, 790 pages. Price 21*s.* ; for cash, post free, 17*s.* 7*d.* 1910

The aim of the Author has been to comprise within a reasonable compass the whole of the law relating to companies.

No. 3.—Grant's Bankers and Banking Companies,

Including Notes and Cases decided in the Canadian Courts, and an Appendix containing the most important English and Canadian Statutes in force relating thereto. Sixth edition. By A. M. Langdon, K.C., M.A., B.C.L., and Herbert Jacobs, B.A., Barrister-at-Law; assisted by A. C. Forster Boulton, Barrister-at-Law. With a Chapter on Goods and Documents of Title to Goods, by David C. Leck, Barrister-at-Law; and Canadian Notes, by A. C. Forster Boulton, of the Canadian Bar. Royal 8vo. Pages 105 + 915 + 52. Price 35*s.* ; for cash, post free, 28*s.* 7*d.* 1910

No. 4.—Fisher's Law of Mortgage.

The Law of Mortgage and other Securities upon Property. By W. R. Fisher, of Lincoln's Inn, Barrister-at-Law. Sixth edition by Arthur Underhill, M.A., LL.D., of Lincoln's Inn, one of the Conveyancing Counsel of the Court. Royal 8vo. Pages 188 + 1028 + 162. In two editions, on thick or thin paper. Price 52*s.* 6*d.* ; for cash, post free, 42*s.* 9*d.* 1910

No. 5.—Challis's Real Property.

Chiefly in relation to Conveyancing. Third edition. By Charles Sweet, Barrister-at-Law. Royal 8vo. Price 20*s.* : for cash, post free, 16*s.* 6*d.* 1911

No. 6.—Combe's Law of Light.

Including an exposition of the Law relating to the Nature, Acquisition, Preservation, and Extinguishment of the Easement or Right to Light, and the Remedies afforded for the Protection of Window Lights. By R. J. Nicholson Combe, M.A., LL.M., Barrister-at-Law. Royal 8vo. Price 25*s.* ; for cash, post free, 20*s.* 6*d.* 1911

No. 7.—Welford and Otter-Barry's Law Relating to Fire Insurance.

By A. W. Baker Welford and W. W. Otter-Barry, Barristers-at-Law. Royal 8vo. Price 35*s.* ; for cash, post free, 28*s.* 6*d.* 1911

No. 8.—Michael and Will on Gas and Water. 1911

BUTTERWORTH & CO., 11 & 12, Bell Yard, Temple Bar.

PREFACE TO THE SIXTH EDITION.

About two years ago the Editor was asked to undertake the preparation of a new edition of this book. He had much hesitation in acceding to the request, for he felt strongly that he would be but a poor successor to Judge Shiress Will, who had made a lifelong study of the subject of gas and water. The learned judge was then much engaged with his judicial duties, and his lamented death occurred not long after the work of revision was commenced. The Editor was, however, fortunate in having from him many sheets of notes and suggestions for the new edition, of which, needless to say, careful use has been made.

It is believed that quite five hundred decisions have had to be considered and incorporated; and, although public general Acts have been an almost negligible quantity, much labour has been involved. Special care has been taken to refer to sections now generally inserted in Gas and Water Acts supplementing the provisions contained in the "Clauses" Acts, and references have been made to provisions of recent Acts which will serve as precedents. Developments in Gas and Water Legislation have been noticed, and great care has been bestowed upon an endeavour to make the Introduction a full and correct synopsis of the Law and Practice relating to Gas and Water Bills.

Since the date of the last edition the Metropolis Water Act, 1902, has been placed on the Statute Book, and this Act and the Boards' Charges Act of 1907 have received careful attention.

Many of the notes have been amplified.

The Editor desires to acknowledge his indebtedness to Mr. G. Eustace Cooke Yarborough who has noted up many of the statutes for him and has rendered valued assistance in many other ways; to his clerk, Mr. C. G. Engwell, who has compiled the Tables of Statutes and Cases and rendered assistance in other directions; and to the Metropolitan Water Board for permission to print the Tables which appear at pp. 580 and 640.

The Editor also desires to acknowledge his obligation to "Lumley's Public Health."

GENERAL INTRODUCTION

PART I.—GAS.

Statistics relating to gas undertakings.

From the last available returns made to Parliament (issued November, 1910), it appears that a capital of about 132 millions is embarked in authorised gas undertakings in the United Kingdom. There are 501 authorised gas companies with a paid-up and borrowed capital of £90,120,962; and there are 293 local authorities who themselves undertake the supply of their districts with gas, employing £42,002,322 of borrowed capital. It also appears that there were, at the date to which the returns were made up, 35,230 miles of gas mains, and over 6 million consumers. The continued growth of the industry—in the face of the competition of the electric light—may be illustrated by the fact that while in 1883 there were 357 companies with an authorised share and loan capital of 48 millions, and in 1899, 450 companies with an authorised share and loan capital of over 69 millions, there were, in 1909, 501 companies with an authorised share and loan capital of over 108 millions; and further that, while in 1883 there were 148 local authorities supplying gas with an authorised capital of 21 millions, and in 1899—1900, 232 local authorities doing so with an authorised capital of nearly 30 millions, there were, in March, 1910, 293 local authorities doing so with an authorised capital of over 46 millions. In addition to the authorised gas undertakings, there is a large number of small undertakings supplying gas without statutory authority—and these are not included in the Parliamentary returns.

Parliamentary authority—how obtained.

Parliamentary authority for the supply of gas is obtained either by* Special Act or by a Provisional Order which is afterwards confirmed by a Public Act. A company may apply for either at their discretion unless they require wider powers than can be conferred by a Provisional Order. A local authority on the other hand must adopt the latter and simpler course, where that is open to them, as otherwise they cannot have the benefit of the Borough Funds Acts. See *post*, p. 1039.

---

* In Scotland promoters who desire to obtain the powers for which in other cases a Special Act is required, must proceed by Provisional Order under the Private Legislation Procedure (Scotland) Act, 1899, instead of by Bill (although in certain cases the measure may subsequently be required to proceed as a Bill). They are not, however, precluded from availing themselves of the procedure under the Gas and Water Works Facilities Act, 1870, if they wish to do so.

Consequences which follow thereon.

Parliamentary authority having been obtained, certain consequences follow; the company obtain power to construct their works, and if need be to take defined land compulsorily, but only if authorised by a special Act; they have certain limits of supply assigned to them; they obtain power to break up the public streets for laying and repairing mains and pipes. They obtain power to charge a certain price, and are given summary remedies for recovering that price by cutting off the supply, and by warrant of distress, as well as by action in any court of competent jurisdiction. On the other hand, the company come under many obligations and restrictions; they are restricted to definite lands for the manufacture and storage of gas; they may be compelled by consumers to afford them under certain conditions a supply of gas; and such gas must be of the prescribed illuminating power, pressure, and purity; and they submit to a statutory limit of divisible profits, and, in certain events, to the auction clauses (afterwards referred to) when new capital is authorised to be raised.

Regulated monopoly.

Companies authorised by Parliament to supply gas for illuminating purposes acquire, by implication, and as a general rule, a regulated monopoly; because, so long as they do thier duty within the limits assigned to them, it is not the practice of Parliament to authorise any other company, or any local authority to compete with them as suppliers of gas for such purposes. Nevertheless, Parliament constantly authorises undertakings for lighting by means of electricity within the area of statutory gas companies and in some instances companies have been authorised to supply "power gas" within the limits of a statutory gas undertaking, but it is the practice to prohibit such companies from supplying gas for purposes of illumination See *post*, p. 26.

The general rule above referred to does not apply to electrical companies authorised by Parliament to supply electrical energy for light and power, as there are many instances of such companies having Parliamentary authority to compete with each other in the same area.

Concurrent powers.

There are a few rare instances in which Parliament has granted concurrent powers of gas supply to more than one company. No such instances have occurred in recent sessions, and where application has been made by one of the companies concerned for exclusive powers of supply, it has been the practice of Parliament to grant the application. In session 1908 the Draycott Gas Company asked for the determination of the powers of the Long Eaton Gas Company in a district in which there were concurrent powers. The district in question was within the authorised limits of the latter company, but had not been supplied with gas by them. A non-statutory undertaking was formed to supply the district with gas and subsequently obtained incorporation by the Draycott Gas Act, 1888. The Long Eaton Company in the exercise of their statutory powers entered into competition with the Draycott Company, who thereupon promoted the Bill for the purpose above referred to. The Bill was opposed by the Long Eaton Gas Company, but was duly passed. For other instances see Golborne Gas Act, 1901; Yorktown and Blackwater Gas Act 1904; Bognor Gaslight and Coke Act, 1908; Padiham U. D. C. Act, 1908; Manchester Corporation Act, 1908 (Stretford Gas); and Aldershot Gas, Water and District Lighting Act, 1909.

Locus standi of local authorities to oppose Gas Bills.

When a company seeks to obtain parliamentary authority, either by Bill or by Provisional Order, to supply gas or to raise additional capital, the municipal or other local authority of the town or district alleging that they are injuriously affected are entitled to be heard against the proposal, and where the district of a county council is alleged to be injuriously affected the county council may be admitted to be heard. See the Standing Orders of the House of Commons, Nos. 134A and 134B.

Powers of local authorities as to lighting.

Under the Public Health Act, 1875, any urban authority is authorised to contract for the supply of gas for lighting the streets, markets and public buildings in their district, and where there is no company or person authorised by Parliament to supply gas for public and private purposes, the urban authority may themselves undertake to supply gas for such purposes, or any of them, throughout the whole or any part of their district. Urban authorities are also empowered, with the sanction of the Local Government Board, to buy the undertaking of any existing gas company within their district, and the same Act authorises companies, statutory or otherwise, to sell to local authorities. See *post*, p. 822.

Urban authorities.

Rural authorities.

With regard to rural districts, the Public Health Act, 1875, s. 276 (see *post*, p. 892), enacts that the Local Government

Board may invest a rural authority with all or any of the powers of an urban authority. In pursuance of the power thus given the Local Government Board frequently invest a rural authority with power to light the streets, markets and public buildings in their district under s. 161 of the Public Health Act, 1875 (see *post*, p. 819). In rural districts, or in such parts of rural districts where the Local Government Board have not exercised the power referred to, the Lighting and Watching Act, 1833, may be adopted by the parish meeting as to the whole or part of a parish. See more fully *post*, p. 825.

Where the Lighting and Watching Act, 1833, has been adopted in any place, and that place becomes an urban district under the Public Health Act, 1875, or becomes invested with urban powers under s. 276 of that Act, then the Act of 1833 is superseded by the Act of 1875 (s. 163). See *post*, p. 824.

Gas and Water Works Facilities Acts, 1870 and 1873.

Provisional Orders.

In order to facilitate the obtaining of parliamentary powers for the supply of gas and water, the Acts known as the Gas and Water Works Facilities Acts, 1870 and 1873, were passed. Under these Acts a Provisional Order may be obtained in any district "by any company, companies, or person," therein described as undertakers. As to urban authorities, see *post*, p. 819. The Provisional Order may be obtained for one or other of the following purposes: (1) The construction, maintenance, or continuance of gasworks and the manufacture and supply of gas in any district where there is not an existing company, corporation, body of commissioners or person empowered by Act of Parliament to construct such works or to manufacture and supply gas; (2) to raise additional capital for any of these purposes; (3) to enable two or more companies or persons duly authorised to supply gas in any district or in adjoining districts to enter into agreements jointly to furnish such supply or to amalgamate their undertakings; (4) to authorise two or more companies or persons supplying gas in any district or in adjoining districts to manufacture and supply gas and to enter into agreements jointly to furnish such supply, and to amalgamate their undertakings. A Provisional Order under these Acts does not confer any power to take lands compulsorily. This results from the express terms of ss. 7 and 10 of the Act of 1870. See *post*, pp. 794, 796. Where such power is necessary to be obtained, the procedure must be by Bill.

Except as regards applications by urban authorities, Provisional Orders under these Acts are made by the Board of Trade.

Consent of local authority.

Where powers to construct gasworks are sought by individuals or companies, the consent of the local authority and also of the road authority (where there is a road authority distinct from the local authority) must be obtained; but the Board of Trade have power, after inquiry, to dispense with such consents. In rural districts the parish council, or where there is no parish council the parish meeting, is the local authority for this purpose, and the rural district council and the county council are the road authorities.

Procedure to obtain Provisional Order.

The procedure necessary for the obtaining of Provisional Orders is fully set out in the body of this Work. Certain notices have to be given and advertisements published, as in the case of proceedings to obtain Private Bills. The Provisional Order is of no effect until confirmed by Act of Parliament, and the confirmation may be opposed in Parliament by persons interested in the same way as Private Bills may be opposed. Any opposition, however, is generally fully dealt with by the Board of Trade while the Provisional Order is under the consideration of that department; and consequently only a small proportion of the Orders are opposed in Parliament.

Incorporation of Gasworks Clauses Acts, 1847 and 1871.

Whenever parliamentary authority is obtained, whether by Special Act or by Provisional Order, the Gasworks Clauses Acts, 1847 and 1871, are incorporated. Certain sections are generally excepted in the case of an urban authority, as to which see *post*, p. 797. Amongst these are the sections which require annual accounts to be kept and published in a particular form. Gas companies whose special Acts incorporate the Act of 1847 only are nevertheless subject to the Act of 1871. See the decisions on this subject, *post*, p. 220.

Separate accounts for gas and water.

Where local authorities or companies obtain authority to supply both gas and water, it is usual to require the accounts of each undertaking to be kept separate.

When urban authorities may obtain Provisional Orders.

The Public Health Act, 1875, which gives to urban authorities the powers before mentioned with reference to the lighting of their district with gas, further provides (s. 161) that where an urban authority may under that Act themselves undertake to supply gas for the whole or any part of their district, a Provisional Order authorising a gas undertaking may be obtained by such authority under and subject to the provisions of the Gas and Water Works Facilities Act, 1870, and any Act amending the same, and that in the construction of that Act the term "the undertakers" shall be deemed to include any such urban authority. There is a further provision that for the purposes of the Act of 1875 the Local Government Board shall, throughout the Act of 1870, be deemed to be substituted for the Board of Trade.

Must apply to Local Government Board.

Must proceed by Bill for powers outside their own district.

Under the powers of the section just cited, the Local Government Board have no power to authorise an urban authority to supply gas outside the limits of their district, or to purchase an existing gas undertaking which also supplies other districts; in any such case a Bill, and not a Provisional Order, is necessary. Bills of this character are of frequent occurrence. Where a local authority purchases an undertaking supplying several districts, provision is commonly inserted to enable the authorities of other districts to acquire their portion of the gasworks. This subject is more fully dealt with later. See *post*, p. 37.

Non-statutory companies.

The inconveniences to which companies not possessing the authority of Parliament are subjected when attempting to break up public streets for the purpose of laying down, renewing, or repairing their pipes, are illustrated by the various cases, which will be found in the order of their dates commencing *post*, p. 164.

Consumers entitled to demand supply of gas.

Prior to the Gasworks Clauses Act, 1871, gas companies were under no obligation to furnish a supply of gas to owners and occupiers within their limits of supply, this duty being left dependent on their interest. By that Act, however, the companies were on the one hand put under such an obligation on certain reasonable conditions, and they were on the other hand empowered to require consumers to use meters.

Limitation of profits.

Reserved fund under Act of 1847.

Under the Gasworks Clauses Act, 1847, the profits to be divided amongst the undertakers in any year are not to exceed 10 per cent. on the paid-up capital in the undertaking unless a larger dividend be at any time necessary to make up the deficiency of any previous dividend which shall have fallen short of that yearly rate. The Act of 1847 further provides that if the clear profits of the undertaking in any year amount to a larger sum than is sufficient, after making up the deficiency in the dividends of any previous year, to make a dividend at the prescribed rate, the excess beyond the sum necessary for that purpose shall from time to time be invested in Government or other securities, so as to form a reserved fund not exceeding a tenth of the nominal capital.

Objects of that fund.

The object of this reserved fund is twofold: (1) to meet any extraordinary claim certified by justices; and (2) where in any year the profits divisible shall not amount to the prescribed rate, such sum may be taken from the reserved fund as, with the actual divisible profits of the year, will enable the undertakers to make a dividend of the prescribed amount for that year. The Act contains power to gas ratepayers to apply to the court of quarter sessions (or to the sheriff in Scotland), and it provides that if it appear to the court that the profits of the undertaking for the preceding year have exceeded the prescribed rate, "the undertakers shall, in case the whole of the said reserved fund has been and then remains invested as aforesaid, and in case dividends to the amount hereinbefore limited have been paid, make such a rateable reduction in the rate for gas to be furnished by them as in the judgment of the said court or sheriff shall be proper." This power of applying to quarter sessions has practically been of little use. The provisions of ss. 30—34 of the Act of 1847 as to profits, dividend, and reserved fund, are not applicable where the sliding scale of price and dividend is adopted.

Dividends on additional capital.

Where additional capital is authorised by Parliament to be raised by an existing company, the dividend on such capital is generally limited to 7 per cent. on the ordinary, and 5 per cent. on the preference shares. See *post*, p. 203. Where borrowing powers are conferred a limit is frequently put on the interest to be paid on the borrowed capital. This is invariably the case in Provisional Orders made by the Board of Trade.

Sliding scale of price and dividend.

The sliding scale of price and dividend was first introduced by the Commercial Gas Act, 1875, which was followed by the Gas Light and Coke Company's Act, 1876, and the South Metropolitan Gas Act, 1876. Since then the sliding scale has been very generally adopted in Gas Acts all over the country.

Theory of the sliding scale.

The theory of the sliding scale is to give to the consumer a pecuniary interest in the economy and skill of the gas company; so that if, by these means, the company are enabled to make and supply gas at a lower cost, they shall on the one hand make a reduction in the price of gas to the consumer, and on the other hand be able to pay their shareholders a proportionate increase in the otherwise authorised rate of dividend; and again, if they shall make any increase in the standard price, they shall make a proportionate decrease in the rate of dividend.

Auction clause.

In the Session of 1877 a Standing Order of the House of Commons appeared requiring the introduction of the auction clause and making it competent to introduce the sliding scale of price and dividend. Since then the Standing Order has annually appeared. In 1887 that portion of it relating to the auction clause was altered so as to apply to water as well as to gas Bills. The Standing Order in its present form is as follows:

> "188. In every Bill by which an existing gas or water company is authorised to raise additional capital, provision shall be made for the offer of such capital by public auction or tender at the best price which can be obtained, unless the committee on the Bill shall report that such

> provision ought not to be required, with the reasons on which their opinion is founded.
>
> "In the case of every such Gas Bill it shall be competent to the committee so to regulate the price of the gas to be charged to consumers that any reduction of an authorised standard price shall entitle the company to make a proportionate increase of the authorised dividend, and that any increase above the standard price shall involve a proportionate decrease of dividend."

Where borrowing powers are obtained, it is frequently provided that they shall be exercised by the issue of debenture stock, created under the Companies Clauses Act, 1863, and that such debenture stock shall be put up to auction or tender.

The "Model" clause for raising additional capital includes under the nominal capital so created "any premium which may be obtained on the sale thereof."

Operation of the auction clause.

So much money therefore as is obtained under the operation of the auction clause by way of premium on the nominal or face value of the new shares or stock becomes part of the capital of the company. But the sum so added to capital bears no dividend, and inasmuch as it necessarily helps to earn profits, it thereby increases the amount of profits divisible among the holders of the dividend-bearing capital and helps to decrease the price of gas to the consumers. Hence, while on the one hand, upon the sale by auction of such new capital, the then existing shareholders are deprived of the benefit of an allocation of shares at their face value, but which have a premium value in the market, on the other hand, they make up for this in the better security of their dividend, and (with a sliding scale) in the possibility of an enhanced dividend.

The result of the operation of the sliding scale and auction clause has been in many cases to lower the price of gas to the consumer, and to increase the rate of the dividend of the gas shareholder. The extensive operation of the auction clause may be illustrated by the fact that (according to the Parliamentary Returns) while in 1882 the amount of authorised gas capital subject to the auction clause was £8,598,290, in 1899 it was £19,657,279, and in 1908 it was £34,411,082; the amounts of such capital sold by auction or tender being, in 1882, £2,065,905, in 1899, £10,031,384; and in 1908, £18,051,884; and the amount of premiums realised by the sale of shares under the auction clause being, in 1882, £957,561, in 1899, £4,301,820, and in 1908, £5,768,851.

The comparative value of these figures is, however, affected by the numerous conversions of capital into stock of a higher nominal amount during recent years.

Standard price, practice of Parliament with regard thereto.

The pivot of the sliding scale is of course the standard price. In the fixing of that, regard must be had to all the circumstances of the case. When once fixed it has not been the general practice of Parliament to alter the standard price. Attempts to induce Parliament to do so were made in the South Shields case in 1886, in the South Metropolitan case in 1881, and in the Plymouth case in 1894; but these failed. There are, however, a few cases in which in exceptional circumstances this practice has not been adhered to. For instance, in 1899, in the Lea Bridge case, a Committee of the House of Lords, presided over by Lord Camperdown, reduced the standard price from 5*s.* to 4*s.* 6*d.* The standard price of 4*s.* 6*d.* authorised by the Southend Gas Act, 1892, was reduced to 4*s.* 3*d.* by an Act of 1898, which sanctioned the conversion and consolidation of the existing capital of the company and the raising of additional capital, and by an Act of 1904, which empowered the company to raise further capital, the standard price upon which the dividends on this further capital are based was reduced to 4*s.* Sect. 9 of the Act of 1904 provides that "in the application of the provisions of s. 43 of the Act of 1898 to any capital of the company raised under the powers of this Act such provisions shall have effect as if the words 'four shillings' were substituted for the words 'four shillings and threepence.'"

Nor is the general rule necessarily followed in cases where application is made for a substantial modification of statutory obligations, *e.g.*, a reduction of the prescribed illuminating power Thus, in the case of the Metropolitan Gas Companies and in certain other cases a reduction of the standard price has been made in consideration of a reduction in the prescribed illuminating power (see *post*, pp. 15, 16). A further precedent in this direction was made by the Brighton Gas Act, 1910, which authorises the use of the Metropolitan Argand (No. 2) burner for testing the gas in lieu of the London Argand (No. 1) burner, and a House of Commons Committee (chairman, Hon. Arthur Stanley), reduced the standard price, on the opposition of the Brighton Corporation, from 3*s.* 3*d.* to 3*s.* 2*d.*, and the differential price in outlying districts was reduced from 6*d.* to 3*d.*

The sliding scale in Provisional Orders.

In Provisional Orders made by the Board of Trade under the Gas and Water Works Facilities Acts, 1870 and 1873, provision is frequently made for a maximum price in the old way, with power to the Board of Trade at any time after the expiration of three years to alter the maximum price, or to substitute a sliding scale.

Special purposes and reserve funds.

When the sliding scale is introduced, provision is also made for the formation of a special purposes fund and a new reserve fund. The formation of these is optional.

The clause authorising the creation of a special purposes fund was first introduced in the Gas Acts of 1908, and was adopted in the Model Gas Bill issued at the end of that session. This fund superseded the Insurance and Renewals Funds previously allowed by Parliament in the case of sliding scale companies.

Objects of the old insurance fund.

As to the old insurance fund, the special Acts by which it is authorised provided that if the clear profits in any year amounted to a larger sum than will be sufficient to make up the dividends payable, the excess, to the extent of 1 per cent. per annum, may be put to an insurance fund, which may accumulate at compound interest until it reaches a sum equal to one-twentieth of the paid-up capital of the company, including premiums.

This insurance fund can be resorted to from time to time "to meet any extraordinary claim, demand or charge which may at any time arise against or fall upon the company from accident, strikes or other circumstances which in the opinion of two justices due care and management could not have prevented."

Objects of the old renewals fund.

The renewals fund clause was first authorised in the Rugeley Gas Act, 1900, and was included in many of the Gas Acts passed between that date and the Session of 1908. In details the sections in the various Acts differ slightly, but they all authorise the directors of the company if they think fit to "annually appropriate out of the revenue of the company, and as part of the expenditure on revenue account," any sum not exceeding in some instances 1 per cent. and in other instances 1½ per cent. on the paid-up capital of the company, including premiums. The object of the fund is defined as being "for the purpose of providing for the renewal and repair of their gasworks, mains and pipes." Generally it is provided that the fund may be accumulated with interest until a sum equal to 10 per cent. on the paid-up capital is reached; but in some cases a definite sum has been fixed as the limit. The fund can be filled up again after having been reduced.

Objects of the special purposes fund.

The special purposes fund clause authorises the directors of a company, if they think fit, in any year to appropriate out of the revenue of the company, as part of the expenditure on revenue account, any sum not exceeding 1 per cent. of the paid-up capital, including premiums. The fund so formed is applicable to meet such charges as a chartered or incorporated accountant, being the auditor of the company, or appointed for the purpose by the Board of Trade, shall approve as being expenses incurred (*a*) by reason of accidents, strikes or circumstances which due care and management could not have prevented, or (*b*) in the replacement or removal of plant or works, other than expenses requisite for maintenance and renewal of plant and works. The fund is not at any time to exceed one-tenth of the paid-up capital, including premiums. Resort may be had to the fund, notwithstanding that the sum standing to its credit is less than the authorised maximum. The fund or any portion of it may be invested in trustee securities, or may be applied for the general purposes of the company to which capital is applicable. Any money standing to the credit of an existing insurance fund is to be transferred to the special purposes fund, and the powers of the company with regard to the insurance fund are repealed.

New reserve fund.

Besides the special purposes fund, companies having the sliding scale are authorised to form a reserve fund. Any existing "reserve or other fund of the company" will be carried to this new reserve fund. With this exception, it must be formed out of money which the company are authorised to divide. For this reason no limit is placed on the amount. The provision generally is to the effect that where in any year the company shall be entitled to pay a higher dividend than the standard rate, by reason of the price charged for gas being below the standard price, then out of the divisible profits applicable to the payment of such excess of dividend the company may set apart "such sum as they shall think fit." The fund so formed may be accumulated at compound interest. It is applicable to the payment of dividend in any year in which the clear profits of the company shall be insufficient to enable the company to pay the dividends they are authorised to pay.

No other reserve fund.

The clause in the Model Gas Bill giving power to create a reserve fund contemplates that no other fund in the nature of a reserve shall be made up. It runs: "Save as in this Act provided, no sum shall in any year be carried by the company to any reserve fund." (See Model Gas Bill, s. 14, p. 364, and *cf.* notes to s. 122 of the Companies Clauses Consolidation Act, 1845, *post*, p. 1130).

Application of excess of profits, and limitation of "carry forward."

In connection with the sliding scale, provision is always made to the effect that if the profits in any year amount to a larger sum than is sufficient for the authorised dividends, the excess, or such portion of it as is not carried to the insurance fund, shall be carried to the credit of the divisible profits for the next following year. Until recently no limitation to this "carry forward" was fixed, except in a few special cases, *e.g.*, the West Ham Gas Act, 1889, s. 14; the Crystal Palace District Gas Act, 1893, s. 15, and the Lea Bridge District Gas Act, 1899, s. 42. In the Acts of Session 1908, however, provision was made that "the sum standing to the credit of such divisible profits shall not at any time exceed the amount required to pay one year's dividend at the authorised rate," and this provision now forms part of the Model Bill (see clause 13 of that Bill, *post*, p. 364).

In a case where the existing amount carried forward was unusually large the company was allowed five years in which to bring the "carry forward" within the prescribed limits. See the Bideford Gas Order, 1909.

Variations in sliding scale provisions.

Some variation has been introduced into the sliding scale to suit the circumstances of particular cases. Thus, a standard price may be fixed, say, at 3*s*. 6*d*., with a provision that for every penny charged over that price the standard dividend shall be reduced 5*s*. per cent., and that the company shall not be entitled to anything over the standard dividend until they reduce the price of gas below 3*s*. This intermediate space (so to speak) between, say, 3*s*. 6*d*. and 3*s*. is sometimes referred to as the "neutral zone." Some instances may be given: *Tonbridge*, below 3*s*. 6*d*. for increase of dividend, and above 3*s*. 9*d*. for reduction of dividend; *Tunbridge Wells*, 3*s*. 9*d*., and outside the town 4*s*. 6*d*., but no increase of dividend till prices are reduced below 3*s*. 6*d*. and 4*s*. 3*d*. respectively; *Ipswich*, above 3*s*. 9*d*. for reducing dividends, and below 3*s*. 6*d*. for increasing dividends. Other instances are Worthing, Cradley Heath, Kingston-on-Thames, Shrewsbury, Godalming, St. Austell, Rochester, Chatham and Gillingham, Peterborough, Earby and Thornton, Derby, Stirling and Wexford. The provisions of the Crystal Palace Gas Act, 1893, and the Coatbridge Gas Order, 1902, authorising standard prices with a "neutral zone" have been amended by the South Suburban Gas Act, 1906, and the Coatbridge Gas Order, 1909, respectively, and standard prices with the ordinary sliding scale arrangements have been substituted.

"Neutral zone."

Proportionate increase and decrease.

In complying with the Standing Order the "proportionate increase" and "proportionate decrease" are generally arrived at by providing that for every penny charged in excess or in diminution of the standard price in any half year the standard rates of dividend may for such half year be reduced or increased by 5*s*. per cent. Where there are several rates of dividend payable, varying from 10 per cent. downwards, the reduction or increase authorised is usually 5*s*. in respect of 10 per cent. capital, 3*s*. 6*d*.

in respect of 7 per cent. capital, and 2*s*. 6*d*. in respect of 5 per cent. capital. The practice is not, however, uniform. The Gas Acts of 1909, for example, exhibit the following variations: In the Alliance and Dublin Gas Act (s. 16) the reduction or increase of dividend for every penny is 1*s*. 3*d*., the standard rate being 5 per cent; in the Eastbourne Gas Act (s. 23) it is 2*s*. 6*d*., with standard rates of 5 per cent. and 3½ per cent; in the Gas Light and Coke Company's Act (s. 34) it is 1*s*. 4*d*., with a standard rate of 4 per cent.; in the Heckmondwike and Liversedge Gas Act (s. 48) and the Leyland Gas Act (s. 29) it is 2*s*. 6*d*., with a standard rate of 5 per cent.; and in the Littlehampton Gas Act (s. 51) it is 5*s*., with standard rates of 10 and 7 per cent., and 2s. 6d. with a standard rate of 5 per cent.

Other variations also occur, *e.g.*, in the Bognor Gas Light and Coke Company Act, 1908 (s. 51), the slide is 1*s*. 3*d*. on A stock and 1*s*. 9*d*. on B stock, both stocks having a standard rate of 5 per cent. In the Gosport Gas Act, 1908 (s. 31), the slide is 3*s*., with a standard rate of 6 per cent., and in the Llanelly Gas Act, 1908 (s. 21), it is 2*s*. 6*d*., 1*s*. 9d., and 1*s*. 3*d*., with standard rates of 10, 7, and 5 per cent. respectively. The Draycott Gas Act, 1908 (s. 27), authorises standard prices of 4*s*. 6*d*. within a prescribed radius and 5*s*. beyond, and provides that the reduction or increase of dividend under the sliding scale shall be calculated only upon whichever of the standard prices shall have been increased or reduced, as the case may be, to the greater extent. For the present model clause, see *post*, p. 366.

Differential prices for gas.

Differential prices are very common. The parliamentary returns relating to gas undertakings in the hands respectively of local authorities and companies (Parliamentary Papers, 1910, Nos. 291, 292), will show all the various instances.

Price for power gas.

In the Gas Acts authorising the supply of gas for power provision is usually made that the charge for such gas may be fixed by agreement. See, *e.g.*, Rochester, Chatham, and Gillingham Gas Act, 1906, s. 33; Truro Gas Act, 1906, s. 74; Bromley and Crays Gas Act, 1908, s. 37; Tottenham and Edmonton Gas Act, 1906, s. 38; Aldershot Gas, Water, and District Lighting Act, 1909, s. 11, and Harrogate Gas Act, 1909, s. 31.

Conversion of loan into share capital.

Under s. 56 of the Companies Clauses Consolidation Act, 1845, it is made lawful for a company, if they think fit, and unless it be otherwise provided by the special Act, to raise money authorised to be borrowed, or any part thereof, by creating new shares instead of borrowing, or having borrowed to convert the amount borrowed into share capital. By Standing Order

No. 109 of the House of Lords, it is provided that in any Bill by which the profits of a company are limited, provision shall be made that the company shall not have power to raise the money by the Bill authorised to be borrowed on mortgage or any part thereof by the creation of shares or stock, instead of borrowing, or to convert into capital the amount borrowed under the provisions of the Bill, or any part thereof, unless in either case all dividends upon the shares or stock, whether ordinary or preferential, are limited to a rate not exceeding 5 per cent. per annum. It will be observed that this Standing Order is not retrospective, applying merely to the loan capital authorised by the particular Bill. For instances where the clause inserted has been retrospective, see Commercial Gas Act, 1875, s. 67, *post*, p. 316; Gaslight and Coke Company's Act, 1876, s. 24, *post*, p. 325; South Metropolitan Gas Act, 1876, s. 25, *post*, p. 332; Brighton and Hove Gas Act, 1893, s. 28.

Testing for illuminating power and purity.

The Act of 1871 contains elaborate provisions (ss. 28—34, and Schedule A) for the provision of a testing place where the gas may be tested for illuminating power and purity, and for the appointment by the local authority of a competent and impartial person to be a gas examiner for conducting such tests during prescribed hours of each day.

Sulphur impurities in gas.

Sect. 12 of the Act of 1871 enacts that the "gas shall as to its purity not exhibit any trace of sulphuretted hydrogen when tested" in the prescribed manner.

Provisions were formerly inserted in a considerable number of Special Acts imposing restrictions with regard to the amount of sulphur impurities in the gas in addition to the requirements in sect. 12. Consequent, however, upon the report of the Departmental Committee of 1904, and the London Gas Act, 1905, by which the metropolitan gas companies were relieved from the liabilities imposed on them as to sulphur impurities other than sulphuretted hydrogen, the Gas Companies (Removal of Sulphur Restrictions) Act, 1906, was passed for the relief of fourteen provincial gas companies from the obligations of their Special Acts with regard to sulphur impurities, and in 1907 a similar Act was passed for the relief of seven other companies. The South Suburban Gas Act, 1905, gave the like relief to the South Suburban Gas Company, and in many other cases in recent sessions the obligations in this respect contained in the earlier Acts have been repealed. For the special enactments which govern the case of the metropolis and for further notes on this subject, see *post*, pp. 63—65.

Illuminating power.

The Act of 1871 does not itself prescribe the minimum illuminating power of the gas to be supplied. This is done in the Special Act or Order relating to the undertaking.

For some years it was common to prescribe an illuminating power of not less than 15 candles, though in earlier Gas Acts the prescribed candle power was frequently lower, and in certain cases higher, than this. The metropolitan gas companies were required to supply 16-candle gas.

The introduction of the incandescent mantle, and the development of the use of gas for cooking, heating, and power during recent years have, however, so changed the conditions affecting the supply and consumption of gas that it has become generally recognised that the importance of a high illuminating power is greatly lessened, and the prescribed illuminating power is now usually 14 candles. In many cases where a higher illuminating power had been prescribed Parliament has sanctioned a reduction.

The culmination of the long controversy between the advocates of "high-grade" and "low-grade" gas occurred in connection with the introduction by the South Metropolitan Gas Company of a Bill in Session 1900 to authorise a reduction of their prescribed illuminating power from 16 candles to 15, and thereafter to 14 candles. The proposed reduction was strongly but unsuccessfully opposed by the London County Council, the Corporation of London, and other authorities before Committees of both Houses of Parliament. The Act as passed provided that on and after 1st July, 1901, the prescribed illuminating power should be 15 candles, and on and after 1st July, 1905, 14 candles. At the same time the standard price of gas was reduced by 1*d.* while the prescribed illuminating power was to be 15 candles, and by 2*d.* when the prescribed illuminating power became 14 candles. The company undertook and were required to supply their consumers, free of charge, with burners "suitable in all respects for the consumption of gas of the illuminating power prescribed by the Act."

By the Commercial Gas Act, 1902, the prescribed illuminating power of the gas supplied by the company was reduced from 16 to 14 candles. The standard price was by the same Act reduced from 3*s.* 9*d.* per 1,000 c.f. to 3*s.* 3d., 2*d.* of which was in consideration of the reduction in illuminating power.

The West Ham Gas Company also obtained, in 1902, a reduction from 16 candles to 14, the standard price being reduced by 1*d.*, namely, from 3*s.* to 2*s.* 11*d.*

The Gas Light and Coke Company continued subject to a prescribed illuminating power of 16 candles until 1908, when on the amalgamation of the undertaking of the West Ham Gas Company a reduction to 14 candles took place, with a reduction of 1*d*. in the standard price.

Many of the provincial gas undertakings have obtained similar reductions. In Session 1903 the Derby, Faversham, Maidstone, and Plymouth and Stonehouse Gas Companies obtained a reduction from 15 candles to 14. The standard price was reduced by 1*d*. at Faversham (4*s*. to 3*s*. 11*d*.), and at Maidstone (3*s*. 8*d*. to 3*s*. 7*d*.) No reduction was made in the standard price at Plymouth (2*s*. 6*d*.). The Derby Gas Company were not previously working under the sliding scale, and a standard price was fixed by the Act of 1903. In the same Session (1903) the illuminating power was reduced in the case of the Walker and Wallsend Union Gas Company from 15½ to 14 candles, and the standard price from 3*s*. 3*d*. to 3*s*. 2*d*.

In the Acts of Session 1904 the prescribed illuminating power was usually 14 candles. The Stirling Gas Company obtained a Provisional Order of the Board of Trade authorising a reduction of illuminating power from 25 to 20 candles, with a reduction of 2*d*. in the standard price (3*s*. 4*d*. to 3*s*. 2*d*.). The South Shields Gas Act, 1904, reduced the candle power from 16 to 14, with a reduction of 3*d*. in the standard price, but other considerations appear to have been involved in the decision of the Committee.

Numerous instances of similar reductions have occurred in more recent Sessions. In most cases a reduction of standard price has been made, but the practice is not uniform as regards the allowance to be made for each candle by which the illuminating power is reduced.

While the minimum illuminating power is now usually fixed at 14 candles, in a few cases, *e.g.*, Watford Gas Act, 1908, the prescribed candle power was reduced from 15 to 13, with a reduction in the standard price of 1*d*. per candle (4*s*. 3*d*. to 4*s*. 1*d*.); in the Uxbridge Gas Act, 1908, similar reductions were made. Truro Gas Act, 1908, also prescribes an illuminating power of 13 candles.

In most of the Acts authorising a reduction of illuminating power the precedent of the South Metropolitan Gas Act, 1900, has been followed by the insertion of a section requiring the company to supply suitable burners, free of charge, to the consumers in lieu of the burners in use.

The testing burner.

The burner to be used for testing the illuminating power of the gas is also prescribed by the Special Act or Order. Usually the prescribed burner has been the Sugg's London Argand (No. 1), or such other burner as may be approved by the Board of Trade for the purpose. Various other testing burners have, however, been prescribed, and in some cases without the power to vary, with the approval of the Board of Trade.

Departmental Committee on Gas Testing in London.

In the metropolis the testing burner, prior to the passing of the London Gas Act, 1905, was Sugg's London Argand (No. 1). In 1904 a Departmental Committee was appointed by the Board of Trade to consider and report upon the question of the testing of gas in London. The committee recommended that Sugg's London Argand (No. 1) burner should continue to be used, and that in testing the gas a flow of 5 cubic feet per hour should be maintained. The recommendations of the committee in this and other respects are set out, *post*, p. 63).

In the Session of 1905 a Bill was jointly promoted by the three London gas companies to carry out certain of the recommendations of the Departmental Committee, and the London County Council also promoted a Bill for the same purpose. The Committee of the House of Commons passed the Bill of the London County Council, incorporating in it some of the provisions of the Companies' Bill, which latter Bill consequently was not allowed to proceed. In the House of Lords Committee an agreement was finally arrived at between the London County Council and the gas companies on the subject of the testing burner, and it was provided (s. 3) that the burner to be used should be prescribed by the gas referees, and that " the burner so prescribed shall be of such a pattern (not being an incandescent or similar burner) as shall be practicable for use by the consumer, and the burner and the chimney (if any) shall be the most suitable for obtaining, and in making the test shall be so used as to obtain, from the gas when consumed at the rate of 5 cubic feet an hour the greatest amount of light " (see London Gas Act, 1905, *post*, p. 295).

Metropolitan Argand (No. 2) burner.

In conformity with this requirement the gas referees prescribed the Metropolitan Argand (No. 2) burner for the testing of the gas supplied by the metropolitan gas companies.

In Session 1906 a new testing clause was framed by the parliamentary authorities (see Model Bill, *post*, p. 367). This clause, which prescribes the use of the Metropolitan Argand (No. 2) burner, has been inserted in all recent Gas Acts and Orders.

Approved by Board of Trade in certain cases.

Applications have from time to time been made to the Board of Trade for the substitution of the new burner for the burner prescribed in the special Act. Approval has been given in the following instances: Aldershot (1906), Hornsey (1907), Southport (1907), Barking (1907), Farnham (1907), Felixstowe (1907), Bromley (1907), Canterbury (1907), Alton (1908), Woking District (1908), St. Albans (1908), Norwich (1909).

The Standard Burner Bills of 1910.

In the Session of 1910, 43 gas companies united in promoting three Bills for the purpose of obtaining the substitution of the new burner for the burners previously prescribed in their respective Special Acts. The Bills met with strong opposition on the part of some of the local authorities concerned, but the Bills were passed by Committees of both Houses without substantial amendment. The second reading of the Bills was opposed in the House of Commons (2nd House), but the Bills were referred to a Committee with an instruction to consider whether any of the cases should be heard separately, and with power in particular to separate the case of Liverpool Gas Company from the other cases, and to include it if necessary in a separate Bill.

The case of Liverpool differed to some extent from that of the other promoting companies, inasmuch as the prescribed burner for testing at Liverpool was a flat flame burner and the prescribed illuminating power was 20 candles.

The Committee did not, however, think fit to divide the Bill and made no special provision with regard to Liverpool.

Notice of opposition on the consideration stage in the House of Commons was given, but was not persisted in, and the Bills were duly passed.

The observations of the Chairman, Sir Henry Kimber, in announcing the decision of the Committee on these Bills were of unusual interest. They are fully reported in the *Journal of Gas Lighting*, July 19th, 1910, p. 213.

Testing for pressure.

The provisions of the Gasworks Clauses Act, 1871 in regard to testing are confined to testing for illuminating power and purity. It is usual for modern Gas Acts, while prescribing the pressure (which is not prescribed by the Act of 1871), to provide that the gas examiner appointed under the Act of 1871, may also test for pressure, as and when he thinks fit, at the testing place or at any public lamp (see clause 26 of Model Gas Bill, *post*, p. 368).

Apparatus for testing.

The Model Gas Bill (clause 25) provides for the use in testing the illuminating power of the gas of the Bar Photometer or the Table Photometer (varying in this respect the requirements of the Act of 1871), and further prescribes the use of Harcourt's Ten-candle Pentane Lamp as the "standard light."

Stand-by Clauses.

The Electric Lighting Act, 1909, contains the following provision (s. 15) for the protection of the undertakers of Electric Lighting Undertakings:—

> "Notwithstanding anything contained in the Electric Lighting Acts or in any Act of Parliament or Provisional Order authorising an undertaking a person shall not be entitled to demand or to continue to receive from undertakers authorised to supply electricity in any area for any premises having a separate supply unless he has agreed with the undertakers to pay to them such minimum annual sum as will give them a reasonable return on the capital expenditure and will cover other standing charges incurred by them in order to meet the possible maximum demand for those premises; the sum to be so paid shall be determined in default of agreement by arbitration."

Similar stand-by clauses have been recently inserted in Acts relating to gas undertakings; *e.g.* the Heywood Corporation Act, 1909, contains the following provisions:—

> Section 37.—Where any person has a supply of gas laid on by the Corporation to any premises for which he has at the same time a supply of gas from an installation other than that of the Corporation, the Corporation shall be entitled to receive from him, as a standing charge in addition to the price of the gas actually supplied to him, a fixed sum to be determined by them, not exceeding £5 per annum: Provided always that, in determining such fixed sum, the Corporation shall have regard to the probable maximum supply of gas which might at any time be required for such premises, and provided also that the Corporation shall not be entitled to any such standing charge as aforesaid in respect of any premises for which the whole supply of gas afforded by them is taken through a meter having a nominal capacity of less than ten lights.
>
> Section 38.—Where any person has a supply of gas laid on by the Corporation to any premises for which he has at the same time a supply of electricity, either from the Corporation or from an installation other than that of the Corporation, the Corporation shall be entitled to charge and receive from him in respect of the supply of gas so laid on such minimum sum as shall be fixed by them not exceeding 25*s.* for any one quarter of a year, notwithstanding that the ordinary charge for the gas actually consumed in such quarter would amount to a lower sum. Provided always that in fixing the amount of such minimum charge the Corporation shall have regard to the probable maximum supply of gas which might at any time be required for such premises: Provided, also, that, in respect of any premises for which the whole supply of gas afforded by the Corporation is taken through a meter having a nominal capacity of less than ten lights, and the supply of electricity is taken from the Corporation, no such minimum charge shall be made; and provided, also, that, in respect of any premises for which the whole supply of gas afforded by the Corporation is taken through such a meter as aforesaid, and the supply of electricity is obtained from an installation other than that

> of the Corporation, the amount of the minimum charge shall not exceed 5*s.* for any one quarter of a year.

In the Mountain Ash Urban District Council Act, 1909 provision was made as follows :—

> "Notwithstanding anything contained in the Gasworks Clauses Act 1871, or any other Act, a person shall not be entitled to demand from the Council a supply, or the continuance of a supply, of gas for premises having a separate supply (that is to say, a supply, from an installation other than that of the Council) unless he shall previously have agreed to pay the Council such minimum annual sum as will give to them a reasonable return on the capital expenditure and standing charges incurred by them to meet the possible maximum demand for those premises, and the minimum annual sum to be so paid shall be determined, in default of agreement, by arbitration in manner provided by the Arbitration Act, 1889."

Provisions which were practically identical with those in the Heywood Corporation Act, 1909, were contained in the Warrington Corporation Bill, 1910. The Home Office made the following report on these clauses :—

> "The Secretary of State observes that these two clauses follow provisions which were allowed last year to Heywood. But these provisions were adapted to somewhat special circumstances; and the Secretary of State suggests, for the consideration of the Committee, that if any provisions to the effect proposed were allowed to Warrington, it would be better, in the absence of any special reason to the contrary, that the two clauses should be combined and re-drafted on the lines of the provision allowed to Mountain Ash last year, and in the Rhondda Urban District Council Bill of the present session. That provision is based on the form which was settled by the Police and Sanitary Committees in regard to the supply of electricity in cases where the consumer has a separate supply, and which is now part of the general law; and its requirements appear to the Secretary of State to be more suitable for adoption generally than the special provisions in the Heywood Act."

The Local Legislation Committee (Chairman, Sir. F. Layland-Barratt), however, agreed to the clauses as proposed in the Bill.

The same Committee, however, allowed a clause in the Rhondda Urban District Council Bill, 1910, in the same terms as the above-quoted section of the Mountain Ash Act, 1909.

Calorific value of gas.

The question of the calorific value of gas has become of growing importance in recent years owing to the introduction of the incandescent mantle for lighting and the great increase in the use of gas for heating and power purposes.

The Departmental Committee of 1904 on gas-testing in the metropolis dealt with this subject in the following paragraphs of their report :—

"The Committee have carefully considered whether the increasing proportion in which gas is being used for heating, as compared with illuminating purposes, renders it desirable that any fundamental alteration of the existing requirements should be made, such as the combination of a standard for calorific power with one for illuminating power, or the abolition of a standard for illuminating power and the substitution of a calorimetric standard.

"Although a large part of the gas used for lighting purposes is used with incandescent mantles, for which the illuminating power of the gas is in itself of no value, a considerable proportion is still consumed in flat-flame burners, and while this is the case the Committee feel it is desirable that testing in respect of illuminating power should be maintained. . . . The Committee do not, however, see their way in existing circumstances to suggest the prescription of tests, which would involve forfeitures . . . . in respect of calorific power, but they recommend that official tests in these respects (supplementary to the existing tests but not for purposes of forfeitures) should be made in such manner and to such extent as the gas referees prescribe. The results of these tests should be recorded and will form a valuable guide for future action."

Calorific tests for London gas.

The London Gas Act, 1905, provided that official tests of the calorific power of the gas supplied by the metropolitan gas companies should be made in accordance with the recommendations of the Departmental Committee.

Standard of calorific power.

By agreement with the London County Council, provision was made in the Gas Light and Coke Company's Act, 1909, for a standard of calorific power for the gas supplied by that company subject to revision by the Board of Trade at triennial periods from 1st January, 1913 (see *post*, p. 350).

In no other case has a calorific standard been prescribed except as regards power gas, as to which see *post*, p. 26.

An attempt to obtain the insertion of a similar provision in the Coatbridge Gas Order, 1909, on opposition by the local authority to the Confirming Bill, was unsuccessful.

The opponents of the Gas Companies (Standard Burner) Bills, 1910 (*supra*, p. 18), sought to obtain the insertion of provisions prescribing a calorific standard for the gas supplied by the companies promoting those Bills, but the committee refused to insert any provision dealing with this matter on the ground that it was outside the scope of the Bill. The Chairman (Sir H. Kimber), however, expressed the opinion that, as a matter of general legislation, a test for calorific power is very expedient.

In the course of his presidential address at the annual meeting of the Institution of Gas Engineers in June, 1910, Mr. James W. Helps, M. Inst. C.E., is reported to have made the following observations upon this subject:—

"In common with most of my professional brethren, I look forward to the time when Parliament will recognise the fact that for all the purposes to which gas is at present applied, its illuminating power is a factor of the most trivial importance, and will, in consequence, eventually decide to abolish the illuminating power standard in favour of one indicative of its heating value. The retention of both the illuminating and the calorific tests would be, in my opinion, not only useless but likely to result in imposing such conditions on the industry as would prove a serious bar to the introduction of improved methods in the carbonisation of coal, and in the after-treatment of the gas. It is, I believe, a recognised fact that the calorific value of gas as produced under the most modern methods does not always vary in direct proportion to its illuminating power, and in many cases which have come under my notice I have found—especially with vertical retorts and with horizontal retorts with what are known as full charges—that it is possible to decrease the illuminating power while actually increasing its calorific value. I have no hesitation, therefore, in expressing the opinion that the dual standard would have the effect of making it more difficult for gas companies to produce that quality of gas best suited for the use of the public and of adding appreciably to the cost at which it could be supplied."

Conversion of stock.

Parliament has now, in many instances, authorised the share capital of companies entitled to pay, *e.g.*, 10 per cent. to be converted into a 5 per cent. stock of double the amount, and in a few instances into stock bearing other rates of dividend with a corresponding increase in the nominal amount of capital. In support of this arrangement, it is contended that it causes no hardship on consumers, while it enables the shareholder to get a better price on the sale of his interest in the company. The first instance is that of the Bristol Gas Company's Act of 1891 (but see also Pudsey Act of 1887), then followed the Oxford Act of 1892, the Crystal Palace District Act of 1893, and the Plymouth and Stonehouse Act of 1894. In 1895 the South Metropolitan Gas Company sought similar powers; but the Bill was rejected by a Commons Committee. In the same session, however, two Acts were passed authorising conversion, viz., Scarborough and Newmarket. The South Metropolitan Company re-introduced their Bill in 1896, when it passed into law and authorised the A., B., and C. 10 per cent. sliding scale stocks of the company, amounting to £2,190,000, to be converted into an equivalent of 4 per cent. sliding scale stock, amounting to £5,475,000. In the same session similiar Acts were passed in relation to the Guildford, Cheltenham, and Ilfracombe Companies respectively. Since then similar Acts have repeatedly been passed. In 1898 the Gas Light and Coke Company obtained power to convert the then existing capital of the company into equivalent amounts of consolidated stocks bearing rates of dividend ranging from 3½ per cent. to 5 per cent. The Parliamentary Return, 1909, No. 180, gives all particulars of conversion up to the end of 1907. More recent instances are Dartford, 1908; Draycott, 1908; Gosport, 1908; Aldershot, 1909; Alliance and Dublin, 1909; Eastbourne, 1909; Heckmondwike and Liversedge, 1909; and Wells, 1909.

Stamp duty on nominal increase of capital.

Sect. 113 of the Stamp Act, 1891 (54 & 55 Vict. c. 39), provides *inter alia* that in case of any increase in the amount of nominal share capital of any corporation or company, a statement of the amount of any such increase must be delivered to the Commissioners, such statement being chargeable with an *ad valorem* stamp duty of 2*s.* (increased to 5*s.* by the Finance Act, 1899 (62 & 63, Vict. c. 9, s. 7)) for every £100 of such increase of capital.

A railway company having obtained power to convert and consolidate their stocks with the result of an increase of the nominal share capital of the company from 74 millions to 134 millions odd, it was held by the House of Lords, affirming decisions of the Courts below, that there had been an increase of capital within the meaning of the above section, and the duty was payable (*Midland Rail. Co.* v. *Att.-Gen.*, [1902] A. C. 171.)

By the Gas Light and Coke Company Act of 1898 (61 & 62, Vict. c. clxxii.) ss. 4—6, certain existing preference and ordinary stocks were consolidated and converted into stocks of increased nominal value. By sub-sect. 2 of sect. 6, power was given to create stock to the value of £437,500 in lieu of stock to the value of £175,000 which the company then had unexhausted power to create. Sub-sect. 2 contained the following proviso: "Except to the extent of the increase in this sub-section provided for, nothing in this Act shall be construed as authorising any increase of nominal share capital of the company." An information was brought against the company by the Attorney-General for penalties for neglecting to deliver to the Commissioners of

Inland Revenue a statement of the increase of the amount of nominal share capital of the company effected under the Act in accordance with s. 113 of the Stamp Act, 1891 (54 & 55 Vict. c. 39). It was contended that the Crown were not bound by the proviso, and that duty was payable. Ridley, J., directed the jury to find a verdict for the Crown (*Att.-Gen.* v. *Gaslight and Coke Co.* (1902), 18 T. L. R. 517). On appeal, the Court of Appeal held that the case could not be distinguished from *Midland Rail. Co.* v. *Att.-Gen.*, *supra* (19 T. L. R. 12). *Cf. Att.-Gen.* v. *Regent's Canal and Dock Co.*, [1904] 1 K. B. 263.

The G. Railway Company was incorporated in 1899 with a capital of £2,400,000, and duly paid the duty thereon under the Stamp Act, 1891. The B. Railway Company was incorporated in 1897 with a capital of £600,000, and duly paid the duty thereon under the Act of 1891. By an Act of 1902, all the powers, rights, privileges, liabilities, and immunities of the G. Railway Company were transferred to the B. Railway Company. It was held that by this transfer there was an increase of the amount of nominal share capital of the B. Company, authorised by the Act of 1902, to the extent of £2,400,000 (*Great Northern, &c., Rail. Co.* v. *Att.-Gen.*, [1909] A. C. 1).

By the Finance Act, 1895 (58 Vict. c. 16) it is provided:

> "12. Where after the passing of this Act, by virtue of any Act, whether passed before or after this Act, either—(*a*), any property is vested by way of sale in any person; or (*b*), any person is authorised to purchase property; such person shall within three months after the passing of the Act, or the date of vesting, whichever is later, or after the completion of the purchase, as the case may be, produce to the Commissioners of Inland Revenue a copy of the Act printed by the Queen's Printer of Acts of Parliament or some instrument relating to the vesting in the first case and an instrument of conveyance of the property in the other case, duly stamped with the *ad valorem* duty payable upon a conveyance on sale of the property; and in default of such production, the duty, with interest thereon at the rate of five per cent. per annum, from the passing of the Act, date of vesting, or completion of the purchase, as the case may be shall be a debt to Her Majesty from such person."

A Private Act provided that a gas company should be dissolved and re-incorporated with further powers; that its property should vest in the new company who should assume all its liabilities; and that the stockholders should receive the same amount of stock in the new company. It was held that the copy of the Act was chargeable with *ad valorem* duty as a "conveyance on sale" on the amount of the liabilities assumed by the new company, and the value of the stock issued by it to stockholders in the old company, such value to be ascertained as on the day of the passing of the Act (*Att.-Gen.* v. *Felixstowe Gaslight Co.*, [1907] 2 K. B. 984; 76 L. J. K. B. 1107; 97 L. T. 340).

As to what is a "conveyance on sale" see also *John Foster, Ltd.* v. *Commissioners of Inland Revenue*, [1894] 1 Q. B. 516; *G. W. Rail. Co.* v. *Commissioners of Inland Revenue*, [1894] 1 Q. B. 507; *John Wilson & Sons, Ltd.* v. *Commissioners of Inland Revenue*, [1895] 23 Ct. of Sess. Cas., 4th Series, 18; *J. & P. Coats, Ltd.* v. *Commissioners of Inland Revenue*, [1897] 2 Q. B. 423; *Great Northern Rail. Co.* v. *Commissioners of Inland Revenue*, [1901] 1 Q. B. 416; *Att.-Gen.* v. *Eastbourne Corporation*, [1904] A. C. 155; *Inland Revenue Commissioners* v. *Irvine and District Water Board*, [1905] 43 Sc. L. R. 649.

Water Gas Committee, 1898.

In 1898 a Departmental Committee (presided over by Lord Belper) was appointed by the Home Secretary to inquire into and report upon:

"(1.) The extent to which water gas and other gases containing a large proportion of Carbonic Oxide are manufactured and used for heating, lighting, and other purposes;

"(2.) The danger attending such manufacture and use;

"(3.) The means by which such dangers may be removed or diminished, either by the discontinuance of the use of such gas or gases or otherwise; and what regulations for the prevention of danger should be established."

The Report of the Committee (Parliamentary Paper, No. 9164, of 1899) deals fully with all these matters. This Report is not unfavourable to the use of the gas; but suggests, *inter alia*, that power should be conferred upon a Central Department to make regulations, and that the provisions for testing for illuminating power and purity contained in the Act of 1871, should be made applicable to the testing of gas for carbonic oxide. No general legislation has followed on this Report, though late in the Session of 1902 a Bill, under the title of the Gas Regulation Bill, was introduced in the House of Lords by the Earl of Dudley (Parliamentary Secretary to the Board of Trade), which provided that the Board of Trade, after consultation with the Local Government Board and the Home Secretary, might make regulations "with respect to the supply of any water gas or any poisonous gas other than ordinary coal gas." The Bill did not proceed to a second reading, and was not re-introduced in any subsequent session.

An unsuccessful attempt was made by the Brighton Corporation to obtain the insertion in the Brighton Gas Act, 1910, of provisions limiting the proportion of carburetted water gas which might be used in the gas supplied by the company.

The Liverpool Corporation sought to insert a provision in the Gas Companies (Standard Burner) Bill (No. 1), 1910, *supra*, p. 18, for the purpose of limiting the amount of carbonic oxide which might be present in the gas supplied by the Liverpool Gas Company, one of the companies promoting the Bill, but the Committee decided that it was outside the scope of the Bill and that they were not competent to deal with the matter.

Quantity of water-gas used.

The Parliamentary Returns (Parliamentary Papers, Nos. 291 and 292, of 1910), show that in the 112,334,153,000 cubic feet of gas sold by statutory gas companies in the year 1909, were included 18,345,916,000 cubic feet of water gas; and in the 65,352,790,000 cubic feet of gas sold by local authorities during the year 1909–1910 were included 5,279,272,000 cubic feet of water gas.

The Returns also show the percentage of carburetted water gas used in admixture with coal gas in particular cases. There is no case in which water gas is supplied without admixture.

Power Gas Acts.

In the Session of 1901 was passed the South Staffordshire Mond Gas (Power and Heating) Company's Act, 1901 (1 Edw. 7, c. ccxli.). This Act authorised the company to manufacture and supply within certain defined parts of South Staffordshire and East Worcestershire "the producer gas commonly known as Mond Gas and any development of Mond Gas approved by the Board of Trade and any other producer gas so approved for the purposes of motive or other power heating or any other purpose to which such gases can be applied except that such gases shall not be supplied or used for the purposes of illumination." The Bill was opposed by a number of local authorities and gas companies authorised to supply ordinary illuminating gas. The Act authorised certain scheduled lands to be acquired under the Lands Clauses Acts, and gave power to lay mains and pipes and to open streets, etc.—these powers, speaking generally, being somewhat similar to those contained in the Electric Lighting (Clauses) Act, 1899. Obligation is placed on the company to supply gas under certain conditions, and by sect. 48 it is provided that the company shall not supply gas for the purpose of illumination, and that no gas supplied by the company shall be used for that purpose, and penalties are imposed for any contravention of the section. Section 52 provides that it shall not be lawful for the company to supply gas which contains more than 14 per centum of carbon monoxide, or which does not possess a distinctive and readily perceptible smell, and provides for penalties for contravention, and further that it shall be the duty of the inspectors of factories and the inspectors of mines to enforce the provisions of the section within their districts, so far as respects factories, workshops, and mines inspected by them respectively. Section 61 provides that "the gas supplied by the company shall have a minimum heating value of 125 British thermal units per cubic foot at 32° Fahr. and 30 inches of mercury pressure, the product of combustion being cooled to 60° Fahr."

By sect. 47 the company may require any consumer of gas supplied by them to consume such gas by a proportional meter (defined to mean "a meter which measures and records a constant fraction of the total quantity passing through the meter") to be supplied and fixed by and at the expense of the company, instead of by a meter which is a legal meter within the meaning of the Sale of Gas Act, 1859. The section then makes certain provisions in lieu of those of the Act of 1859 in regard to meters. By sect. 49 the company are authorised to charge in respect of gas supplied by them such sums as may be agreed between them and the consumer, being at a rate or price not exceeding 3*d.* per 1,000 cubic feet, if the quantity taken be not less than 4,000,000 cubic feet per quarter, and not exceeding 4*d.* per 1,000 cubic feet, if the quantity taken be less. The Board of Trade are authorised to make a slight increase in the price in consequence of any rise in the price of good quality slack.

The North-Western Electricity and Power Gas Act, 1903 (3 Edw. 7, c. ccxxxviii.), authorises the manufacture and supply of electricity and also of power gas. The latter is defined to mean "the producer gas commonly known as Mond Gas and any development of Mond Gas approved by the Board of Trade for the purposes of motive or other power heating or any other purpose to which such gas can be applied except illumination."

The provisions of this Act with respect to power gas follow the lines of the South Staffordshire Mond Gas (Power and Heating) Company's Act, 1901, *supra.* The company obtained a further Act in 1904.

The Belfast and North-East Ireland Electricity and Power Gas Act, 1904 (4 Edw. 7, c. ccxxviii.), the Esk Valley Power Gas Act, 1905 (5 Edw. 7, c. cxxvi.), and the Cumberland Electricity and Power Gas Act, 1906 (6 Edw. 7, c. xcii.) contain similar provisions to those in the earlier Acts, but s. 41 of the Esk Valley Act provides that it shall not be lawful for the company to supply power gas which contains more than 14 per centum of carbon monoxide, "or such higher percentage as may be approved by a Secretary of State," which approval may be given, subject to such conditions as he may think fit, and may be revoked at any time, and in the Cumberland Act, in lieu of prescribing any limitation on the amount of carbon monoxide in the gas, the following provision is inserted (s. 41 (1)):

> "The Secretary of State for the Home Department may at any time either before or after the company shall have commenced to give a supply of power gas to consumers (after holding such inquiries as he may think fit and considering any representations made to him by the company) make or impose in the interests of safety to persons, regulations, terms and conditions with respect to such supply."

Authority to supply power gas in addition to illuminating gas has been given in the following instances:

The Caterham and District Gas Act, 1902, provides that the company may supply "gas for light, heat, power and any purpose to which gas whether manufactured from coal, slack or other substance or liquid may be applicable." Power gas must not contain more than 14 per cent. of carbon monoxide, and no gas must be supplied which does not possess a distinctive and readily perceptible smell."

The Buxton Urban District Water Act, 1902, authorised the council, being the owner of the gasworks supplying the district, to manufacture and supply for purposes other than illumination any gas other than coal gas.

The Matlock and District Gas Act, 1904, authorises the company to supply power gas, but not within the district of the Matlock Bath Urban District Council, except with the consent of the council. The capital to be expended for the purposes of power gas supply is limited to £15,000.

The Selby Urban District Council Gas Act, 1904; Rochester, Chatham and Gillingham Gas Act, 1906; Tottenham and Edmonton Gas Act, 1906; Truro Gas Act, 1906; Bromley Gas Act, 1908; Aldershot Gas, Water and District Lighting Act, 1909; and Harrogate Gas Act, 1909, also contain authority to supply power gas, subject to regulation by the Home Secretary in the interests of safety.

The Greenock Corporation Act, 1909, authorises the manufacture and supply of "non-illuminating" gas, and the use of the existing gasworks, apparatus and plant and appliances for the purpose. The corporation may exercise all the powers they now possess of laying down mains and pipes, and may supply gas fittings, etc., for non-illuminating gas.

The Hamilton Burgh Order Confirmation Act, 1909, provides (s. 16) that "the Corporation may supply gas for heating, cooking, motive power, warming, ventilating and other purposes, and for the particular requirements of any trade, industry, manufacture, or business, and may do all things needful therefor on such terms and conditions in all respects as may be agreed between the Corporation and the person to whom such supply shall be given." The rate charged for gas so supplied shall be the same to all persons under the like circumstances.

Rating of gasworks.

The subject of the rating of gasworks is dealt with at pp. 205 *et seq.*, where will be found a reference to all the decisions connected with the rating of gasworks.

Profits of local authorities' gas or water undertakings.

When gas or water undertakings are in the hands of a municipal or other local authority, their special Acts as a rule authorise them to apply the surplus profits in reduction of rates —in other words to carry such surplus profits to the credit of the borough fund or of the district fund or general district rate. The annual parliamentary returns relating to gas undertakings in the hands of local authorities in the United Kingdom show the amount of surplus profits carried to the relief of rates in each year. See, *e.g.*, 1910, No. 292. There are many variations of the rule. Sometimes it is provided that surplus profits shall not be so applied while the price of gas to consumers exceeds so much per 1,000 cubic feet. This form occurs in Provisional Orders made by the Local Government Board under the Gas and Water Works Facilities Acts, 1870 and 1873, and by the authority of the Public Health Act, 1875, s. 161. See, *e.g.*, the Ynyscynhaiarn Gas Order, 1909, confirmed by 9 Edw. 7, cccxxiv. See also, *e.g.*, Barry and Cadoxton Gas and Water Act, 1893 (56 & 57 Vict. c. lxxvii.). In some instances where outside districts are supplied it is provided that the whole of any surplus profits shall be applied in reduction of the price of gas.

By the Oldham Act of 1886 differential rates were abolished and profits were by sect. 30 defined and strictly limited. See also Nelson Local Board Act, 1888 (51 & 52 Vict. c. cxlvi.). Where surplus profits in such cases go to the district fund of the supplying authority, that course is generally defended on the ground that the district fund, failing any reserve fund, is liable to make good any deficiency in the revenues or receipts of the gas (or water) undertaking. In the case of the Stockport Act of 1899 to authorise the corporation to acquire a water undertaking which supplied not only Stockport, but also a large number of outlying urban districts, the corporation, by their Bill, proposed to carry surplus profits to the district fund, but a Committee of the House of Lords, presided over by Lord Camperdown, decided that the surplus profits should be applied "in reduction of the water rates for domestic supply." The Committee, however, inserted the following proviso: "Provided however that in the event of any local authority other than the urban district council of New Mills purchasing under the section of this Act, the marginal note of which is 'sale of portion of water undertaking to other local authorities,' the portion of the water undertaking of the corporation within the district of such local authority, notwithstanding anything in this section contained, any arbitrator or umpire in determining the price to be paid by such local authority shall value such portion of the water undertaking as aforesaid as if any such balance as aforesaid were directed to be carried by the corporation to the district fund instead of being applied in reduction of such water rates as aforesaid."

The Bury and District Water (Transfer) Act, 1900 (63 & 64 Vict. c. cxliv.), s. 38, follows the Stockport precedent by providing that "the surplus, if any, shall be applied in reduction of the charge for water for domestic purposes when and as circumstances shall permit the same to be done." See also the Liverpool Water Act, 1847 (10 & 11 Vict. c. cclxi.), which authorised the Corporation of Liverpool to purchase the statutory undertakings of two water companies. Sect. 125 provided that the charges for water should be such as not to exceed interest on borrowed money, costs of management and sinking fund; any moneys received in excess being applicable to reduction in the rents and charges for water.

See also Bolton Corporation Act, 1905, s. 60; Tees Valley Water (Consolidation) Act, 1907, s. 90; Birkenhead Corporation Water Act, 1907, s. 75; and Oldham Corporation Act, 1909.

Section 75 of the last-named Act besides providing for the application of the gas revenues for the customary purposes authorises an annual payment of £7,500 to the borough fund, and an annual contribution to a reserve fund of not exceeding 1 per cent. on the aggregate capital expenditure on the undertaking, or if the fund amounts to not less than £50,000 any sum not exceeding £1,000 annually, until the fund is equal to one-tenth of the aggregate capital expenditure. Any balance remaining is to be carried forward and eventually applied to reduction of gas charges equally throughout the limits of supply.

By sect. 25 any surplus water revenue is to be applied to the reduction of water rents for domestic purposes equally throughout the limits of supply.

An important decision in this respect was given by the Committee on the Salford Corporation Bill, 1909 (H. L. Lord Donoughmore, Chairman). This was an omnibus Bill, by which the corporation sought, *inter alia*, power to borrow further money for the purposes of the gas undertaking and to reduce the prescribed illuminating power of the gas. In Session 1895 the corporation sought power to borrow money, and on the opposition of the outside authorities the committee decided that there should be a limitation of the profits, and in consequence the corporation withdrew the Bill, costs being awarded against them. In 1897, however, the corporation obtained an Act giving them additional powers for their gas undertaking and agreed clauses for the protection of the outside authorities were inserted. The Act contained no limitation on the power of the corporation to apply surplus profits in aid of the borough rates.

The Bill of 1909 was opposed by the outside authorities, who asked for a limitation of profits, and for the abolition of differential charges. The Committee decided that in charging their consumers the corporation should be allowed to charge a sum which would only fall under the following heads: A fair price; interest and sinking fund on capital outstanding; a reserve fund of ½ per cent. per annum, the total not to exceed 10 per cent. of the capital outstanding; 1 per cent. on the capital outstanding, which had been described as "brain money *plus* risk." Further, the Committee decided that the same conditions as in the case of companies should be imposed with regard to the amount carried forward, that the differential rates in the outside districts who were opposing should be abolished, and that a statutory obligation should be placed upon the corporation to charge the lighting fund with the cost of public lighting. They also decided that a clause should be inserted stating that if at any time through discontinuance of the use of gas by the public the gas undertaking of the corporation becomes a total loss and the outstanding capital should thus become chargeable on the rates of Salford, that charge should be shared by the ratepayers of the outside districts in proportion to their respective rateable values.

Leave was refused to the promoters to withdraw the gas portion of the Bill, and the Bill as amended was reported to the House, but was subsequently withdrawn by the corporation.

Where one local authority are authorised to supply gas—or it may be water—to other local authorities and places outside, and are also authorised in the section relating to "application of moneys" to carry any surplus to the borough fund or to the district fund, it has been questioned whether the supplying authority are entitled to charge such prices, within their maximum, as will result in substantial profits to be carried to those funds and so applied for the benefit exclusively of the ratepayers of the district supplying. In the case of *Corporation of Birmingham* v. *The West Bromwich Improvement Commissioners*, decided by the Queen's Bench Division, *Times*, 30th May, 1879; *Journal of Gas Lighting*, June 10th, 1879, p. 895, a similar point arose. By the Birmingham Corporation Gas Act, 1875, the Corporation of Birmingham were authorised to acquire the undertakings of two large gas companies supplying Birmingham and various outlying places. By sect. 40, the outlying local authorities were authorised to purchase from Birmingham their portions of the undertakings acquired. By sect. 36 the Corporation of Birmingham were authorised to apply the moneys received by them in the way thereby directed, and from time to time to "carry to the borough improvement rate or fund the net surplus remaining after the fulfilment of the several purposes aforesaid and the annual proceeds of the reserve fund when amounting to £100,000." The question before the Court related to the principle on which the portion purchased by West Bromwich should be valued, Birmingham contending, *inter alia*, that they had acquired a concern out of which they were entitled to make profits and to apply the surplus of such profits in the way above mentioned. The Queen's Bench Division decided against this view. COCKBURN, L.C.J., in the course of his judgment, said: "I cannot think Parliament ever could have contemplated that a public body to whom they were entrusting these great powers, rights and privileges would use them with a view to commercial gain, or use them for any other purpose but that of the benefit of the public. Secondly, I assume, that there should be no such thing as profit, except accidental profit, in the management of such an undertaking. A corporation or a public body distinguished from a private company, have not to make profit; they have to supply both as regards quality and quantity, the article to the consumer upon the cheapest terms upon which they can supply it. If it so happens that accidentally a profit is made, it is pointed out by the Act of Parliament in what way that profit shall be applied, but it cannot have been the intention of Parliament, and it cannot have been in the contemplation of Parliament, and it ought not to be in the contemplation of such a body as the Corporation of Birmingham that they are to treat this as a commercial speculation out of which they are to make a profit for the benefit of the borough. What makes the thing more striking is, that whatever profit they make, is not to be spent on the outlying districts from which the profit is made, but on the borough of Birmingham. I cannot suppose that any such thing was ever in the contemplation of the legislature in passing this Act or in passing this section. Suppose the Corporation of Birmingham have bought this undertaking of the Staffordshire Company upon fair terms as between the corporation and the company, we cannot suppose that the Corporation of Birmingham undertook this with a view to profit."

As regards electric lighting, see Electric Lighting Clauses Act, 1899 (62 & 63 Vict. c. 19), s. 7 (1) (e).

Scotland.

As regards Scotland where the Burghs Gas Supply (Scotland) Act, 1876, has been adopted, very stringent provision is made to ensure that the gas consumer shall not pay more than cost price. See s. 41 of that Act, *post*, p. 968.

Joint Boards

Where a joint board is formed it is frequently the practice to provide in effect that the gas or water shall be supplied at cost price; see *e.g.* Accrington District Gas and Water Act, 1893, Chesterfield Gas and Water Board Act, 1895, and Derwent Valley Water Act, 1899: or as in the Bury and District Water (Transfer) Act, 1900, referred to *ante*, p. 30, that all surplus profits shall be applied in reduction of water charges. In the Swinton and Mexborough Gas Board Act, 1909, it is provided that the surplus may either be employed in reduction of charges, or divided between the constituent authorities. Provision is made for the division of the surplus between the constituent authorities in the Oakengates and Dawley Joint Water Board Act, 1904, and the Stourbridge and District Water Board Act, 1909.

The following List of Joint Boards and Committees, with the Acts under which they were appointed, and the names of the constituent authorities, is taken from the Local Taxation Returns (England and Wales), 1906—07, Parliamentary Paper, 1909, 248—I., pp. 116—120, which also shows the receipts, payments and loan transactions of the various boards and committees :

For other instances of Acts authorising the formation of Joint Boards, see Wath and Bolton Gas Boar Act, 1908 (8 Edw. 7, c. xciii.); Stourbridge and District Water Board Act, 1909 (9 Edw. 7, c. xci.), and Swinton and Mexborough Gas Board Act, 1909 (9 Edw. 7, c. lxvi.).

Accounts of joint boards.

By a general order of the Local Government Board, dated July 31st, 1895, rules are laid down as to the accounts of joint water boards and committees, and many forms of accounts are prescribed. See Statutory Rules and Orders (revised to December 31st, 1903), Vol. IV., pp. 200—210.

Purchase by outside authority of their portion of undertaking.

In every case in which a local authority is authorised by Parliament to acquire a gas or water undertaking which also supplies outside districts, it is the practice of Parliament to insert a clause authorising any local authority outside the area of the purchasing authority to purchase their portion of what is bought. The question has frequently arisen whether what the outside authority is authorised to purchase is their "portion of the undertaking" or their "portion of the waterworks [gasworks] and plant." See the Model Clause, p. 370. A remarkable litigation arose in a case in which the phraseology employed was somewhat different. Stockton and Middlesbrough were authorised by Parliament to purchase the undertaking of the Stockton and Middlesbrough Water Company. The outside districts respectively were authorised to purchase from the Stockton and Middlesbrough Board "the mains, pipes, and fittings belonging to the board within their district." The question arose whether in view of these words an outlying purchasing authority was bound to pay anything for goodwill. The arbitrator stated his award in the form of a special case. In it he stated that in fixing the price of the mains, pipes, and fittings at the sum of £25,424, he took into consideration the loss of revenue earned by the board by the supply of water through such mains, pipes, and fittings; but if the Court should be of opinion that the basis of calculation was wrong, and that the true basis was (as had been contended on behalf of the purchasers) the value of the mains, pipes, and fittings regarded as plant *in situ* capable of earning a profit, he fixed the price at £8,006. The case ultimately went to the House of Lords, who decided (affirming the decision of the Court of Appeal) that in fixing the price the basis of calculation should be merely the value of the mains, pipes, and fittings regarded as plant *in situ* capable of earning a profit, and that the arbitrator ought not to include in the price any compensation to the board for the loss of the right to supply water within the outlying district (*Stockton and Middlesbrough Water Board* v. *Kirkleatham L. B.*, [1893] A. C. 444).

A limited company supplied gas under Provisional Order in several parishes, including the urban district and parish of Hucknall-under-Huthwaite. By an agreement made between the company and the district council, the latter agreed to purchase "all and singular the works, pipes, mains, meters, and other gas apparatus, and all other the real and personal property (if any), and all effects of the company of whatsoever kind which are laid down or situate within the urban district and parish of Hucknall-under-Huthwaite, freed and discharged (as between the council and the company) from all debts and outgoings and liabilities. . . ." The question of price was referred to an arbitrator. As to the principle of valuation the company contended that the sale was of part of the gas company's undertaking as a going concern, while the district council contended that the sale was merely of certain plant and materials *in situ*. On a case stated, the Court of Appeal (reversing BRAY, J.) decided that the purchase money was to be assessed on the basis of a sale of a portion of the gas undertaking as a going concern (*Hucknall-under-Huthwaite U. D. C.* v. *South Normanton Gas Co., Ltd.* (1905), 69 J. P. 329).

Where under the Tramways Act, 1870, s. 43, a local authority require a statutory tramway company to sell so much of the tramway works and undertaking as is within the district, the payment must include the value of buildings of the promoters which, though situated outside the district, are suitable to and used by the promoters for the purposes of their undertaking within the district (*Manchester Carriage and Tramway Co., Ltd.* v. *Swinton and Pendlebury U. D. C.*, [1906] A. C. 277). *Cf.*

Edinburgh Street Tramways Co. v. *Edinburgh Corporation*, [1894] A. C. 456; *London Street Tramways Co.* v. *London C. C.*, [1894] A. C. 489; *London Tramways Co.* v. *London C. C.*, [1898] A. C. 375; *Manchester Tramway Co.* v. *Manchester Corporation* (1902), 18 T. L. R. 779; *Kingston (Ontario) Light, &c., Co.* v. *Kingston (Ontario) Corporation* (1904), 20 T. L. R. 448; *London, Deptford and Greenwich Tramways Co.* v. *London C. C.*, [1905] 1 K. B. 316; and *Wolstanton United U. D. C.* v. *Burslem Corporation* (1907), 72 J. P. 28.

In 1899 the Corporation of Stockport, having agreed upon a price with the water company, sought power from Parliament to purchase the undertaking of the water company supplying their district and various outlying districts. A purchase clause was inserted by the promoters in their Bill authorising the outlying authorities to purchase their "portion of the undertaking." There was much contest over those words in both Houses, it being alleged that the price agreed to be paid was excessive. In the result the Bill passed with those words. See Stockport Corporation Act, 1899, s. 59. A similar question arose in the Session of 1900, when the Morecambe U. D. C., having agreed upon a price with the Morecambe Gas Company, introduced a Bill to authorise the purchase. A similar clause was inserted authorising purchase by outside authorities of their "portion of the undertaking." Heysham, an outlying local authority, opposed, alleging that the agreed purchase price was excessive. The words were retained. See Morecambe U. D. C. Act, 1900, s. 18. See also Loughborough Corporation Act, 1899, s. 40; Shipley Improvement Act, 1901, s. 31; Poulton-le-Fylde Gas Act, 1901, s. 41; Rickmansworth Gas Act, 1903, s. 43; Doncaster Corporation Act, 1904, s. 11 (portion of the waterworks and plant); Kirkby-in-Ashfield U. D. C. (Gas) Act, 1904, s. 33; Minehead U. D. C. Act, 1904, s. 37; Leeds Corporation (Consolidation) Act, 1905, s. 43; Mansfield Corporation Act, 1905, s. 12 (portion of the waterworks and plant); Tees Valley Water (Consolidation) Act, 1907, s. 50; Leicester Corporation Act, 1908, s. 6; Wath and Bolton Gas Board Act, 1908, s. 57 (portion of gas undertaking including goodwill); Conway Gas Act, 1909, s. 24 (portion of gasworks and plant); Llanelly Waterworks Act, 1909, s. 29 (portion of waterworks and plant); Risca U. D. C. Act, 1909, s. 44 (portion of water undertaking including goodwill).

An important question arose in the course of the arbitration proceedings under the Metropolis Water Act, 1902, as to whether in ascertaining the price to be paid to the metropolitan water companies the undertakings to be transferred to the Water

Board were to be regarded as being subject to the liability to make payments to the sinking fund provided for by the Acts of the water companies. Stated shortly, the effect of the enactments as to the sinking fund was that on the issue of debenture stock by a company there should be carried to a sinking fund in each year such percentage on the amount of the stock as should be equal to the excess of the average percentage of the dividend or interest paid for that year on all the capital of the company, whether share capital or borrowed, above the interest, together with an additional 1 per cent. added thereto for management, on such stock, such sinking fund to be held and applied by the Chamberlain of the City of London as trustee for the purpose of purchasing and extinguishing the share capital of the company, or for such other purposes as Parliament might from time to time determine. The Court of Appeal, on a special case stated by the Court of Arbitration, held that the undertakings were transferred subject to that liability to make the payments to the sinking fund (*East London Waterworks Co.* v. *Metropolitan Water Board* (1904), 20 T. L. R. 245). An appeal to the House of Lords was dismissed with costs (see the First Annual Report of the Metropolitan Water Board at page 12). A similar conclusion was arrived at on appeal to the House of Lords in *In re New River Co. and Metropolitan Water Board* (1904), 20 T. L. R. 687.

Compulsory purchase of gas and water undertakings by local authorities.
Non-statutory gas companies.

When a non-statutory company comes to Parliament seeking re-incorporation and statutory powers, and the local authority oppose and seek power to purchase the undertaking, and give a pledge to come to Parliament with a Bill for this purpose in the next session of Parliament, it is the general practice of committees, if they pass the company's Bill, to " impose the condition of a purchase clause," to the effect that if the local authority should promote a purchase Bill in the next session of Parliament, the company shall not oppose it in principle. It is also the practice in such cases to provide that in the event of such a purchase being effected, the powers of the Act shall not be considered as enhancing the price. One strong reason in support of the policy indicated is, that while the non-statutory company is unauthorised by statute, the local authority is so authorised by the Public Health Act, 1875, s. 51, as regards water, and s. 161 as regards gas; and therefore that the passing of the company's Bill would oust the local authority from their statutory powers under the Act of 1875. In the case of the Hitchin Gas Act, 1905, a purchase clause asked for by the urban district council was refused by a House of Commons Committee, but was inserted by the Committee of the House of Lords.

The cases illustrating this rule with regard to non-statutory gas companies will be found in Schedule A., *post*, p. 109.

Non-statutory companies applying for Provisional Order.

When a non-statutory company instead of coming to Parliament for an Act, promotes a Provisional Order for statutory powers under the Gas and Water Works Facilities Acts, 1870 and 1873, and the local authority oppose at the Board of Trade inquiry and ask for insertion of a purchase clause, the Board have not, up to the present time, imposed that condition unless by consent. On opposing the confirming Bill in Parliament, the local authority may obtain the insertion of such a clause. The following are illustrations: In 1899, the non-statutory gas companies supplying respectively Newtown, Brigg, and Farnham, promoted Provisional Orders. The local authorities opposed in each case, and asked for purchase clauses, but the Board of Trade refused to insert them. In the cases of Newtown and Farnham the Committee on the confirming Bill (Lord Camperdown, chairman), inserted purchase clauses. In the case of Brigg, the local authority had themselves a purchase Bill in Parliament, which ultimately passed unopposed, terms of purchase having been arranged during the progress of the Bill before Committee. Agreed clauses for purchase by the local authority were inserted in the Hailsham Gas Order and the Wexford Gas Order, both of 1903; the Elham Valley Gas Order, 1904, the Sandiacre Gas Order, 1905, the Tavistock Gas Order, 1905, the Rainford Gas Order, 1908, and the Hayfield Gas Order, 1909; the Board of Trade still holding to their practice not to insert a purchase clause unless by agreement.

Statutory gas companies.

Where a statutory gas company applies for further powers, and the company have fairly carried out their statutory duties, it is not the practice of Committees to insert a compulsory purchase clause in favour of a local authority. This practice has been fairly uniform, but not absolutely so. The cases are collected in Schedule B., *post*, p. 117. In the Waterford Case in 1877, the opposition of the company to the purchase clause does not appear to have been strenuous. In the Ilkley Case, the Committee of the House of Commons passed the Bill, but an arrangement was come to in the other House. In the St. Anne's-on-Sea Gas Bill, 1897, a Committee of the House of Lords inserted a purchase clause, but the Bill was rejected in the House of Commons. The cases of Morley, 1898, Loughborough, 1899, and Pontefract, 1906, afford examples of the insertion of purchase clauses. In these cases there was no contest in the second House. In the Redhill and Reigate case in 1898, the Redhill Gas Company (statutory) promoted a Bill to acquire by agreement the undertaking of the Reigate Gas Company, Limited. The Reigate Corporation opposed, and sought a purchase clause. The Redhill Company's works were not within the district of the corporation. A Committee of the House of Lords gave a purchase clause. In consequence, the promoters withdrew the Bill. In 1906, the Pontefract Corporation promoted a Bill for the compulsory acquisition of the undertaking of the Pontefract Gas Company. No mismanagement on the part of the company was shown, but the power of compulsory purchase was granted apparently on the ground that the company had shown a want of enterprise. On the other hand, the following are instances where, in the case of statutory gas companies, the local authorities have failed to obtain powers of compulsory purchase: Pudsey, 1887, Derby 1890, Southend, 1892, North Middlesex, 1895, Norwich, 1896, Weymouth, 1897, Ilford, 1899, Lea Bridge, 1899, Heckmondwike Gas, 1901, the Hartlepool Gas and Water cases of 1898, 1900, and 1901, and Bognor, 1904. The last named case was that of a Limited Company authorised by Provisional Order. A further Provisional Order was obtained in Session 1904, authorising additional works, extension of limits of supply and additional capital. The local authority opposed the Order and asked for the insertion of a purchase clause. In conformity with their usual practice the Board of Trade refused to insert the clause, and the local authority opposed the Confirmation Bill in Parliament. A Committee of the House of Lords refused the clause.

Suspensory clauses.

In the East Hull Gas Act, 1906, a purchase clause asked for by the Corporation of Hull was refused, but a clause (s. 24) was inserted by the Committee (chairman, Mr. H. J. Tennant), providing that the Act should not prejudge or prejudice the question of purchase if the Corporation should promote a Bill therefor in the next session of Parliament, and that in the meantime the company should not raise further capital, nor borrow money except for specified purposes and to a limited extent. A similar provision was also inserted by the Committee in the Merthyr Tydfil Gas Act, 1906. Sect. 60 of the last named Act is as follows:

> "If the Corporation shall introduce a Bill into Parliament in the next Session for an Act to empower them to purchase the undertaking of the Company, nothing in this Act contained shall be deemed to prejudge or prejudice one way or the other the question of such purchase and in the event of such Bill becoming law the value of the undertaking shall not be enhanced or depreciated by the passing of this Act or by anything herein contained, and in addition to such value the Company shall be repaid all moneys in excess of twelve hundred pounds (if any), which the arbitrator, arbitrators or umpire, who determines or determine such value may deem to have been

> reasonably expended by the Company in obtaining this Act and for capital purposes and in acquiring the said lands and easements and erecting a gasholder and other necessary works in connection therewith. But the Company shall not issue any capital before the first day of December, 1906, and if the Corporation shall give notice of and introduce and *bonâ fide* promote such Bill then during the promotion of such Bill, and they shall not borrow any moneys save for the purposes aforesaid before the like date, but the Company may borrow for these purposes notwithstanding any other provision in this Act contained."

The Heckmondwike and Liversedge Gas Act, 1909, contains a similar clause.

Non-statutory and statutory water companies.

The practice of Parliament with regard to the compulsory acquisition by local authorities of the undertakings of water companies has not been uniform. Where the undertaking is non-statutory, there are several precedents in favour of purchase. See Schedule C., *post*, p. 129. Where the undertaking is statutory there are precedents both ways. See Schedule D., *post*, p. 132. The most notable in favour of compulsory acquisition being Stockton and Middlesbrough, 1876; Sheffield, 1887; Fylde, 1897; Harrogate, 1897; Filey, 1898; Horsforth, 1899; Southport, 1901; Devonport, 1902; Clevedon, 1909; Worksop, 1909.

Price of gas undertakings on compulsory acquisition by local authorities.

As regards the estimation of the price which a local authority ought fairly to be asked to pay for the purchase of a gas undertaking as a going concern, it was stated in the first edition of this book published in 1872, that "the principle governing the price is usually a calculation at the rate of twenty years' purchase of the net profits of a company having Parliamentary authority to open streets and supply gas, and sixteen and two-thirds years' purchase where without such sanction." In the later edition of 1884, twenty-five years' purchase was suggested with certain qualifications as a fair estimation of value of a company possessing Parliamentary powers. But all of these figures have long since had to be revised with reference to what is now the market value of money; and larger multipliers than those above named have undoubtedly been applied of late years. The main considerations in fixing a fair multiplier, in each particular case, would seem to be not merely the amount of net profits earned, but also the capacity of the company to continue to earn such profits; and this must depend upon a great variety of considerations, including the condition of the works, their capability of extension, and the chances of effective competition.

Prepayment meters.

Prepayment meters are now largely used. Where the gas supply is in the hands of the local authority the Local Government

Board will sanction a loan for the purpose of obtaining meters, prepayment meters and stoves. All of these are exempt from distress or execution against the person to whom they are let for hire. See *post*, p. 231. The Metropolis Gas (Prepayment Meter) Act, 1900, provides that in addition to the authorised price of the gas, a further charge may be made at the rate of 10*d*. per 1,000 cubic feet to "include the providing, letting, fixing, repairing and maintenance of the meter and fittings and the cost of collection, inspection and any other cost incurred by the company in connection with the meter and fittings." This rate is subject to revision by the Board of Trade. See *post*, p. 294.

A similar power of charge is now commonly inserted in all Gas Acts with an additional provision allowing a charge of 1*s*. per 1,000 cubic feet if the fittings include a cooking stove. See Model Bill Clause, *post*, p. 367.

Electrolytic action on gas and water pipes.

The question of electrolytic action on gas and water pipes was considered by a Joint Committee of both Houses of Parliament in 1893, and the result of the deliberations of the Committee was the inclusion in the Model Tramways Bill of the following clause relating to this matter:

> "The following provisions shall apply to the use of electrical power under this Act unless such power is entirely contained in and carried along with the carriages:—
>
> (1) The company shall employ either insulated returns or uninsulated metallic returns of low resistance:
>
> (2) The Company shall take all reasonable precautions in constructing placing and maintaining their electric lines and circuits and other works of all descriptions, and also in working their undertaking, so as not injuriously to affect by fusion or electrolytic action any gas or water pipes or other metallic pipes structures or substances or to interfere with the working of any wire line or apparatus from time to time used for the purpose of transmitting electrical power or of telegraphic telephonic or electric signalling communication or the currents in such wire line or apparatus:
>
> (3) The electrical power shall be used only in accordance with the Board of Trade regulations and in such regulations provision shall be made for preventing fusion or injurious electrolytic action of or on gas or water pipes or other metallic pipes structures or substances, and for minimising as far as is reasonably practicable injurious interference with the electric wires lines and apparatus of other parties and the currents therein, whether such lines do or do not use the earth as a return:
>
> (4) The company shall be deemed to take all reasonable precautions against interference with the working of any wire line or apparatus, if and so long as they adopt and employ at the option of the company either such insulated returns or such uninsulated metallic returns of low resistance and such other

> means of preventing injurious interference with the electric wires lines and apparatus of other parties and the currents therein as may be prescribed by the Board of Trade regulations, and in prescribing such means the Board shall have regard to the expense involved and to the effect thereof upon the commercial prospects of the undertaking.
>
> (5) At the expiration of two years from the passing of this Act the provisions of this section shall not operate to give any right of action in respect of injurious interference with any electric wire line or apparatus or the currents therein, unless in the construction erection maintaining and working of such wire line and apparatus all reasonable precautions including the use of an insulated return have been taken to prevent injurious interference therewith and with the currents therein by or from other electric currents:
>
> (6) If any difference arises between the company and any other party with respect to anything hereinbefore in this section contained, such difference shall unless the parties otherwise agree be determined by [arbitration] the Board of Trade or at the option of the Board by an arbitrator to be appointed by the Board, and the costs of such determination shall be in the discretion of the Board or of the arbitrator as the case may be.

It has been the practice of Parliament to refuse provisions in protective clauses rendering the company liable in any event for injurious interference with pipes or wires of other parties, whether such clause has been agreed with the promoters or otherwise.

In Session 1903, however, the Brighton and Hove Gas Company secured the insertion by a Committee of the House of Lords (Lord Hatherton, Chairman) of the following clause in the Brighton Corporation Tramways Act:

> "If at any time it be proved that any injury or damage to any mains, pipes or apparatus of the Brighton and Hove General Gas Company, shall have resulted from the use of electric current on any of the tramways authorised by this Act, nothing in this Act shall relieve the Corporation from liability to make compensation for such injury or damage."

In the same session the Crystal Palace District Gas Company obtained a similar clause in the Beckenham Urban District Bill, except that the liability was confined to damage from "electrolysis resulting from the use of electric current" (Duke of Bedford, Chairman). On the motion for the third reading of the Bill, Earl Stanhope moved an amendment to omit the clause. The motion was supported by the Earl of Morley (the Lord Chairman) who stated that the practice had been to refuse requests for individual protection on the ground that the Board of Trade regulations, if properly carried into effect were sufficient, and that if not the proper course was to make them more stringent. The motion was also supported by the representative of the Board of Trade, and the clause was negatived.

The Torquay Tramways Bill, 1904, as introduced, contained a clause for the protection of the Corporation water mains and the gas mains of the St. Mary Church gas undertaking belonging to the Corporation of Torquay. The Torquay Gas Company opposed the Bill, and the House of Commons Committee inserted a clause for the protection of their mains. Both clauses were struck out by counsel to the Lord Chairman when the Bill reached the House of Lords, but were re-instated by the Select Committee (Lord Hawkesbury, Chairman) on the opposition of the corporation and the gas company. The clauses were, however, again disallowed by the Lord Chairman as being opposed to the practice of Parliament. On the third reading of the Bill, Lord Clifford of Chudleigh proposed the re-insertion of these provisions, but the motion was resisted by the Lord Chairman and Lord Wolverton (on behalf of the Board of Trade), and was negatived.

In Session 1908, the Brentford Gas Company sought to obtain the insertion of a clause in the London and District Electricity Bill, 1908, arranging for compensation in the event of injury being done to their gas distribution system by the operations of the electricity company, and compelling the electricity distribution system to be so constituted as to ensure that no accumulation of gas can occur. The Committee of the House of Lords (Earl of Cromer, Chairman) refused the clause.

Certain clauses now generally inserted in Gas Acts.

The Gasworks Clauses Acts, 1847 and 1871, no longer contain all the "provisions usually contained in Acts of Parliament authorising the construction of gasworks" (preamble of Act of 1847). Clauses on the following subjects are now usually inserted in Gas Acts:

(1) *Dividends on different classes of stock or shares to be paid proportionately.*—The object is to provide that in case in any half-year the funds of the company applicable to dividend shall be insufficient to pay the full amount of dividend at the prescribed maximum rate on each class of ordinary stock or shares in the capital of the company, a proportionate reduction shall be made in the dividend of each class (Model Bill, *post*, p. 364). See *Maughan* v. *Leamington Priors Gas Co.*, cited p. 1129.

(2) *Pressure of gas.*—This is now always provided for, and the gas examiner appointed under the Act of 1871 is authorised to test for pressure. See p. 241 n., and Model Bill, p. 368.

(3) *Power to purchase lands by agreement.*—The effect of this clause is to enable the company, in addition to their scheduled lands, to purchase "by agreement, but not otherwise," a limited number of acres for the purposes of their works and undertaking, but no nuisance may be created or permitted on any such lands,

nor may they be used for the purpose of manufacturing gas or residual products. See Model Bill, *post*, p. 366.

(4) *Construction and placing of pipes, etc., between mains and meters.*—The object of this clause is to authorise the company to specify the size and material of the pipes and fittings thereof which are to be laid between the company's mains and the meter, and (so far as the same are intended to be covered over) on the consumer's premises; and also to give the company certain powers of inspection with regard to pipes and meters. The company are also authorised to refuse to supply gas to the premises until the provisions of the section have been complied with, an appeal to a petty sessional court being given. See Model Bill, *post*, p. 368.

(5) *Payment of interest on money deposited as security.*—By s. 11 of the Act of 1871 security may be demanded in respect of the supply of gas to any consumer, and by sect. 14 of the same Act security for any meter supplied by the gas company may be demanded. A clause is now generally inserted requiring the gas company to pay interest at the rate of 4 per cent. per annum on every sum of 10*s*. deposited by way of such security for every six months during which the same remains in their hands (Model Bill, p. 369).

(6) *Power to supply fittings, etc. Fittings not to be subject to distress, etc.*—Companies and local authorities supplying gas are now granted large powers to let for hire (but not to manufacture) engines, stoves, ranges, pipes, and other fittings for lighting, motive power, warming, ventilation, etc. Special provision is now always added to the effect that these shall not be subject to distress or to the landlord's remedy for rent, or be liable to be taken in execution under process of any court or any proceedings in bankruptcy against the person in whose possession the same may be; provided a sufficient mark or brand be affixed or impressed indicating the ownership. Local authorities obtaining these powers are prohibited from expending money, except through a contractor, upon the provision of such fittings or the labour and materials required for their fixing, repairing, or removal, and are required to adjust their charges therefor so as to meet the expenditure incurred, including interest on borrowed moneys and sinking fund. They are also required to state separately on every demand note every sum charged for the provision and fixing of the fittings, and to show the receipts and expenditure separately in the published annual accounts of the gas undertaking (Model Bill, p. 369). See *Gaslight and Coke Co.* v. *Hardy*, p. 188.

(7) *Consumers to give notice before removing.*—This clause requires twenty-four hours' notice in writing by a consumer before quitting any premises supplied with gas by meter. In default of notice the consumer remains liable for the supply up to the next usual period for ascertaining the register of the meter or the date from which any subsequent occupier shall require the company to supply gas (Model Bill, p. 369).

(8) *Power to refuse to supply to persons in debt for other premises.*—See *Montreal Gas Co.* v. *Cadieux*, p. 225, and Model Bill, p. 370.

(9) *Notice by consumer to company to discontinue supply.*—It is usual to enact that such a notice shall not be of any effect unless it be in writing (Model Bill, p. 370).

(10) *Period of error in defective meters.*—It is usual to enact that the erroneous registration shall be deemed to have first arisen during the then last preceding quarter, unless it be proved to have first arisen during the then current quarter. The amount of the allowance to be made to or of the surcharge to be made upon the consumer by the company being payable by or to the company to or by the consumer, as the case may be, and being recoverable in like manner as gas rents are recoverable by the company (Model Bill, p. 370).

(11) *Company may contract with local authority, etc., for supply in bulk.*—Companies are now specially authorised to contract with any local authority, company, or person authorised to supply gas under parliamentary powers in any district adjacent to the company's limits of supply for the supply to them respectively of gas in bulk upon such terms and conditions, and for such periods not exceeding in any case seven years from the making of the contract as shall be agreed upon, but the company are not thereby authorised to lay any mains or interfere with any street beyond their limits of supply (Model Bill, p. 370).

(12) *Saving as to penalties.*—This clause provides that no penalty shall be incurred for insufficiency of pressure, defect of illuminating power, or excess of impurity in the gas in any case in respect of which it is proved that such insufficiency, defect, or excess was produced by any circumstance beyond the control of the company, but the want of sufficient funds is not to be held to be a circumstance beyond the control of the company (Model Bill, p. 368).

(13) *Discounts.*—Many Gas Acts contain provisions with regard to the discounts which may be allowed to consumers in consideration of prompt payment, and large consumption. The

amount of the discount allowable varies in different Acts, but generally it is limited to 10 per cent. for prompt payment, with "in addition thereto or irrespective thereof" discounts not exceeding 15 per cent. to large consumers. The discounts or rebates must be of equal amount under like circumstances to all consumers, and notice of the effect of the enactment must be endorsed on every demand note for gas rates or charges.

These provisions would appear to operate by way of limitation to the general power given by s. 13 of the Gasworks Clauses Act, 1847, to enter into contracts for the supply of gas "in such manner and upon such terms as shall be agreed upon," and the most recent practice is to insert in lieu of a "discounts" clause a provision that s. 13 of the Act of 1847 shall be read as if the words "Provided also that every such contract entered into by the company shall be alike in terms and amount under like circumstances to all consumers" were added at the end of that section.

Alternative provisions relating to this matter are contained in the Model Bill. See *post*, pp. 362, 367, clauses 1 and 21.

In addition to the clauses above referred to (all of which have found their way into the Model Gas Bill), some other clauses which are more or less frequently inserted in Gas Acts may here be noticed.

Power to lay pipes in streets not dedicated to the public use on application of an owner or occupier of premises abutting, or in course of building.—A clause giving this power is frequently inserted in Gas Acts. For the common form of the clause see s. 12 of the Bury Corporation Act, 1909. The Eastbourne Gas Act, 1909, provides (s. 42) that before the company break up such streets or roads they shall give three clear days' notice to the corporation (except in cases of emergency), and that in carrying out the works and reinstating the street or road, the company shall conform to all such requirements made by the corporation as shall not be inconsistent with any requirements of the owner of the street or road. Differences are to be determined by a court of summary jurisdiction. The work is to be carried out under the superintendence of the corporation, and provision is made for the proper lighting and guarding of the portion of the road broken up. See also Littlehampton Gas Act, 1909, s. 57.

A modified form of the clause is inserted in Gas Provisional Orders, under which the power to break up private streets and roads is only exercisable with the consent of the owner of the street or road. The reason for this limitation appears to be the absence of any authority in the Gas and Water Works Facilities Act, 1870, to grant in a Provisional Order under that Act compulsory powers over private property.

Power to hold licences under letters patent.—This clause is to be found in many recent Gas Acts. For an instance of the common form of the clause see Blackwood Gas Act, 1909, s. 74.

Power to require anti-fluctuators to be fixed to gas engines.—This clause is found in most modern Gas Acts, *e.g.*, Blackwood Gas Act, 1909, s. 72.

Power to purchase, take on lease, or erect dwelling houses for persons in the employ of the company.—Many recent Acts contain a clause to this effect. The following section is taken from the Littlehampton Gas Act, 1909, s. 64:

> "The company may upon any lands for the time being belonging or leased to them erect, fit up, maintain, and let houses, cottages, and buildings, for the officers and servants employed by the company for the purposes of their undertaking."

Power to lay pipes in streets for "ancillary purposes," e.g., the conveyance of oil.—The following are instances in which this power has been granted: Enfield Gas Act, 1898, s. 45; Cleethorpes Gas Act, 1900, s. 37; Kingston-upon-Thames Gas Act, 1900, s. 44 (this section is qualified by the words, "with the consent of the local authority"); Burgess Hill and St. John's Common Gas Act, 1903, s. 61 (with the consent of the local authority); Derby Gas Act, 1903, s. 44 (provided that the company shall not under the powers of this section break up any street in the borough of Derby without the consent of the corporation); Gorleston and Southtown Gas Act, 1903, s. 30 (with the consent of the corporation, which consent shall not be unreasonably withheld); Maidstone Gas Act, 1907, s. 9 (with the consent of the corporation); Blackburn Corporation Act, 1908, s. 48; Draycott Gas Act, 1908, s. 38; Gosport Gas Act, 1908, s. 35; Llanelly Gas Act, 1908, s. 22; Southwell District Gas Act, 1908, s. 65; Wath and Bolton Gas Board, 1908, s. 55; Widnes Corporation Act, 1908, s. 5; Aldershot Gas etc. Act, 1909, s. 20; Blackwood Gas Act, 1909, s. 63; Bury Corporation Act, 1909, s. 11; Heckmondwike and Liversedge Gas Act, 1909, s. 56; Leyland Gas Act, 1909, s. 11; Lisburn Urban District Council Act, 1909, s. 37; Oldham Corporation Act, 1909, s. 71; Risca Urban District Council Act, 1909, s. 66; and Swinton and Mexborough Gas Board Act, 1909, s. 54.

Appliances let on hire though fixed to premises to remain property of company.—A clause to this effect is frequently found in recent Gas Acts. The clause provides that the amount of the assessment for rating of premises on which the fittings are fixed shall not be affected. See, *e.g.*, South Metropolitan Gas Act, 1905, s. 8; South Suburban Gas Act, 1905, s. 3; Annfield Plain and District Gas Act, 1907, s. 49; Boston Spa Gas Act, 1907, s. 67; Falmouth Gas Act, 1907, s. 28; Llandrindod Wells Gas Act, 1907, s. 44; Pontypridd Urban District Council Act, 1907, s. 10; Rhymney and Aber Valleys Gas and Water Act, 1908, s. 57; Swinton and Mexborough Gas Act, 1908, s. 68; Aldershot Gas, Water and District Lighting Act, 1909, s. 85; Alliance and Dublin Gas Act, 1909, s. 43; Blackwood Gas Act, 1909, s. 67; Harrogate Gas Act, 1909, s. 36; Lisburn Urban District Council Act, 1909, s. 22; Pontypool Gas and Water Act, 1909, s. 53; Risca Urban District Council Act, 1909, s. 49; Swinton and Mexborough Gas Board Act, 1909, s. 38; and Wells Gas Act, 1909, s. 34.

Entry and removal of apparatus from premises where supply has been lawfully cut off.—For an instance of a section giving this power see Alliance and Dublin Gas Act, 1909, s. 47.

Power to lay pipes, etc., against buildings.—The following clause appears in the Greenock Corporation Act, 1909, s. 329:

> "The corporation, with the consent of the owner or occupier of any building, may lay any pipe or other apparatus into, through, or against such building for the purpose of lighting it, and may with the like consent provide and set up on or against any such building any apparatus necessary for securing to such building a proper supply of gas, and for measuring and ascertaining the extent of such supply, and may from time to time with the like consent repair replace, alter or discontinue and remove any such pipe or apparatus."

Power to carry private pipe across intervening building.—The Greenock Corporation Act, 1909, also contains the following section (s. 330):—

> "Notwithstanding anything contained in sect. 7 of the Gasworks Clauses Act, 1847, where any building belongs in portions to different owners, the owner of any portion shall be entitled to carry a pipe for supplying such portion with gas across or along any other portion of such building where such supply cannot be otherwise obtained. Provided always that where any damage shall be caused by such operation, the person performing the operation shall be bound to pay such damage as the amount thereof shall be fixed and ascertained by arbitration."

Power to take portions only of properties where same could be severed from the remainder without material detriment thereto.—See, *e.g.*, Pontypool Gas and Water Act, 1909, s. 43.

Power to retain, sell, lease, etc., superfluous land, notwithstanding Lands Clauses Acts.—Such a clause is frequently found in Water

Acts, and it has recently been inserted in some Gas Acts. See, *e.g.*, South Shields Gas Act, 1904, s. 24; Worthing Gas Act, 1907, s. 9; Alliance and Dublin Gas Act, 1909, s. 14.

Power to grant pensions or gratuities to officers and servants disabled or incapacitated.—See, *e.g.*, Selby Urban District Council Act, 1904, s. 187; Accrington District Gas and Water Board Act, 1905, s. 28; Perth Corporation Gas Order Confirmation Act, 1906, s. 27; Harrogate Gas Act, 1909, s. 27.

Power to directors to fix the remuneration of secretary.—A clause for this purpose has been inserted in some recent Gas Acts, *e.g.*, Bishops Stortford Gas Act, 1904, s. 74; Colney Hatch Gas Act, 1904, s. 48; Sheppey Gas Act, 1904, s. 38; Northampton Gas Provisional Order, 1904, s. 33; Berkhampstead Gas Act, 1905, s. 80; Brentwood Gas Act, 1905, s. 45; Croydon Gas Act, 1905, s. 38; East Cowes Gas Act, 1905, s. 72; Derby Gas Act, 1906, s. 13; Cardiff Gas Act, 1906, s. 46; Heckmondwike and Liversedge Gas Act, 1909, s. 43 (applicable to appointment, removal, etc., of all officers and servants).

Qualification of auditors.—The following section is taken from the Heckmondwike and Liversedge Gas Act, 1909 (s. 42):

> "Notwithstanding anything contained in the Companies Clauses Consolidation Act, 1845, as from the 1st day of January, 1910, no person shall be appointed as auditor of the accounts of the company who shall not be either a chartered accountant or an incorporated accountant, and it shall not be necessary for such person to be a shareholder in the company."

Other instances in which a similar provision has been inserted are Berkhampstead Gas Act, 1905, s. 48; Brentwood Gas Act, 1905, s. 48; East Cowes Gas Act, 1905, s. 48; Crediton Gas Act, 1906, s. 50; Annfield Plain and District Gas Act, 1907, s. 30; Southwell District Gas Act, 1908, s. 49; Blackwood Gas Act, 1909, s. 44.

The accounts of all County Councils, the London Borough Councils, and Urban District Councils, are subject to audit by the district auditors of the Local Government Board. In several Corporation Acts of recent years provision is made for the audit of the corporation accounts by the district auditors. The instances, together with a model clause dealing with this matter, are cited in the Model Bills and Clauses, Miscellaneous (clause 19 and note). They are Tunbridge Wells (1890), Bournemouth (1892), Southend-on-Sea (1895), Plymouth (1904), Swindon (1904), Merthyr Tydfil (1905), Cheltenham (1905), Poole (1905), Chelmsford (1907), Monmouth (1908), East Ham (1908), Margate (1908), Shrewsbury (1908). The Corporation of Folkestone by their Act of 1901 have power to adopt audit by a district auditor on resolution of the council. The cases referred to do not relate exclusively to corporations owning gas undertakings.

Where statutory powers are conferred upon a limited company, the Act of Parliament must be registered. This applies not only to Bills promoted by a limited company, but also to Bills promoted by a local authority. See Model Bills and Clauses, Session 1910, Miscellaneous, clause 29.

Powers of certain gas companies to supply electricity.

In a few cases power to supply electricity has been granted to statutory gas companies. Provision is always made for the keeping of separate accounts, both as regards capital and revenue, of the gas and electricity undertakings. See Andover Lighting and Power Act, 1905; Ascot District Gas and Electricity Act, 1906; Aldershot, Gas, Water and District Lighting Act, 1909; and York Town and Blackwater Gas (Electric Lighting, etc.) Act, 1909.

Locus standi of statutory gas companies to oppose Electricity Bills and Orders.

The Court of Referees in the *Ferndale Case*, 1 Saund. and Aust., 314, have held that a statutory gas company is entitled to a *locus standi* to oppose a Provisional Order under the Electric Lighting Acts; and they have also decided that a non-statutory gas company is equally entitled to a *locus standi* to oppose on the ground of competition. Grangemouth Electric Lighting Provisional Order, 1905. Jl. G. L., June 6th, 1905, p. 727; 1 Saund. and Bidder, 18.

The Cannock, Hednesford and District Gas Co. Ltd., were granted a *locus* to oppose the Shropshire and Worcestershire Electric Power Bill, 1905. *Electrical Review*, 10th March, 1905, p. 390.

The Barnet Gas and Water Company and the Southgate and District Gas Company obtained a *locus standi* to oppose the Finchley Urban District Bill, 1908, relating to the supply of electricity within the statutory limits of those companies. The North Middlesex Gas Company, whose limits were not affected, were refused leave to oppose as ratepayers.

METROPOLIS GAS.

Metropolis Gas Act, 1860.

In the year 1860 the Metropolis Gas Act, 1860, was passed for the purpose of better regulating the supply of gas to the metropolis. In the preamble of that Act it is recited that the various companies therein named (thirteen in number) were respectively incorporated under the authority of Parliament for the purpose of supplying several districts of the metropolis with gas, "and that the said companies, instead of supplying gas by several mains in the same district, have agreed, as far as possible, each one to confine its supply to a separate district, in order to economise capital and avoid the too frequent opening of public streets." The Act then proceeded to enact that the limits of each of the said companies should be the respective districts defined upon four duplicate maps deposited with the respective clerks of the peace for the counties of Middlesex, London, Surrey, and Kent (see s. 6, p. 277). Prior to the passing of this Act there was no obligation on the several companies to supply gas to consumers, though they were authorised to contract. The Act of 1860 made the supply compulsory under the conditions prescribed in s. 14 (see p. 280). The Act also contained powers to the Secretary of State for the Home Department (which powers were afterwards transferred to the Board of Trade) to appoint an inspector on complaint being made to him as to quantity or quality of the gas (see ss. 7—12, p. 279). It also contained enactments relating to the illuminating power and purity of the gas, the appointment of gas examiners by the local authorities, and complaint to a magistrate as to the supply of gas (see ss. 25—34, p. 282); and it further provided for appeal by consumers to the Home Secretary (afterwards to the Board of Trade) on rise of price of gas, and authorised the issue of a form of accounts (see ss. 40, 41, p. 284). Sections 7—12, 25—34, and ss. 40, 41 were afterwards repealed and fresh enactments have been substituted in their place, as will presently appear. By successive amalgamations authorised by later Acts, the thirteen companies named in the Act of 1860 have been reduced to three. These are the Gas Light and Coke Company, the Commercial Gas Company, and the South Metropolitan Gas Company.

Intrusion of one company into the district of another.

The effect of the Metropolis Gas Act, 1860, in assigning a separate district to each company is illustrated by the decision in the *Gaslight and Coke Co.* v. *South Metropolitan Gas Co.*, the facts of which will be found fully stated at p. 278.

City of London Gas Act, 1868.

At the time of the passing of the City of London Gas Act, 1868, the city of London was supplied by three different gas companies, viz., the Gas Light and Coke Co., the City of London Gas Light and Coke Co., and the Great Central Gas Consumers Co. The main objects of the Act of 1868 were—(1) to give power to the corporation to purchase the undertakings, a purpose which, though authorised, was not carried out; (2) the amalgamation of the three companies, a purpose which was carried out; (3) the appointment by the Board of Trade of gas referees; and (4) the making of better provision in regard to the illuminating power and purity of the gas, the daily testing of the same, the establishment of testing places, and the appointment of a gas examiner and a chief gas examiner and also of an auditor of the accounts of the companies, and the prescribing by the auditor from time to time of a uniform form of accounts. It was further enacted that if application were made to the Board of Trade by any company or by the corporation for a revision of the scale of illuminating power and price, the Board of Trade shall "appoint not less than two nor more than three competent and impartial persons to be commissioners for the purpose . . ."

Gas referees first appointed, 1868.

A notable feature of the City of London Gas Act, 1868, was the appointment of gas referees. By sect. 29, the Board of Trade were required to "appoint three competent and impartial persons, one at least of them having practical knowledge and experience in the manufacture and supply of gas, who shall be called the gas referees." By s. 34, the gas referees were required to inspect the "works of the companies and investigate the processes of manufacture carried on therein, with the view of ascertaining the means adopted therein for purifying gas and for preventing nuisance, and may from time to time apply all such tests as they think expedient, at the works of the companies or elsewhere, for ascertaining the amount of sulphur and ammonia and of compounds thereof or other impurity with which gas supplied by them is charged." By s. 36, it was provided that the gas referees should from time to time ascertain with what degree of purity each company could reasonably be required to make and supply gas continuously without occasioning a nuisance to the neighbourhood in which the works were situate and should thereupon prescribe the maximum amount of impurity in each form with which gas supplied by the company should be allowed to be charged. Amongst the other duties assigned to them was power to prescribe and certify from time to time the mode to be adopted for testing and recording the purity of the gas supplied by the companies, and the number of the times of testing (s. 37), and the mode of ascertaining the quantity of gas consumed by the public lamps (s. 38). Sect. 39 provided that gas supplied by the companies should be wholly free from sulphuretted hydrogen, and that nothing in the Act should authorise the gas referees "to allow of gas being charged with any amount of impurity in that form."

The gas referees were further required from time to time to prescribe and certify what testing places and what apparatus therein for testing the illuminating power and purity of gas should be provided by each company (s. 40); and they were further required to prescribe the burner for testing the illuminating power of the gas (s. 43). The testings for illuminating power were required to be made "three times at least each day" (s. 47); the average of all the testings on each day being deemed to represent the illuminating power on that day (s. 48).

Gas Light and Coke Company's Act, 1868.

In the Session of 1868, the Gas Light and Coke Company introduced a Bill for the purpose of consolidating and amending the Acts relating to that company. It passed into law as the Gas Light and Coke Company's Act, 1868. By s. 109, it was provided that the company and their undertaking should be subject to the City of London Gas Act, 1868, "without as well as within the City of London and the liberties thereof, and such Act shall extend to the whole undertaking of the company"; and that the Metropolitan Board of Works should have, outside the limits of the City of London, all the rights and powers given to the City Corporation within the city. By s. 10, the company were to continue subject to the Metropolis Gas Act, 1860, so far as not varied by the Act. See also s. 110 to the effect that the company are not to be exempt from the provisions of general Acts, including the Metropolis Gas Act, 1860.

Whole area of the company made subject to the City of London Gas Act, 1868.

Effect of legislation to end of Session 1868.

The result of legislation to the end of Session 1868, was that the whole area of the undertaking of the Gas Light and Coke Company ceased to be under the repealed sections (ss. 7—12, 25—34, 40, 41) of the Act of 1860, and became subject to the new provisions of the City of London Gas Act, 1868, while the Commercial Gas Company and the South Metropolitan Company remained under the Metropolis Gas Act, 1860, in its entirety. The City of London Gas Light and Coke Company and the Great Central Gas Consumers Company became amalgamated with the Gas Light and Coke Company in 1870.

Provisions as to amalgamation.

The sections of the Act of 1868 authorising the three companies therein named to amalgamate, will be found at p. 303, *post.* The machinery provided was the submission of a scheme to the Board of Trade for approval, and the subsequent confirmation "whether modified or not" by Order in Council. This machinery was afterwards, by various special Acts, extended to other companies: and the various amalgamations ultimately effected will be found, *post*, p. 66.

South Metropolitan Gas Act, 1869.

In the Session of 1869, the South Metropolitan Company promoted a Bill for further capital. It passed into law as "The South Metropolitan Gaslight and Coke Company's Act, 1869." By s. 4 and the schedule it repealed, so far as they relate to the South Metropolitan Company, the whole of the sections of the

Act of 1860, which had been repealed by the City of London Gas Act, 1868, so far as regards that company, viz., ss. 7—12, 25—34, 40, 41; and it introduced in substitution the various sections which had been inserted in the City of London Gas Act, 1868.

Gas referees appointed in relation to South Metropolitan and Commercial Companies.

By this Act of 1869, s. 15, the Board of Trade were authorised to appoint gas referees in relation to the South Metropolitan Company. By the Commercial Gas Act, 1875, s. 22, the Board of Trade were also authorised to appoint gas referees in relation to that company.

Gas Light and Coke Act, 1871.

The Gas Light and Coke Company's Act, 1871, authorised the amalgamation of the Equitable Gaslight Company with that company. It further provided as follows:

> Section 56.—Sections eighteen to twenty-four (inclusive) of the City of London Gas Act, 1868, shall, taken in connexion with the amalgamated company, extend and apply to the several gas companies supplying gas within the metropolis, as defined in the Metropolis Gas Act, 1860.

Commercial Gas Act, 1875.

By the Commercial Gas Act, 1875, the Commercial Gas Company brought itself into line with the Gas Light and Coke Company and the South Metropolitan Company in regard to the new legislation. Sect. 22 provided for the appointment of gas referees "in relation to the Commercial Company." It repealed, *inter alia*, ss. 7—12, 25—34, and 40, 41, of the Metropolis Gas Act, 1860, and adopted the substituted sections of the City of London Gas Act, 1868, except with reference to revision of price and appointment of commissioners for that purpose.

Sliding scale first introduced, 1875.

The Commercial Gas Act, 1875, first introduced the sliding scale. In the session of that year the Metropolitan Board of Works introduced three Bills: the first to erect competing gasworks; the second for the purchase of the then existing gas undertakings in the metropolis (then nine in number); and the third for imposing more stringent regulations on the companies. The first two were dropped. The third, along with the Bill of the Commercial Gas Company and another of the Imperial Gas Company (which was afterwards dropped), were referred to a hybrid Committee of the House of Commons, presided over by Mr. W. E. Forster. The chief points of the inquiry related to auction clauses (which were not then absolutely new) and to the sliding scale which Mr. George Livesey and others advocated. The Committee made a report (Parliamentary Paper, 1875, No. 281). In the result the Commercial Gas Company got their Act with the sliding scale and auction clauses.

The Act fixed a standard price of 3*s.* 9*d.*, with power to the company to increase or diminish that price, subject to a decrease or increase in the standard rates of dividend as defined by the Act, to be calculated as follows:

> For every penny or part of a penny charged in excess or in diminution of such standard price in any year, the standard rate of dividend shall for such year be reduced or increased by five shillings in the hundred pounds per annum.

The Act also gave power to the company to form an insurance fund and a reserve fund. The Act also authorised amalgamation with the Ratcliff Gaslight and Coke Company. See the unrepealed portions of this Act, *post*, p. 308. See the later provisions as to standard price, etc., at pp. 62 *et seq.*, *post.*

Gas Light and Coke Act, 1876.

By their Act of 1876 the Gas Light and Coke Company came under the sliding scale, Parliament fixing a standard price of 3*s.* 9*d.*, with power to form an insurance fund and a reserve fund. The Act repealed the following portions of the City of London Gas Act, 1868, viz., ss. 25—28 (relating to dividends); ss. 33—84, relating to testing for illuminating power and purity, illuminating power and price, reports of chief gas examiner, forfeitures, accounts, and pressure of gas. It then proceeded to enact fresh provisions with regard to all these matters. The Act of 1876 contains no fresh enactment with regard to the appointment of gas referees, because the powers in that behalf conferred upon the Board of Trade in 1868 were still in operation. See the unrepealed portions of this Act, *post*, p. 321. See the later provisions as to standard price, illuminating power, testing, etc., at p. 65, *post.*

The Act of 1876 recites the various amalgamations of other companies with the Gas Light and Coke Company, including the Imperial Gaslight and Coke Company and the Independent Gaslight and Coke Company. As regards the former, the Imperial Gas Company had by their Act of 1869 substituted the Board of Trade for the Home Secretary under the Metropolis Gas Act, 1860, and repealed ss. 7—12, 25—34, 37, 40, 41, of that Act. As regards the Independent Gaslight and Coke Company, the same repeals are effected in regard to it by s. 8 of the Act of 1876.

South Metropolitan Gas Act, 1876.

By their Act of 1876 the South Metropolitan Company were placed under the sliding scale, the standard price in their case being fixed at 3*s.* 6*d.* The Act repealed large portions of the Act of 1869 (ss. 13 and 14 and ss. 19—66 inclusive). Among these sections were the sections prescribing illuminating power and pressure, and the various sections connected with testing for illuminating power, purity and pressure, auditor and accounts. Accordingly, the Act of 1876 re-enacted provisions in regard to these matters (ss. 26—61 inclusive, as to which, see p. 332, *post*). See the later provisions as to standard price and other matters referred to on pp. 62 *et seq.*, *post.*

Sixteen-candle gas prescribed for the three companies.

By the Commercial Gas Act, 1875, the Commercial Company were required to afford an illuminating power of sixteen candles. By the Gas Light and Coke Company's Act, 1876, an illuminating power of sixteen candles was also required in the case of common gas. (The City of London Gas Act, 1868, s. 53, had required sixteen-candle gas as from January 1st, 1870.) By the South Metropolitan Gas Act, 1876, sixteen-candle gas was also required. By the South Metropolitan Gas Act, 1900, the illuminating power of gas supplied by that company was reduced, on and after July 1st, 1901, to fifteen candles, and on and after July 1st, 1905, to fourteen candles; corresponding reductions in the standard price being made (see *post*, p. 339). See the further provisions hereon as to all these companies referred to at p. 64, *post.*

Act of 1880.

In 1880 an Act was passed entitled "The Gas Light and Coke and other Gas Companies Acts Amendment Act, 1880." The Act (s. 4) extends to the Gas Light and Coke Company, the Commercial Gas Company, and the South Metropolitan Gas Company, which three companies had then, by successive amalgamations, absorbed all the other gas undertakings supplying the metropolis. It proceeded on the preamble that it was expedient to amend the provisions of the Acts of 1875 and 1876 above mentioned, with respect to the testing of the gas supplied by the said companies respectively, and with respect to the forfeitures fixed by the said Acts, and in other respects. It repealed the various sections of the Commercial Gas Act, 1875, the Gas Light and Coke Company Act, 1876, and the South Metropolitan Gas Act, 1876, relating to the above matters, and substituted new enactments (see *post*, pp. 333 *et seq.*). See now the later provisions as to these matters referred to at pp. 64 *et seq.*, *post.*

South Metropolitan Gas Act, 1881.

By the South Metropolitan Gas Act, 1881, the company obtained power to establish new works at a place known as the "Greenwich Marshes," and also obtained power to raise further capital.

South Metropolitan Gas Act, 1882.

By the South Metropolitan Gas Act, 1882, the company obtained power to purchase certain additional lands and construct works, and also obtained an enlargement of their borrowing powers.

South Metropolitan Gas Act, 1896.

By the South Metropolitan Gas Act, 1896, the company were authorised to convert their then existing stocks (not including debenture stock) into a 4 per cent. stock, subject to the sliding scale. Sect. 16 provided for decrease and increase of the dividends payable by the company, according to increase or decrease in the standard price of gas charged by the company. See now the Act of 1900, *post*, p. 339. The Act of 1896 also authorised the conversion of the company's 5 per cent. debenture stock into a substituted debenture stock at less than 5 per cent., but not less than 3 per cent. This conversion of debenture stock was authorised to be effected by a resolution of the directors. This Act of 1896 recited in the preamble that "by reason of the system of the company under which persons in their employ receive by way of bonus a share in the profits of the company many of such persons hold ordinary stock in the capital of the company and it is expedient that provision should be made for the election by such persons of a director or directors to take part in the management of the affairs of the company." Accordingly, by s. 19 of the Act, the company were authorised, subject to the approval of the Board of Trade, to prepare a scheme for the purpose of enabling the employees of the company holding ordinary stock of the company to elect one or more of their number (but not exceeding three) to be a director or directors of the company. See also the South Suburban Gas Act, 1904, s. 5.

Profit sharing.

Employees' directors.

South Metropolitan Gas Act, 1897.

By the South Metropolitan Gas Act, 1897, the qualification of directors was altered.

Gas Light and Coke Act, 1898—conversion of debenture and capital stocks.

By the Gas Light and Coke Company's (Capital Consolidation) Act, 1898, the company were authorised to convert their existing debenture and capital stocks,—the bulk of the preference stocks into 4 per cent., the debenture stocks into 3 per cent., and the ordinary stock into 4 per cent. By s. 15 corresponding alterations were made in the sliding scale enacted by the Act of 1876, but see now the later provisions hereon referred to at p. 65, *post*. By s. 19 it is provided as follows:

> "Whereas the conversion by this Act authorised may affect the market prices of the company's stocks therefore be it enacted that in the event of any purchase of the company's undertaking by a public or local authority the market prices of the company's stocks shall not be taken into consideration in determining the price to be paid for the undertaking."

Select Committee of 1899 as to powers of charge.

In 1899 a Select Committee (of which Sir James Rankin was Chairman) was appointed to inquire into the powers of charge conferred by Parliament on the metropolitan gas companies, and to report as to the method in which those powers have been exercised, having regard to the difference of price charged by the various companies. The Committee examined witnesses from the Board of Trade, the London County Council, the Corporation of the City of London, several of the vestries of the metropolis, and representatives of all three of the gas companies supplying the metropolis. In their Report (Parliamentary Paper, No. 294 of 1899), the Committee made the following recommendations:

Recommendations of the Committee.

"(1.) That whenever any of the Metropolitan gas companies again come to Parliament for an extension or alteration of their capital powers, a revision of the sliding scale should take place, and that the standard price should be reduced to 3*s*. 3*d*. to carry the standard dividend of 10 per cent.; and that the existing scale of increase and decrease for dividend of ¼ per cent. for every penny of decrease or increase of price below or above 3*s*. 3*d*. be maintained, and that a secondary or additional scale be imposed which should permit of an increase or decrease of dividend over and above that regulated by the present scale of ¼ per cent. for every complete 3*d*. of decrease or increase below or above the standard price of 3*s*. 3*d*.

"(2.) That the area south of the river Thames, at present part of the district of the Gas Light and Coke Company, acquired by them from the absorption of the London Gas Company in 1883, should be transferred from the Gas Light and Coke Company to the South Metropolitan Gas Company, fair and reasonable price being paid by the latter to the former company for their property in the southern area.

"(3.) That the charge made by the Gas Light and Coke Company for the rents of automatic meters and stoves should be the same to consumers north and south of the Thames for fittings of the same quality and capacity, and that the prices charged by all the companies for the slot meters and fittings require regulation, having regard to the fact that the business is a new one, and has extended with extraordinary rapidity throughout the metropolis.

"(4.) That capital powers should not be granted to any gas company for more than five years if and when new capital is required, and that Parliament should revise the sliding scale, either by way of increase or decrease, when any application for new capital is made, if the circumstances of the times or the conditions of the company appear to require it.

"(5.) That an effort should be made by any company having obsolete or unproductive capital to redeem such capital by sinking fund or otherwise."

South Metropolitan Gas Act, 1900.

Reduction of illuminating power and standard price.

By the South Metropolitan Gas Act, 1900, it was provided that after July 1st, 1901, the illuminating power of the gas supplied by the company should be fifteen candles, and the standard price should be 3*s.* 2*d.*, and that after July 1st, 1905, the illuminating power should be fourteen candles, and the standard price 3*s.* 1*d.*; with liberty upon certain conditions to accelerate the reduction of the illuminating power from fifteen candles to fourteen candles. The Act then proceeded to make corresponding provisions for decrease and increase of the dividend payable by the company according to increase or decrease in the price of gas supplied by the company. See more fully, *post*, p. 339.

South Metropolitan Gas Act, 1901.

By the South Metropolitan Gas Act, 1901, that company were authorised to raise additional capital, and also to purchase by agreement so much of the undertaking of the Gas Light and Coke Company as is situate on the south side of the Thames. The provisions of this Act as to the raising of additional capital were amended by the South Metropolitan Gas Act, 1902.

Commercial Gas Act, 1902.

By the Commercial Gas Act, 1902, (2 Edw. 7, c. cxxxiv.) the capital stocks, and the debenture stock of the company were converted into stocks of other nominal amounts respectively but yielding equivalent amounts of dividend or interest. The illuminating power was reduced to fourteen candles and the standard price which was fixed by s. 53 of their Act of 1875, at 3*s.* 9*d.* was reduced to 3*s.* 3*d.* with power to the company to increase or diminish such standard price subject to the decrease or increase in the standard rates of dividend as defined by the Act (see s. 12). Provision was also made for the raising of further money by the creation and issue of capital stock, and debenture stock, the capital stock to be offered in the first instance to consumers of gas supplied by and to employees of the company.

Testing of fourteen-candle gas.

The Bill of the Commercial Gas Company contained a clause modifying the provisions of their Act of 1875 relating to the testing of gas so as to make the like provisions for the testing of fourteen-candle power gas as were already in force with respect to the supply of gas of that illuminating power in other parts of London, but in view of representations made during the passage of the Bill through Parliament on behalf of the London County Council the company agreed to withdraw the clause in the belief that the gas referees would have full power to prescribe the apparatus to be used in and method of testing gas appropriate to the candle power as reduced as aforesaid. The gas referees, however, held that in testing the gas they were bound by the provisions of the Act of 1875 both with regard to the burner to be used and the rate at which the gas should be consumed in such burner.

Commercial Gas Act, 1903.

The Board of Trade were about to appoint a departmental committee to inquire (*inter alia*) into the question of existing methods of testing the gas supplied within the administrative county of London; and temporary provision was therefore made by the Commercial Gas Act, 1903, for an amendment with respect to the testing of the gas supplied by the company.

Gas Light and Coke Act, 1903.

Alteration of standard price.

By the Gas Light and Coke Company's Act, 1903 (3 Edw. 7, c. xli.) the company was authorised to create and issue debenture stock not exceeding the nominal amount of £750,000. By s. 8 of the Act the standard price was reduced from 3*s*. 9*d*. to 3*s*. 4*d*. with a new sliding scale as to dividend (see now Act of 1909, *post*).

Departmental Committee of 1904 on testing of gas in London.

The Departmental Committee of the Board of Trade, which was appointed to inquire and report as to the statutory requirements relating to the illuminating power and purity of gas supplied by the metropolitan gas companies, and as to the methods then adopted for testing the same, and as to whether any alteration was desirable in such requirements or methods, sat for twenty-one days and heard evidence from the Metropolitan Gas Referees, the representatives of the London County Council, the Corporation of the City of London, and each of the gas companies concerned, viz., Gas Light and Coke Co., the South Metropolitan Gas Co., and the Commercial Gas Co. They made their report, dated May 19th, 1904, Parly. Paper, 1904, Cd. 2118. The report concludes with the following recommendations:

Recommendations of the Committee.

(*a*) That the standard burner to be used for testing the illuminating power of all qualities of gas should remain, as at present, the Sugg's London (No. 1) Argand burner, and that the chimney to be used therewith should be of uniform size, namely, six inches long and one and seven-eighths inches internal diameter.

(*b*) That for the purpose of determining the nominal illuminating power of gas of any quality, the gas should be burnt in the standard burner at the rate of 5 cubic feet an hour.

(*c*) That provision should be made for official testing of illuminating power in a flat flame burner, of a kind to be prescribed by the gas referees, and that the result of such tests be recorded and notified to the various authorities and companies concerned and to the Board of Trade.

(*d*) That official tests of the calorific power of the gas supplied by each company should also be made, recorded and notified as above.

(*e*) That the existing statutory provision which requires the gas to be wholly free from sulphuretted hydrogen (which is in fact impracticable) should be modified, and that for the future the test which the gas should be required to pass should not be more severe than that specified in the schedule to the Gasworks Clauses Act, 1871.

(*f*) That the obligations placed upon the companies with regard to the removal of the sulphur impurities (other than sulphuretted hydrogen) should be abolished, but that testing for information only should continue to be made in such manner and to such extent as may be prescribed by the gas referees.

(*g*) That the gas to be tested should be brought direct from the main to the testing room by a single service pipe without tap, branch or connection.

(*h*) That in case of difference between the gas companies and the gas referees as to the reasonableness of any requirements of the referees, the decision of the chief gas examiner should be conclusive.

(*j*) That except as may be involved in the foregoing recommendations, the powers and duties of the gas referees should remain as at present.

(*k*) That it should not be obligatory upon the controlling authority to test on Sundays.

(*l*) That the duties of the chief gas examiner should include the hearing of all applications by the controlling authority for the recovery of forfeitures in respect of illuminating power, purity, or pressure, and the assessment of the forfeitures to be paid by the company in all cases except those in which he is unable to certify that the default is not substantial, or that it is not due to careless conduct of the works.

Legislation of 1905.

In the Session of 1905, the London County Council promoted a Bill to carry out the recommendations of the Board of Trade Departmental Committee. This was opposed by the metropolitan gas companies, who also promoted a Bill of their own. In the result, a Committee of the House of Commons (Mr. Cawley, Chairman) resolved to uphold the recommendations of the Departmental Committee, and passed the Bill of the London County Council, and rejected the Bill promoted by the companies.

In the House of Lords, some of the provisions of the Bill were modified, and the Bill became the London Gas Act, 1905.

London Gas Act, 1905.

The following are, shortly stated, the main provisions of the Act:

Section 3.—The gas referees are to prescribe the burner for testing the illuminating power of gas and the chimney (if any) to be used with the burner. The burner so prescribed is to be of such a pattern (not being an incandescent or similar burner) as shall be practicable for use by the consumer, and the burner and chimney (if any) shall be the most suitable for obtaining and in making the test shall be so used as to obtain from the gas when consumed at the rate of five cubic feet an hour the greatest amount of light.

Section 4 (1).—The gas supplied by the Gas Light and Coke Company shall be such as to produce when consumed at the rate of five cubic feet an hour in the prescribed burner a light equal in intensity to sixteen sperm candles of six to the pound, and each consuming 120 grains an hour.

Section 4 (2).—The gas supplied by the South Metropolitan and Commercial Gas Companies shall be such as to produce when consumed in the above manner a light equal in intensity to the light produced by fourteen sperm candles.

Section 4 (3).—If on any one day at any testing place the illuminating power is deficient to an extent not exceeding one candle, the average of the testings at that place on that day and the preceding and following day is to be deemed to represent the illuminating power on that particular day.

Section 5.—Gas examiners are at the places and in the manner prescribed by the gas referees to make testings to ascertain (i.) the calorific power; (ii.) the purity as regards sulphur other than sulphuretted hydrogen; and (iii.) the illuminating power as ascertained by means of a flat flame burner to be prescribed by the gas referees which shall be of the best available pattern. The companies are not to be liable to forfeitures in respect of testings made under this section.

Section 6.—Gas supplied is not to exhibit any trace of sulphuretted hydrogen when tested in the mode prescribed by the gas referees, such mode not to be more stringent than that prescribed in Schedule A of the Gasworks Clauses Act, 1871, and sect. 15 of the Gas Light and Coke and other Gas Companies Acts Amendment Act, 1880, is to apply accordingly

Section 7.—No liability for forfeiture in respect of sulphur impurities other than sulphuretted hydrogen, and the gas referees are not to prescribe or certify the amount of sulphur impurities other than sulphuretted hydrogen.

Section 8.—Provision is hereby made as to pipes connecting mains with testing places.

Section 9.—Provision is hereby made for an appeal to the chief gas examiner if any company is aggrieved by any prescription or certificate of the gas referees.

Section 10.—Testings on Sundays are not obligatory.

Sections 11 and 12.—Provision is made, in substitution of the provisions of sect. 12 of the Act of 1880, for an appeal to the chief gas examiner as to any report of a gas examiner. If on such appeal the chief gas examiner certifies that any default of the company is not substantial or not due to careless conduct, proceedings are not to be taken before a petty sessional court for the determination of the amount of the forfeiture to be paid, but the chief gas examiner, if requested so to do by the controlling authority, may determine, subject to the provisions of sect. 14 of the Act of 1880, the amount of forfeiture to be paid, such forfeiture to be recoverable summarily as a civil debt.

Section 15 imposes a penalty for neglect to comply with prescriptions of gas referees, and the remaining sections deal with matters of procedure only.

Gas Light and Coke Act, 1909

Under the Gas Light and Coke Company's Act, 1909 (9 Edw. 7, c. lxxxvii.), the Gas Light and Coke Company acquired the undertaking of the West Ham Gas Company. By the same Act (s. 34) the standard rate of dividend on the ordinary stock of the Gas Light Company was fixed at 4 per cent. per annum, subject to increase or reduction in accordance with the scale therein set forth, and the standard price to be charged for gas was reduced to 3*s.* 2*d.*, with a provision for the increase or reduction of the price subject to the reduction or increase in the dividend payable on ordinary stock as therein mentioned. The standard for the illuminating power of the company's gas was also (by s. 38) reduced from sixteen to fourteen candles, and the fourteen-candle standard thereby became applicable throughout London.

Standard of calorific power

The company assented to the insertion in this Act of a standard of calorific power with penal testing. The agreement for its insertion was a term in the settlement of the opposition to the proposals in the Bill to acquire the West Ham Company's undertaking and to reduce the standard for illuminating power, and cannot be regarded as a parliamentary precedent. In the same session, Parliament declined to insert a similar provision in the Coatbridge Gas Order.

The Gas Light and Coke Company's Act, 1909, is set out at p. 350, *post.*

Amalgamations.

Since the passing of the Metropolis Gas Act, 1860, the following companies have become amalgamated with the Gas Light and Coke Company, viz.: (1) the City of London Gaslight and Coke Co. (1870); (2) the Great Central Gas Consumers Co. (1870); (3) the Western Gaslight Co., Limited (1872); (4) the Imperial Gaslight and Coke Co. (1876); (5) the Independent Gaslight and Coke Co. (1876); (6) the London Gaslight Co. (1883); (7) the Victoria Docks Gas Co. (1871); (8) the Equitable Gas Co. (1871); (9) West Ham Gas Company (1909). Of these amalgamations, Nos. (1) and (2) were effected under the powers of the City of London Gas Act, 1868; Nos. (3)—(6) under the powers of that Act and the Gas Light and Coke Company's Act, 1871; Nos. (7) and (8) under the powers of the Gas Light and Coke Company's Act of 1870 and 1871 respectively and No. 9 under the Act of 1909. See Schedule B. to the Gas Light and Coke Company's (Capital Consolidation) Act, 1898. By s. 39 of the scheme sanctioned by Order in Council, dated May 22nd, 1883, whereby the London Gaslight Company became amalgamated with the Gas Light and Coke Company, it is provided that "the united company shall not charge in the districts of the London company south of the river Thames a higher price per 1,000 cubic feet of sixteen-candle gas, either for public or private lighting, than the price for the time being charged by the South Metropolitan Gas Company for gas of the same illuminating power." By s. 44 of the Gas Light and Coke Company's Act, 1909, the words "fourteen-candle gas" were substituted for the words "sixteen-candle gas" in the last-mentioned section.

With the Commercial Gas Company has been amalgamated the Ratcliff Gaslight and Coke Company. This was sanctioned by the Commercial Gas Act, 1875.

By the South Metropolitan Company's Act of 1876, s. 64, that company were authorised to amalgamate their undertaking with that of any other gas company supplying gas in the Metropolis on the south side of the Thames (except the Crystal Palace District Gas Company), subject to the conditions and restrictions contained in the City of London Gas Act, 1868, except the restriction as to time contained in s. 18 of that Act. This disability was removed by the Crystal Palace District Gas Act, 1893 (56 & 57 Vict. c. clxviii.), s. 30. See *post*, p. 274. Under the powers of the City of London Gas Act, 1868, and the South Metropolitan Gas Act, 1876, there have been amalgamated with the South Metropolitan Company the following companies: the Surrey Consumers Gas Co. (1879); the Phœnix Gaslight and Coke Co. (1880); the Woolwich, Plumstead, and Charlton Consumers Gas Co. (1884); and the Woolwich Equitable Gas Co. (1884). These amalgamations were effected by schemes confirmed in accordance with the City of London Gas Act, 1868. By virtue of these schemes the several companies were amalgamated into one company, called the South Metropolitan Gas Company; the original name of the company having been the South Metropolitan Gaslight and Coke Company. See the preamble to the South Metropolitan Gas Act, 1896.

Metropolis Gas (Prepayment Meter) Act, 1900.

By the Metropolis Gas (Prepayment Meter) Act, 1900, provision is made to regulate the charges in connection with the use of prepayment meters. See *ante*, p. 43, and the Act, *post*, p. 293.

South Suburban Gas Act, 1904.

By the South Suburban Gas Act, 1904 (4 Edw. 7, c. xci.), the name of the Crystal Palace District Gas Company was changed to the South Suburban Gas Company, and by s. 2 thereof (repealing s. 17 of the Crystal Palace District Gas Act, 1893), it was provided that the standard price should be 3*s.* 2*d.*, with power to increase or reduce the price above or below such standard price, subject to a reduction or increase in the standard dividend on ordinary stock as therein specified. Provision was made that this dividend should be dependent upon the price of gas in any *half-year* instead of in any *year*, as provided by s. 17 of the Act of 1893.

South Suburban Gas Act, 1905.

By the South Suburban Gas Act, 1905 (5 Edw. 7, c. xviii.), it was provided that the company should not be liable to any forfeiture by reason of the presence in the gas supplied by them of sulphur impurities other than sulphuretted hydrogen.

South Suburban Gas Act, 1906.

By the South Suburban Gas Act, 1906 (6 Edw. 7, c. lxvii.), it was provided (by s. 2) that the standard price to be charged by that company should be 2*s.* 9*d.*, provided that the company might increase or reduce the price charged above or below the standard price, subject to a reduction or increase in the dividend payable by the company on their ordinary stock as therein specified. It was further enacted (by s. 3) that the prescribed number of candles should be fourteen, provided that if the illuminating power shall be below such prescribed number to an extent not exceeding half a candle the company shall not be liable to any penalty, and that if such deficiency exceeds half a candle, but does not exceed one candle, the penalty shall not exceed £5. By the same section it is further enacted that the burner to be used shall be the Metropolitan Argand Burner (No. 2) or such other burner as may be for the time being approved by the Board of Trade, provided that such other burner shall be of such a pattern (not being an incandescent or similar burner) as shall be practicable for use by the consumer, and shall, with the chimney (if any) to be used therewith, be the most suitable for obtaining from the gas, when consumed at the rate of five cubic feet an hour, the greatest amount of light; provided also that the said Metropolitan Argand Burner (No. 2) or such other burner as aforesaid, shall in making the test be so used as to obtain from the gas when consumed at the rate aforesaid the greatest amount of light. It is also enacted by the same section that the standard for measuring the illuminating power shall be Harcourt's Standard Pentane Ten-candle Lamp, which shall be used with an open-bar photometer, and that the gas under examination shall be kept burning at the said rate of five cubic feet an hour for at least thirty minutes before any testing is made.

Sect. 5 of the same Act makes provision as to testing for calorific power, sulphur impurities, and illuminating power with flat-flame burners similar to that in s. 5 of the London Gas Act, 1905, *supra*. Provision was also made for testing illuminating power with incandescent burners.

PART II.—WATER.

WATER companies, when they have no statutory authority for that purpose, are liable to indictment and to proceedings for injunction for breaking up the public streets. How far such proceedings will succeed where the company are careful to cause no unnecessary or permanent obstruction, is illustrated by reference to the cases collected, *post*, pp. 164 *et seq.*

Effect of Parliamentary powers.

Water companies, on obtaining parliamentary authority, acquire compulsory powers, if necessary (except where they proceed by Provisional Order), to take land and water rights; power to break up the streets, under superintendence, for the laying and renewing of their pipes; power to charge rates not exceeding the authorised maximum, based on the rateable value of property, and power to require payment of the same quarterly in advance; and power to recover such rates by the summary method of distraint with a further power of cutting off the supply; and the company's water supply is protected by penalties against the fouling, waste or misuse of it. On the other hand, the company may be compelled, under the conditions provided, to afford a supply of pure and wholesome water, unless prevented by frost, unusual drought or other unavoidable cause or accident; and their profits are restricted to 10 per cent. on their ordinary capital. In many cases the supply is required to be constant.

Dividend on new capital.

When a company comes to Parliament for power to raise additional capital the dividend on the new capital is generally fixed at 7 per cent. for the ordinary stock, and 5 per cent. for the preference.

Auction clause.

Since the year 1887, the Standing Order 188, quoted at p. 7, has been made applicable to water companies so far as regards the auction clause, and therefore the Bill or Provisional Order must contain an enactment requiring the additional capital to be offered by public auction or tender.

Powers of local authorities.

By s. 51 of the Public Health Act, 1875, any urban authority may provide their district or any part thereof, and any rural authority may provide their district or any contributory place therein, or any part of any such contributory place, with a supply of water proper and sufficient for public and private purposes. For those purposes or any of them both urban and rural authorities are authorised (1) to construct and maintain waterworks, dig wells, and do any other necessary acts; (2) to take on lease or hire any waterworks and (with the sanction of the Local Government Board) purchase any waterworks or any water or right to take or convey water, either within or without their district, and any rights, powers and privileges of any water company; and (3) to contract with any person for a supply of water.

Restriction where a statutory company exists.

The following restriction is placed upon the powers of urban and rural authorities alike;—before commencing to construct waterworks within the limits of supply of any water company empowered by Act of Parliament, or any order confirmed by Parliament, to supply water, the local authority must give written notice to every water company within whose limits of supply the local authority are desirous of supplying water, stating the purposes for which and (as far as may be practicable) the extent to which water is required by the local authority. Sect. 52 then proceeds to enact that it shall not be lawful for the local authority to construct any waterworks within such limits if and so long as any such company are able and willing to supply water proper and sufficient for all reasonable purposes for which it is required by the local authority. Any difference as to whether the water which any such company are able and willing to lay on is proper and sufficient for the purposes for which it is required or whether the purposes for which it is required are reasonable, or (if and so far as the charges of the company are not regulated by Parliament) as to the terms of supply, must be settled by arbitration in manner provided by the Public Health Act, 1875.

Operation of s. 52 of Public Health Act, 1875.

Sect. 52 of the Act of 1875 has been put in operation in many cases, and arbitrations held. Those of which a report exists are referred to *post*, pp. 852 *et seq.*

Provision in cases where company fails to supply.

Of recent years it has become usual to introduce into Bills or Provisional Orders, obtained for the first time by companies or individuals, a clause to the effect that if at any time after the expiration of a certain limited time (*e.g.*, three or five years) from the commencement of the Act or Order, the undertakers are not furnishing or prepared on demand to furnish a sufficient supply of water in accordance with the provisions of the Act or Order in any part of the district, the local authority may provide such supply under the Public Health Act, 1875.

Local authority must supply pure and wholesome water.

A local authority supplying water under the powers of the Public Health Act, 1875, must provide and keep in their waterworks a supply of pure and wholesome water. Constancy of supply and pressure are left optional (s. 55, *post*, p. 860).

Power to charge a water rate.

May be compelled to charge water rate.

By s. 56 of the Act of 1875, where a local authority supplies water to any premises, they may charge in respect of such supply a water rate to be assessed on the net annual value of the premises, ascertained in the manner by that Act prescribed with respect to general district rates. By the Public Health (Water) Act, 1878, s. 10, a small number of ratepayers may compel them to charge such water rate. See, *post*, p. 924.

Where a local authority supply water within their district, they have the same powers and are subject to the same restrictions for carrying water mains within or without their district as they have and are subject to for carrying sewers within or without their district. This subject is fully explained *post*, p. 856. As to their powers with regard to the construction of reservoirs, see *post*, p. 855.

Local authorities laying mains outside their district.

Any water company may contract to supply water or may lease their waterworks to any local authority, and power is also given them to sell their waterworks to the local authority. See *post*, p. 870.

Water company may lease or sell waterworks to local authority.

As to the formation of united districts for the purposes of water supply, see *post*, p. 896.

United districts.

Local authorities are empowered to compel occupied houses to be supplied with water. The conditions under which this can be effected are dealt with *post*, p. 867.

Local authorities may compel houses to be supplied.

By the Public Health (Water) Act, 1878, the power of compelling houses to be supplied is, as regards rural districts, considerably enlarged, s. 3 enacting that "it shall be the duty of every rural sanitary authority, regard being had to the provisions in this Act contained, to see that every occupied dwelling-house within their district has within a reasonable distance an available supply of wholesome water sufficient for the consumption and use for domestic purposes of the inmates of the house." The Act of 1878 further provides that it shall not be lawful in any rural district to erect or to re-build houses unless there is provided within a reasonable distance an available supply of wholesome water; and power is given to rural authorities to provide stand-pipes and to recover water rates or water rents from the owner or occupier of every dwelling-house within 200 feet of any such stand-pipe in the same manner, in all respects, as if the supply had been given on the premises. The Local Government Board are authorised to invest any urban authority with the powers of rural authorities under the Act of 1878. See *post*, p. 924. As to the further powers given to parish councils and district councils with reference to water supply, see *post*, p. 926.

Special powers of rural authorities.

Urban authorities may be invested with special powers of the Act of 1878.

When local authorities require to put in force the compulsory powers of the Lands Clauses Act, 1845, for any purpose connected with water supply, their course is to obtain a Provisional Order under s. 176 of the Public Health Act, 1875. The power of making such an order rests with the Local Government Board. Before proceeding, the advisers of local authorities should carefully peruse the instructions on this subject issued by the Local Government Board. See these instructions, *post*, p. 932. It

Procedure where local authority require to take lands compulsorily for water purposes.

Water rights.

was at one time considered that the Board had power to make an order for the compulsory taking of water rights, such as the taking of the whole or part of the water from a river, stream, or lake. It is now conclusively settled that they have no such power. At p. 883 the reason is fully explained. When it is necessary to acquire water rights compulsorily a local authority must proceed by private Bill.

Borough Funds Acts.

The conditions under which local authorities may expend the funds or rates under their control in promoting or opposing Bills in Parliament are considered in connection with the Borough Funds Acts, 1872 and 1903, *post*, pp. 1032, 1039.

Costs of proceeding by Bill when Provisional Order obtainable.

By s. 10 of the Borough Funds Act, 1872, it is provided that the provisions of that Act shall not extend to applications for any Bill in Parliament for any object which would, for the time being, be attainable by Provisional Order. As to when the Borough Funds Acts must be complied with and as to when they need not, see the note to s. 2, *post*, p. 1036.

Gas and Water Works Facilities Acts, 1870 and 1873.

Under the Gas and Water Works Facilities Acts, 1870 and 1873, Provisional Orders, subject to confirmation of Parliament, may be obtained by "any company, companies or person." So far as regards water, Provisional Orders may be obtained (a) to construct or to maintain and continue waterworks and works connected therewith, or to supply water in any district within which there is not an existing company, corporation, body of commissioners or person, empowered by Act of Parliament to construct such works and to supply water; (b) to raise additional capital necessary for any of those purposes; (c) to enable two or more companies or persons duly authorised to supply water in any district or in adjoining districts to enter into agreements jointly to furnish such supply, or to amalgamate their undertakings; (d) to authorise two or more companies or persons supplying water in any district or in adjoining districts to supply water and to enter into agreements jointly to furnish such supply and to amalgamate their undertakings.

Procedure not available to local authority as regards water.

Local authorities cannot obtain Provisional Orders under these Acts so far as regards water.

Lands cannot be taken compulsorily under Acts of 1870 and 1873.

A Provisional Order under the Gas and Water Works Facilities Acts, 1870 and 1873, cannot confer the power of taking land compulsorily. It is expressly provided by s. 7 of the Act of 1870 that a Provisional Order shall not contain any provision for empowering the undertakers or any other person to acquire lands otherwise than by agreement, and by s. 10 it is further provided that the provisions of the Land Clauses Acts (1) with respect to the purchase and taking of lands otherwise than by agreement, and (2) with respect to the entry upon lands by the promoters of the undertaking, shall be excepted from incorporation. Therefore, where companies or private persons desire to take land compulsorily, whether for the purposes of water supply or of gas supply, they must proceed by private Bill, and not by Provisional Order.

Power of Local Government Board to make Provisional Orders under Public Health Act, 1875.

By s. 303 of the Public Health Act, 1875, the Local Government Board are empowered to issue Provisional Orders to amend local Acts. Mr. John Lithiby, C.B., the legal adviser to the Board, in his evidence before the Committee on the Water Supplies (Protection) Bill (1910), stated the practice of the Board in relation to waterworks Provisional Orders during the past twenty-five years. His evidence is of great interest and value and is contained on pp. 10—12 of the Minutes of Evidence [Parliamentary Paper, No. 226, of Session 1910].

Notices when water is proposed to be taken from stream.

By Standing Order 14 of the House of Commons it is required that on or before December 15th immediately preceding the application for a Bill, whereby it is proposed to abstract water from any stream for the purpose of supplying any cut, canal, reservoir, aqueduct, navigation, or waterwork, notice in writing of such Bill shall be given to the owners or reputed owners, lessees, or reputed lessees, and occupiers of all mills and manufactories or other works using the waters of such stream for a distance of twenty miles below the point at which such water is intended to be abstracted, such distance to be measured along the course of such stream, unless such waters shall, within a less distance than twenty miles, fall into or unite with any navigable stream, and then only to the owners or reputed owners, lessees, or reputed lessees and occupiers of such mills and manufactories or other works as aforesaid which shall be situate between the point at which such water is proposed to be abstracted, and the point at which such water shall fall into or unite with such navigable stream. These notices must state certain particulars required by the Standing Order. And see Standing Order of the House of Lords, No. 14.

Maps to be deposited when Bills propose taking of water or extension of limits of supply.

By Standing Order 25c of the House of Lords it is also provided that where, under the powers of any Bill, any water may be taken, collected, or impounded for the purpose of a water supply, the Promoters shall, on or before November 30th, deposit at the office of the Local Government Board, and also at the Office of the Clerk of the Parliaments, an ordnance map on the scale of 6 inches to a mile, showing by a distinguishing mark the position of each reservoir, well, conduit, or other work proposed to be authorised by the Bill; and where the proposed source of supply is a river, stream, or lake, an ordnance map on the scale of not less than 1 inch to a mile, showing by a clearly marked line the catchment area or gathering ground from which the waters are derived. It is further provided that, where under the powers of any Bill it is proposed to supply with water any area not previously included within the Promoters' limits of supply, the Promoters shall similarly deposit an ordnance map on the scale of 1 inch to a mile, showing respectively the existing limits of supply and the area proposed to be added thereto.

Compensation water.

When Parliament authorises undertakers to take water from a watershed or collecting ground, it is the invariable practice to provide for compensation for injury likely to be caused by the abstraction of water which would otherwise find its way into the streams or rivers fed by the watershed. This compensation may be in water, or in money, or in both; and in rare instances the injury likely to occur to particular works on a stream may be so great that a clause may be inserted requiring the undertakers to purchase the mills or works of petitioners if they can "prove to the satisfaction of the arbitrator that the business or businesses or either of them cannot be satisfactorily carried on by reason of the construction or maintenance of the said works or execution of the said powers." The words quoted are taken from the Rochdale Corporation Water Act, 1898 (61 & 62 Vict. c. ccxxxvi.), s. 38 (2) (b).

Measure of water compensation.

The compensation given by Parliament is generally in water. One-third of the mean available rainfall of three consecutive dry years is the measure usually adopted. Provision is usually made for the regular, equal, and continuous supply of this compensation water to the rivers and streams during the twenty-four hours of each day. For this purpose it is usual to authorise the construction by the undertakers of one or more compensation reservoirs according to the necessities of the case.

Standing Orders as to compensation water.

By Standing Order 185 of the House of Commons it is provided that—

> "In the case of every Bill whereby it is proposed to impound or abstract the whole or any part of the water of any river or stream, the Committee on the Bill shall inquire into the expediency of making provision, so far as may be practicable, for giving a flow of water in compensation for the water so impounded or abstracted, and that the whole or a minimum amount of such compensation water shall be given in a continuous flow throughout the twenty-four hours of every day, and shall report to the House accordingly."

See a similar Standing Order of the House of Lords, No. 110a.

See the clause as to compensation water in the Model Water Bill, *post*, p. 703.

Exceptional cases.

In very exceptional circumstances Parliament has required the compensation water to be sent down some particular stream during the working hours of the mills instead of during the twenty-four hours of the day. As instances, see (1) the Oldham Corporation Act, 1886 (49 & 50 Vict. c. cxvii.), s. 15, which requires the compensation water in respect of the Hull Brook to be sent down during twelve hours of each working day (as defined by the section), except Saturday, and during seven hours on each Saturday, commencing in each case at five o'clock in the morning; (2) the Huddersfield Water Act, 1869 (32 & 33 Vict. c. cx.), s. 28, which requires certain compensation water to be sent down the Brow Grains Dyke during each lawful working day from 6 a.m. to 6 p.m.; the Huddersfield Corporation Waterworks Act, 1890 (53 & 54 Vict. c. cxv.), s. 26, which requires the compensation water in respect of the Wessenden Brook to be given during twelve hours (6 a.m. to 6 p.m.) each working day, except Saturday, and on each Saturday from 6 a.m to 12 noon; and the Huddersfield Water Act, 1908, amending certain of the provisions of the former Acts with regard to compensation water; and (3) the Halifax Improvement Act, 1853 (16 & 17 Vict. c. clxvii.), s. 22, the Halifax Corporation Waterworks and Improvement Act, 1863 (31 & 32 Vict. c. cxxvii.), s. 14; and the Halifax Water and Gas Extension Act, 1876 (39 & 40 Vict. c. ccxxxiv.), s. 18. See also Sheffield Corporation Water Act, 1896 (59 & 60 Vict. c. cxc.), ss. 22, 24 and 25, and two special agreements set out in the 4th Schedule to the Act, and Sheffield Corporation Act, 1907, ss. 29—35.

For other examples of special clauses with regard to compensation water, see the Leeds Corporation (Consolidation) Act, 1905, ss. 10—16, and Leeds Corporation Act, 1907, s. 15; Bolton Corporation Act, 1905, ss. 10—15; Arbroath Corporation Water Order Confirmation Act, 1905, s. 13; Forfar Corporation Water Order Confirmation Act, 1906, s. 10; Clydebank and District Water Board Order Confirmation Act, 1906, s. 32; Blairgowrie, Rattray and District Water Board Order Confirmation Act, 1906, s. 52; Tees Valley Water (Consolidation) Act, 1907, ss. 36—48; Renfrewshire Upper District (Eastwood and Mearns) Water Act, 1907, s. 37; Penrith U. D. C. Act, 1907, s. 9; Birkenhead Corporation Water Act, 1907, s. 58; Conway and Colwyn Bay Joint Water Supply Board Act, 1908, s. 4; Burnley Corporation Act, 1908, s. 10; Pontypridd Waterworks and Tramroads Act, 1908, ss. 7—9; Pontypool Gas and Water Act, 1909, s. 18;

Cardiff Corporation Act, 1909, s. 9; and Greenock Corporation Act, 1909, ss. 297, 298.

Rule for ascertaining amount of water compensation.

As above stated, the measure of water compensation is usually one-third of the mean available rainfall of three consecutive dry years. In most parts of the United Kingdom the amount of rainfall is now known, or approximately known, by the system of rain gauges, with which the name of the late Mr. George James Symons, F.R.S., is associated.

The first process in the calculation is to find the mean of three consecutive dry years. The three years must not only be dry years, but consecutive dry years. If the available statistics afford reliable figures for three such years, then the mean of those three consecutive years may be taken. If not, the mean available rainfall of three consecutive dry years is ascertained by deducting from the average annual rainfall one-sixth, or, according to some, one-fifth.

The next step is to deduct the proportion of the rainfall which fails to reach the streams and rivers owing to evaporation and to absorption by vegetation. This figure is variously put at fourteen and at fifteen inches. It is believed that fifteen inches is a fair figure, though it has been contended, that the figure ought to be more than fifteen where the watershed is flat, *e.g.*, a tableland, and where, so to speak, the water is "laid out to dry."

The third step is to divide the result by three, and that gives the one-third of the mean available rainfall of three consecutive dry years. Thus, if the average rainfall of three consecutive dry years be, say, *e.g.*, thirty-six inches, a deduction of fifteen is made for evaporation and absorption, which leaves the available rainfall at twenty-one inches, and therefore seven inches, being one-third of that, is the amount of water compensation to be given.

In the Derwent Valley Scheme authorised in 1899, Parliament made provision for two arbitrators and an umpire (called the "referees"), to put up gauges and ascertain the annual rainfall, over a period of the next succeeding six years, and to find the average rainfall, and to ascertain and declare the "available rainfall," and provision was then made that $\frac{1}{365}$th part of the available annual rainfall so ascertained should be sent down during the twenty-four hours of the day. See Derwent Valley Water Act, 1899 (62 & 63 Vict. c. cclxix.), s. 51.

Rule as to one-third not always followed.

The rule of ascertaining the fair amount of water compensation does not fit every case. In cases out of the ordinary category a less amount has been allowed. Thus, in the great schemes of Thirlmere for Manchester, and Elan and Claerwen Valleys for Birmingham, the compensation water required to be given was calculated upon one-fourth instead of the usual third of the mean available rainfall of three consecutive dry years; and in the case of the Vyrnwy scheme for Liverpool somewhat less than that proportion. As a general rule, where the district through which the streams compensated flow is agricultural, the compensation is one-fourth, and where it is manufacturing the compensation is one-third. In all the three great instances above mentioned, the amount in gallons of the compensation water was ascertained and fixed, and inserted in the several Acts; and that is the usual course.

Decisions with regard to compensation water.

By the Swansea Local Board of Health Water Works Act, 1860 (23 & 24 Vict. c. xlviii.), the Swansea Local Board were authorised to construct certain reservoirs and to impound certain waters. By s. 29 the local board were required to send certain specified quantities of compensation water daily down the Lliw River and the Blaenant Ddu Brook respectively. Section 30 provided that in case of any failure, neglect, or default certain penalties and damages should be recoverable. In 1884 another Act was passed empowering the corporation, in whom the powers of the local board had become vested, to construct certain additional reservoirs. Section 24 of this Act repealed the provisions of the former Act in regard to penalties, but enacted in lieu thereof—

> "In case of any failure, neglect or default by or in consequence of which the quantity of water which by the Act of 1860 and this Act is required to flow or be discharged from or out of the reservoirs on the River Lliw and Blaenant Ddu Brook respectively shall not so flow or be discharged, the corporation shall for and during every day on which such failure or neglect or default shall occur forfeit and pay by way of penalties to the owners and occupiers of lands, ornamental waters, fish ponds, mills and works interested in the waters of the said river and brook and of each of them, and who may sue for and recover the same, the sum of five pounds, together with the amount of damage or loss which shall accrue to or have been sustained by such owners and occupiers in any court of competent jurisdiction. Provided that the corporation shall not be liable to make good any such damage or loss in case of inevitable accident beyond the control of the corporation . . . ."

The provision as to the compensation water was the only compensation given to the riparian owners for taking the waters of the streams referred to. In 1885, in consequence of excessive droughts and of the reservoir leaking, the water in the reservoir became very low, and it became impossible for the corporation to supply both the riparian owners and the town of Swansea. They accordingly elected to supply the town by sending the water into the mains rather than to supply the riparian owners by sending it down the river Lliw and the Blaenant Ddu Brook. Three actions were thereupon commenced by owners and occupiers of mills and factories on the said river and brook. In the Court of Appeal the Master of the Rolls (Lord Esher), in giving judgment, said: "What meaning must be given to the words 'failure, neglect, or default'? When a deficiency in the flow of water resulted from no act on the part of the corporation, but was produced by some cause over which the corporation had no control, that would not, in my opinion, be a 'failure' within the meaning of the section. But if by doing any act, or by omitting to do any act which it was in their power to do, the corporation caused the flow of water to be diminished, then, in my opinion, there would be a 'failure' within the meaning of the section." And he held that, "considering the present condition of engineering skill, the leaks were something which it was possible for the corporation to put right, and their omission to do this amounted to a 'failure' within the meaning of the section, and rendered them liable to a penalty." The next question that arose was whether the corporation were liable to one penalty only, or to a penalty in each of the actions. Denman and Wills, JJ., who respectively had tried the actions on circuit, held that the defendants were liable to a penalty of £5 per day for each day to each of the owners of lands in respect of which he or they was or were separately interested in the compensation water. The Court of Appeal, however, took a different view in regard to this. The Master of the Rolls said as follows: "But then arose a second question, namely, who were entitled to recover these penalties? To say that every owner and occupier of riparian land along the whole course of the stream was entitled to recover separate penalties from the corporation for every infraction would be to produce an outrageous result from the Act. The words were, however, susceptible of another meaning which would produce a reasonable and not uncommon mode of enforcing such obligations. The true interpretation was that every riparian owner who was interested in the water had the right to bring an action for penalties in such a case, but only one penalty could be recovered, and when once the penalty had been recovered, all the other actions for penalties must fail. Of course, as I have said, they would each recover for any damages which they had sustained, but only one penalty could be recovered in respect of each day" (*Lewis* v. *Swansea Corp.* (1888), 4 T. L. R. 122, 706).

A point of a somewhat similar kind arose in the *Huddersfield Case* of 1902. The Huddersfield Water Act, 1869 (32 & 33 Vict. c. cx.), authorised the corporation to construct waterworks and to appropriate and use waters which would otherwise "directly or derivatively flow or proceed into" certain streams. As compensation for the taking of such waters s. 28 required that—

> "The corporation shall cause to flow from the reservoir to be constructed at or near Blackmoor Foot, down a pipe or aqueduct, into the said Brow Grains Dyke at a point . . . . 951 gallons per minute during the following hours of every lawful working day, that is to say, from 6 o'clock in the forenoon to 6 o'clock in the afternoon."

Sect. 31 required the corporation to construct and maintain measuring gauges. Sect. 32 provided that—

> "In case of neglect on the part of the corporation to maintain any such gauge in a state of efficiency and in case of any other neglect by or in consequence of which any of the several quantities of water aforesaid from the said reservoirs shall not so flow, the corporation shall for every day on which such neglect occurs forfeit and pay to the occupiers of each of the mills and works affected thereby (who may sue for and recover the same) the sum of £5, and shall in addition make compensation for any loss, damage, or injury sustained by such occupiers, or any of them, in respect of which such penalties are an insufficient compensation, and such occupiers may respectively from time to time recover such compensation with costs from the corporation by proceedings in any court of competent jurisdiction."

Actions were brought against the corporation by eight different occupiers of mills and works along the stream, alleging that through the neglect of the corporation on all and each of the working days comprised within the period extending from September 23rd, 1901, to November 11th, 1902, inclusive, the quantity of water aforesaid did not so flow as required by the said Act from the said reservoir at Blackmoor Foot into the said Brow Grains Dyke, whereby damage was sustained. Each of the plaintiffs claimed £215, being at the rate of £5 per day for each of the days on which the shortage occurred. The corporation pleaded that this was not due to "neglect" on their part, and that if liable, they were only liable to one penalty of £5 for each day. The actions were consolidated and were tried together. The plaintiffs gave evidence that pipes of the character used after the lapse of time were liable to be obstructed by corrosion or deposit. On behalf of the corporation no evidence was given to account for the deficiency in the amount of the compensation water, and the manager of the waterworks admitted that for something like thirty years no inspection had been made, and that he had no knowledge whether the pipes were obstructed or not. The evidence showed that when the head of water was kept above eleven feet the pipes did furnish a sufficient supply of compensation water, but that when the head was reduced to seven feet during a period of drought the water ceased to flow, and the suggestion of the plaintiffs was that the water ceased to flow by reason that the head of seven feet did not give the necessary driving power. It also appeared that when the drought was over ample water was obtained in the reservoir, and the pipes again afforded the requisite compensation water. The jury found for the plaintiffs, and the Court of Appeal held that there was evidence in support of the verdict; and distinguishing the above case of *Lewis* v. *Swansea Corp.*, the Court held, as did GRANTHAM, J., at the trial, that the liability of the corporation was not limited to one penalty of £5 for each day, but that they were liable to each of the plaintiffs in that amount for each day during which the deficiency continued. On this point COLLINS, M.R., observed: "It seems to me that s. 32 has in it all those specific words which make it impossible as a matter of grammar or sense to say that it is open to the construction which was put on a section—I will not say analogous but in *pari materiâ*—in *Lewis* v. *Swansea Corp.* (1887), 4 T. L. R. 122, 706. It has in it specific conditions for giving to each individual, in the most distinct terms, the right to what is in a sense a penalty, but is really liquidated damages which are not provided for apart from ordinary damages as in the *Swansea Case*, but which are to be taken as part of the damages without prejudice to damages in addition. In the *Swansea Case* there was in the clearest possible terms a penalty. There was no provision for its being paid to each of the millowners, and there was a distinct provision that that penalty was to be entirely exclusive of damages. It was distinctly taken out of the category of compensation. It was a penalty and nothing more. The two sections really, when they are criticised, are not in the least degree analogous, and the grammatical meaning of this section does not admit of any possible doubt. Therefore, it seems to me that the construction which has been accepted by the learned judge is right, and that the plaintiffs are entitled to the full amount that they have claimed." Judgments to the same effect were delivered by ROMER and MATHEW, L.JJ. (*Beaumount and Others* v. *Huddersfield Corp.* (1902), 67 J. P. 57 (*a*)).

(*a*) See now the Huddersfield Corporation Act, 1902 (2 Edw. 7, c. cxxxvii.), s. 57, which contains the following proviso: "Provided that no person including the corporation shall incur or be liable for more than one penalty (other than a daily penalty), under the recited Acts or this Act for the commission of the same offence or for the same neglect or default." See definition of "recited Acts" in s. 4.

Two trading companies having commenced actions in the High Court against the Corporation of Huddersfield to recover penalties under s. 32 of the Huddersfield Act above quoted, the two actions were consolidated and the preliminary point of law argued as to whether the actions were maintainable, inasmuch as it was argued that the proper remedy of the plaintiffs was under ss. 140 and 145 of the Railway Clauses Act, 1845, which provided that every penalty or forfeiture the recovery of which was not otherwise provided for might be recovered by summary proceedings before two justices. WRIGHT, J., held that by s. 32 it was otherwise provided by the words "who may sue for and recover the same" (*Meltham Spinning Co.* v. *Huddersfield Corp., Bent Ley Silk Mills, Ltd.* v. *Same* (1903), 89 L. T. 403).

Damage caused by bursting of reservoirs. etc.

In many Acts authorising the construction of reservoirs a special clause is introduced for the protection of millowners and landowners, making the undertakers responsible for any damage caused by the bursting of the reservoirs or aqueducts. The following section is taken from the Manchester Corporation Waterworks Act, 1879 (42 Vict. c. xxxvi.):

> "The Corporation shall at all times make good all such loss or damage whatsoever as may be occasioned by reason of the bursting, leaking, or overflow of the dam of Lake Thirlmere, or of any of the reservoirs, aqueducts, pipes, or other works constructed or maintained for the purposes of this Act within the Lake District as hereinbefore defined."

The following section is taken from the Birmingham Corporation Water Act, 1892 (55 & 56 Vict. c. clxxiii.):

> "46. The Corporation shall from time to time make full compensation to all persons for all damage and injury, losses, and expenses whatsoever which may from time to time be incurred or suffered by reason or in consequence of the bursting or giving way of any of the reservoirs or the aqueduct by this Act authorised, and such compensation shall be paid and satisfied out of any rates, revenues, or funds for the time being belonging to the Corporation."

No bursting clause occurs in the Liverpool Corporation Waterworks Act, 1880 (43 & 44 Vict. c. cxliii.), authorising the Vyrnwy scheme.

The following section occurs in the Newcastle and Gateshead Waterworks Act, 1894 (57 & 58 Vict. c. lxxi.), s. 10:

> "The company shall make full compensation to all persons for all damage and injury, losses, and expenses whatsoever which they may from time to time sustain by reason or in consequence of the bursting or giving way of the reservoir by this Act authorised."

By the Sheffield Waterworks Act, 1853 (16 Vict. c. xxii.), the Sheffield Waterworks Company were authorised to obtain a further supply of water from the rivers Rivelin and Loxley and their tributaries. By s. 68 it was provided:

> "That the said company shall and they are hereby required from time to time and at all times for ever hereafter to pay and make good to the owners, lessees, and occupiers of all mills, manufactories, buildings, lands, and grounds, and to every person whomsoever, all loss, costs, charges, sum and sums of money, damages and expenses whatsoever, and for all injury of what nature or kind soever, as well immediate as consequential, which such owners, lessees, or occupiers, or other persons may suffer, incur, pay, expend, or be put unto by reason or in consequence of the failure or giving way of the reservoirs, embankments, watercourses, or other works of the said company."

By the Sheffield Waterworks Act, 1864 (27 & 28 Vict. c. cccxxiv.), it was recited that in March, 1864, the embankment of a reservoir, situate on the upper waters of the river Loxley, which was being constructed by the company, gave way, and an inundation ensued in the valleys of the rivers Loxley and Dun, extending into and below the town of Sheffield. After reciting s. 68 of the Act of 1853, and also that "it is apprehended that claims to a very considerable amount will be made against the company for damages in consequence of the said inundation in respect of injury immediate or consequential to property or to trade or business or in respect of bodily injury or in respect of loss of life," the Act authorised the appointment of a body of commissioners styled "The Sheffield Inundation Commissioners," for the purpose of assessing the amount of damages payable to the several claimants, and authorised the company to raise a further sum of £400,000. By the Sheffield Corporation Water Act, 1896 (59 & 60 Vict. c. cxc.), the Sheffield Corporation, who had in 1887 acquired the undertaking of the water company, obtained an Act for impounding the waters of the river Porter or Little Don and its tributaries. This Act does not contain a general bursting clause, but in an agreement between the Corporation and Messrs. Samuel Fox and Co., Ltd., which is scheduled to and confirmed by the Act, the following provision occurs:

> "6. The Corporation are from time to time and for ever hereafter to pay and make good to the company and their lessees, tenants, clerks, agents, servants, workmen, and other persons employed by the company, all costs, charges, sums of money, damages, and expenses whatsoever, and for all injury of what nature or kind soever as well immediate as consequential, which the company or such persons as aforesaid may suffer, incur, pay, expend, or be put unto by reason or in consequence of the failure or giving way of the reservoirs, embankments, watercourses, mains, pipes, or other works of the corporation."

A similar provision for the protection of Messrs. Fox occurs in an agreement scheduled to the Sheffield Corporation Act, 1907, and in s. 33 of the Barnsley Corporation Waterworks Act, 1896 (59 & 60 Vict. c. lii.).

The Mountain Ash Local Board Act, 1886 (49 & 50 Vict. c. cxiv.), contains a clause (s. 23) for the protection of the owners, etc., of the Darwonno Estate. The following sub-section occurs in that clause:

> "(c.) The Local Board shall maintain and keep the reservoir to be constructed by them water-tight in all respects, and shall from time to time make good any damage which the owners, lessees, or occupiers of the Darwonno Estate or of any part thereof, or of the mines and minerals thereunder, or any of them may sustain during the construction or maintenance of the waterworks, by reason or in consequence of the bursting, leaking, overflow, or any failure of such reservoir, and nothing in this Act contained shall relieve the Local Board from liability to compensate and pay such owners, lessees, and occupiers for any damage, loss, or injury done or occasioned to any mines or minerals by reason or in consequence of the construction of the said reservoir or of the breakage or leakage of all or any of the reservoirs, aqueducts, mains, or pipes whatsoever of the Local Board or the flow of water therefrom, or the cost of pumping or extra pumping occasioned thereby."

The section as to bursting in the Bury Corporation Waterworks Act, 1889 (52 & 53 Vict. c. clxxxii.), is remarkable on account of the proviso at the end thereof. The section is as follows:

> "7. The Corporation shall and they are hereby required from time to time and at all times hereafter to pay and make good to the owners, lessees, and occupiers of all mills, manufactories, dwelling and other houses, cottages, and other buildings now erected or in course of erection over upon the banks of or near the said Whitewell Brook, or which may hereafter be erected in proper and reasonable situations down to its juncture with the river Irwell, and of all lands adjoining or near to the said brook, all loss, costs, charges, sum and sums of money, damages and expenses whatsoever, and for all injury of what nature and kind soever which such owners, lessees, or occupiers may suffer, incur, pay, expend, or be put unto by reason or in consequence of the failure or giving way of the said reservoir, embankments, watercourses, or other works of the Corporation. Provided that this section shall not prejudice or impair the rights or remedies of the owners, lessees, and occupiers of property below the said junction by reason or in consequence of the matters aforesaid. Provided that no obligation or liability shall attach to the Corporation in respect of an injury occasioned by an *actus Dei*, and not arising from any default of the Corporation or any defect in the works."

The following section is contained in the Arbroath Corporation Water Order Confirmation Act, 1905 (s. 31):

> "The Corporation shall make full compensation to all persons (including the County Council of the county of Forfar and the district

> committees thereof) for all damage and injury, losses, and expenses whatsoever which they may from time to time sustain by reason or in consequence of the bursting or giving way of the reservoir or of the conduits or lines of pipes by this Order authorised, and of the flooding that may be thereby occasioned."

A similar provision is contained in the Dundee Water Order Confirmation Act, 1905, s. 17.

See also Stockport Corporation Act, 1905, s. 14; Lincoln Corporation (Water, etc.) Act, 1908, s. 39; Pontypridd Waterworks and Tramroads Act, 1908.

Adaptability of land for works an element in value of land to be acquired.

In estimating the value of land and easements to be acquired by a corporation or company for the construction of a reservoir, the natural and peculiar adaptability for the construction of a reservoir, of the lands in question, is a fit and proper matter for consideration as an element in the value thereof, in the assessment of compensation. *Ossalinsky* (*Countess*) v. *Corporation of Manchester*, reported Brown and Allen's Law of Compensation, 1896, at p. 718; *Cor.* GROVE and STEPHEN, J.J. The same point was raised and decided by the C. A. in the case of *In re an Arbitration between Gough and Aspatria Silloth and District Joint Water Board*, [1904] 1 K. B. 417.

Underground water.

The legal decisions which have established that there is no property in underground percolating water are examined at pp. 417 *et seq.* The practice of the Court of Referees in Parliament had been to follow the law and refuse a *locus standi* to petitioners alleging injury by the abstraction of underground percolating water. Mr. James Mansergh, President of the Institution of Civil Engineers, referred to the hardship of this in his presidential address on November 6th, 1900. Since then the following new Standing Order of the House of Commons has been issued:

> "134D. Where any owner, lessee, or occupier, or where any conservancy or other authority charged with the control of river or other waters, petitions against a Bill alleging that under its provisions any water or water supply of which they may legally avail themselves will be diminished or injuriously affected, it shall be competent to the referees on private Bills, if they think fit, to admit the Petitioners to be heard against the Bill or any part thereof."

The following are instances of Acts authorising pumping schemes in which clauses have been inserted for the protection of existing wells: Goole Urban District Council Act, 1899, s. 21; South Hants Water Act, 1899, s. 6; Bedford Corporation Water Act, 1902, s. 14; Gosport Water Act, 1904, s. 8; Selby Urban District Council Act, 1904, s. 27 (protection of wells within 2½ miles from pumping station); Southport, Birkdale and West

Lancashire Water Board Act, 1905, s. 20; Mansfield Corporation Act, 1905, s. 17; Malvern Water Act, 1905, ss. 24—26; Poole Corporation Water Act, 1905, s. 24 ("Provided that it shall not be obligatory on the owner to show that such depletion or diminution has been caused by the exercise by the corporation of the powers conferred on them by this Act, but on the other hand it shall be competent for the corporation to show that any such depletion or diminution has not been caused by the exercise of such powers"); Accrington District Gas and Water Board, 1906, s. 14 (the onus of proof resting upon the Water Board); Birkenhead Corporation Act, 1907, s. 43; Holderness Water Act, 1908, s. 55 (protection of wells within radius of 1 mile northward, and 2 miles southward of pumping station); South Staffordshire Waterworks Act, 1909, ss. 21, 23, 26, 28, 29, 32, 33 (a "protected area" is set up and the onus of proof is put upon the company); Frimley and Farnborough District Water Act, 1909, s. 27 (private wells within 2 miles from pumping station); Donington Water Act, 1909, s. 47, and Bungay Water Act, 1909, s. 35; Cambridge University and Town Waterworks Act, 1910, ss. 20—23. See also Staffordshire and Worcestershire Canal Companies Act, 1903, s. 8, with regard to the pumping operations of the Wolverhampton Corporation.

The South Lincolnshire Water Act, 1906, s. 38 (3), provides that in the event of the existing water supply of any person having his own well within the urban district of Bourne being so affected by the pumping operations of the company that he is deprived of his supply of water, the company shall, free of charge, lay the necessary pipes to connect the house of such person with the company's water mains, and shall on demand provide him with a supply of water at sufficient pressure, and the charge for such supply shall be one half the charge at which water is supplied to other water consumers in the said district occupying premises of the same rateable value.

An important precedent was created by the Sutton District Water Act, 1906, in regard to the protection of the sources of supply of a statutory water company. The water supplied by the company is obtained from wells sunk in the chalk at Sutton in Surrey. It came to the knowledge of the company that the London, Brighton and South Coast Railway Company proposed to bore for water in the chalk on land of their own adjoining the railway, and within 1,000 yards from the company's wells, and that it was the intention of the railway company to obtain a large quantity of water and to convey it along their line for the general use of their undertaking, including the supply to their

Victoria terminus and their carriage cleaning yard at Streatham. A "late Bill" was introduced by the water company, which was supported by all the public authorities having jurisdiction within or adjacent to the company's area of supply. Notwithstanding the opposition of the railway company, the Bill was allowed to proceed and ultimately became law. The operative section of the Act is as follows :

> "From and after the passing of this Act, it shall not be lawful for any company, body or person, except with the express authority of Parliament hereafter obtained, to convey by pipe or conduit for sale or use beyond the area of supply, water taken from any well or watercourse within such area.
>
> Provided that nothing in this section contained shall take away :
>
> (1) Any right of any landowner (other than a railway company) to supply with water any part of his estate situate within or partly within and partly without the area of supply, or to construct works for that purpose ; or
>
> (2) Any right of any railway company to supply with water any station or stations within the area of supply, or to construct works for that purpose or to use on any engine or carriage without as well as within such area, water supplied at any such station or stations."

See also River Wandle Protection Act, 1908, by which the Croydon Corporation were placed under certain restrictions in regard to the abstraction of water which might affect the flow of the river Wandle.

Water (Underground Supplies) Bill, 1902.

In the Session of 1902 a Bill entitled the Water (Underground Supplies) Bill was introduced by Mr. Abel Smith, M.P. It proposed to enact that no new well for public supply should be sunk without express parliamentary sanction, and that, when sanctioned, records should be kept of the effect of pumping on the level of the water. The Bill was not proceeded with.

Water Supplies (Protection) Bill, 1910.

In the Session of 1910 a Bill entitled the Water Supplies (Protection) Bill was introduced in the House of Lords by Lord Desborough, and was referred to a Joint Committee of both Houses of Parliament.

The Bill proposed to restrict the powers of authorised water undertakers in the following ways : (i.) By preventing the acquisition of fresh supplies without parliamentary authority ; (ii.) by rendering the undertakers liable to give compensation for injury to private supplies caused by their works ; and (iii.) where water is taken from one district to supply another, by conferring on the local authorities of the districts from and through which the water is taken the right to demand a supply from the works of the undertakers on terms to be agreed or fixed by the Local

Government Board. The report of the Committee was to the following effect:

Report of Joint Committee.

On point (i.) the Committee were in favour of the principle that Parliament, before sanctioning a scheme for abstraction of underground water, should be in possession of full information as to the objects of the scheme and the means for carrying it into effect. But they considered that in the present imperfect state of information on the subject of underground water, parliamentary control over such schemes can be better secured by the insertion of any necessary safeguard in each Bill which comes before Parliament than by making the clause of the Bill which was based on clause 8 of the Model Bill part of the general law, and that, at all events, for the present, each case should be dealt with on its merits.

As regards point (ii.) the committee pointed out that it is clear that to give a right to compensation for loss of subsoil water, even within the limitations proposed by the Bill, involves an important alteration of the general law, which, as it stands, recognises no property in underground water unless it is flowing in a known and definite channel, and that it had been forcibly urged on them that if it be fair and equitable to levy compensation, as the Bill proposed, from water undertakers for injury done by the abstraction of water from the subsoil of private property, then the application of the same rule or treatment to all other agencies or industries causing similar injury cannot be resisted.

With regard to the proposal in the Bill that, where claims for compensation are made, the ordinary law as to burden of proof should be altered, and within the area specified in the Bill the burden transferred from the claimant to the undertakers, the Committee considered that while the shifting of the burden of proof may be justified in reference to a designated person or specified source of water supply or narrowly limited area of land, it could not, as a general proposition, be supported even within the limits laid down in the Bill, and further that no general definition or limitation of a "Protected Area" can, with any pretence to accuracy, be made.

With regard to point (iii.), the Committee were of opinion that a claim for water supply made by the local authorities of the area which would naturally have recourse to the source of supply proposed to be appropriated, may, as a general rule, be reasonably complied with, but they abstained from making any such recommendation in favour of other districts through which the mains may pass.

The Committee were also of opinion that local authorities under the Public Health Acts should be relieved from the necessity of promoting a Bill in Parliament in connection with water supply in all cases where the procedure by Provisional Order is applicable. In these cases powers are not granted without a public local inquiry at which all parties interested are entitled to be heard. Opportunity for securing adequate protection would be thereby afforded to the various interests concerned, without imposing on the local authority and the ratepayers the expense of coming to Parliament by Bill which would in many cases be prohibitive and might involve serious delay.

In this connection the Committee drew attention to the inadequate powers at present possessed by local authorities for the compulsory acquisition of *water rights.* Under the existing law they possess the powers of compulsorily acquiring rights in land, of course on fair terms, but unless they can obtain rights in water by agreement (which involves the condition insuperable in some cases of obtaining the consent of every riparian owner) they are compelled to incur the expense of promoting a Bill in Parliament (which rural councils cannot do under the existing law) or to abandon their project. The procedure by Provisional Order enables all parties to have their claims adjudicated upon before the Order is made, and reviewed in Parliament before the Order becomes an Act and operative. In these circumstances the Committee, having special regard to the obligations placed on local authorities to provide an adequate supply of potable water, suggested that, subject to due provision for compensation water being made, these authorities should not be in a worse position respecting the acquisition of water rights than they are respecting the acquisition of rights in land.

On the general question the Committee drew attention to the Reports of various Royal Commissions and in particular to the following paragraph from the Fifth Report of the Royal Commission on Sewage Disposal (paragraph 356): "That ultimate control should be vested in an adequately-equipped central administrative authority, and that, as far as practicable, the local rivers board should, in accordance with regulations framed by the Central Department, act as a first tribunal. Among the more important questions which have to be dealt with under the new conditions of administration which we are contemplating are the following: " . . . . (iii.) The protection of water supplies from pollution; (iv.) the collection of information as to the water supplies available in various parts of the country; (v.) the collection of information as to the need of water in various parts of the country."

The Committee concluded by strongly recommending, *firstly*, the establishment (within the Local Government Board or independently as may seem best to the Government) of such a Central Administrative Authority as is contemplated in paragraph 356 of the Fifth Report of the Royal Commission on Sewage Disposal (quoted above); and, *secondly*, the division of the country into watershed areas, and the appointment for those areas of local representative boards, who, subject to the guidance and control of the Central Authority, should prosecute systematic and continuous inquiries into the water supply of their jurisdiction, take all necessary measures to husband such supplies, both surface and subsoil; secure their preservation from pollution; and advise on their allocation for sanitary, industrial, and other purposes.

See Parliamentary Paper, No. 226, of Session 1910.

Prevention of pollution of the watershed.

The most effective means of completely preventing the pollution of the watershed is to acquire it as part of the undertaking. And the practice of recent years has been in that direction. See the notes, *post*, p. 501.

In a few instances power has been given to the local authority supplying water, with the consent of the County Council or Local Government Board and of the District Council affected, to enforce the provisions of the Rivers Pollution Prevention Acts, 1876 and 1893, or of the Public Health Acts, in respect of waters over which the authority has powers of user or of any watercourse through which any water may for the time being flow into any such waters. See, *e.g.*, Colne Corporation Act, 1905, s. 7; Penrith Urban District Council Act, 1907, s. 15; Burnley Corporation Act, 1908, s. 17; and Llanelly Waterworks Act, 1909, s. 23.

Local Government Board inquiry into lead poisoning by moorland waters.

The results of a lengthy inquiry conducted by the Medical Department of the Local Government Board into the subject of lead poisoning by moorland waters are embodied in Reports issued as Supplements to the Annual Reports of the Local Government Board for the years 1900-1 and 1902 (see Parliamentary Papers, Cd. 1343 and Cd. 1714)

The following paragraphs from the summary and conclusions as set out on pp. 9—12 of the Second Report may be here quoted:

> "1. The history of epidemics of lead poisoning due to water supply at all events in the North of England, clearly shows that the towns which have suffered in the past derived their water supply from moorland sources. In some cases the water was known to be acid, and in others there was every reason to infer that the water was in a similar condition, since the physical circumstances of the gathering ground were the same."
>
> "2. Moorland gathering grounds are usually rich in peat. The amount of peat varies greatly on different gathering grounds, both superficially and in depth."
>
> "3. Moist peat has been found to be invariably acid in reaction."
>
> "5. Acid peaty water dissolves lead."
>
> "6. The degree of plumbo-solvency of a water is chiefly governed by the amount of its acidity."
>
> "29. Plumbo-solvent ability which has been acquired by a water destined to be distributed to consumers may be removed by suitable arrangements for neutralisation. It is an advantage to combine such arrangements for neutralisation with sand filtration."
>
> "30. It would appear, as a natural outcome of this inquiry, that the circumstances of every supply of moorland origin should be considered with reference to the factors of plumbo-solvency which exist upon it; and in this report I have endeavoured to make clear the nature of these factors and their relative importance. It is advisable in the case of existing works, to test, not only in the reservoirs and main streams, but also in the tributary streams and subsidiary "feeders" during different seasons of the year, and under ordinary and extraordinary conditions of the rainfall, in order to arrive at a satisfactory conclusion as to the liability of the supply in general, and of its constituent waters, to acquire plumbo-solvent ability. Study of this sort affords the most satisfactory means of determining how best to apply the remedy, or combination of remedies, needed in the particular instance. In the case of proposed new waterworks, this inquiry indicates the necessity of a careful survey of the physical characters of the gathering grounds, as well as of ascertaining the

proportion of spring water to surface water at different times of the year and under different conditions of rainfall, and of testing the quality of the spring water and its power of neutralising acid, and the quality of the surface water, especially during wet weather and sudden storms following a period of drought."

Special provisions for the prevention of lead poisoning.

The following are recent instances in which specific requirement has been made for the treatment of the water before distribution so as to prevent it acting on lead in such manner as to endanger the health of the consumers: Stockport Corporation Water Act, 1901, s. 25; Skipton Water and Improvement Act, 1904, s. 16; Bolton Corporation Act, 1905, s. 24; Rhondda Urban District Council Act, 1905, s. 8; Todmorden Corporation Act, 1906, s. 10; Ashton-under-Lyne, Stalybridge and Dukinfield (District) Waterworks Act, 1907, s. 19; Pontypridd Waterworks and Tramroad Act, 1908, s. 12, and Northallerton Waterworks Act, 1909, s. 19.

Joint boards.

As to precedents of joint boards either for purposes of water supply or for gas and water supply combined see *ante*, p. 34.

Profits of water undertaking in the hands of local authority.

As a rule where the water supply is in the hands of a local authority, they are authorised by Parliament to apply any surplus profit, after payment of loan and sinking fund charges, towards the relief of the borough or general district fund. See this subject treated, *ante*. p. 29, and the instance of the Stockport Act, 1899, there mentioned. For further information as to undertakings in the hands of local authorities, the surplus profits made in each case, and the manner in which the same are disposed of, see the Municipal Trading (United Kingdom) Returns ordered by the House of Commons on December 20th, 1906, giving particulars of the financial results of reproductive municipal undertakings for each of the last four years for which figures were available. Parliamentary Papers 171 of Session 1909, (6 vols.).

Powers generally of a statutory company.

When the water supply is in the hands of a company, the public Acts of 1847 and 1863, incorporated with their special Act, regulate their rights and obligations. Their duty to supply pure and wholesome water is referred to, *post*, p. 467. Since the decision of the House of Lords in the case of *Dobbs* v. *Grand Junction Waterworks Co.*, "annual value," when that or some equivalent expression is the basis on which companies are entitled to make their charge, must be taken to mean net annual value, that is to say, rateable value. See more fully, *post*, p. 506. In all modern Acts "rateable value" is made the basis of charge. As to the metropolis, see the Water Rate Definition Act, 1885, referred to *post*, p. 505.

"Annual value."

"Domestic purposes."

The decisions as to what comes within domestic supply are dealt with *post*, p. 468. Some recent Water Acts contain definitions of what is, and is not, included in domestic supply. "Domestic purposes" are defined by the Metropolitan Water Board (Charges) Act, 1907, s. 25 to "be deemed to include water-closets and baths, constructed or fitted so as not to be capable of containing when filled, or filled up to the overflow or waste pipe (if any), more than eighty gallons, but shall not include a supply of water for any of the following purposes (namely), steam, gas, motor and other like engines, railway purposes, ventilating purposes, working any machine or apparatus, consumption by or washing of horses and cattle, washing carriages or other vehicles, watering gardens by means of any outside tap or hose, tube, pipe, sprinkler or other like apparatus, fountains, or any ornamental purpose, cleansing sewers and drains, cleansing and watering streets or roads, fire extinction, flushing drains by means of any apparatus discharging automatically, public pumps, baths or washhouses, any trade, manufacture, or business, any bath constructed or fitted so as to be capable of containing when filled, or filled up to the overflow or waste pipe (if any) more than eighty gallons." See hereon the decision in *Metropolitan Water Board* v. *L. B. & S. C. Rail. Co.*, at p. 697, *post.*

The Camborne Water Act, 1908, s. 18, provides that "a supply of water for domestic purposes shall not include a supply of water for cattle or for horses, or for washing carriages, motor-cars, or other vehicles, or for any trade, manufacture or business, or for washing house or shop fronts, or windows, by means of a hose or jet, or for watering gardens, for fountains, or for any ornamental purposes whatsoever." See also Portishead District Water Act, 1907, s. 21.

Maintenance of fire-plugs, etc., in public highways.

The rights and liabilities of local authorities and companies respectively with regard to the maintenance, in the highways, of fire-plugs, stop-cocks, and other apparatus in connection with water supply are treated *post*, p. 480.

Cutting off supply for non-payment of water rates.

Sect. 74 of the Waterworks Clauses Act, 1847, provides that if any person supplied with water by the undertakers neglects to pay the water rate when due, the undertakers may cut off the supply, and may also recover the rate, if less than £20, together with the cost of cutting off the supply, in a summary manner, and in other cases by action. By the Water Companies (Regulation of Powers) Act, 1887, it is now provided that the water shall not be cut off where the owner, and not the occupier, is liable by law or by agreement with the water company to the payment of the water rate; but such water rate, without prejudice to other remedies, shall, along with interest at 5 per cent.,

Water Companies (Regulation of Powers) Act, 1887.

be a charge on the premises in priority to all other charges affecting the premises. See more fully, *post*, p. 517, where the decisions under this Act are noted.

Waste, misuse, etc., of water.

The subject of the prevention of the waste, misuse, or contamination of water is specially dealt with, *post*, pp. 713 *et seq.* Where a constant supply is afforded, companies and local authorities are armed by Parliament with the power of making (subject to the approval of the Local Government Board) and enforcing regulations for the prevention of waste and misuse of water.

Rivers Pollution Prevention Act, 1876.

Mersey and Irwell Rivers of West Riding.

Border rivers.

The Rivers Pollution Prevention Act, 1876, is set out, *post*, p. 725, and the decisions under the Act are noted. The special legislation with regard to the Mersey and Irwell, and their tributaries, and with regard to the rivers of the West Riding and their tributaries, will be found, *post*, pp. 764 *et seq.*, and pp. 771 *et seq.* For the Act of 1898, enabling the county councils on either side of the Border to act together for the prevention of the pollution of rivers, see *post*, p. 755.

Rivers Pollution Prevention Act, 1893.

A very notable alteration of the law was effected by the Rivers Pollution Prevention Act, 1893 (56 & 57 Vict. c. 31). It had theretofore been decided (see the cases, *post*, p. 731) that where sewers existed prior to 1875, and were not constructed by the local authority, but only became vested in them under that Act, the local authority could not be made responsible for pollution of streams caused by the use of such sewers by persons who had acquired a right to drain into them. The Act of 1893 now provides that "where any sewage matter falls or flows or is carried into any stream after passing through or along a channel which is vested in a sanitary authority, the sanitary authority shall for the purposes of s. 3 of the Rivers Pollution Prevention Act, 1876, be deemed to knowingly permit the sewage matter so to fall, flow, or be carried" (see *post*, p. 754).

Limited Owners Reservoirs and Water Supply (Further Facilities) Act, 1877.

By the Limited Owners Reservoirs and Water Supply (Further Facilities) Act, 1877, it is provided that the construction or erection of reservoirs or other works of a permanent character for the supply of water to persons residing or engaged in labour on the lands on which such works are situate, or on any other lands settled to the same uses, or for the more convenient or profitable user of such lands, or for the supply of water to any sanitary or other local authority or water company, or to any manufacturer or other person, or for any one or more of such purposes, shall be deemed to be an improvement of land within the meaning of s. 9 of the Improvement of Land Act, 1864, and shall be sanctioned by the commissioners if it can be shown to their satisfaction that such reservoirs or works for the supply of water will for any purpose effect a permanent yearly increase in the value of the lands on which they are situate, or any other lands settled to the same uses, or will be permanently productive of a yearly revenue to the owner of such lands, exceeding the yearly amount proposed to be charged thereon; and the construction of any such works shall be deemed to include the purchase by the landowner of any water right or other easement which might otherwise interfere with or prevent the construction of the same, or any such supply of water as aforesaid (see the Act, *post*, p. 709).

District Councils (Water Supply Facilities) Act, 1897.

By the District Councils (Water Supply Facilities) Act, 1897, it is provided that when any person who is a landowner within the meaning of the Improvement of Land Act, 1864, contributes any money towards the expenses incurred by a district council for the purpose of supplying water to any lands of such landowner (whether together with other lands or not), the amount so contributed may, with the sanction of the Board of Agriculture, be charged on the land of the landowner (see the Act, *post*, p. 930).

Certain clauses generally inserted in Water Acts.

As in the case of gas so in the case of water, the public general Acts no longer contain all the provisions usually contained in Water Acts. Among the clauses usually inserted in modern Water Acts are:

(1.) Power to make agreements with owners, etc., in regard to drainage of lands within the drainage area of reservoirs, etc.

(2.) Power to hold lands for protection of waterworks.

(3.) Limiting power to abstract water, *i.e.*, no well to be sunk upon, or works to be constructed for taking or intercepting water from, any lands acquired unless the works and the lands upon which the same are to be constructed are specified.

(4.) Byelaws for preventing pollution of water. (This clause is allowed only when the waterworks of a large town are situate beyond its limits, and it is expedient that the byelaws should be enforced by the authority owning the waterworks).

(5.) Power to acquire easements in respect of works to be constructed underground, but on compulsory acquisition owner may require land to be taken.

(6.) Rates to be payable by owners of small houses let to tenants by the week or month, or for less than a quarter.

(7.) Power to supply water for other than domestic purposes on such terms as may be agreed, and power to supply water by measure either for domestic or other purposes.

(8.) No obligation to supply otherwise than by meter houses partly used for trade. [When this clause is inserted a maximum rate per 1,000 gallons must be fixed by the Bill.

(9.) No obligation to supply more than one house by means of the same communication pipe, and undertakers may require a separate pipe to be laid to each house.

(10.) Notice of discontinuance of supply to be in writing.

(11.) Byelaws for the prevention of waste, misuse, or contamination of water.

(12.) Power to sell or let meters and fittings connected therewith.

(13.) Notice of connecting or disconnecting meters.

(14.) Power with respect to persons injuring meters, etc.

(15.) Power to furnish, repair, or alter (but not to manufacture) pipes, valves, cocks, cisterns, baths, meters, etc.

(16.) Power to lay pipes in streets not dedicated to the public use.

(17.) Contracts for supply of water in bulk beyond the limits,

(18.) Power to local authority, etc., to supply, in case company fails to supply after a time limited—usually five years.

(19.) A copy of the Act to be delivered to the Registrar of Joint Stock Companies for registration by him.

(20.) Demands recoverable in county court if within limit of its jurisdiction.

Other clauses inserted in Water Acts.

All the foregoing have found their way into the Model Water Bill, *post*, p. 701. Other provisions found in Water Acts may be here referred to.

A special section (s. 20) as to entry into buildings to inspect fittings will be found in the Merthyr Tydfil U. D. C. Act, 1903 (3 Edw. 7, c. cxiv.); see also Torquay Corporation Water Act, 1903 (3 Edw. 7, c. cvi.), s. 33.

Power is frequently given to temporarily discharge water from reservoirs, etc., into neighbouring streams or watercourses. The following section is from the Bath Corporation Water Act, 1903 (3 Edw. 7, c. ccvii.):

> "21. (1) For the purpose of sinking any well or constructing enlarging extending repairing cleansing or examining any aqueduct conduit or reservoir authorised by this Act, the Corporation may cause the water in such well aqueduct conduit or reservoir to be temporarily discharged into any available stream or watercourse.
>
> "(2) In the exercise of the power conferred by this section, the Corporation shall do as little damage as may be and shall pay compensation to all persons for all damage sustained by them by the exercise of such power the amount of compensation to be settled in default of agreement by arbitration in accordance with the provisions of the Arbitration Act, 1889."

There are similar sections in many recent Acts, including the following Acts of Session 1909: Aldershot (s. 38); Clevedon (s. 55); Clydebank and District (s. 22); Frimley and Farnborough (s. 24); Grantham (s. 44); Lisburn (s. 41); Llanelly (s. 13); Oldham (s. 10); Risca (s. 23); St. Andrews (s. 23); Stourbridge and District (s. 51); Wakefield (s. 6); Worksop (s. 10).

The following precedent is taken from the Bath Corporation Water Act, 1903 (3 Edw. 7, c. ccvii.):

> "22. (1) The provisions of the Waterworks Clauses Act, 1847, with respect to the breaking up of streets shall apply with the necessary modifications to the construction laying down erection and maintenance in any streets or roads of the conduits by this Act authorized and of any discharge pipes telephone or telegraph posts wires conductors or apparatus which the Corporation may and which they are hereby authorised to erect or lay down for the purposes of their water undertaking."
>
> "(2) Provided that no telephonic or telegraphic apparatus made and maintained under the authority of this Act shall be used for the purpose of transmitting telegrams in contravention of the exclusive privilege conferred upon the Postmaster-General by the Telegraph Act, 1869."

See also Scunthorpe U. D. C. Act, 1903, s. 20; Torquay Corporation Water Act, 1903, s. 25; Preston Corporation Water Act, 1904, s. 19.

The following section is contained in the Sutton District Waterworks Act, 1903 (3 Edw. 7, c. xviii.):

> "6. The Company may undertake to pay the Postmaster-General any loss he may sustain by reason of the establishment or maintenance at their request of any post or telegraph office or of any additional facilities postal or otherwise in any rural district in connection with the works authorised by this Act and any expense incurred by the Company under such undertaking may be defrayed out of the funds or revenue of the Company."

See also Skegness Water Act, 1905, s. 39; Holyhead Water Act, 1906, s. 6; Portsmouth Water Act, 1906, s. 10; Great Yarmouth Waterworks, etc., Act, 1907, s. 56; Newquay and District Water Act, 1907, s. 27; Holderness Water Act, 1908, s. 84; Pontypridd Waterworks and Tramroad Act, 1908, s. 95.

In many modern Water Acts a clause is inserted authorising the undertakers on selling any lands acquired for their water undertaking and not required for that purpose to reserve to themselves all water rights. The following is taken from the Bury and District Joint Water Board Act, 1903 (3 Edw. 7, c. ccxxxiv.):

> "26. The Board on selling any lands acquired for or in connection with their water undertaking and not required for that purpose may reserve to themselves all or any part of the water rights or other easements belonging thereto and may make the sale subject to such reservations accordingly and may also make any such sale subject to such other reservations special conditions restrictions and provisions with respect to use of water, exercise of noxious trades or discharge or deposit of manure sewage or other impure matter and otherwise as they may think fit."

For recent instances see Lisburn U. D. C. Act, 1909, s. 46; Northallerton Waterworks Act, 1909, s. 21; Risca U. D. C. Act, 1909, s. 19.

A clause which enables undertakers to acquire portions only of certain lands, buildings, and property, where such portions may be severed from the remainder without material detriment thereto, is now frequently met with in modern Water Acts. See, *e.g.*, Merthyr Tydfil Urban District Council Act, 1903, s. 34; Chesterfield Gas and Water Board Act, 1904, s. 10; Derwent Valley Water Act, 1904, s. 17; Thurles U. D. C. Act, 1904, s. 20; Doncaster Corporation Act, 1904, s. 29; Barrow Corporation Act, 1904, s. 37; Shipley U. D. C. Act, 1904, s. 27; Dundee Water Order Confirmation Act, 1905, s. 14; Truro Water Act, 1905, s. 12; Manchester Corporation Act, 1906, s. 12; Blairgowrie, Rattray and District Water Board Order Confirmation Act, 1906, s. 42; Accrington District Gas and Water Board Act, 1906, s. 9; Newquay and District Water Act, 1907, s. 17; Metropolitan Water Board (Various Powers) Act, 1907, s. 22; Birkenhead Corporation Water Act, 1907, s. 9; Manchester Corporation Act, 1908, s. 14; Troon (Loch Bradan) Water Order Confirmation Act, 1908, s. 21; Pontypool Gas and Water Act, 1909, s. 43; Watford U. D. C. Act, 1909, s. 16.

Occasionally provisions are to be found requiring the waters to be so treated as to reduce the natural hardness thereof to the extent that the water after such treatment shall not exceed so many degrees in hardness. See, *e.g.*, Bolsover and District Provisional Order, 1903, s. 18; Sutton District Waterworks Act, 1903, s. 7; Bungay Water Act, 1909, s. 33; West Gloucestershire Water Act, 1909, s. 17.

The following precedent is taken from the Mid-Kent Water Order, 1903, s. 10:

> "If and whenever the undertakers in the exercise of any power in that behalf possessed by them sink any well in any parish within the new limits of supply as defined by this Order they shall before supplying water obtained from such well to any other part of the said new limits furnish continuously at the same rates and upon the same conditions as the undertakers are bound to supply water within their existing limits of supply to the inhabitants of that parish such water as may be demanded by them for their reasonable sanitary and domestic requirements."

In some instances a clause is inserted enacting that notwithstanding anything in the Lands Clauses Consolidation Act, 1845, the promoters may retain hold and use for such time as they may think fit, and may from time to time sell, lease, etc., land in such manner and for such consideration, and on such terms and conditions as they think fit. See, *e.g.*, Derwent Valley Water Act, 1904, s. 34; Gosport Water Act, 1904, s. 20; Preston Corporation Water Act, 1904, s. 17; Barrow Corporation Act, 1904, s. 37; Ebbw Vale Water Act, 1904, s. 16; Barnet District Gas and Water Act, 1904, s. 18; Oakengates and Dawley Joint Water Board Act, 1904, s. 38; Skipton Water and Improvement Act, 1904, s. 37; Doncaster Corporation Act, 1904, s. 30; Selby U. D. C. Act, 1904, s. 60; Loughborough Corporation Act, 1905, s. 10; Malvern Water Act, 1905, s. 20; Mansfield Corporation Water Act, 1905, s. 25; Accrington District Gas and Water Board Act, 1906, s. 12; Borough of Portsmouth Waterworks Act, 1906, s. 12; Keswick U. D. C. (Water) Act, 1907, s. 15; Metropolitan Water Board (Various Powers) Act, 1907, s. 53; Newquay and District Water Act, 1907, s. 22; Penrith U. D. C. Act, 1907, s. 47; Ammanford U. D. C. (Water) Act, 1908, s. 13; Cardiff Corporation Act, 1909, s. 26; Llanelly Waterworks Act, 1909, s. 21; and Stourbridge and District Water Board Act, 1909, s. 48.

There are precedents for a clause making the auction clauses apply to loan capital. The following is taken from the City of Norwich Waterworks Act, 1904, s. 13:

> "The provisions of this Act with respect to the sale by public auction or tender of shares or stock created under the authority of this Act, the application of the premiums arising from such sale and other the provisions incidental to such sale shall apply *mutatis mutandis* to

> and in relation to the granting of mortgages and issue of debenture stock by the Company under this Act."

See also Southend Waterworks Acts, 1904, s. 19, and 1907, s. 39. As to the occurrence of such a clause in Gas Acts, see *ante*, p. 7.

Power to Lay Pipes, etc., for Ancillary Purposes.—A clause of this nature applicable to both gas and water occurs in the Bexhill Water and Gas Act, 1904, s. 58. For similar clauses introduced into Gas Bills, see *ante*, p. 50.

The following section occurs in the Brymbo Water Act, 1904:

> "The Company may in and upon the lands acquired within the said gathering areas construct and lay down drains cuts sewers watercourses and other works and conveniences necessary or proper for the purpose of intercepting or taking all foul waters arising or flowing upon such lands or necessary or proper for preventing the water which the Company are empowered to take from being polluted fouled contaminated discoloured encroached upon or injured, and the Company may for the purposes aforesaid carry any such drain cut sewer or watercourse under across or along any street or road within or adjoining the lands in the said gathering areas subject and according to the provisions of the Waterworks Clauses Act, 1847, with respect to the breaking up of streets for the purpose of laying pipes."

Similar provisions are very generally included in recent Water Acts.

For a power to lay mains outside water limits in streets forming the boundary of any parish within the water limits, see Barnet District Gas and Water Act, 1904, s. 19.

Water Supply to large Institutions.—In some recent Acts and Provisional Orders it is enacted that the supply of water to large institutions shall be by meter unless otherwise agreed. See, *e.g.*, Barnet District Gas and Water Act, 1904, s. 27; Selby U. D. C. Act, 1904, s. 19; Littlestone-on-Sea and District Water Act, 1904, s. 39; Bradfield Water Provisional Order, 1904, s. 16; South Lincolnshire Water Act, 1906, s. 44; North Sussex Gas and Water Act, 1906, s. 16; Selsey Water Act, 1907, s. 27; Metropolitan Water Board (Charges) Act, 1907, s. 20; Holderness Water Act, 1908, s. 67; Chelsham and Woldingham Water Order, 1910, s. 23.

Power to Grant Gratuities to Officers and Servants.—Selby U. D. C. Act, 1904, s. 187; Swindon Corporation Act, 1904, s. 164; Accrington District Gas and Water Board Act, 1905, s. 28; Southport, Birkdale and West Lancashire Water Board Act, 1905, s. 37; Perth Corporation Gas Order Confirmation Act, 1906, s. 27; Colne Valley Water Act, 1907, s. 32; Harrogate Gas Act, 1909, s. 27.

Dwelling-houses for Workmen.—See, *e.g.*, Selby U. D. C. Act, 1904, s. 63; Bangor (County Down) Water and Improvement

Act, 1905, s. 34; Hythe Corporation Act, 1905, s. 12; Skegness Water Act, 1905, s. 36; Poole Corporation Water Act, 1906, s. 35; Colne Valley Water Act, 1907, s. 33; Devonport Corporation Act, 1907, s. 15; Briton Ferry U. D. C. Act, 1908, s. 11; Camborne Water Act, 1908, s. 25; Frimley and Farnborough District Water Act, 1909, s. 20; Grantham Waterworks Act, 1909, s. 45; Stourbridge and District Water Board Act, 1909, s. 91; and West Gloucestershire Water Act, 1909, s. 11.

Local Authorities being Undertakers to have Powers of s. 54 *of Public Health Act*, 1875, *as to carrying Water Mains within and without their District.*—See, *e.g.*, Ebbw Vale Water Act, 1904, s. 22; Skipton Water and Improvement Act, 1904, s. 14; Oakengates and Dawley Joint Water Board Act, 1904, s. 43; Hythe Corporation Act, 1905, s. 21; Mansfield Corporation Act, 1905, s. 15; Poole Corporation Water Act, 1906, s. 44; Ashton-under-Lyne, etc. Waterworks Act, 1907, s. 15; Penrith U. D. C. Act, 1907, s. 16; Burnley Corporation Act, 1908, s. 12; Risca U. D. C. Act, 1909, s. 26; Stourbridge and District Water Board Act, 1909, s. 53.

As to one effect of such a section, see *Hill* v. *Wallasey Local Board*, cited under s. 54 of the Public Health Act, 1875, *post*, p. 858.

Limit of Interest on Borrowed Capital in Water Provisional Orders.—A clause for this purpose is always inserted in Provisional Orders under the Gas and Water Works Facilities Act, 1870.

Abatement of Rates when Part of a District is Supplied by a Local Authority and another Part by a Company at a Higher Rate.—Where the water supply of part of a district is in the hands of the local authority and the supply of the rest of the district is in the hands of a company provision has been made in some cases for a deduction from the general district rate in favour of the ratepayers in the company's area if and so long as the charges for water are higher than in the area supplied by the local authority. The rebate is to be such "as shall in the opinion of the corporation fairly represent the difference for the year or half-year as the case may be" between the two sets of water rates. See, *e.g.*, Birkenhead Corporation Water Act, 1907, s. 78, and Watford Urban District Council Act, 1909, s. 33.

Power to Directors to fix Remuneration of Secretary.—This power has been given in several recent Gas Acts, see *ante*, p. 52. For an instance in which it is included in a Water Act, see Truro Water Act, 1905, s. 37.

Detection of Waste.—The following provision is found in the Frimley and Farnborough District Water Act, 1909, s. 55:

> "Subject to the provisions of the Waterworks Clauses Act, 1847, the Company may for the purpose of preventing and detecting waste affix and maintain meters and similar apparatus on the service pipes and mains of the Company and stopcocks in the pipes supplying houses with water and may insert in the roads or footways the necessary covers or boxes for giving access and protection thereto and may for that purpose break up and interfere temporarily with public and private streets, roads, lanes, footways, courts, passages, tramways, gas or water pipes, electric lines, wires and apparatus: provided that the Company shall not break up or interfere with any electric lines, wires or apparatus of the Postmaster-General except in accordance with and subject to the provisions of the Telegraph Act, 1878."

For other instances see Southport, Birkdale and West Lancashire Water Board Act, 1905, s. 26; Higham and Hundred of Hoo Water Act, 1905, s. 23; Holyhead Water Act, 1906, s. 23; Portishead District Water Act, 1907, s. 18; Newquay and District Water Act, 1907, s. 34; Penrith U. D. C. Act, 1907, s. 29; Llanelly Waterworks Act, 1909, s. 31; South Staffordshire Water Act, 1909, s. 37; and Stourbridge and District Water Board Act, 1909, s. 64.

Purchase by outside authority of their portion of the undertaking.

The subject of the purchase by outside authorities of their portion of an undertaking is dealt with *ante*, p. 37. See also the instance of the Stockport Act, 1899, mentioned *ante*, p. 39.

Compulsory purchase of water undertakings by local authorities.

The subject of the compulsory acquisition by local authorities of gas and water undertakings is dealt with *ante*, p. 40. The various precedents for and against compulsory acquisition will be found as regards non-statutory undertakings in Schedule C, *post*, p. 129, and as regards statutory undertakings, in Schedule D, *post*, p. 132.

Water diviners.

In reply to a question put in the House of Commons, on August 7th, 1899, on the subject of certain disallowances which had been made in the accounts of urban district councils of moneys paid from the rates for the employment of water diviners, Mr. Chaplin, then President of the Board, stated: "Three appeals had been made to the Local Government Board against disallowances of the kind referred to in the question. The sums disallowed were £13 8*s.* 7*d.*, £7 13*s.* 6*d.*, and £3 8*s.* The disallowances were made in May and August, 1897, and in August, 1898. One of the appeals is at present before the Board, but in the other two cases they have allowed the appeals. The decisions were given in October, 1898, and March, 1899. The Board did not deem it necessary to consult the Law Officers of the Crown on the case. They were advised by their own legal adviser that the reasons assigned by the auditor for making the disallowance did not support the action he took in point of law; but at the same time they stated that they could not but consider that the action of the district council had been unwise in the matter" (Hansard, 4th ser., vol. 76, p. 22). See also a reversal of a disallowance by an auditor referred to in the *L. G. Chronicle*, 20th May, 1905, p. 508.

A water diviner having been consulted by a landed proprietor indicated a place where water would be found at a depth of 25 to 30 feet. The proprietor sunk the well at a cost of £42 6*s.* 8*d.* but found no water. She brought an action in the county court against the water diviner to recover the amount. The judge found on the evidence that the defendant had made a statement that water would be found at the depth stated recklessly and with the knowledge that the plaintiff would act upon it. He based his finding of recklessness on the fact that the defendant stated in evidence that he had no means of knowing the depth of the water. The county court judge therefore gave judgment for the plaintiff, for £42. The case afterwards came before a Divisional Court on a case stated; and the judgment of the county court judge was upheld (*Pretty* v. *Child* (1902), 71 L. J. K. B. 512).

A good deal has been written on the subject of the "dowser," and he was honoured by mention in the course of the presidential address of Mr. James Mansergh, at the Institution of Civil Engineers on November 6th, 1900 (see p. 28 of the Address). See also the article there referred to "On the so-called Divining Rod or *Virgula Divina*," by Professor W. F. Barrett, published in the proceedings of the Society for Psychical Research for July, 1897, and a supplement to the same paper by the same author, published in the proceedings of the same society for October, 1900. See also Tompkins' "Theory of Water Finding by the Divining Rod," and articles in the *Journal of Gas Lighting*, 7th February, 1905, p. 355, and 14th February, 1905, p. 421.

METROPOLIS WATER.

Transfer of undertakings of water companies to Metropolitan Water Board.

Formerly eight companies supplied the metropolis with water. These were the New River Company, the East London Company, the Chelsea Company, the West Middlesex Company, the Grand Junction Company, the Lambeth Company, the Southwark and Vauxhall Company, and the Kent Company. The districts supplied by the first five of these were on the north side of the river Thames, and those supplied by the last three on the south side. The undertakings of these companies were transferred to the Metropolitan Water Board under the provisions of the Metropolis Water Act, 1902.

The various public Acts regulating the water supply of the metropolis will be found *post*, pp. 549 *et seq.*

Water Regulations.

The history of the "Water Regulations" in force in the metropolis, and of the attempts which have been made to alter them, is dealt with *post*, p. 714, and the Regulations themselves will be found *post*, p. 716.

Water Rate Definition Act, 1885.

By the Water Rate Definition Act, 1885, it is enacted that the words "the annual value of the tenement supplied with water" in s. 68 of the Act of 1847 shall, within the unions and parishes to which the Valuation of Property (Metropolis) Act, 1869, extends, mean the rateable value as settled from time to time by the local authority as duly constituted (see the Act, *post*, p. 586).

London Water Act, 1892.

By the London Water Act, 1892, the London County Council are given power from time to time to pay the costs and expenses of promoting Bills in Parliament relating to the supply of water in the administrative county of London, and within the limits of supply of the metropolitan water companies. See *post*, p. 587.

Duke of Richmond's Commission. 1869.

The subject of the water supply of the metropolis has engaged the attention of several Royal Commissions and Parliamentary Committees. These will be briefly referred to. The Duke of Richmond's Commission in 1869 reported as regards the water supply of the metropolis that "the future control of the water supply should be entrusted to a responsible public body, with powers conferred on them for the purchase and extension of existing works . . ." (p. cxxvii. of Report).

Sir William Harcourt's Committee, 1880.

Through the services of the late Mr. E. J. Smith, on the invitation of Sir Richard Cross, then Home Secretary, provisional agreements for the purchase of the various water companies were come to in 1880. These were submitted to a Select Committee of the House of Commons, presided over by Sir William Harcourt. In the result the agreements were dropped. The Committee reported: "That it is expedient that the supply of water to the metropolis should be placed under the control of some public body which shall represent the interests and command the confidence of the water consumers."

City of London inquiry, 1890.

In 1890 an independent inquiry on the subject of metropolitan water supply was held by a committee appointed by the corporation of the city of London, and presided over by Sir Guyer Hunter. The committee recommended that the metropolitan water supply should be taken over by a public authority.

Sir Matthew White Ridley's Committee, 1891.

In 1891 a Bill (commonly referred to as the Vestries Bill) was promoted by the vestries of certain London parishes for the constitution of a water trust, and for the compulsory acquisition of the undertakings of the London water companies. This, with certain other cognate Bills, was referred to a Select Committee of the House of Commons in 1891, presided over by Sir Matthew White Ridley. The Committee concluded their report by stating: "Of the two Bills before your Committee for the constitution of a new water authority neither appeared to them calculated to effect a satisfactory solution of the problem, but your Committee desire to place upon record their opinion that both those Bills were promoted in the public interest and to considerable public advantage." They reported, however, suggesting further inquiries by the London County Council, and recommended that if the London County Council should so resolve, they should have power to promote a Bill or Bills in Parliament for the purpose of constituting themselves the responsible water authority for London, with power to purchase (by agreement or arbitration) the various undertakings, either alone or in conjunction with such of the authorities of the outside areas as might be arranged.

Royal Commission, 1892—Lord Balfour of Burleigh, Chairman.

A Royal Commission was appointed in 1892 on the subject of the metropolitan water supply. The Commissioners were commanded to ascertain, "Whether, taking into consideration the growth of the population of the metropolis and the districts within the limits of the metropolitan water companies, and also the needs of the localities not supplied by any metropolitan company, but within the watersheds of the Thames and the Lea, the present sources of supply of these companies are adequate in quantity and quality; and, if inadequate, whether such supply as may be required can be obtained within the watersheds referred to, having due regard to the claims of the districts outside the metropolis, but within those watersheds, or will have to be obtained outside the watersheds of the Thames and the Lea." The valuable report of the Royal Commissioners is dated September 8th, 1893. The Commissioners were Lord Balfour of Burleigh, Chairman; Sir George B. Bruce, C.E.; Sir Archibald Geikie; Professor James Dewar; Mr. George Henry Hill, C.E.; Mr. James Mansergh, C.E.; and Dr. William Ogle. They reported making many recommendations as to the prevention of pollution, and the treatment of water after abstraction from the river, and they further reported, *inter alia*: "We are strongly of opinion that the water, as supplied to the consumer in London, is of a very high standard of excellence and of purity, and that it is suitable in quality for all household purposes. . . ." With respect to the quantity of

Report, 1893

water which can be obtained within the watersheds of the Thames and the Lea, they reported: "We are of opinion that, if the proposals we have recommended are adopted, a sufficient supply to meet the wants of the metropolis for a long time to come may be found without any prejudice to the claims, or material injury to the interests of any districts outside the area of Greater London." The recommendations referred to included the construction of storage reservoirs in the Thames Valley "at no great distance above the intakes of the companies," whereby an average daily supply of 300 million gallons a day might be obtained. The report and evidence (with maps, plans, and diagrams) form Parliamentary Papers, C. 7,172, C. 7,172, 1, and C. 7,172, 2, of 1893.

London County Council Purchase Bills of 1895.

In the Session of 1895 the London County Council promoted Bills to authorise the compulsory purchase by them of the undertakings of the several water companies. The special feature of these Bills was a clause defining the matters to be taken into account by the arbitrators. These Bills were referred to a Committee of the House of Commons, presided over by Mr. David Plunket, afterwards Lord Rathmore. These Bills came to nothing, the inquiry not having been concluded before the rising of the House of Commons.

Purchase Bills of 1897.

In 1897 the London County Council again promoted Bills for the purchase of the several water undertakings; and these also contained a special clause as to what the arbitrators were to consider. The Bills were rejected on second reading.

Purchase Bill of 1899.

In 1899 the London County Council again promoted a Purchase Bill containing a special arbitration clause. This Bill also failed to pass. The Llandaff Commission had then been appointed, and had not then made their final report.

Royal Commission appointed 1897.

In the Session of 1897, a Royal Commission was appointed on water supply within the limits of the metropolitan water companies. They were to inquire—

(1.) Whether, having regard to financial considerations and to present and prospective requirements as regards water supply in the districts within the limits of supply of the metropolitan water companies, it is desirable in the interests of the ratepayers and water consumers in those districts that the undertakings of the water companies should be acquired and managed either—

(a) by one authority, or

(b) by several authorities;

and, if so, what should be such authority or authorities.

To what extent physical severance of the works and other property and sources of supply of the several companies, and the division thereof between different local authorities within the limits of supply, are practicable and desirable; and what are the legal powers necessary to give effect to any such arrangements.

(2.) If the undertakings are not so acquired, whether additional powers of control should be exercised by local or other authorities; and, if so, what those powers should be.

(3.) Whether it is practicable to connect any two or more of the different systems of supply now administered by the eight metropolitan companies; and, if so, by whom, and in what proportion should the cost of connecting them be borne, and what are the legal powers necessary to give effect to any such arrangement.

Viscount Llandaff, Chairman.

The members of the Commission were Viscount Llandaff, Chairman; Rt. Hon. John W. Mellor, Q.C., M.P.; Sir John E. Dorington, M.P.; Sir George B. Bruce, C.E.; Mr. Alfred de Bock Porter, C.B.; Major-General Alexander de Courcy Scott, R.E.; Mr. C. A. Cripps, Q.C.; and Mr. Robert Lewis. The final report of this Royal Commission (Parliamentary Paper, 1899, Cd.—25) is an invaluable document in connection with metropolitan water supply, especially on account of the exhaustive examination of the facts connected with the subject. The Commission recommended purchase, and also recommended that the water supply should be in the hands of a single public authority or Water Board, being a permanent and not a fluctuating body, and consisting of not more than thirty members, "selected on account of their business capacity and, if possible, their knowledge of matters connected with water supply." They suggested that the London County Council should appoint, say, ten members of the Board; the Conservators of the River Thames, four members; the County Councils of Middlesex, Surrey, Essex, Hertford, and Kent, the Lea Conservancy Board, and the Town Council of the Borough of West Ham should each appoint two members; and that the Local Government Board should appoint the chairman and vice-chairman. They further recommended that the appointing authorities should be empowered to fill up any vacancy caused by death or resignation of their representatives, who should hold office for a definite term of years; that the chairman and vice-chairman should receive adequate salaries: that a sum should be allotted annually for division among the other members of the Board, according to their attendances, as was done in

Report, 1899.

the case of the Conservators of the River Thames; that the Board should be empowered and required to acquire the undertakings of all the eight metropolitan companies—either by agreement, or, failing agreement, by arbitration, on the terms usual in cases of compulsory purchase—taking over all the existing powers and obligations of the companies. (See their Report, Parliamentary Paper, Cd.—25, of 1899, at pp. 60, 61.)

Purchase Bill of 1900.

The London Water (Purchase) Bill promoted in the Session of 1900 was defeated on second reading in the House of Commons, and the London Water (Welsh Supply) Bill was withdrawn.

Purchase Bill of 1901.

In the Session of 1901 the London Water (Purchase) Bill was again defeated on second reading in the House of Commons.

Metropolis Water Act, 1897.

The Metropolis Water Act, 1897, provides that if at any time complaint as to the quantity or quality of the water supplied by any of the metropolitan water companies for domestic use is made to the Railway and Canal Commission by any water consumer or local authority, the Commission may hear and determine such complaint; and, if satisfied that the complaint is well founded, may order the company, within such reasonable time as is specified in the order, to remove the ground of such complaint, and may enforce such order in like manner as any other order of the Commission, and may award damages to the complainant. The instances of complaints which have, under this Act, been brought before the Commission are noted *post*, p. 589.

Thames Conservancy Act, 1894.

The Acts relating to the Thames Conservancy Board were consolidated and amended by the Thames Conservancy Act, 1894. The sections of that Act relating to the metropolitan water companies will be found *post*, pp. 576 *et seq.* The provisions of the Act of 1894, so far as they relate to the water companies, are not affected by the Port of London Act, 1908, under which the Thames Conservancy were reconstituted.

Lee Conservancy Act, 1900.

Certain further powers were conferred on the Lee Conservancy Board by the Lee Conservancy Act, 1900.

Staines Reservoirs Acts, 1896, and 1898.

In the Session of 1896 the Staines Reservoirs Act was passed. The Bill was promoted by the West Middlesex Waterworks Company, the Grand Junction Waterworks Company, and the New River Company. By it a joint committee of the three companies was appointed, with power to construct three reservoirs and to collect and divert waters of the river Thames and Wraysbury River and the Colne Brook with certain limitations and conditions. By an Act of 1898 enlargements of two of these reservoirs were authorised. See the notes, *post*, p. 579. Lord Llandaff's Commission say, with reference to this storage: "The storage authorised under the Staines scheme, and now under construction, amounts to about 3,300 million gallons. The area of the top water of the reservoirs is 421 acres." (Report, p. 41, para. 104.) The Acts of 1896 and 1898 respectively provided, that in the event of purchase within a limited number of years, no additional value should be claimed in respect of these fresh powers. See also the Staines Reservoirs (Amendment) Act, 1901, *post*, p. 579.

Southwark and Vauxhall Act, 1898.

By an Act of 1898 the Southwark and Vauxhall Company were authorised to construct two additional reservoirs and to take an additional quantity of water from the Thames. See the notes, *post*, pp. 580 *et seq.*

West Middlesex Act, 1899.

By an Act of 1899 the West Middlesex Water Company were authorised to take certain additional water from the Thames. See the notes, *post*, pp. 580 *et seq.*

Metropolis Water Act, 1899.

The object of the Metropolis Water Act, 1899, was to enable and require the metropolitan water companies to supply each other with water in cases of emergency. See the Act, *post*, p. 591.

Sect. 3 provided that if the undertaking of any of the metropolitan water companies was purchased within seven years from the passing of that Act, otherwise than by agreement, by any public body or trustees, nothing in that Act should authorise the company to bring into account or to make any claim in respect of any advantages conferred on them by or resulting from the passing of that Act. This Act passed on June 6th, 1899. By the Staines Reservoirs (Amendment) Act, 1901, the periods which had been fixed by the Staines Reservoirs Acts of 1896 and 1898, within which, in the event of purchase, the water companies were not to be entitled to bring into account the powers thereby conferred, were extended to June 6th, 1906, being the date fixed by the Metropolis Water Act, 1899.

Metropolis Water Act, 1902.

Constitution of Metropolitan Water Board.

The Metropolis Water Act, 1902, established a board, called the Metropolitan Water Board, for the purpose of acquiring by purchase and of managing and carrying on the undertakings of the eight metropolitan water companies, and generally for the purpose of supplying water within the limits of the Act. The board consists of a chairman and vice-chairman, and 38 other members. The chairman and vice-chairman are appointed by the board, and need not be appointed from amongst the members of the board. The members are appointed by various public authorities as provided in the Act.

Provisions as to arbitration.

A Court of Arbitration consisting of three Commissioners was set up by the Act for the purpose of determining the price to be paid to the companies for their undertakings. The Act provided that in fixing the sum to be paid by the Water Board the Court of Arbitration should determine the value of each undertaking as if with the necessary modifications the law of compensation for the purposes of the Lands Clauses Acts were applicable to the case, but that no allowance was to be made for compulsory sale, nor was any enhancement or depreciation of the market value of the stock or shares of the company which was caused, in the opinion of the Court, by the passing or anticipation of the passing of the Act to be taken into account. The Court might make such allowance as they thought just for recoupment of any loss of interest pending reinvestment and for expenditure incurred by the companies in consequence of the Act which ought in the opinion of the Court to be borne by the Water Board. The costs of the arbitration were to be borne by the Water Board.

Provision was made for the dissolution of the companies in due course, for the protection of existing officers and servants of the companies, and for compensation to directors, and to the official auditor of the accounts of the metropolitan water companies.

The provisions of the Act are set forth in *extenso* at p. 596, *post*.

Metropolitan Water Board Act, 1906.

The Metropolitan Water Board Act, 1906, conferred further powers upon the Water Board with regard to the construction of certain works authorised by the East London Waterworks Acts, 1900, and the Southwark and Vauxhall Water Act, 1894, and for raising further moneys. Power is given to the Board to raise money, if they think fit, by the issue of bills instead of by mortgages or stock, subject to regulations to be made by the Local Government Board.

Metropolitan Water Board (Charges) Act, 1907.

The Metropolitan Water Board (Charges) Act, 1907, provides for uniform scales of charges for water applicable throughout the limits of supply of the Water Board. The Act of 1902 required the board to introduce a Bill for this purpose within three years from the appointed day, namely, the 24th June, 1904.

Metropolitan Water Board (Various Powers) Act, 1907.

The Metropolitan Water Board (Various Powers) Act, 1907, conferred further powers upon the Water Board with regard to the construction of works and other matters, and authorised the establishment of a superannuation fund and the borrowing of further moneys.

JOSHUA SCHOLEFIELD.

SCHEDULE A.*

PURCHASE BY LOCAL AUTHORITIES OF THE UNDERTAKINGS OF NON-STATUTORY GAS COMPANIES.

1879. Queenstown Gas.—Bill promoted by a non-statutory company to obtain statutory powers. On opposition of the local authority, a two years' purchase clause was inserted.

1887. Dundalk Gas.—The gas company had been in existence about fifty years without any statutory authority. The undertakers had lately formed a limited company, and in the session of 1886 promoted in Parliament a Bill for re-incorporation and statutory powers. The Bill was opposed by the Dundalk Commissioners. The Committee of the House of Commons found the preamble proved; but the Bill was rejected on third reading in the House itself. In the session of 1887 the company re-introduced their Bill, and the Commissioners introduced a Bill of their own to enable them to undertake gas supply. The latter came on first before a Committee of the House of Lords, presided over by the Earl of Derby. The *locus standi* of the gas company was objected to, but was allowed. The Commissioners were willing to purchase on the footing of a non-statutory company. For the company it was contended that there was no case of competitive works being authorised where a gas company were able and willing to supply gas. The company's Bill contained a purchase clause. The Committee allowed it to proceed, and rejected the Bill of the Commissioners. Before the Committee of the House of Commons (the Earl of March, chairman) the contention was whether or not there should be a no-enhancement clause, *i.e.*, whether the undertaking in the event of a purchase should be regarded as a statutory or a non-statutory company. For the Commissioners it was urged that a no-enhancement clause had been inserted in the Queenstown Gas Act, 1879 (non-statutory). The Committee inserted such a clause.

1891. Rhyl Gas.—Bill of non-statutory company for further capital. Under a local Act the Rhyl Commissioners could not set up works of their own without purchasing. Committee of H. C. (Sir William Houldsworth, chairman) gave three years for exercise of option to purchase, and no enhancement. In H. L. an agreement was come to and scheduled.

1891. Glasgow Corporation (Partick, Hillhead, and Maryhill) Gas—In 1869 the Corporation of Glasgow acquired the gas undertaking of two companies then supplying gas within Glasgow and the neighbourhood. Partick, Hillhead and Maryhill were not within the limits of the city of Glasgow, but were within the gas limits. Glasgow had power to charge a differential rate in these three burghs. This led to dissatisfaction on the part of the consumers in those places, and a limited company was formed in 1871 for the purpose of supplying these districts with gas. This limited company had no parliamentary powers, but were permitted by the local authorities as occasion required to break up the streets for the purpose of laying and maintaining the gas pipes. In 1873 the limited company promoted a Bill for re-incorporation and for statutory powers. This Bill was opposed by the Corporation of Glasgow successfully, and it was thrown out. Several unsuccessful attempts were made by the Corporation of Glasgow to include Partick, Hillhead and Maryhill within their limits. In 1890 the limited company again promoted a Bill for re-incorporation and statutory powers. This Bill was again opposed by the Corporation of Glasgow, and it was rejected (H. C., Mr. (afterwards Sir) Theodore Fry, chairman). It appeared that at that time Glasgow supplied 20 per cent. of the gas used in these burghs and the company supplied 80 per cent. In the course of the case the counsel for the company offered to sell on arbitration terms as a going concern. This offer was refused. After this the parties concerned entered upon negotiations which resulted in an agreement for the purchase by the corporation of the company's undertaking upon certain agreed terms which were embodied in an agreement scheduled to the Glasgow Corporation (Partick, Hillhead and Maryhill) Gas Act, 1891.

---

* For much of the information contained in Schedules A, B, C, and D, the Editor is indebted to the parliamentary reports of the *Journal of Gas Lighting and Water Supply.*

1894. Ambleside Gas.—A non-statutory company promoted a Bill to obtain statutory powers and additional capital. The local board opposed, asking for a purchase clause. In opening, counsel for the Bill stated that they did not offer strenuous opposition to purchase if limit of time fixed. Local board pressed for rejection of Bill, which it was alleged was really to enhance prices by obtaining statutory powers. They gave a pledge to come for a Purchase Bill in the next session, and offered to continue negotiations in the meantime. Company's Bill rejected by H. C. Committee (Sir James Kitson, chairman. In the session of 1895 the local board promoted a Purchase Bill, which was passed.

1894. Falkirk Gas.—A non-statutory company promoted a Bill to obtain statutory powers and further capital. The Corporation of Falkirk promoted a Bill to construct gasworks of their own, and also to purchase by agreement the undertaking of the company. In the result the corporation Bill was passed. This was practically the result of agreement between the parties, the only difference between them ultimately being in regard to the terms of the purchase clause.

1896. Cowes Gas.—A non-statutory company promoted a Bill for statutory powers and further capital. The local authority opposed, and asked for a purchase clause. Company contended no precedent. Opponents relied on Dundalk case, but it was pointed out that in that case the Dundalk Corporation were also in Parliament with a Purchase Bill. The Committee of the House of Lords (Lord Camperdown, chairman) allowed the Bill to proceed, and refused the purchase clause. The local authority again opposed in the House of Commons; the Committee inserted a three years' purchase clause.

1896. Whittington Gas.—A non-statutory company promoted a Bill for statutory powers and further capital. The Chesterfield Gas and Water Board opposed, alleging that the district was within their authorised limits, and gave a pledge to give "a full, fair and reasonable price for the undertaking" if the Bill were rejected. They relied on the Ambleside case as a precedent. Preamble not proved. The chairman (Sir Wm. Coddington) stated that the Committee relied on the pledge given.

1896. Matlock Bath Gas.—A non-statutory company had applied to the Board of Trade for a Provisional Order. The local authority promoted a Bill to purchase compulsorily. No grievances proved as to price or otherwise, save that the local authority wished to remove the works to a better site. Preamble proved. H. C., Sir Wm. Coddington, chairman. In the House of Lords the company again opposed the Purchase Bill. The Committee (Lord Northbrook, chairman) passed the Bill. The company asked that any arbritration should be under the Lands Clauses Act, but the Committee did not accept the amendment.

1896. Driffield Gas.—The Great Driffield (Gas) Provisional Order was confirmed by 59 & 60 Vict. c. cxii. The sale of the undertaking of the Driffield Gaslight Company (non-statutory) had been agreed under the powers of the Public Health Act, 1875.

1897. Ashford Gas.—Urban district council promoted Bill to purchase compulsorily the undertaking of a non-statutory company. Ultimately the parties agreed on twenty-four years' purchase, it being left to an arbitrator to fix the maintainable profit. H. C.

1897. Malvern Link Gas.—Bill of Malvern Link U. D. C. to acquire the undertaking of a non-statutory company, with whom they had agreed on terms, and who were supporting the Bill. The Great Malvern U. D. C. opposed, they having also a Bill to purchase the same undertaking. The H. L. Committee (Lord Knutsford, chairman) passed the first named Bill, and rejected the other. In 1898 the Great Malvern U. D. C. obtained an extension of their district under the powers of the Local Government Act, 1894, so as to include the Malvern Link district. They thus succeeded to the powers of the Malvern Link Council, and carried out the purchase.

1897. Stirling Gas.—The Stirling Corporation promoted a Purchase Bill to acquire the undertaking of a non-statutory company. The company had agreed to sell, and the price had provisionally been ascertained at £62,697. On the opposition of owners and occupiers (who under the Bill would be liable to a contingent guarantee rate) the Bill was thrown out by the H. L. Committee (Lord Hawkesbury, chairman).

1898. Whitwick and Coalville Gas. — A non-statutory company promoted a Bill for statutory powers and further capital. The urban district council opposed, and asked for a purchase clause. They alleged no complaints. Purchase clause inserted. H. C., Sir James Kitson, chairman.

1898. Stirling Gas. — A non-statutory company had lighted the town for fifty years, and they now sought statutory powers. See *supra*, the proceedings in 1897. No action had been taken since then by the corporation to acquire the undertaking. Corporation now opposed the Bill, and also sought a six months' suspensory clause to enable them to purchase under the powers of the Burghs Gas Supply (Scotland) Act, 1876. The H. L. Committee (Duke of Richmond, chairman), allowed the Bill to proceed without the suspensory clause. Before the H. C. Committee (Col. Gunter, chairman) the preamble was proved.

1898. **Yeovil Gas.**—A non-statutory company promoted a Bill for statutory powers, and conversion and increase of capital. The corporation also promoted a Bill for additional powers with regard to their waterworks, and thereby also sought to acquire compulsorily the gas undertaking. No complaints. They relied for precedents on the Matlock Bath, Cowes, and Whitwick cases. Company's Bill rejected. The corporation Bill passed with purchase clause. H. L., Lord Lauderdale, chairman. The purchase section in the Yeovil Corporation Act, 1898, provided for arbitration under Lands Clauses Act ; excess works and plant ; payment by corporation of company's costs in present session, including cost of opposing corporation Bill ; compensation to officers (14 years) ; payment by corporation of costs incident to transfer and winding up.

1898. **Frodingham Gas.**—A non-statutory company promoted a Bill for statutory powers. The Urban District Councils of Scunthorpe and Frodingham respectively opposed, desiring to set up works of their own. Before the Committee the parties came to an agreement. Part of the terms was the introduction of a Purchase Bill in the next session. H. C., Mr. A. H. Brown, chairman. See, further, Scunthorpe, 1899, *infra*.

1899. **Brigg Gas.**—A non-statutory company applied to the Board of Trade for a Provisional Order. The local authority promoted a Bill for compulsory purchase of the undertaking. In the course of the case the company withdrew their opposition to the Purchase Bill on terms arranged. H. C., Sir John Brunner, chairman.

1899. **Scunthorpe Gas and Water.**—The Scunthorpe U. D. C. promoted this Bill in pursuance of the arrangement come to in 1898, and the Bill sought to acquire the undertaking of the non-statutory company above referred to. (See 1898, Frodingham Gas.) It was opposed by the Frodingham U. D. C., who were at present supplied by the non-statutory company. The promoters offered a clause, which was accepted, to enable the Frodingham U. D. C. to purchase from the promoters the mains and pipes in their district without allowing anything for goodwill. H. C., Sir John Brunner, chairman.

1899. **Newtown Gas.**—A non-statutory company promoted a Provisional Order for statutory powers and additional capital. The urban district council opposed before the Board of Trade, asking unsuccessfully for the introduction of a purchase clause. Before the Committee on the confirming Bill they again appeared in opposition, when a purchase clause was granted by the Committee. H. L., Lord Camperdown, chairman. In 1900 the Purchase Bill was introduced and passed.

1900. **Portland Gas.**—A non-statutory gas company having gone into liquidation, the Urban District Council of Portland entered into an agreement with the liquidator for the sale and transfer of the undertaking to the council, and this was carried out by the Portland U. D. C. Gas, etc. Act, 1900.

1901. Petersfield and Selsey Gas.—By this Bill it was proposed to incorporate a company to acquire the undertakings of two non-statutory companies. It was opposed by the Petersfield U. D. C., who sought a purchase clause. This was inserted by agreement. H. C., Mr. Harwood, chairman.

1901. Mansfield Gas.—The Corporation of Mansfield had the gas supply in their own hands. They afforded a supply in bulk to a non-statutory company, which retailed it in Mansfield-Woodhouse. The corporation by this Bill sought to acquire this undertaking compulsorily. The Bill passed by agreement.

1901. Golborne Gas.—Bill promoted by a non-statutory company for parliamentary authority, and to repeal certain powers of the Leigh Corporation to supply gas in the district of Golborne. The Committee passed the preamble. H. C., Mr. Caine, chairman. In the House of Lords the Bill was again allowed to proceed, the Leigh Corporation getting authority to remove any pipes they had laid but getting no compensation for the laying of them. Lord Hatherton, chairman.

1901. Omagh Gas.—Bill to re-incorporate a non-statutory company and confer statutory powers. It was opposed by the Omagh U. D. C., who sought a purchase clause. The Committee found the preamble proved and gave a three years' purchase clause. H. L., Lord Newton, chairman. In the Session of 1902 a Purchase Bill was introduced by the Omagh U. D. C., and was passed into law.

1901. Swaffham Gas.—A non-statutory company having applied to the Board of Trade for a Provisional Order for further capital, the urban district council opposed and obtained the insertion by agreement of a two years' purchase clause. No purchase was effected in this case.

1901. Winsford Gas.—The Over and Wharton Gas Co., Ltd., were supplying gas to the town of Winsford. They resolved to wind up the company voluntarily, and the liquidators agreed to sell the undertaking to the Winsford Urban District Council. The transaction was carried out by the Winsford Urban District (Gas Transfer, etc.) Act, 1901.

1902. Chard Gas.—A non-statutory company came to Parliament for statutory powers and for further capital and the introduction of the sliding scale. The Chard Corporation opposed. The H. C. Committee (Mr. Fison, chairman) passed the preamble and granted a purchase clause limited to the ensuing session of Parliament, and the Committee required the insertion of a provision against the raising of more than £6,000 of capital before January 1st, 1904. A Purchase Bill was introduced and passed in the Session of 1903.

1902. Whitstable Water and Improvement.—The Urban District Council of Whitstable promoted a Bill to purchase the undertakings of a water company and a gas company—both of them non-statutory. There was no opposition. Failing agreement, the price was to be determined by arbitration under the Lands Clauses Acts.

1902. Syston and Thurmaston Gas.—A non-statutory company had been supplying gas in Syston and Thurmaston. They promoted a Provisional Order to obtain statutory powers, further capital, etc. The Thurmaston Urban District Council opposed the confirming Bill, and desired either that Thurmaston should be left out of the Order or that they should get a purchase clause as to that portion, their ultimate desire being to obtain a supply from the neighbouring town of Leicester, where gas was being supplied at 2*s.* as against 3*s.* 6*d.* charged in Thurmaston. The Committee of the House of Lords (Earl of Erne, chairman) passed the confirming Bill without a purchase clause. It may be mentioned that the Provisional Order contained a clause (s. 6) providing for the cesser of the powers of the undertakers as to Thurmaston in case the urban district council could satisfy the Board of Trade that the undertakers failed to afford an adequate supply.

1902. Glasgow Gas.—By the Glasgow Corporation (Gas, etc.) Provisional Order, 1902, confirmed by 2 Edw. 7, c. clxxxv., the Glasgow Corporation purchased for an agreed price the undertaking of the Milngavie Gaslight Co. (non-statutory).

1903. Shepshed Gas.—By the Shepshed Urban District Council Gas Act, 1903, the transfer was authorised by agreement of a non-statutory company on arbitration terms under the Lands Clauses Acts.

1903. Chard Gas.—See 1902, Chard Gas, *supra.*

1903. Nantwich Gas.—By the Nantwich U. D. C. Act the council were empowered to acquire the undertaking of the Nantwich Gas Co., Ltd. In addition to the price of the undertaking, the council were to pay to the company £250 towards the cost of promoting the Nantwich Gas Bill, 1903, of the opposition of the company to this Act, and of winding up.

1904. Bishops Stortford and District Gas.—A limited company, established originally in 1834, and registered under the Joint-Stock Companies Acts in 1871, promoted a Bill for incorporation as a statutory company. They were opposed by the Bishops Stortford Urban District Council. In the result a compromise was arrived at, a purchase clause being inserted (s. 76). Mr. Tennant, chairman.

1904. Chippenham Gas.—A non-statutory gas company promoted a Bill for re-incorporation as a statutory company and for further powers. The company were not unwilling to sell and the local authority were willing to purchase. The Committee on the Bill adjourned the proceedings for the parties to prepare a purchase clause. On resuming, the company proposed a purchase clause in the usual terms, and the corporation proposed a clause which was described as an "old iron clause." The Committee preferred the former. See s. 89. Mr. Fison, chairman.

1904. Wellington (Somerset) Gas.—This was a Bill promoted by a limited company for re-incorporation and for further powers. A purchase clause was inserted (s. 77) by agreement with the corporation, and the Bill passed unopposed.

1904. Doncaster Corporation.—In the year 1827 a non-statutory company was formed for the supply of Doncaster, consisting of the corporation and certain individuals. Afterwards the whole concern became vested in the corporation, who, down to the time of the promotion of the Bill, supplied their district with gas and also certain outlying districts. The Bill sought for statutory powers and further capital. On the petition of the local authorities of the two outside districts—Balby-with-Hexthorpe and Wheatley—a purchase clause was inserted in their favour in respect of mains and plant in their districts, with a provision for compensation during the time any part of their plant may remain idle in consequence of the purchase.

1904. Appleby Corporation Gas.—A non-statutory gas company having agreed to sell their undertaking to the local authority, a Bill was promoted by the corporation to authorise the transfer, and for various additional powers (s. 4).

1904. Shipley U. D. C. Act.—By this Act an agreement for the purchase of a non-statutory company was confirmed, and various additional powers obtained.

1905. Hitchin Gas.—Bill promoted by a non-statutory company to obtain statutory powers. The urban district council opposed and asked for the insertion of a purchase clause. A Committee of the House of Commons (Mr. Agg Gardner, chairman) refused to insert such a clause. This case is a notable exception to the general practice of Committees, as illustrated in what precedes. The company had an excellent record for economy and good management. Their share capital was only £7,000, and they had, instead of raising further capital, borrowed money for capital purposes (in all £14,000) from time to time at a fairly low rate of interest. They had also expended divisible profit upon capital purposes. In consequence, the structural value of the works was said to be £32,000, and it was stated that the urban district council had offered £33,000, whereas, if the concern were purchased on the footing of £700 a year maintainable profits, with a multiplier of, say, twenty-five years, that would only give £17,500. There were no complaints, and the price was 3*s.* to ordinary consumers and 2*s.* 5*d.* to the local authority for public purposes. J. G. L., April 4th, 1905, pp. 14, 19, 38.

In the House of Lords the urban district council again opposed the Bill, and sought for the insertion of a purchase clause. The Committee (Lord Newton, chairman) allowed the Bill to proceed, subject to the insertion of a purchase clause. J. G. L., May 30th, 1905, pp. 586–8. See s. 71 of the Act (5 Edw. 7, c. cxxxi.).

1906. Dowlais Gas.—This Act dissolved the Dowlais Gas and Coke Co., Ltd., a non-statutory company, and re-incorporated the company with powers to manufacture and supply gas. The Bill was opposed by the Merthyr Tydfil Corporation. By agreement a purchase clause in the Hitchin form was inserted, without the provision making it an absolute direction to the arbitrator to allow 10 per cent.

1906. Truro Gas.—By this Act a limited company was dissolved and re-incorporated with additional powers. A purchase clause was inserted by agreement with the corporation, entitling them to apply for power to purchase without opposition from the company within seven years. Compensation for officers and servants is provided for. The clause as agreed included a provision that the corporation should take over the "liabilities, mortgages, and other obligations." These included a sum of £8,000 irredeemable stock. The Local Government Board raised objections to this, and the provision was struck out by the Unopposed Committee of the House of Lords.

1906. Wolstanton Urban District Gas.—An agreement to purchase the undertaking of the Chesterton Gas Co., Ltd. (a non-statutory undertaking), was confirmed by this Act.

1907. Bude Gas.—A new company was incorporated by this Act with power to construct works and supply gas. A purchase clause, operative for twenty-one years, was inserted by agreement with the local authority.

1907. Llandrindod Wells Gas.—A new company was incorporated by this Act with power to construct works and supply gas. A clause was inserted by agreement providing for the purchase of the works if within six months after the expiration of a period of twenty-one years from the passing of the Act the council serve notice on the company.

1908. Ammanford Gas.—A company was incorporated by this Act with power to purchase by arbitration the works of the Amman Valley Gas Co., Ltd. Power is given to the urban district council to purchase the undertakings after twenty-one years, without opposition from the company.

1908. Blackwood Gas.—By agreement, a purchase clause was inserted in favour of the local authority, operative in twelve months after the expiration of twenty years from the passing of the Act.

1909. Lisburn Urban District Council.—The Lisburn Gas Co. and the Lisburn Urban District Council both promoted Bills, the former seeking to be re-incorporated, the latter to obtain power to purchase the company's undertaking. By agreement, the company withdrew their Bill and allowed the council's measure to proceed unopposed.

SCHEDULE B.

PURCHASE BY LOCAL AUTHORITIES OF THE UNDERTAKINGS OF STATUTORY GAS COMPANIES.

1877. Waterford Gas.—Bill promoted by a statutory company for additional powers and further capital. In the second House, after the Committee had decided to allow the Bill to proceed, the corporation brought up a ten years' purchase clause. The promoters opposed the clause "on the ground of its being compulsory." The Committee accepted the clause, inserting three years instead of ten. H. L., Viscount Sidmouth, chairman.

1887. Pudsey Gas.—A statutory company promoted a Bill for new capital. Within their limits were two districts that had since been added to Bradford. Bradford opposed, and said they were willing to purchase, but asked that the Bill might be rejected. Preamble proved. H. C., Mr. Giles, chairman.

1888. Swansea Gas.—Bill promoted by a statutory company for additional capital. The corporation opposed and asked for a purchase clause. The Committee refused. H. C., Mr. (now the Right Hon.) James W. Lowther, chairman.

1890. Ystrad Gas and Water.—Statutory company with Bill for further works. Local authority opposed, asking purchase clause. Agreement come to before the Committee. H. L.

1890. Derby Gas.—Statutory company—Bill for new works and capital. Corporation opposed. Purchase clause refused. H. C., Right Hon. James Lowther, chairman.

1891. Stourbridge Gas and Water.—Bill by Stourbridge Improvement Commissioners to purchase both undertakings compulsorily. Both companies statutory. Terms agreed as to gas. As to water, Committee refused purchase clause. H. C., Sir William Houldsworth, chairman.

1891. Salford Corporation Gas.—The corporation, having parliamentary powers, promoted a Bill for additional capital, etc. Outlying local boards supplied opposed, and asked for power to purchase their portions of undertaking. Purchase clause granted. H. C., Mr. Mount, chairman.

1892. Southend Gas.—Statutory company promoted Bill for further capital, etc. Local board opposed, asking for a purchase clause. Refused. H. C., Mr. Herbert Gladstone (now Lord Gladstone), chairman.

1892. Ilkley Gas.—The local board promoted Bill to acquire the undertaking of the Ilkley Gas Co., which was statutory. Complaints were alleged as to the method of the accounts. The House of Commons Committee (Sir Francis Sharp Powell, chairman), passed the preamble. Owing to the dissolution of Parliament in 1892, the Bill was suspended till the session of 1893. It then came before a Committee of the House of Lords, when counsel announced a settlement.

1893. Accrington Gas and Water.—Statutory company promoted Bill for additional works and capital. The Corporation of Accrington opposed, asking for a purchase clause. The Committee of the House of Lords allowed the Bill to proceed without a purchase clause. Before the House of Commons Committee a purchase clause was inserted by agreement of parties.

1893. Barry and Cadoxton Gas and Water.—The local board promoted a Bill to acquire compulsorily the undertaking of the gas and water company, which was statutory. On the morning of the second day counsel announced a settlement.

1893. Pontypridd Gas.—The Pontypridd Local Board (Gas) Act, 1893 (56 & 57 Vict. c. c.), authorised the purchase of the undertaking of the Pontypridd Gas Light and Coke Co. (statutory) upon terms contained in an agreement scheduled to the Act.

1893. Barnoldswick Gas.—The Barnoldswick Local Board Gas Act, 1893 (56 & 57 Vict. c. clvii.), authorised the purchase of the undertaking of the Barnoldswick Gas and Light Co. (statutory) upon terms contained in an agreement scheduled to the Act.

1895. Ilfracombe Gas.—Statutory company promoted Bill for new works and further capital. Local authority opposed and asked for a purchase clause. The Bill contained other controversial matter such as the removal of the gasworks and the construction of a pier with harbour jurisdiction. Bill rejected. H. L., Viscount Hampden, chairman.

1895. North Middlesex Gas.—Statutory company promoted Bill for additional works and capital. The company supplied the districts of several local authorities. One of these (Hendon District Council) opposed, and asked for a purchase clause. Company replied that joint board would have to be formed. Purchase clause refused. H. C., Sir James Kitson, chairman.

1895. Chesterfield Gas and Water.—In 1894 a statutory company promoted a Bill for additional capital and increase of water rate. The Chesterfield Corporation opposed, making complaints mainly in regard to water, and asking that the Bill might be rejected to enable them to come with a Purchase Bill. Company's Bill rejected, the Committee intimating that in the event of a purchase both the gas and the water should be acquired. In 1895 a Bill was promoted for the formation of a joint board and the purchase of the gas and water undertakings. Before the Committee the main point discussed regarding the purchase was whether the arbitration should be under the Lands Clauses Act, 1845, or under the Public Health Act, 1875. The Committee, following the general rule, decided in favour of the Lands Clauses Act. H. L., Earl of Jersey, chairman.

1895. Hebden Bridge and Mytholmroyd Gas.—This was a Bill promoted by local authorities to purchase the undertaking of a statutory gas company, and to form a joint board. The terms of purchase had been agreed beforehand, and the Bill was unopposed.

1896. Norwich Gas.—The British Gaslight Co., a statutory company, promoted a Bill for further capital in respect of their Norwich station. Corporation opposed and asked a purchase clause. The Bill was allowed to proceed. No purchase clause. H. L., Lord Poltimore, chairman.

1896. Leamington Gas.—Bill of Leamington Corporation for various purposes, including power to purchase undertaking of a statutory gas company. Before the Committee it was opened that this part of the Bill had been agreed.

1896. Ystradyfodwg Gas and Water.—The Ystradyfodwg U. D. C. (Gas and Water) Act, 1896 (59 & 60 Vict. c. lxxi.), s. 6, authorised the purchase by the council of the statutory gas and water undertakings of the Ystradyfodwg Gas and Water Co., and failing agreement, provided for arbitration to ascertain the price.

1897. Lowestoft Gas and Water.—Corporation Bill for compulsory purchase of the Lowestoft Water, Gas and Market Co. (statutory). The promoters said they would not have asked for the gas but for the water. The corporation complained of the water, but offered no new supply. The H. L. Committee (Lord Poltimore, chairman) rejected the Bill.

1897. St. Anne's-on-Sea Gas.—Local authority promoted a Bill for compulsory purchase of a statutory gas undertaking. A Committee of the House of Lords (Lord Poltimore, chairman) passed the Bill, a clause being inserted to insure a "fair and full value being paid." In the other House (Col. Gunter, chairman) the preamble was not proved.

1897. Weymouth Gas.—A statutory company promoted a Bill for extension of limits and additional capital. Corporation opposed and sought purchase clause. Clause refused. H. C. Committee, Mr. Jeffreys, chairman.

1897. Kingston-upon-Hull Gas.—The Kingston-upon-Hull Corporation Act, 1897 (60 & 61 Vict. c. ccxlix.), authorised the purchase of the undertaking of the Kingston-upon-Hull Gaslight Co. (statutory) upon terms of an agreement, scheduled.

1898. Aberystwith Gas.—A statutory company promoted a Bill for new works and additional capital. By arrangement a purchase clause was inserted. A difference arose as to whether the arbitration should be under the Lands Clauses Act, 1845, or the Arbitration Act, 1889, and the H. L. Committee (Lord Lauderdale, chairman) decided for the latter.

1898. Redhill and Reigate Gas.—The Redhill Gas Co. (statutory) promoted a Bill to acquire by agreement the undertaking of the Reigate Gas Co., Limited (also statutory), and for further capital. The Reigate Corporation opposed, and sought a purchase clause. The H. L. Committee (Lord Lauderdale, chairman) granted a purchase clause. Promoters asked for time to consider, and on the Bill coming again before the Committee it was withdrawn.

1898. Morley Gas.—A statutory company promoted a Bill to include the district of Chirwell, and to acquire the undertaking of the Chirwell Gas Co. (non-statutory). The corporation also promoted a Bill by which they sought to acquire compulsorily the Morley Gas Undertaking. There were complaints of quality, and in connection with the accounts.

The corporation relied for precedents on the Ilkley, Ystrad, and Redhill and Reigate cases. Corporation Bill proceeded. Company's Bill rejected. The purchase clause provided for arbitration under the Lands Clauses Act "with reference to the purchase and taking of land otherwise than by agreement," the gas company to be entitled out of cash in hand to pay their costs in opposing the Purchase Bill, and of promoting their own Bill (subject to taxation if desired by the corporation as between solicitor and client), the corporation paying costs of winding-up and compensation to officers. H. L., Lord Rookwood, chairman.

1898. **Rhymney and Aber Valleys Gas and Water.**—An undertaking was authorised for supplying with gas and water a number of districts in the county of Monmouth and in the county of Glamorgan. Portions of those parishes were supplied by a statutory company authorised in 1892. An agreement was come to between the parties which was scheduled to the Act.

1898. **Hartlepool Gas and Water.**—A statutory company promoted a Bill for further reservoirs, and additional capital to meet increased demand for soft water for trade purposes. The corporation opposed, and were allowed to go into the question of gas as well as water. They sought a purchase clause as to both gas and water. Preamble proved. No purchase clause. H. C., Sir James Kitson, chairman.

1898. **Filey Gas and Water.**—Bill promoted by the urban district council to acquire compulsorily the undertaking of a statutory company, There had been negotiations extending back many years. The promoters asserted that the company were opposing in order that the purchase might be considered compulsory under the Lands Clauses Act. For the company it was urged that there being no complaints there was no precedent. Preamble proved. H. L., Earl of Kintore, chairman.

1899. **Ilford Gas.**—A statutory company promoted a Bill for further capital. The urban district council promoted a Bill for compulsory purchase of the undertaking. Preamble of company's Bill proved. Preamble of Purchase Bill not proved. H. C., Mr. Schwann, chairman.

1899. **Lea Bridge Gas.**—A statutory company promoted a Bill for further capital. The local authorities of Walthamstow and Leyton opposed and asked for a purchase clause. Preamble proved. No purchase clause. H. L., Lord Camperdown, chairman. Before the Committee of the other House (Sir Wm. Houldsworth, chairman) the opposition was renewed. The Committee found the preamble proved, and did not insert any purchase clause.

1899. **Skipton Gas.**—A statutory company promoted a Bill for further capital. The urban district council also promoted a Bill to acquire the undertaking compulsorily. They called much local evidence as to bad quality and complaints. It was announced to the Committee that an agreement had been arrived at. Purchase clause inserted, which specially provided for an allowance of 10 per cent. for compulsory purchase. H. L., Lord Wenlock, chairman.

1899. **Loughborough Gas.**—A statutory company promoted a Bill for additional capital. The corporation promoted a Bill to acquire the undertaking compulsorily. There had been complaints. The

Morley case was relied on for the corporation. The company replied that the Morley Company were practically willing sellers. Company's Bill rejected and corporation's Bill proceeded. H. L., Lord Ribblesdale, chairman. The Bill was not opposed in the second House.

1899. Bradford Gas.—The corporation promoted a Bill to acquire so much of the Shipley and Pudsey Gas Companies as lay within the extended boundaries of the borough. The corporation had the gas supply in the unextended borough in their own hands. The borough had been extended previously in 1881, and then the position of these outside gas companies had been protected by clauses. Now that the borough had been further extended the consequence was that the charge for gas was not the same throughout the extended borough. The company complained that the taking of part of their undertaking would make it more expensive for them to supply the rest of their district. The Committee suggested a compromise; but the companies refused to entertain any proposal, and went on with their case. The corporation having relied on the Morley case, the opponents replied through a witness that that case was practically a case of agreement. (See the Loughborough case, *supra.*) Preamble not proved. H. C., Mr. Molloy, chairman. See 1900, Bradford Gas, *post*, p. 122.

1900. Glyncorrwg Gas.—By the Llynvi Gas Act, 1868, a company was incorporated to supply gas within an area which included the urban district of Glyncorrwg, in the county of Glamorgan. By agreement, the urban district council of Glyncorrwg purchased that portion of the undertaking which lay within their district, and the transaction was carried out by the Glyncorrwg Urban District Council Gas Act, 1900.

1900. Ossett Gas.—A statutory company promoted a Bill for additional capital and other purposes. The corporation also promoted a Bill for compulsory purchase. In the course of the second day's hearing the parties came to terms, which were announced, including arbitration under the Lands Clauses Act.

1900. Morecambe Gas.—The Morecambe U. D. C. promoted a Bill to acquire the undertaking of a statutory company, the limits of which embraced certain outside places including Heysham. Terms had been agreed with the company. The Bill contained a clause to authorise the sale to outside authorities of their portion of the "undertaking." Heysham opposed, objecting to the use of that word, and alleging that the agreed price was excessive. The H. C. Committee found preamble proved. (Sir T. Gibson Carmichael, chairman.) The H. L. Committee also allowed the Bill to proceed with the clause as proposed. (Earl of Erne, chairman.) See 1899, Stockport Water, *post*, p. 137, and see also *ante*, p. 37.

1900. Glastonbury Gas.—Bill to authorise the corporation to acquire the undertaking of a statutory gas company. Terms had been agreed, including arbitration under the Lands Clauses Act. The only opposition was from the Urban District Council of Street, which was supplied by the company. The Bill contained a clause authorising outside districts to purchase their portion of the "undertaking, and works, mains, and plant." Preamble proved, H. C., Mr. Schwann chairman. The Committee inserted a clause providing for a separate sinking fund for Glastonbury and Street respectively in case Street should purchase its portion; and surplus revenue was directed to go in reduction of price, subject to a power to carry to the district fund 1 per cent. per annum in respect of capital expended.

1900. Hartlepool Gas and Water.—A statutory company promoted a Bill for £200,000 additional capital earmarked for the gas portion of the undertaking and also for conversion of stock. The corporation opposed and asked for a purchase clause. Company contended no complaints, and relied on decision of Sir James Kitson's Committee in 1898. See *ante*, p. 120. Preamble proved. New capital fixed at £150,000. H. C., Sir T. Gibson Carmichael, chairman.

1900. Cleethorpes Gas.—A statutory company promoted a Bill for additional capital, conversion of present capital and sliding scale. The local authority opposed, but terms were arranged which did not include purchase.

1900. Wolverhampton Gas.—A statutory gas company having promoted a Bill for additional capital, etc., the corporation petitioned. Terms were arranged between the parties, including a purchase clause enabling the corporation to come for a Purchase Bill in the next or the following session of Parliament, if they should so desire.

1900. Bradford Gas.—The corporation, under the Local Government Act, 1894, obtained a considerable extension of boundaries embracing districts now supplied by four statutory companies. Pleading the desirability of uniformity of price and illuminating power to the citizens of Bradford, the corporation now promoted a Bill to acquire the several undertakings compulsorily. The following instances were mentioned in the course of the case as precedents for the compulsory acquisition of a statutory gas company: Ilkley, Chesterfield, Skipton, Stourbridge, and Morley. As regards the North Bierley Gas Company an agreement was arrived at, but as regards the others the Committee declared the preamble not proved. H. C., Lord E. Fitzmaurice, chairman. See 1899, Bradford Gas, *ante*, p. 121.

1901. Poulton-le-Fylde Gas.—A Bill by the local authority to purchase the undertaking of a statutory company. The Provisional Order of the company of 1888 contained a purchase clause. Terms of purchase were agreed.

1901. Heckmondwike Gas.—The Bill proposed to constitute a joint gas board for the urban districts of Heckmondwike and Liversedge, and to acquire compulsorily the statutory undertaking of the Heckmondwike Gas Company. The company opposed. The promoters attempted to prove complaints. Preamble not proved. H. C., Mr. Schwann, chairman.

1901. Hartlepools Gas and Water.—The Corporations of Hartlepool and West Hartlepool promoted a Bill to acquire compulsorily the statutory undertaking of the Hartlepool Gas and Water Company. In opening, the counsel for the corporation said "he did not know that any great fault was to be found with the company, and he would take it therefore that their gas and water were fairly good in quality and quantity and below the maximum price." The case for the Bill was therefore based on public policy. Preamble not proved. H. C., Mr. Schwann, chairman.

1901. Colwyn Bay Gas.—This Bill was promoted by the Colwyn and Colwyn Bay U. D. C., and it sought to acquire compulsorily the undertaking of a statutory company. In 1896, however, the local authority had obtained the insertion of a five years' purchase clause in the company's special Act of that year. In 1899 they attempted to carry out this purchase by a Provisional Order. This had to be dropped, because although the Local Government Board were favourable to purchase, the limits of the company were not confined to the district of the local authority. Terms were arranged, including arbitration under the Lands Clauses Act, and allowance for any excess of works and plant.

1901. Devonport Gas.—A statutory company promoted a Bill for further capital and powers. The corporation promoted a Bill to acquire the undertaking compulsorily. Complaints were made of the gas. Terms were agreed to and a purchase clause inserted. H. C., Mr. F. W. Fison, chairman.

1901. Weston-Super-Mare Gas.—By this Bill the local authority sought to acquire the undertaking of a statutory company. Terms had been agreed.

1901. Bingley Gas.—The Bingley U. D. C. having gas supply in their own hands afforded a supply in bulk to a company with statutory powers, which retailed it in Cullingworth. Their district was extended to include the district supplied by the company. By this Bill they sought to acquire compulsorily the undertaking of the company. Before the Committee the contest did not turn upon purchase or no purchase, but on the question of terms of purchase. The Bill passed with a purchase clause. H. C., Mr. Heywood-Johnstone, chairman.

1901. Long Eaton Gas.—A statutory company promoted a Bill for further powers. The local authority opposed and sought to purchase. Before the Committee the terms of a purchase clause were agreed to. It included arbitration under the Lands Clauses Act, and 10 per cent. for compulsory purchase. H. C., Colonel Welby, chairman.

1901. Elland Gas.—Bill promoted by a statutory company for consolidation of existing capital and for additional capital. The Elland U. D. C. opposed and asked for a purchase clause. The district of the company extended beyond their area. It was contended on their behalf that the Committee should limit the amount which might be expended on capital during the next twelve months to enable Elland and the adjoining districts to come to Parliament with a Purchase Bill. Bill allowed to proceed. H. L., Lord Pirbright, chairman.

1901. Honley Gas.—By the Honley Urban District Council Gas Act 1901, the council were authorised to carry out an agreement for the purchase of the undertaking of a limited company authorised by Provisional Order.

1901. Shipley Gas.—The Shipley district was being supplied by gas by a statutory company who entered into an agreement with the council for the sale and purchase of the undertaking. This Act authorised the agreement, and made provisions for carrying out the purchase. The urban district of Baildon was within the limits of the Shipley Company, and the Corporation of Bradford had in Parliament in the same session a Bill for extension to include Baildon. They petitioned against the Shipley Bill, but before the Police and Sanitary Committee the extension to Baildon was struck out of the corporation's Bill. The Shipley Act contained the usual clause, "Sale of portion of undertaking to outside authorities."

1902. Abercarn Gas.—The Abercarn and Newbridge Gas and Water Co. had been incorporated in 1884, but had never exercised their water powers. The Abercarn U. D. C. now promoted a Bill for purchase of their gas undertaking and other powers under the Act of 1884. After the Bill had been opened in Committee of House of Commons (Mr. W. S. Caine, chairman), an arrangement was come to and a price agreed.

1902. Bradford Corporation.—By an Omnibus Act the Bradford Corporation obtained power, *inter alia*, to purchase three statutory gas companies, viz., the Clayton Allerton and Thornton Gas Co., the Airedale (Idle) Gas Co., and the Eccleshill and Bolton Gas Co. All of them supplied gas partly within and partly without the city. Agreements had been come to beforehand, and the Bill in this respect was unopposed. The usual clause was inserted for sale to outside local authorities of their portion of the undertaking (s. 72).

1902. Leamington Corporation.—See 1896, Leamington Gas, *ante*, p. 119. In pursuance of the power to purchase given by the Act of 1896, the Leamington Corporation later on gave the necessary notice to purchase. In the Session of 1902 they had an Omnibus Bill in which was contained a clause repealing the purchase clause in the Act of 1896, and declaring the notice to purchase null and void. This clause was not opposed by the gas company. As the counsel for the corporation explained before the Police and Sanitary Committee (Mr. Heywood Johnstone, chairman), the corporation had given the notice at a time when they expected they could borrow the necessary money at the rate of 2¾ per cent., which would have made it possible for them to have carried on the works without recourse to the rates; but they had found that they would have to pay from 3¼ to 3½ per cent., and would therefore have to resort to the rates. Hence their determination to give up the idea of purchasing. The Bill passed with the clause (s. 60).

1902. Rickmansworth Gas.—A statutory company promoted a Bill for further capital. The urban district council presented a petition against the Bill in the House of Lords, but, not having complied with the Borough Funds Act, they were stopped by injunction from expending the ratepayers' money in opposing the Bill. When the Bill came to the second House, the urban district council, having complied with the Borough Funds Act, opposed the Bill, objecting to the proposed increase of capital, and seeking a purchase clause. The Chairman (Sir John Brunner) suggested that the parties should come to an agreement, and in the result an agreement was arrived at as to capital and otherwise, and a purchase clause was inserted. In the session of 1903 a Purchase Bill was introduced by the urban district council. It was opposed by the gas company, who sought for, and ultimately obtained by agreement, the insertion of the following clause:

"18. *Cancellation of Sale on Failure to Complete.*—If the purchase of the undertaking of the company under the provisions of this Act is not completed and the purchase-money paid within five months after the determination of the amount of the said purchase-money, the company may, if they think fit, by notice in writing to the council, declare the sale to be cancelled, and thereupon the provisions of this Act with respect to the sale and transfer of the said undertaking shall become of no effect, but all costs, charges, and expenses incurred by the company with respect to the said sale and transfer, and with respect to the ascertainment of the amount of the purchase-money, as well as the costs, charges, and expenses of obtaining the Rickmansworth Gas Act, 1902, shall in such case be paid by the council."

1902. Broadstairs Gas.—A statutory company promoted a Bill for further works, a new site, and additional capital. The Urban District Council of Broadstairs and St. Peter's opposed the Bill, their main objection being to the proposed site. There were no complaints against the company. The urban district council contended primarily that the site should be rejected, and in the second place that, if the Committee passed the site, they should suspend the power to acquire it for one year to enable the council to come for a Purchase Bill. In the House of Commons the Committee (Sir Savile Crossley, chairman) passed the preamble, with the qualification that no gasholder should be more than 20 feet above the soil. In the House of Lords (Lord Hawkesbury, chairman) the urban district council presented similar contentions, and in the result the Committee decided to strike out the site clause altogether.

1902. Longwood Gas.—A statutory company promoted a Bill for conversion, further capital, and sliding scale. The limits of the company included, amongst other places, Lindley and Longwood. A part of Lindley was supplied by the Corporation of Huddersfield, and in their Act of 1875 the company, by agreement, inserted a clause to the effect that the price to be charged by them in the part of Lindley which they supplied, should not exceed the charge made by the corporation in the portion which the corporation supplied. Afterwards the corporation extended their limits so as to include the whole of Longwood. They now opposed the company's Bill, and sought either that the arrangement in regard to Lindley should be applied to Longwood, or that they should be allowed to purchase the portion of the company's undertaking lying within the limits of Huddersfield. Both these proposals were rejected by the committee. H. L., L. Stanmore, chairman. In the House of Commons the corporation again petitioned, but a compromise was come to.

1903. Rickmansworth Gas.—See 1902, Rickmansworth Gas, *ante.*

1903. Bradford Gas.—By the Bradford Corporation Act, 1903, the corporation of Bradford were authorised to acquire for an agreed sum that portion of the gas undertaking, works, mains, and plant of the Shipley U. D. C. as is contained within Bradford, and the Shipley Council were also authorised to acquire for an agreed sum that portion of the gas undertaking, works, and plant of the corporation as is contained within the district of the Shipley Council.

1903. Bridgwater Gas.—This Bill was promoted by a statutory company incorporated by an Act of 4 Will. 4, but which had not since been in Parliament. By agreement a clause was inserted, providing that the corporation may within twenty years promote a transfer Bill without opposition from the company.

1904. Matlock and District Gas.—Promoted by the Matlock and District Gas Company, which was a statutory company, for further capital, reduction of illuminating power, etc. The Bill was opposed by the Matlock Bath U. D. C., who had statutory power to supply gas, and they desired the insertion of a purchase clause to enable them to acquire compulsorily that part of the promoters' district of supply which lay within the district of the council. It appeared that in 1896 the Matlock Bath Council obtained power to purchase their present undertaking, and a clause was inserted in the Bill to the effect that the area in question should be supplied by the promoters and should not be taken away from them without their consent in writing. The Committee (Lord Barnard, chairman) refused to insert a purchase clause.

1904. Bognor Gas.—Provisional Order promoted by a statutory gas company for further works, further capital, and extension of limits. Opposed by the Bognor U. D. C., who, *inter alia*, sought a purchase clause. The Committee (Earl of Dartrey, chairman) found the preamble proved and gave no purchase clause.

1904. Whitby Gas.—A statutory gas company having promoted a Bill for further capital and the introduction of the sliding scale, a purchase clause in favour of the local authority was, by consent, inserted in the Act (s. 47).

1904. Kirkby-in-Ashfield U. D. C. Gas.—Following upon a re-arrangement of districts, this local authority was authorised to purchase so much of the undertaking authorised by the Sutton-in-Ashfield Local Board Gas Act, 1878, as lay within their district (ss. 3 and 5). The Bill was unopposed. By s. 35 the powers, theretofore unexercised, of a statutory gas company to supply this district were repealed.

1904. Harlow and Sawbridgeworth Gas.—The following precedent giving the first option of purchase to a local authority occurs in the Harlow and Sawbridgeworth Gas Act, 1904, s. 54 :

"*As to Sale of Portions of Undertaking.*—The company shall not at any time agree to sell their undertaking or any part . . . thereof to any local authority, company, or person without previously offering to sell the portion of their undertaking, which is situate in the urban district of Sawbridgeworth, to the urban district council of that district upon the same terms and conditions as may be offered by the said local authority, company, or person, and in the event of the council aforesaid agreeing to purchase the same, the company shall not oppose any application that may be made to the Local Government Board or to Parliament by the council for the necessary powers."

1906. Merthyr Tydfil Gas.—The Merthyr Tydfil Gas Company by this Act were given authority to construct new or additional works, and to purchase compulsorily certain specified lands, and for other purposes. Among the petitioners against the Bill were the Merthyr Tydfil Corporation, who endeavoured to get a purchase clause inserted. This they failed to do, but a suspensory clause was inserted, which had the effect of suspending the operation of the company's new Act in order that the corporation and the company might meet and fight out the question of purchase in a Bill to be specially promoted by the corporation in the following session. Major Seely, chairman.

1906. East Hull Gas.—The Sutton, Southcoates and Drypool Gas Company obtained power by this Act to consolidate their capital, to raise additional capital, and to change their name to "East Hull Gas Company." The Kingston-upon-Hull Corporation desired a purchase clause. This they failed to obtain, but succeeded in getting a suspensory clause inserted corresponding to the clause put into the Merthyr Tydfil Act. Mr. H. J. Tennant, chairman.

In the following session (1907) the Corporation included in an Omnibus Bill a provision to enable them to purchase the undertaking of the company. The Committee of the House of Commons allowed the clause, apparently on the ground that the management of the undertaking had not been all that it might have been. The corporation sought to insert a provision to prevent the company being allowed anything for compulsory purchase, but this was not passed by the Committee. The H. L. Committee (Lord Donoughmore, chairman), however, refused to allow the section of the Bill relating to purchase to proceed.

1906. Pontefract Gas.—This Act empowered the Pontefract Corporation to compulsorily purchase the undertaking of the Pontefract Gas Company. No mismanagement on the part of the company was shown, but the power of compulsory purchase was granted apparently on the ground that the company had shown a want of enterprise. H. C., Mr. J. W. Wilson, chairman.

1908. Garw and Ogmore Gas.—By this Act the company obtained an extension of their statutory limits of supply and other powers. By agreement purchase clauses were inserted in favour of the Ogmore and Garw D. C. and the Llantrisant and Llantwit R. D. C., applying to the portions of the undertaking in their respective areas. The clauses are only operative after ten years.

1908. Gosport Gas Bill.—The Gosport Gas and Coke Company promoted a Bill for the purpose, among other things, of defining the limits of their operations, and giving power to charge differential rates in outlying parts of their district. The Gosport and Alverstoke U. D. C. opposed, and required a purchase clause. The Committee refused to insert a purchase clause.

1908. Wath and Bolton Gas Board.—The Act provides for the constitution of a gas board, and the acquisition by agreement of the undertaking of the Wath-upon-Dearne and District Gas Company, Ltd., a statutory concern. Provision is made that the Thurnscoe Local Authority may purchase the portion of the undertaking within their district if, after December 31, 1912, they give not less than six months' notice.

1908. Swinton and Mexborough Gas.—The Bill was promoted by a limited company having powers under a Provisional Order, and sought for the incorporation of the company with further powers. It was opposed by the Mexborough U. D. C., and a Committee of the House of Commons (Mr. Whitbread, chairman) granted a purchase clause on the ground of past bad management, with the condition that the Swinton and Mexborough Councils should jointly promote a Bill in the next session of Parliament.

1909. Prestatyn Urban District.—The owner of the Prestatyn Gas Undertaking (statutory) applied for a Provisional Order to authorise the expenditure of further capital and for other powers. The Prestatyn U. D. C. promoted a Bill for the purchase of the undertaking. Power to purchase compulsorily was granted.

1909. Heckmondwike and Liversedge Gas.—The Company promoted a Bill to enable them to extend their works, to convert and consolidate their capital, and for other purposes. The Heckmondwike and Liversedge U. D. C. petitioned for the insertion of a suspensory clause, which was granted.

SCHEDULE C.

PURCHASE BY LOCAL AUTHORITIES OF THE UNDERTAKINGS OF NON-STATUTORY WATER COMPANIES.

1882. Todmorden Water.—A non-statutory company promoted a Bill for statutory powers. The local board opposed, and obtained a twelve months' purchase clause, with provision for no enhancement in case of purchase. H. C., Mr. A. H. Brown, chairman.

1882. Queenstown Water.—A non-statutory company promoted a Bill for statutory powers. On the opposition of the Commissioners, a one-year purchase clause was inserted.

1885. Northwich Water.—A Purchase Bill promoted by the local board. The company, which was non-statutory, also promoted a Bill to obtain statutory powers. In the result terms were arranged, the Bill of the local board being passed. H. C., Mr. Shield, chairman.

1889. Rastrick Water.—A non-statutory company promoted a Bill for statutory powers. The local board opposed, and sought a purchase clause. A two years' purchase clause inserted. H. L., Lord Henley, chairman.

1890. Newark-upon-Trent Water.—Bill promoted by a non-statutory company. Corporation alleged they were taken by surprise, and desired to purchase. Bill rejected. H. C., Mr. A. H. Brown, chairman.

1895. Bridlington Water.—A non-statutory company promoted a Bill for statutory powers. The urban district council opposed, and sought a purchase clause. Terms were eventually arranged and the Bill passed with a purchase clause; arbitration under the Lands Clauses Act, and a no-enhancement clause for five years.

1895. Felixstowe and Walton Water.—A non-statutory company promoted a bill for statutory powers and further capital. The urban district council opposed and sought a purchase clause. Counsel for company tendered a purchase clause (with arbitration under Lands Clauses Act) which was accepted.

1898. Matlock Water.—The Matlock U. D. C. promoted a Bill to acquire by agreement the undertaking of a non-statutory water company. A provisional agreement had been come to. The opposition to the Bill was from the Derbyshire C. C. and the Matlock Bath U. D. C. Preamble proved. H. C., Sir William Houldsworth, chairman.

1899. Scunthorpe Gas and Water.—The Scunthorpe U. D. C. promoted this Bill in pursuance of the arrangement come to in 1898 (see 1898, Frodingham Gas), and the Bill sought to acquire the undertaking of the non-statutory company above referred to. It was opposed by the Frodingham U. D. C., who were at present supplied by the non-statutory company. The promoters offered a clause, which was accepted, to enable the Frodingham U. D. C. to purchase from the promoters the mains and pipes in their district without allowing anything for goodwill. H. C., Sir John Brunner, chairman.

1899. Church Stretton Water.—This Bill proposed to authorise the incorporation of a company to supply the parish of Church Stretton with water. The parish was at present supplied by three small water companies, all of them non-statutory. The promoters offered to buy them out if they so desired, and offered to insert a clause to enable the local authority to purchase. The H. L. Committee (Lord Loch, chairman) allowed the Bill to proceed, reducing the capital so as to bring the undertaking within the limits of the purchasing power of the local authority.

1900. Menstone Water.—A limited company was formed for the purpose of supplying with water the township of Menstone, in the West Riding. In 1889, the company came to Parliament for re-incorporation, further capital and works. In this Act a purchase clause was inserted in favour of the Wharfedale Rural District Council. The transaction was carried out by the Menstone Waterworks (Transfer) Act, 1900.

1901. Prestatyn Water.—The local authority promoted a Bill to acquire compulsorily the non-statutory undertaking which was in the hands of one proprietor. Terms of purchase were agreed. H. L., Lord Newton, chairman.

1902. Whitstable Water and Improvement.—The Urban District Council of Whitstable promoted a Bill to purchase the undertakings of a water company and a gas company—both of them non-statutory. There was no opposition. Failing agreement the price was to be determined by arbitration under the Lands Clauses Acts.

1904. Minehead U. D. C. Act.—This Act, which was unopposed, transferred to the Minehead U. D. C. the undertaking of the Minehead Waterworks Co., Ltd., who had no statutory powers. Section inserted fixing the amount of compensation to officers and servants.

1905. Skegness Water.—Lord Scarborough had supplied the town of Skegness with water without an Act of Parliament. He determined to provide the town with a new and better source of supply, and sought for statutory powers. The district council opposed, and asked for a purchase clause. In the result a clause was agreed upon providing for three clear years' tenure of the undertaking, and giving the council (on six months' notice after the expiry of the three years) power to purchase, The district council obtained an Act in 1908 to give effect to the purchase.

1906. New Mills Urban District Council.—The council were authorised by this Act to purchase the Ollerset Waterworks, as well as such portion of the works and plant of the Stockport Corporation as was within the area of the council. The Ollerset works were constructed under an Act of 1831, and the powers of the Act became vested in Mr. F. J. Summers, with whom the council entered into an agreement for the transfer. This agreement is confirmed by the Act.

1906. Poole Corporation Water.—The Poole Water Company promoted a Provisional Order in this session for power to construct additional works and to obtain additional water. The corporation also promoted a Bill to enable them to purchase the company's undertaking, and to carry out certain additional works. The Provisional Order was granted by the Board of Trade, and referred to the Committee to which the corporation Bill was sent. In the result the Provisional Order was withdrawn by the promoters, and the Corporation Bill passed.

1908. Criccieth Water and Improvement.—By agreement this Act authorised, *inter alia*, the acquisition by the council of a non-statutory water undertaking.

SCHEDULE D.

PURCHASE BY LOCAL AUTHORITIES OF THE UNDERTAKINGS OF STATUTORY WATER COMPANIES.

1876. Stockton and Middlesbrough Water.—In the previous year the company (statutory) had come for a Bill for more water from the Tees. The corporations opposed. They proved that the water was bad and suggested that the promoters should go to the hills for the further supply which was wanted. In the following year the company came again with the same scheme but to take less water from the river. The corporations promoted a rival Bill for a supply from the hills. The company's Bill was lost, and the Bill of the corporations was passed with a purchase clause introduced providing (1) for 25 years' purchase of maximum dividends, (2) compensation for prospective profits, and compulsory sale. These last were left to be ascertained by arbitration, and in the result the company obtained, in respect of these considerations, a sum equal to 11½ years' purchase of the maximum dividend. The company, therefore, got in all 36½ years' purchase. H. C., Mr. Orr-Ewing, chairman.

1876. Birmingham Water.—This Bill was promoted by the Corporation of Birmingham in order to acquire the undertaking of the Birmingham Water Company (statutory). An agreement for purchase had been come to between the corporation and the water company in 1851. This agreement was embodied in the clauses of the Birmingham Improvement Act, 1851 (14 & 15 Vict. c. xciii.). It authorised (s. 109) the corporation, on giving twelve months' notice in writing, to purchase "the whole of the waters, engines, machinery, pipes, mains, apparatus, works, and reservoirs of and belonging to the said Birmingham Waterworks Company." Failing agreement the price was to be "settled under the powers of the Lands Clauses Consolidation Act, 1845, relating to the purchase of lands otherwise than by agreement." The corporation failed to put in force this power of purchase, and in the interval between 1851 and 1876 the company expended further capital on their undertaking. The corporation were advised that they could not obtain specific performance by proceedings in Chancery. They accordingly promoted this Bill, which was passed.

1878. Nottingham Water.—Bill promoted by a statutory water company for additional powers. The corporation opposed, and themselves promoted a Purchase Bill. The corporation admitted the company to be efficient, but contended that public policy demanded the transfer. Company's Bill passed. No purchase clause. H. C., Mr. J. Holms, chairman.

1878. Cheltenham Water.—A statutory company promoted a Bill for further works. The corporation also promoted a Bill for works and compulsory purchase. The Committee found the preamble of the company's Bill not proven, and before giving a decision upon the corporation's Bill, they suggested that terms should be agreed upon. After two adjournments an agreement was ultimately arrived at, the compensation being 25 years' purchase of maximum dividends, a sum of £5,000 in discharge of debts and liabilities, the continuance of certain small annuities for which the company were then liable; compensation to manager or continuance in service for three years. H. C., Marquis of Lorne, chairman.

1887. Sheffield Water.—Owing to the bursting of their Dale Dyke reservoir, the company had become liable to pay large sums as compensation. They accordingly obtained an Act of Parliament authorising them for a period of 25 years to increase their authorised water rate by 25 per cent. The period of 25 years would expire in 1889. The company promoted this Bill for the purpose of continuing that increase for another period of 25 years, and also for certain filtration works with a view to rendering the water less soft. The corporation on their part promoted a Bill for compulsory purchase. This Bill was ultimately passed by the House of Lords Committee. Lord Derby, the chairman, announced the following decision : "The Committee have come to a decision that it is expedient that the works of the Sheffield Water Company and the control of the water supply should be transferred to the corporation. They have come to this conclusion on the grounds of public policy. But they do not consider that there has been any proof of mismanagement or failure of duty on the part of the company ; and consequently they think the terms of purchase should be not only fair but liberal. They are, therefore, of opinion that in fixing the price at which the company's works should be taken over the arbitrator should calculate the value as though the additional 25 per cent. expiring in the year 1889 had been continued for five additional years. They are not prepared to lengthen the time over which the sinking fund should extend beyond the period of 60 years. The result of this decision is, that the preamble of the Sheffield Water Company's Bill is not proved, and the preamble of the corporation Bill is proved, subject to the conditions named." Before the House of Commons Committee (Mr. W. W. B. Beach, chairman), an agreement between the parties was announced, the only matter requiring the attention of the Committee being the sinking fund. After the decision of the Committee of the House of Lords, and upon motion for the third reading of the Bill, on April 28th, 1887, in that House, an amendment was moved by the Earl of Wemyss, that the Bill be read the third time that day six months, on the ground that the company had not failed in their duty, and that if such transfers ought to be authorised as matters of public policy, Government should undertake public general legislation on the subject. After a discussion, in which the Earl of Derby, Lord Grimthorpe, Lord Balfour of Burleigh, the Duke of Argyll, Lord Bramwell, the Duke of Buckingham (chairman of committees), and the Earl of Morley took part, the amendment was withdrawn.

1890. Ystrad Gas and Water.—Statutory company with Bill for further works. Local authority opposed, asking purchase clause. Agreement come to before the Committee. H. L.

1891. Stourbridge Gas and Water.—Bill by Stourbridge Improvement Commissioners to purchase both undertakings compulsorily. Both companies statutory. Terms agreed as to gas. As to water, the Committee refused a purchase clause. H. C., Sir William Houldsworth, chairman.

1893. Accrington Gas and Water.—Statutory company promoted Bill for additional works and capital. The Corporation of Accrington opposed, asking for a purchase clause. Committee of the House of Lords allowed the Bill to proceed without a purchase clause. Before the House of Commons Committee a purchase clause was inserted by agreement of parties.

1893. Barry and Cadoxton Gas and Water.—The local board promoted a Bill to acquire compulsorily the undertaking of the gas and water company which was statutory. On the morning of the second day counsel announced a settlement.

1895. Whitby Water.—Statutory company promoted Bill for additional capital and sanction of certain unauthorised expenditure on works. The urban district council opposed, and also asked for a purchase clause. Preamble proved; purchase clause refused; but a proviso inserted to the effect that in the event of the undertaking being acquired by the district council, the amount of the new capital authorised (except so far as expended for certain defined purposes, and on works authorised by that Act), shall not be deemed to have increased the capital value of the undertaking, or be the subject of compensation or purchase. H. C., Sir James Kitson, chairman.

1894, 1895. Chesterfield Gas and Water.—In 1894 a statutory company promoted a Bill for additional capital and increase of water rate. The Chesterfield Corporation opposed, making complaints mainly in regard to water, and asking that the Bill might be rejected, to enable them to come with a Purchase Bill. Company's Bill rejected, the Committee intimating that in the event of purchase, both the gas and the water should be acquired. In 1895, a Bill was promoted for the formation of a joint board, and the purchase of the gas and water undertakings. Before the Committee the main point discussed regarding the purchase was whether the arbitration should be under the Lands Clauses Act, 1845, or under the Public Health Act, 1875. The Committee, following the general rule, decided in favour of the Lands Clauses Act. H. L., Earl of Jersey, chairman.

1896. Shoreham and District Water.—Bill by the Brighton Corporation to purchase a statutory company. Terms of purchase had been agreed beforehand, and the Bill was unopposed.

1896. Fylde Water.—Statutory company's Bill for new works, for extension of limits, and for £250,000 additional capital, with £62,500 borrowing powers. Corporation of Blackpool and various other local authorities opposed, complaining that the water was not properly filtered, and asking for a purchase clause. Preamble proved. No purchase clause. Additional capital £160,000, and borrowing powers £40,000. Chairman stated these figures were arrived at in view of the local authorities proposing to purchase in a few years. H. C., Sir Wm. Coddington, chairman. See *infra*, 1897, Fylde Water.

1896. Bournemouth Water.—A statutory gas and water company promoted a Bill for new works and extension of limits. The Urban District Council of Pokesdown (within the limits of the company) opposed, seeking a purchase clause as regards their portion. Preamble proved. No purchase clause. H. C., Mr. Seale Hayne, chairman.

1896. Ystradyfodwg Gas and Water.—The Ystradyfodwg U. D. C. (Gas and Water) Act, 1896 (59 & 60 Vict. c. lxxi.), s. 6, authorised the purchase by the council of the statutory gas and water undertakings of the Ystradyfodwg Gas and Water Company, and failing agreement, provided for arbitration to ascertain the price. There is no reference in the Jl. of G. L. for 1896 to show whether it was opposed or not.

1897. Fylde Water.—Bill promoted by the local authorities of Fleetwood, Blackpool, St. Anne's-on-the-Sea and Lytham, to acquire compulsorily the undertaking of a statutory water company. The company opposed. Preamble proved. H. C., Sir Wm. Coddington, chairman. See *supra*, 1896, Fylde Water.

1897. Eastbourne Water.—A statutory company promoted a Bill for further works, its water having become contaminated with salt. The corporation at the same time promoted a Bill for compulsory purchase and also for new works of their own. Part of these they abandoned, leaving the works in both Bills the same. Bill of the corporation rejected. H. L., Lord Fermanagh, chairman.

1897. Caerphilly Water.—Bill of the urban district council to acquire compulsorily part of the undertaking of the Rhymney Gas and Water Company supplying their district. Preamble not proved. H. L., Lord Knutsford, chairman.

1897. Southampton Water.—The corporation promoted a Bill to acquire compulsorily the undertaking of the South Hants Water Company, a statutory company. When the borough was extended, the corporation had given a pledge to promote a Purchase Bill, and it was suggested that this had weighed with the Local Government Board. Bill rejected. H. L., Lord Camperdown, chairman.

1897. Tynemouth Water.—Corporation Bill for compulsory purchase of the undertaking of a statutory company. Complaints as to quantity, quality, storage, etc. House of Lords Committee (Lord Poltimore, chairman) allowed the Bill to proceed. When the Bill came on before the Commons Committee, it was announced that terms had been arranged, including arbitration under the Lands Clauses Act.

1897. Harrogate Water.—Corporation Bill for compulsory purchase of statutory company. Company were also promoting a Bill for additional works to cost £90,000. H. L. Committee (Lord Poltimore, chairman) passed the Bill. In H. C. (Sir Wm. Coddington, chairman) the preamble was proved.

1897. Lowestoft Gas and Water.—Corporation Bill for compulsory purchase of the Lowestoft Water, Gas, and Market Company (statutory). The promoters said they would not have asked for the gas but for the water. The corporation complained of the water, but offered no new supply. The H. L. Committee (Lord Poltimore, chairman) rejected the Bill.

1898. Rhymney and Aber Valleys Gas and Water.—An undertaking was authorised for supplying with gas and water a number of districts in the county of Monmouth and in the county of Glamorgan. Portions of these parishes were supplied by a statutory company authorised in 1892. An agreement was come to between the parties which was scheduled to the Act.

1898. Hartlepool Gas and Water.—A statutory company promoted a Bill for further reservoirs and additional capital to meet increased demand for soft water for trade purposes. The corporation opposed, and were allowed to go into the question of gas as well as water. They sought a purchase clause as to both gas and water. Preamble proved. No purchase clause. H. C., Sir James Kitson, chairman.

1898. Filey Gas and Water.—Bill promoted by the urban district council to acquire compulsorily the undertaking of a statutory company. There had been negotiations extending back many years. The promoters asserted that the company were opposing in order that the purchase might be considered compulsory under the Lands Clauses Act. For the company it was urged that there being no complaints, there was no precedent. Preamble proved. H. L., Earl of Kintore, chairman.

1898. Norwich Water.—A statutory company promoted a Bill for new works and further capital. The corporation opposed and asked for a purchase clause. Preamble proved. No purchase clause. H. C., Mr. A. H. Brown, chairman.

1898. Folkestone Water.—A statutory company promoted a Bill for new works and additional capital. The corporation promoted a Bill for compulsory purchase of the undertaking. Their Bill did not provide for new works. Company's Bill allowed to proceed. Corporation's Bill not allowed to proceed. H. L., Earl of Kintore, chairman.

1898. Rochdale Water. 1898. Todmorden Water.—Bills promoted by the Corporations of Rochdale and Todmorden respectively, to enable them to acquire the undertaking of the Todmorden Water Company. The purchase was by agreement. The opposition to the Bill was from certain public bodies and mill-owners. Both Bills passed. H. L., Lord Hawkesbury, chairman.

1898. Brompton, Chatham, Gillingham and Rochester Water.—A statutory company promoted a Bill for further powers. It was opposed by the Corporation of Chatham and the Urban District Council of Gillingham, who desired to purchase. These opponents undertook to come next year, with or without Rochester, for a Purchase Bill. In the course of the case, the chairman said the Committee would assume that such a Bill would be promoted in the next session, but that they did not consider the question of purchase was before them then. The opponents pressed for a suspensory clause in regard to expenditure, in view of a Purchase Bill. Preamble proved. Suspensory clause not inserted. H. C., Colonel Gunter, chairman.

1899. South Hants Water.—A statutory company promoted a Bill for additional works and extension of limits. The Southampton Corporation promoted a Bill to acquire compulsorily the portion of the undertaking within the borough. Before a Committee of the House of Lords the Purchase Bill was allowed to proceed, but it was lost in the other House.

1899. Glastonbury Water.—The Corporation of Glastonbury having the water supply in their own hands, promoted a Bill for further works, additional capital, and extension of limits of supply. The Wells R. D. C. opposed and objected to the inclusion of certain outlying parishes.

The Committee decided that the Bill should proceed, the district council being authorised to purchase their "portion of the waterworks and plant." H. L., Lord Derby, chairman.

1899. New Mills Water.—The urban district council promoted a Bill to acquire a water supply then in the hands of a private owner, who was willing to sell. Newtown was within the district of the urban district council, but was within the limits of the Stockport Water Company. This company and the Stockport Corporation (who had agreed to purchase the undertaking of the Stockport Company and had a Bill in Parliament for the necessary authority) opposed. Preamble not proved "principally on financial grounds." H. C., Mr. Baldwin, chairman.

1899. Stockport Water.—The corporation promoted a Bill to acquire the undertaking of the Stockport District Water Company. An agreement had been come to. The Bill contained a clause to enable outside authorities to purchase their portion "of the water undertaking." The outside authorities contended that they should not be made to pay anything for goodwill, but only for their portion of the pipes, plant, etc. In the House of Commons (Mr. Baldwin, chairman) the Committee decided to retain the word "undertaking." In the House of Lords (Lord Camperdown, chairman) the same decision was arrived at, save as regards one particular district (New Mills; see 1899, New Mills Water, *supra*), where there were special circumstances, and where the Committee allowed authority to purchase their "portion of the waterworks and plant" (s. 60). See 1900, Morecambe Gas, *ante*, p. 121. See also *ante*, pp. 37 *et seq*.

1899. Airdrie and Coatbridge Water.—A statutory company promoted a Bill to authorise the abandonment of certain works authorised by their Act of 1892, and to construct others and raise additional capital. The corporations of Airdrie and Coatbridge opposed, complaining *inter alia* of rates and asking for a purchase clause. Bill allowed to proceed without purchase clause. H. L., Lord Fermanagh, chairman. See 1900, *infra*.

1899. Godalming Water.—The corporation promoted a Bill to acquire by agreement the undertaking of a limited company authorised by Provisional Order to supply their district and certain other districts. An agreement had been come to with the company. The outlying districts opposed. The House of Commons Committee (Mr. Schwann, chairman) inserted a clause directing that any surplus profits should be apportioned between the outside districts and the borough according to the amount of water rents, and the portion belonging to the outside districts should go in reduction of water rents, and the portion belonging to the borough should go either in reduction of water rents or be carried to the general district fund. In the House of Lords the only opposition was from twenty shareholders in the company, who said the price which had been agreed was inadequate, and who asked for open arbitration terms. Bill allowed to proceed. Lord Hawkesbury, chairman.

1899. Horsforth Water.—A statutory company promoted a Bill for new works. The urban district council opposed, and also promoted a Purchase Bill. The Burley-in-Wharfedale U. D. C. opposed on the ground that by their own Bill they proposed to acquire the same gathering ground as the company. There had been complaints as to management, quantity, and quality, and there had been frequent negotiations for purchase. Preamble of the Purchase Bill proved, and that of the Company's Bill not proved. H. C., Mr. Baldwin, chairman.

1899. Bognor Water.—The local authority promoted a Bill to acquire compulsorily the undertaking of a statutory water company. In 1894 there had been an arbitration under the Public Health Act, 1875, s. 52, and the arbitrators had decided that the company were willing to supply water proper and sufficient for all reasonable purposes. Since then complaints were alleged of insufficient storage and pressure. Bill not allowed to proceed. H. L., the Earl of Jersey, chairman.

1899. Newhaven and Seaford Water.—This Bill proposed to constitute a joint water board for the two districts and for the compulsory acquisition of the undertaking of the Newhaven and Seaford Water Company. That company opposed. The Lewes Water Company also opposed on the ground that it was proposed to authorise the board to obtain their water from that company's area of supply, and to sink a well within a mile of one belonging to that company. Bill not allowed to proceed. H. L., Lord Loch, chairman.

1900. Exmouth Water.—A statutory company promoted a Bill for further works and capital. The urban district council opposed the Bill and also promoted a Bill for purchase. As the result of negotiations the Purchase Bill was allowed to pass unopposed, the terms arranged including arbitration under the Lands Clauses Acts, and the usual clause for compensating officers and servants.

1900. Sevenoaks Water.—A statutory company having applied to the Board of Trade for further capital, a three years' purchase clause was, by agreement, inserted in favour of the Sevenoaks Urban District Council. See also Sevenoaks Water, 1908, *infra.*

1900. Hemel Hempsted Water. — In 1885 a limited company obtained a Provisional Order within certain defined limits which included a small portion of the parish and borough of Hemel Hempsted, but they had not constructed any works or supplied water. In 1896 another limited company obtained a Provisional Order within certain limits, which included the greater part of Hemel Hempsted. By this Act of 1900 the Corporation of Hemel Hempsted carried out by agreement the purchase of so much of the rights of the first company as were within their area and the whole of the undertaking of the second company.

1900. Airdrie, Coatbridge, and District Water.—This Bill proposed to constitute a water trust for the boroughs of Airdrie and Coatbridge and the adjoining district, and to acquire compulsorily the undertaking of a statutory water company. The company opposed, but before the Committee it was announced that the parties had agreed upon terms. Sir T. Gibson Carmichael, chairman.

1900. North Warwickshire Water.—A statutory company promoted a Bill for extension of their limits of supply to a number of rural districts in the neighbourhood of Coventry and Birmingham, and to construct the necessary works. Two of these districts—the Meriden and Solihull rural districts—opposed on the question of the period when they might purchase their part. The county council had agreed with the promoters on a clause to the effect that each of the districts should be allowed to purchase their portion at any time after twenty-five years. In the result the Committee reduced this period to ten years. H. C., Mr. Lewis Fry, chairman.

1900. Dorking Water.—A statutory company promoted a Bill for additional works and capital. The Dorking U. D. C. and the Dorking R. D. C. opposed and sought a purchase clause. There had been negotiations in 1898. The Committee passed the preamble without a purchase clause. Eventually the terms of a purchase clause were agreed between the parties and inserted in the Bill. It included arbitration under the Lands Clauses Act.

1900. Spalding Water.—This was a Bill promoted by the urban district council for the acquisition of the undertaking of a statutory company. The parties agreed.

1901. Hartlepools Gas and Water.—The Corporations of Hartlepool and West Hartlepool promoted a Bill to acquire compulsorily the statutory undertaking of the Hartlepool Gas and Water Company. In opening, the counsel for the corporations said : "He did not know that any great fault was to be found with the company, and he would take it therefore that their gas and water were fairly good in quality and quantity, and below the maximum price. The case for the Bill was therefore based on public policy." Preamble not proved. H. C., Mr. Schwann, chairman.

1901. Wells Water.—A statutory company promoted a Bill for further powers. The local authority promoted a Bill to acquire the undertaking compulsorily. The parties came to an agreement, and an agreed purchase clause was inserted. This provided, *inter alia*, for arbitration under the Lands Clauses Act, and it made express provision that 10 per cent. should be allowed in respect of compulsory purchase. H. C., Mr. Arthur Elliot, chairman.

1901. Llandrindod Water.—A statutory water company promoted a Bill for extension of their limits, additional capital and new works. The urban district council as successors of two local authorities, who respectively in 1894 and 1893 obtained power to purchase the undertaking of the water company, opposed, and also promoted a Bill of their own for purchase. The Committee decided in favour of purchase under the Provisional Order of 1893. Ultimately the matter ended in agreement, and the company's Bill was withdrawn. H. C., Mr. Fison, chairman.

1901. Burgess Hill Water.—Bill of a statutory company for additional capital, etc. Opposed by the local authorities of Burgess Hill and Cuckfield, who sought a purchase clause authorising them, dependent on their coming to Parliament for power, to form a joint board and to acquire the undertaking. Preamble proved ; no purchase clause. H. C., Mr. Fison, chairman.

1901. Southport Water.—Bill promoted by the Corporation of Southport, the Birkdale U. D. C., and the West Lancashire R. D. C., to constitute a joint water board to acquire compulsorily the undertaking of the Southport Waterworks Company. In the previous year the company had obtained an Act for new works and additional capital ; but a clause was inserted that these powers should not be taken into account in the event of a joint board being authorised in the present session with power to purchase. The promoters of this Bill made no serious complaints against the company. The Bill was allowed to proceed. H. L., Earl of Jersey, chairman.

1901. Aldeburgh Water.—The Corporation of Aldeburgh by this Bill obtained power to acquire compulsorily the undertaking of a company who had been supplying the borough under a Provisional Order. The purchase price had been agreed, and the company were consenting parties.

1901. Broadstairs Water.—By this Act, the Urban District Council of Broadstairs and St. Peter's obtained confirmation of an agreement for the sale and purchase of the water undertaking of a statutory company then supplying Broadstairs. The price had been agreed, and was stated in the scheduled agreement.

1901. Cromer Water.—A limited company was formed in 1882 for supplying the parish of Cromer and certain adjoining parishes with water. The limited company obtained a Provisional Order in 1882. By this Act of 1901 they sought re-incorporation, further capital and works, and an extension of their limits of supply. The Cromer Urban District Council opposed the Bill, but in the result, a two years' purchase clause (s. 86) was inserted by agreement. That portion of the clause providing for compensation to officers and servants does not state any number of years service as being necessary for qualification for right to compensation as in the Yeovil case of 1898, *ante*, p. 112.

1901. Ilkeston and Heanor.—This was a Bill to authorise the formation of a joint board representative of the Corporation of Ilkeston and the Heanor Urban District Council. The Corporation of Ilkeston had, under the Public Health Acts, constructed certain waterworks, and were supplying water, and the Heanor Urban District Council had also done the same for their district, but a further supply of water was needed. The Meerbrook Sough Company had, under an Act of 4 & 5 Vict., constructed a certain sough, level or water-gate, called the Meerbrook Sough, with a view to relieving some of the mines, veins, and rakes of lead ore in the parish of Winksworth, in the county of Derby, from water. The joint board were authorised to acquire and utilise the water in the Meerbrook Sough, and an agreement for the purchase of the company's undertaking was scheduled to the Act, the price being therein stated.

1902. Devonport Water.—A statutory company promoted a Bill for further works. The Devonport Corporation promoted a Purchase Bill. The quality of the water was good. In the H. L. (E. Dartrey, chairman) the company's Bill was rejected, and the corporation's Bill allowed to proceed. In the H. C. (Sir James Woodhouse, chairman), the company again opposed the Purchase Bill, but the preamble was proved.

1902. Ystradfellte Water.—The Neath Rural District Council promoted a Bill for extensive works to supply their district with water. Within the district was a statutory undertaking, authorised by the Cwm Avon Gas and Water Order, 1885. After the Bill was introduced, an agreement was come to for the purchase of this undertaking (Standing Orders having been dispensed with). The Bill passed with the necessary purchase clause, the agreement being scheduled.

1902. North Warwickshire Water.—By an Act of 1898, it was provided that if Coventry extended its limits so as to include any portion of the limits of supply of the company, the company should sell that portion of the undertaking to Coventry. Afterwards Coventry extended its boundaries so as to include a portion of the limits, and gave notice to purchase. By the Act of 1902, provisions were made for carrying out certain details in connection with the purchase, including the day for the completion of the purchase (s. 7).

1903. Harrogate Water.—Under the Harrogate Water Act, 1903, the Corporation of Harrogate acquired the water undertaking of the Knaresborough Urban District Council. The original undertaking for the supply of Knaresborough was sanctioned by Acts of 1764 and 1823, and was afterwards acquired by the Knaresborough Urban District Council. The arrangement between the council and the corporation was embodied in an agreement which was scheduled to this Act of 1903. The water limits were extended so as to include the limits of the vendors.

1905. Truro Water. — By this Act the Truro Water Company was authorised to construct additional works, and to raise additional capital. In the event of the introduction of a Bill by the Corporation of Truro in the next or the succeeding session, to empower them to purchase the company's undertaking, the company may not oppose except so far as may be necessary to secure protective provisions. The clause appears to have been inserted by agreement.

1907. St. Neot's Urban District Council.—By this Act an agreement between the council and the liquidator of the St. Neot's Water Company (a statutory concern) for the purchase of the undertaking is confirmed.

1908. Skegness Urban District.—See Skegness Water, 1905, *ante*, p. 130.

1908. Sevenoaks Water Order.—A purchase clause in favour of the urban district council was inserted by agreement.

1908. Slough Water.—The Slough Urban District Council promoted the Bill for the purchase of the Slough Waterworks. The Committee, while recognising that it had been a matter of public policy for the water supply of places to be under the care of local authorities, doubted whether this young authority had sufficient experience. The Committee suggested that the council should try to come to terms with the company. No terms were agreed to, and the Committee eventually held that no case for compulsory purchase had been made out, and declined to put compulsion on the company in any shape or form.

1908. Stourbridge Water Order.—A purchase clause in favour of a water board was inserted in this Order by agreement.

1909. Clevedon Water.—By this Act the company were bound not to oppose an application by the Clevedon Corporation for purchase in any of the next three available sessions. Purchase to be carried out on Lands Clauses Act terms, and in addition, the taxed costs of obtaining the Company's Act, the reasonable costs of winding up the company, and compensation to company's officials. In the meantime the company may not raise more than £3,000 capital, except with the consent of the corporation.

1909. Worksop Waterworks.—By this Act the company were bound not to oppose a Bill to be promoted in the next available session by the Worksop Urban District Council for the purchase of the undertaking. The purchase price is not to be enhanced by the passing of the

Act, and the company may not raise further capital in the meantime without the consent of the council.

1909. Risca Urban District Council Water.—By this Act the Risca Urban District Council was, by agreement, authorised to purchase the undertaking of the Western Valleys (Monmouthshire) Water and Gas Company.

1909. Stourbridge and District Water Board. — By this Act a water board for the Urban District of Stourbridge, Lye, and Wollescote in the county of Worcester, and Amblecote in the county of Stafford, and the Rural District of Kingswinford in the latter county was constituted with authority to acquire the undertaking of the Stourbridge Water Company.

1909. Glamorgan Water Bill.—The Bill was promoted by the Glamorgan County Council with the object of forming a water board representative of the local authorities concerned, and acquiring the undertakings of certain water companies and local authorities. The preamble was declared proved by the Committee of the House of Commons, but the Bill was rejected by the House of Lords Committee.

ABSTRACTS

OF THE

GASWORKS CLAUSES ACTS, 1847 AND 1871.

GASWORKS CLAUSES ACT, 1847.

(10 & 11 Vict. c. 15.)

SECTION	PAGE
1—3.—Interpretation clauses	147–159
4.—Short title	152
5.—Form in which portions of the Act may be incorporated; that is, with special Act obtained by companies since 1847	162
6.—Power to break up streets, etc.	162
7.—Prohibiting the entry on private lands without consent	180
8.—Provides that notice shall be served on parties having control of streets before opening or breaking up the same	182
9.—Streets are only to be broken up under superintendence of those who have control of the same; but if they fail to superintend them, undertakers may perform the work without them	183
10.—Streets after being broken up must be reinstated without delay	183
11.—Provides a penalty in case streets are not reinstated without delay, and kept in repair for a period of three months	184
12.—Parties having control of streets may, in case of the undertakers neglecting to reinstate the streets broken up, do the work themselves and recover the expenses	185
13.—Gives power to the company to contract with any person for private or public lighting	185
14.—*Repealed*	188
15.—*Repealed*	188
16.—Authorises the undertakers to cut off supply from persons neglecting to pay gas rent due	188
17.—*Repealed*	189
18.—Imposes a penalty of £5, and a further penalty of £2 per day, for fraudulently using and continuing so to use the gas of the undertakers	189
19.—Imposes a penalty of £5, in addition to the amount of damage done, for wilfully damaging pipes or other works of the undertakers	191
20.—Provides that any accidental injury to any pipe, pillar, or lamp of the undertakers shall be paid for, such payment not to exceed £5	191
21.—Imposes a penalty of £200 on undertakers for causing or suffering water to be fouled	191
22.—The penalty must be sued for within six months in superior court	193
23.—A further penalty of £20 per day is imposed during the continuance of the offence	194
24.—Imposes a penalty of £5 per day during which gas is allowed to escape from any pipe of the undertakers after twenty-four hours' notice	194

SECTION	PAGE
25.—Penalty for fouling water, £20, and a further sum of £10 for each day the offence continues, to be paid to the owner of the water	197
26.—Gives power to the person whose water is supposed to be fouled by the gas of the company, to dig up the ground and examine the pipes and works of the undertakers after giving the twenty-four hours' notice	197
27.—The expenses incurred are to abide the result of the examination ...	197
28.—The expenses are to be ascertained in the same manner as damages ...	197
29.—Nothing is to exempt the undertakers from being indicted for a nuisance	198
30.—Limits the profits in any one year to a maximum dividend of 10 per cent.	202
31.—Any excess of profits is to be appropriated to the formation of a reserved fund, which is not to exceed one-tenth of the nominal capital of the undertakers, for the purpose of meeting extraordinary claims and making up deficiency of dividend in any year; and all interest and dividends arising from the investment of the money are to be added to the principal sum invested	210
32.—No extraordinary claim can be met until it is certified by two justices in England or Ireland, and in Scotland by the sheriff	210
33.—When the reserved fund amounts to 10 per cent., then the interest and dividends are to go to the general purposes of the undertaking ...	210
34.—Gives power to the undertakers, if in any year the profits do not amount to the maximum dividend, to take a sum from the reserved fund to supply the deficiency	210
35.—Prescribes examination of the accounts, on the petition of two gas ratepayers, to see whether the profits exceed the amount prescribed, and provides in such case for reduction of price by the court of quarter sessions, or in Scotland by the sheriff	211
36.—Should the petition prove to be groundless, the court or sheriff may order the petitioner to pay the costs	212
37.—Imposes a penalty of £100 and £10 a day on undertakers refusing or neglecting after seven days to produce their books of account, such penalty being recoverable in any superior court, with full costs of suit	213
38.—Enacts that undertakers shall furnish the clerk of the peace, on or before the 31st day of January in each year, with an annual statement of receipts and expenditure under a penalty of £20 for any default	213
39.—*Repealed*	213
40.—Incorporates the clauses of the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), as to recovery of damages which are not specially provided for	214
41.—*Repealed*	217
42.—Enables one magistrate, where by law he has authority to act alone, to do all acts authorised or required to be done by two justices; and in Scotland by the sheriff or his substitute	217
43.—Requires all penalties in the metropolitan district to be paid to the receiver of the metropolitan police district, and provides for appeal, payment of witnesses, etc.	217
44.—Makes any person giving false evidence upon oath under the Act guilty of perjury	218
45.—Requires the undertakers to keep copies of their special Act in their office open to inspection, and also to deposit copy with clerk of the peace	218
46.—Imposes a penalty of £20 and £5 a day on undertakers failing to keep or deposit copies of the special Act	218

SECTION PAGE

47.—Provides that undertakers are not to be exempt from provisions of the Act for better paving, etc., the streets of the metropolis and the laws of sewers in force within ten miles of the Royal Exchange 218

48.—Saves the rights of the Crown 219

49.—Provides that undertakers are not to be by this Act exempted from the provisions of any general gas Act which may hereafter be passed... 219

50.—*Repealed* 219

GASWORKS CLAUSES ACT, 1871.

(34 & 35 Vict. c. 41.)

1.—Provides that this Act and the Act of 1847 should be construed together... 219

2.—Short title 219

3.—Makes the Act applicable to every undertaking authorised by any special Act passed after the 13th day of July, 1871, or any provisional order made under the authority of the Gas and Water Works Facilities Act, 1870 (33 & 34 Vict. c. 70), unless there be a special exception ... 220

4.—Interprets the terms used in the Act 221

5.—Prohibits works being erected either for manufacture of gas or residual products on any lands except those described in the special Act; also prohibits storing gas on any other lands without the consent of persons owning or occupying dwelling-houses within 300 yards of the site 222

6.—Enables undertakers to dispose of superfluous lands 222

7.—Provides that the receipt of guardians, etc., of persons incapacitated shall be sufficient discharge 222

8.—Provides for appointment of receiver by mortgagees having an amount owing to them of at least £1,000 222

9.—Makes the undertakers liable to indictment, etc., for any nuisance ... 223

10.—Enables the undertakers to take easements by agreement 223

11.—Compels undertakers to supply gas under certain conditions to owners and occupiers of premises within the limits of the special Act... ... 223

12.—Provides for quality and purity of gas supplied by undertakers... ... 228

13.—Enables undertakers to require that the gas supplied by them shall be consumed by meter 229

14.—Compels undertakers to supply meters, either by sale or on hire, to consumers who are to furnish security for the value or rent of such meter 229

15.—Prevents consumers from connecting with or disconnecting from service pipes without twenty-four hours' notice to undertakers under a penalty of 40*s.* 229

16.—Provides for the nature and amount of security to be furnished by consumers 229

17.—Directs consumers to keep meters belonging to them in proper order, and authorises undertakers to take off and examine meters 230

18.—Gives power to the undertakers to let meters, and gives security against such meters being taken in execution 230

19.—Compels undertakers to keep the meters let by them for hire in good repair 232

20.—Makes the register of the meter *primâ facie* evidence of the quantity of gas consumed 232

21.—Gives power to officers of undertakers to enter buildings to inspect the meters, fittings and works for the supply of gas, and provides a penalty of £5 on any person hindering any officer in so doing 234

22.—Enables the agents and workmen of the undertakers, after twenty-four hours' notice, to enter buildings and remove meters and fittings in cases where a supply of gas is no longer required 234

SECTION PAGE

23.—Provides a summary mode for recovery of charges for gas 235

24.—Provides for supply of gas to public lamps; and in case of difference as to price, provides for arbitration 235

25.—Lays down conditions regulating the supply of gas to public lamps ... 237

26.—Enables the undertakers or the local authority of any district to affix governors to street lamps 237

27.—Directs all differences between the undertakers and any local authority to be settled by arbitration in manner provided by the Companies Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 16) 237

28.—Compels undertakers to provide and keep in good repair a testing place and apparatus for testing quality and purity of gas, according to regulations in Part I. of Schedule A. 237

29.—Enables any local authority within the limits of the special Act to appoint a gas examiner to test the illuminating power and purity of the gas at the test-house provided by the undertakers 238

30.—Gives power to two justices to appoint gas examiner on application of not less than five gas consumers, with same powers as gas examiners appointed by a local authority 239

31.—Allows officer of undertakers to be present at any testing of the gas 239

32.—Directs the mode of testing to be in accordance with the rules prescribed in Part II. of Schedule A. 239

33.—Directs that the report of the gas examiner shall be delivered the next day after testing to the local authority or justices by whom he was appointed, and to the undertakers 239

34.—Provides for access of gas examiners to testing place, and inflicts a penalty of £5 on undertakers making default 240

35.—Prescribes mode of framing an annual statement of accounts according to Schedule B., which statement is to be forwarded to the local authority of every district within the limits of the special Act every year on or before March 25th : 240

These statements are to be kept by undertakers, and sold to all applicants at a price not exceeding one shilling per copy ;

It also gives the Board of Trade power to alter the form of accounts from time to time ;

And provides that in case of default by the undertakers, they are to be liable to a penalty of 40*s*. for every day of such default.

36.—Provides penalties for failure to supply gas at proper pressure, of less illuminating power, or of less purity than provided for in the special Act : 241

But the penalties are not to be cumulative.

37.—Provides for the costs of experiments where gas examiner is appointed by the justices... 245

38.—Provides penalties for wilfully, or by culpable negligence, injuring meters, pipes or fittings belonging to the undertakers, or for tampering with any meter 245

39.—Prevents undertakers from claiming from incoming tenant arrears of gas rents due by former tenant 245

40.—Provides that arrears due for gas or meter rent, or fittings, or expenses incurred in cutting off the gas, may be recovered by the undertakers as a penalty 246

41.—Enables the undertakers, in addition to other remedies, to recover any rent or sum due to them in any court of competent jurisdiction with full costs of suit 247

42.—Enables several names and sums to be contained in one summons or warrant... 247

43.—Provides that a warrant of distress may include also the costs 247

SECTION PAGE

44.—Provides summary remedy for recovery of penalties, etc., as in the Gasworks Clauses Act, 1847 (10 & 11 Vict. c. 15) 247

45.—Directs mode for service of notices 248

46.—Provides against disqualification of justices by reason of their being gas consumers 248

SCHEDULES providing Regulations in respect of testing apparatus and also Rules as to mode of testing gas and prescribing forms of accounts.

GASWORKS CLAUSES ACT, 1847.

(10 & 11 VICT. c. 15.)

An Act for consolidating in one Act certain Provisions usually contained in Acts authorising the making of Gasworks for supplying Towns with Gas. [23rd April, 1847.]

Extent of Act.

[**1.**] This Act shall extend only to such gasworks as shall be authorised by any Act of Parliament hereafter to be passed which shall declare that this Act shall be incorporated therewith, and all the clauses of this Act, save so far as they shall be expressly varied or excepted by any such Act, shall apply to the undertaking authorised thereby, so far as the same shall be applicable to such undertaking, and shall, with the clauses of every other Act which shall be incorporated therewith, form part of such Act, and be construed therewith, as forming one Act.

The preamble was repealed by Statute Law Revision Act, 1891 (54 & 55 Vict. c. 67).

Powers of gas or water company as a corporation.

A gas or water company established by Act of Parliament is thereby made a corporation. It does not thereby necessarily possess the common law powers incident to corporations aggregate; because, being the creature of statute, such a corporation possesses those powers only which are conferred by the statute. See hereon *Attorney-General* v. *West Gloucestershire Water Co.*, [1909] 2 Ch. 338, cited at length at p. 153 *post.* The Special Act invariably enacts that the company shall have a common seal. It also limits and defines the land or the quantity of land which the company may hold. Special Acts usually incorporate the Companies Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 16), and companies thus incorporated become entitled under s. 124 of that Act to make byelaws for certain limited purposes therein defined; and by s. 127 the production of a written or printed copy of the byelaws of the company having the common seal of the company affixed thereto shall be sufficient evidence of such byelaws in all cases of prosecution under the same. As to the power of a municipal corporation empowered by Special Act to carry on a specified undertaking, see *Attorney-General* v. *Manchester Corporation*, [1906] 1 Ch. 643.

A gas or water company authorised by provisional order is likewise a corporation and has a common seal. Such a company is not incorporated by the provisional order, but is formed under the Companies Acts (now consolidated by the Companies (Consolidation) Act, 1908 (8 Edw. 7 c. 69), prior to its application for a provisional order. Its powers as a corporation are defined in those Acts and in the provisional order, and the extent of land which the company may hold is limited. This limitation is expressly required to be made by the Gas and Water Works Facilities Act, 1870 (33 & 34 Vict. c. 70), s. 7. Such land can be acquired by agreement only.

Sect. 1.

NOTE.

Every gas or water company incorporated in the ways above mentioned, sues and is sued by its corporate name. Under the Gas and Water Works Facilities Acts, 1870 and 1873, individuals as well as companies may obtain parliamentary powers to supply gas or water or both.

How a corporation may contract.

It is a general rule of law that a corporation can only contract under its common seal, as that is the only way in which it can express its will or do any act. There are exceptions, however, where the general rule would occasion inconvenience or tend to defeat the very object for which the corporation was created—thus, engaging inferior servants, or the doing of acts very frequently recurring, or too insignificant to require the common seal, are established exceptions. Thus, a gas company may sue upon a contract not under seal for the price of gas supplied (*Church* v. *Imperial Gaslight and Coke Co.* (1837), 6 A. & E. 681). See this case commented on by COLERIDGE, C.J., in *Austin* v. *Guardians of Bethnal Green* (1874), L. R. 9 C. P. 91; and see *Mayor of Ludlow* v. *Charlton* (1840), 6 M. & W. 815. A gas company might be sued in *indebitatus assumpsit* for goods sold and delivered on an executed parol contract (*Beverley* v. *Lincoln Gaslight Co.* (1837), 6 A. & E. 829). So also on an executory contract (*Church* v. *Imperial Gaslight Co., supra; Arnold* v. *Mayor of Poole* (1842), 4 M. & G. 860). PARKE, B., said the former case may be supported on the ground that the special Act of the company contemplates the purchase from them of gas without any contract under seal (*Finlay* v. *Bristol and Exeter Rail. Co.* (1852), 7 Ex. 417). See further hereon *Lawford* v. *Billericay R. D. C.*, [1903] 1 K. B. 772 and the note at p. 844 *post.*

But there must be a special power, either express or implied, to draw and accept or indorse bills of exchange and promissory notes (*Broughton* v. *Manchester Waterworks Co.* (1819), 3 B. & A. 1). Where the business of the company cannot reasonably be carried on without the use of bills of exchange, the power is implied (*Ibid.;* and see *Mayor of Ludlow* v. *Charlton* (1840), 6 M. & W. 815).

It has been decided that mining companies, waterworks companies, gas companies, salt and alkali companies, and many others, are incapable of drawing, accepting, or indorsing bills of exchange. See *per* MONTAGUE Smith, J., in *Bateman* v. *Mid-Wales Rail. Co.* (1866), L. R. 1 C. P. at p. 512; and see *Bramah* v. *Roberts* (1835), 3 Bing. N. C. 963 (gas company); and *Broughton* v. *Manchester Waterworks Co., supra* (water company). A railway company also has no such power (*Bateman* v. *Mid-Wales Rail. Co., supra*). The Bills of Exchange Act, 1882 (45 & 46 Vict. c. 61), leaves the power of corporations in this respect where it was.

A company incorporated under the Companies Act, 1862, for the working of collieries, contracted, but not under seal, with an engineer for the erection of a pumping engine and machinery for use in the colliery, and paid him part of the price. In an action by the company against the engineer for a breach of contract in refusing to deliver the engine and machinery :—*Held*, affirming the decision of the Court of Common Pleas, that the action was maintainable, though the contract was not under seal (*South of Ireland Colliery Co.* v. *Waddle* (1869), L. R. 4 C. P. 617). COCKBURN, C.J., remarked, "We are asked to overrule a long series of decisions in all the courts which, in accordance with sound sense, have held that the old rule as to corporations contracting only under seal does not apply to corporations or companies constituted for the purpose of trading."

Where a municipal corporation were possessed of a dock, of which they allowed the use to ships needing repairs under certain printed regulations, and the plaintiff entered into a parol agreement with them for the use of the dock upon the terms of such regulations, it was held that the contract need not be under the seal of the corporation (*Wells* v. *Mayor, etc., of Kingston-upon-Hull* (1875), L. R. 10 C. P. 402). And where the plaintiff from time to time supplied coals to the guardians of a poor law union for the use of their workhouse, under a contract signed by the plaintiff, but not sealed by the guardians and the guardians received and used some of the coals, it was held that as the goods had been supplied and accepted by the defendants, and were such as must necessarily be from time to time supplied for the very purposes for which the defendants were incorporated, they were liable to pay for the coals, although the contract was not under seal (*Nicholson* v. *Guardians of Bradfield Union* (1866), L. R. 1 Q. B. 620, following *Clarke* v. *Cuckfield Union* (1852), 21 L. J. Q. B. 349); see further hereon *Lawford* v. *Billericay R. D. C.*, *supra*, and the note at p. 844 *post;* but the contract for the engagement of a clerk to the master of a workhouse by a board of guardians must, in order to bind the guardians, be under seal, it appearing that the clerk in question was principally engaged in keeping accounts of a somewhat complicated nature, requiring some amount of skill and capacity, and that the office he filled was so far considered of importance that by the orders of the poor law board, which have the effect of an Act of Parliament, the assent of one of the departments of the State was made necessary to the constitution of the office (*Austin* v. *Guardians of Bethnal Green*, *supra*).

As regards companies which have the Companies Clauses Act, 1845, incorporated with their special Acts, regard must be had to the provisions of that Act for the powers of the directors to bind the company without using its seal. See ss. 95 to 98 of the Act, *post*. As regards companies empowered by provisional order, similar provisions are to be found in the Companies (Consolidation) Act, 1908 (8 Edw. 7 c. 69), s. 76.

It is not necessary that contracts entered into between consumers and a company for a supply of gas or water should be stamped; the reason being that they are contracts for the sale of goods within the meaning of the Stamp Acts, and are thus exempted from duty (*Church* v. *Imperial Gaslight Co.*, *supra; West Middlesex Waterworks Co.* v. *Suwerkropp* (1829), M. & M. 408).

In a recent case it was, however, held that an agreement for the supply of electric power for a term of years on payment of a fixed charge per quarter and also one penny per unit is a security for a sum of money at stated periods and chargeable with duty at the rate of 2*s.* 6*d.* per cent. on the aggregate amount of the minimum annual payments, and the same principle will no doubt apply to similar agreements for the supply of gas (see *County of Durham Electrical Power Distribution Co.* v. *Inland Revenue Commissioners*, [1909] 2 K. B. 604).

The defendants, a municipal corporation, having, by transfer from a body of town commissioners, power to purchase certain gasworks, and being also a local board, took proceedings for the purpose of purchasing the works and of assessing the price to be paid by arbitration. In pursuance of a resolution passed at a meeting of a sub-committee appointed to manage the business, the report of which committee was adopted by the council, the plaintiff, a gas engineer, was employed as a witness in the arbitration to support the evidence of the defendants' valuer. There was no appointment of the plaintiff under seal, but he acted as witness under the instructions of the valuer who was so appointed. In all these proceedings the defendants erroneously described themselves as acting as the local board, and described their seal as the seal of the local board. It did not appear that the seal of the local board was other than the municipal seal. In an action brought by plaintiff against the corporation for his services as witness:—*Held*, that the municipal corporation and the local board could not be treated as independent bodies; that the plaintiff's contract was in substance with the corporation, and that he was entitled to recover (*Andrews* v. *Mayor, etc., of Ryde* (1874), L. R. 9 Ex. 302); but when a municipal corporation acts as an urban sanitary authority its contracts are governed by s. 174 of the Public Health Act, 1875, and not by the general law as to the contracts of corporate bodies (*Young* v. *Leamington (Mayor, etc., of)* (1883) 8 App. Cas. 517).

Contracts with metropolitan gas companies.

By the Metropolis Gas Act, 1860 (23 & 24 Vict. c. 125), s. 20, it is provided that "notwithstanding its being required by any Act of Parliament or otherwise that the gas company's contracts shall be under seal, every contract of the gas company entered into in accordance with this Act shall without seal be binding on them if the contract be signed by at least two of their directors

NOTE.

or by their secretary or other officer, by the authority of at least two of their directors." By s. 4 "gas company" means "any and every company, and any person or persons supplying gas within the limits of this Act." The special Acts of the metropolitan companies must be examined on this subject, as it is not safe to assume that all the provisions of the Act of 1860 apply to these companies (see *e.g.*, s. 3 of the Commercial Gas Act, 1875, *post*, p. 309, and s. 8 of Gaslight and Coke Act, 1876, *post*, p. 332.) Besides this, the special Acts may be found to contain special provisions on the subject of contracts. See *e.g.*, s. 72 of the Commercial Gas Act, 1852.

Contracts with local authorities under Public Health Act, 1875.

The Public Health Act, 1875 (38 & 39 Vict. c. 55), s. 174, enacts that every contract made by an urban authority whereof the value or amount exceeds £50 shall be in writing and sealed with the common seal of such authority (*Young* v. *Corporation of Leamington* (1883), 8 App. Cas. 517; *Hunt* v. *Wimbledon Local Board* (1878), 4 C. P. D. 48; *Bournemouth Commissioners* v. *Watts* (1884), 14 Q. B. D. 87; *Tunbridge Wells Improvement Commissioners* v. *Southborough L. B.* (1888), 60 L. T. 172). The words "exceeds £50" apply only to a contract which the parties at the time of making it contemplate will exceed £50, and, therefore, where a medical man was engaged to attend certain fever patients, and his fees in the end exceeded £50, he was held entitled to recover (*Eaton* v. *Basker* (1881), 7 Q. B. D. 529). See the further provisions of s. 174 and the notes thereon at p. 843 *post*.

Suing corporations in county court.

A corporation may be sued in a county court, and "dwells" at the place where its business is carried on (*Taylor* v. *The Crowland Gas and Coke Co.* (1854), 11 Ex. 1), *i.e.*, at the place where its principal business is carried on (see *Brown* v. *L. and N. W. Rail. Co.* (1863), 32 L. J. Q. B. 318; *Le Tailleur* v. *South Eastern Rail. Co.* (1877), 3 C. P. D. 18). The head office of a trading company is not necessarily the office registered under the Companies Act, but the place where the business of the company is conducted (*Keynsham Gas Co.* v. *Baker* (1864), 53 L. J. Ex. 41; see also *Aberystwith Pier Co.* v. *Cooper* (1866), 35 L. J. Q. B. 44).

Wrongful acts of servants of corporations.

A corporate body is answerable for such of the wrongful acts of its servants as are done in the execution of the powers vested in the corporation (*Smith* v. *Birmingham and Staffordshire Gaslight Co.* (1834), 1 A. & E. 526; *Green* v. *London General Omnibus Co.* (1859), 29 L. J. C. P. 13; *Goff* v. *Great Northern Rail. Co.* (1861), 30 L. J. Q. B. 148). It is not necessary that the servants' authority should be under seal (*Smith* v. *Birmingham, &c. Gaslight Co.*, *supra*; *Eastern Counties Rail. Co.* v. *Brown* (1851), 20 L. J. Ex. 196; *Goff* v. *Great Northern Rail. Co.*, *supra*). The servant must however be acting within the scope of his employment (*Allen* v. *L. and S. W. Rail. Co.* (1870), L. R. 6 Q. B. 65; *Bank of N. S. Wales* v. *Owston* (1879), 4 A. C. 270; *Bolingbroke* v. *Swindon Local Board* (1874), L. R. 9 C. P. 575). A corporation will not be liable in respect of the wrongful conduct of a servant in respect of an act which the corporation itself is not authorised to perform (*Poulton* v. *L. and S. W. Rail. Co.* (1867), L. R. 2 Q. B. 534; *Shaw, Savill and Albion Co.* v. *Timaru Harbour Board* (1890), 15 App. Cas., 429).

Bankruptcy petitions by corporation.

Under the Bankruptcy Act, 1883 (46 & 47 Vict. c. 52), s. 148, a corporation may act by any of its officers authorised in that behalf under the seal of the corporation. It may be a petitioning creditor. See *Re Calthrop* (1868), L. R. 3 Ch. 252.

Malicious prosecution.

An action for malicious prosecution will lie against a corporation (*Edwards* v. *Midland Rail. Co.* (1880), 6 Q. B. D. 287; *Cornford* v. *Carlton Bank, Limited*, [1900] 1 Q. B. 22). See also *Citizens Life Assurance Co.* v. *Brown*, [1904] A. C. 423.

Contracts *ultra vires.*

In the case of a company incorporated under the Companies Act, 1862 (25 & 26 Vict. c. 89), the House of Lords decided that where the directors had entered into a contract which was *ultra vires* of the directors and of the company even the subsequent assent of the whole body of shareholders would have no power to ratify it (*Ashbury Railway Carriage and Iron Co.* v. *Riche* (1875), L. R. 7 H. L. 653). The law laid down by the House of Lords in this case applies to all companies created by any statute for a particular purpose, and not only to companies created under the Companies Act, 1862: *per* Lord BLACKBURN in *Wenlock* (*Baroness*) v. *River Dee Co.* (1885), 10 App. Cas., at p. 360. *Cf. Corbett* v. *South Eastern and Chatham Railways Managing Committee*, [1906] 2 Ch. 12.

A gaslight company was incorporated by Act of Parliament which provided that eighteen shareholders should be directors, and as such should use the common seal, manage the affairs of the company, lay out money, purchase lands, etc., and make contracts for lighting and for the sale of materials. The company were empowered to make byelaws under seal for its government and for regulating the proceedings of the directors, officers, servants, etc. At a meeting of the company a resolution was passed, not under seal, that a remuneration should be allowed to every director for his attendance in court, committees, etc., viz., one guinea for each attendance:—*Held*, that a director who had attended courts, etc., could not maintain an action for payment according to the above resolution, for that it was not a byelaw within the statute, nor a contract (if such could have been available) to pay the directors or any of them for their attendance, and the directors could not be considered as servants to the company, and as such entitled to remuneration for their labour according to its value (*Dunston* v. *Imperial Gaslight and Coke Co.* (1832), 3 B. & Ad. 125).

Remedy where a gas or water company exceeds its powers.

Where a gas or water company incorporated by parliamentary authority attempts to go beyond its powers, either as to limits of supply or in any other way, the question arises, What is the remedy? The general rule may be stated thus: No action can be maintained by any individual unless he sustains particular injury, because the powers conferred by Parliament being for the public benefit, the public only are entitled to complain; nevertheless, by obtaining the assent of the Attorney-General, proceedings may, in certain circumstances, be taken by the individual, either at the active instance of the Attorney-General, or by the individual in the name of the Attorney-General (his approval having been first obtained), "on the relation" of the individual. The old procedure was by information in Chancery; but, since the Judicature Act, 1873 (36 & 37 Vict. c. 66), action is substituted (R. S. C., Ord. 1, r. 1). In *Mayor, etc. of Liverpool* v. *Chorley Waterworks Co.* (1852), 2 De G. M. & G. 852, Lord CRANWORTH decided that persons obtaining from the legislature power to interfere with the rights of property are bound strictly to adhere to the powers so conceded to them; to do no more than the legislature has sanctioned, and to proceed only in the mode which the legislature has pointed out; but (except in a proceeding at the instance of the Attorney-General) anyone seeking the assistance of the court to restrain the violation of such a contract with the legislature is bound to show that he has a private interest in the matter. Therefore, where a Waterworks Act empowered a company to divert the water of a stream, without limit as to quantity, by means of an open channel filled with loose stones, and they were diverting it by means of a culvert, it was held that the Liverpool Corporation (who supplied Liverpool with water under the Liverpool Corporation Waterworks Act, 1847, and who were entitled to the water of a stream into which the diverted stream had flowed) were not entitled to an injunction to restrain a violation of the terms of the Act as to the mode of diversion. In the course of his judgment, Lord CRANWORTH said (p. 860): "For the purposes of the present argument, we will assume that even within the limits of deviation they are bound to convey the water by an open watercourse, and not by a covered channel, *i.e.* a tunnel or culvert. Still the question arises whether the acts of the defendants, departing in these respects from the strict parliamentary powers, are acts of which the plaintiffs have any right to complain, or demand the prevention, in the actual circumstances; for though we accede to the general observation that, persons obtaining from the legislature, by Acts of Parliament, like those now before us, powers to interfere with rights of property for their own purposes (whether of a local nature or merely private), are bound strictly to adhere to the powers so conceded to them, to do no more than the legislature has sanctioned, and to proceed only in the mode which the legislature has pointed out; yet it does not follow that any one of her Majesty's subjects has a right to complain whenever parliamentary powers of this nature have not been strictly followed or are intended

Action through the Attorney-General.

Sect. 1.

NOTE. Remedy where a gas or water company exceeds its powers—*continued.*

to be transgressed. In such cases (we, of course, except any proceeding at the instance of the Attorney-General), a plaintiff, seeking the assistance of a court of equity, by way of injunction, is bound to show that he has an interest in preventing the defendants from doing what is in fact, or may well be called, a violation of their contract with the legislature. He must show not only that the defendants are committing or intend to commit a wrong, but also that the wrong complained of does occasion or will occasion loss or damage to him, that he has a special or private interest in confining the defendants within the limits of their parliamentary powers. Now, in this respect, the corporation of Liverpool appear to us to have failed. It is clear, from the 23rd section of the defendants' Act, that they may, at point H., divert the water of the stream and cause it, by a proper channel, to flow into their reservoir. The plaintiffs have no interest whatever in the lands through or over which the water may so be made to flow; and to them it must be a matter of indifference—of no importance in any sense—whether it is carried by a longer or shorter line, by an open channel or by a culvert, by a course convenient or inconvenient, to the defendants."

In the earlier case of *Corporation of Cardiff* v. *Cardiff Waterworks Co.* (1859), 5 Jur. (N.S.) 953, the company's Acts provided that the limits for the supply of water should comprise "the whole of the town and port of Cardiff, and the parishes and places within and adjoining to such town." It was held that the word "port" was used in its popular sense, and did not extend to the district fixed by the Commissioners of the Treasury as the port of Cardiff for the purposes of the Customs duties; and inasmuch as the company were proceeding to lay down pipes to carry water to parishes which were neither within the town of Cardiff nor adjoining thereto but which were within the "port" if that word were taken not in its popular but in its wider sense, WOOD, V.-C., granted an injunction apparently on the ground that the defendants were breaking up the streets and roads in the town for the purpose of laying pipes which they intended to use for supplying water outside the authorised limits. See the last paragraph of the report at p. 956 as to certain proceedings on appeal.

In *Stockport District Waterworks Co.* v. *Corporation of Manchester* (1863), 9 Jur. (N.S.) 266, a bill was filed by the water company against the corporation and the Stockport Waterworks Company (Registered), charging that by an arrangement between the corporation and the registered company a junction was about to be effected at Reddish, near Manchester of the pipes of the two defendants, whereby Manchester water would be supplied in Stockport, which was within the limits of the plaintiffs. Lord WESTBURY, L.C., refused an injunction, and in the course of his judgment, said: "When an incorporated company is created for certain purposes undoubtedly the agency of the company, the course of action, and the sphere of action of the company are limited entirely to that which is defined by the legislature. What it is empowered to do it has a right to do, and what it is not empowered to do it must be considered as having no right to do. . . . We next come to the principal topic, the principal ground on which the plaintiffs rely, and that is, that the Manchester Corporation, as a water company, is limited in its sphere of action; with that argument I am very much disposed to agree, because if the Manchester company were at liberty to sell water without restriction, they might sell that water to every surrounding district, and the consequence would be, that they would draw from the sources of their supply, which sources they are authorised to resort to for the purposes of the township of Manchester, an amount of water which the legislature could not be considered as having had at all in their contemplation when the parliamentary powers for the benefit of Manchester were granted. I think, therefore, that if the case depended upon that, if I had here a party who had a right to restrain the Manchester Corporation within its proper limits, as, for example, the ratepayers, who were interested in having the water at the lowest amount, and in having the certainty of an abundant supply, or if I had the Attorney-General, who would be able to represent that larger view of the question—namely, that if you extend the purposes of the legislative grant to Manchester, you may be overstepping the bounds within which the legislature confined its view when it granted these powers to the Corporation of

NOTE. Remedy where a gas or water company exceeds its powers—*continued.*

Manchester—if, I say, I had the Attorney-General here as an informant, representing that general view of the subject, the *bonum publicum* which is contained in that view of the subject, I should probably not hesitate to restrain the Corporation of Manchester from carrying into effect the agreement which they have entered into with the registered company. But here I have a rival company, and whatever may be the general merits of the controversy, the question is, whether they can be represented by that company."

So, in *Pudsey Coal Gas Co.* v. *Corporation of Bradford* (1873), L. R. 15 Eq. 167, a municipal corporation having under the provisions of an Act of Parliament bought up a gas company which previously supplied gas to the borough, and which had compulsory powers for the purpose within the borough, commenced supplying gas to an adjoining township in which another gas company already existed, having similar powers within the township. The gas company of the township having filed a bill against the corporation to restrain them from supplying gas within the township, and alleging as a personal injury which entitled them to maintain their suit, that the corporation had contracted to supply gas to a particular manufactory within the township which otherwise they must have supplied, and that they had thereby been deprived of the profits arising from the supply of gas to the manufactory, and that great loss would be sustained by them; it was held on demurrer that the injury alleged was not such as entitled the plaintiffs to maintain the suit. *Cf. Preston Corporation* v. *Fullwood L. B.* (1885), 53 L. T. 718. There the Corporation of Preston, who had no parliamentary powers for the purpose, supplied water to the adjoining urban district of Fullwood, and claimed the right to enter upon and break up the streets of Fullwood whenever occasion should require, for the purpose of repairing their water pipes, relying, as regarded some of the streets, on alleged irrevocable licences granted by the predecessors of the local board of Fullwood (*i.e.*, the surveyors of highways), and, as regarded other streets, on prescription:—*Held*, by NORTH, J., (1) that the claim of the corporation was to commit a nuisance; (2) that it was not in the power of the surveyors of highways to grant the alleged licences; (3) that, therefore, as a grant could not be presumed, the corporation could not obtain the right claimed by prescription. See *Edgeware Highway Board* v. *Harrow District Gas Co.* (1874), L. R. 10 Q. B. 92, *post*, p. 167.

Where a local authority, having the right to supply water within certain limits, were about to supply water in bulk within those limits to a railway company for the purpose of being used by the railway company, within the limits of another local authority possessing power to supply water, injunction was granted in proceedings taken by the Attorney-General on relation (*Wakefield Union* v. *Morley Corporation and G. N. Rail. Co.*, Jl. of G. L., March 6th, 1894, vol. 63, p. 441; and *Halifax Corporation* v. *Morley Corporation*, 10 T. L. R. 454).

A water company, authorised to supply water within the limits defined by their Acts, not only for domestic purposes but also in bulk, and to carry on the business usually carried on by water companies, agreed to supply water to W., who resided outside their district, and at his cost laid a main outside their district from which pipes were laid on to his property, and connected this main with their main just within the boundary of their district. The pressure in the company's main caused the water to flow through W.'s main and pipes to the terminals on his property where the water was received and used. It was held that the company were not entitled either on the terms of their special Acts or on the ground that such supply was incidental to their statutory powers to supply water outside their district; and that the supply of water to W. was not at the point where his main joined the company's main, but at the place where the water was delivered for use, and that therefore, the company were acting *ultra vires* and ought to be restrained (*Attorney-General* v. *West Gloucestershire Water Co.*, [1909] 2 Ch. 338). See further, *Attorney-General* v. *Metropolitan Electric Supply Co.*, [1905] 1 Ch. 24, 757.

Further, as to the right of the Attorney-General to institute proceedings in such cases, see *Attorney-General* v. *G. N. Rail. Co.* (1860), 1 Dr. &

Sect. 1.

NOTE.

Sm. 154; *Attorney-General* v. *Ely, Haddenham and Sutton Rail. Co.* (169), L. R. 4 Ch. 194; *Attorney-General* v. *G. W. Rail. Co.* (1872), L. R. 7 Ch. 767; *Attorney-General* v. *Cockermouth L. B.* (1874), L. R. 18 Eq. 1872; *Attorney-General* v. *G. E. Rail. Co.* (1879), 11 Ch. D. 449; and *Attorney-General* v. *Shrewsbury Bridge Co.* (1882), 61 Ch. D. 752. As to whether the Attorney-General is bound to make out a case of public mischief, and whether the mere fact that a proceeding is *ultra vires* is sufficient, without injury to the public being shown, see *Attorney-General* v. *G. E. Rail. Co.*, *supra;* and *cf. Ware* v. *Regent's Canal Co.* (1858), 3 De G. & J. 212. Where the Attorney-General seeks by information to restrain a public body possessing statutory powers, from infringing a term introduced into their Act in the interests of the public as a condition of the exercise of their powers, it is not necessary to prove that injury to the public results from that infringement (*Attorney-General* v. *L. & N. W. Rail. Co.*, [1900] 1 Q. B. 78). At the instance of the Attorney-General on the relation of a number of omnibus proprietors, the London County Council were restrained from running omnibuses in connection with their tramways purchased under parliamentary authority (*London County Council* v. *Attorney-General*, [1902] A. C. 165). Applied in *Attorney-General* v. *Mersey Rail. Co.*, [1907] A. C. 45. In the London County Council case, *supra*, it was held that the jurisdiction of the Attorney-General to decide in what cases it is proper for him to sue on behalf of relators is absolute. See also *Attorney-General* v. *Sheffield Gas Consumers Co.* and other cases cited, *post*, p. 164 *et seq.*, as to breaking up streets without parliamentary authority in order to lay pipes.

Laches.

See as to attributing laches to the Attorney-General, *Attorney-General* v. *Wimbledon House Estate Co., Ltd.*, [1904] 2 Ch. at p. 42; *Attorney-General* v. *Grand Junction Canal Co.*, [1909] 2 Ch. 505.

When rights given by special Act cannot be surrendered or restricted.

Rights conferred by Act of Parliament upon a company for public purposes cannot be restricted or rescinded by private agreement between the company and third parties. In *Thames Conservators* v. *Southwark and Vauxhall Water Co.* (1897), 13 T. L. R. 155, MATHEW, J., held that an agreement whereby the water company limited and restricted their right to take water from the Thames to 24½ million gallons in 24 hours was lawful because it had been sanctioned by the legislature in subsequent legislation. Further, as to the general principle, see *Ayr Harbour Trustees* v. *Oswald* (1883), 8 App. Cas. 623, in which it was decided by the House of Lords that where the legislature confers powers on any body—whether one which is seeking to make a profit for shareholders or one acting solely for the public good—to take lands compulsorily for a particular purpose, it is on the ground that the using of that land for that purpose will be for the public good; and a contract purporting to bind such a body, and their successors not to use those powers, is void. And in *Mulliner* v. *Midland Rail. Co.* (1879), 11 Ch. D. 611, it was held that a railway company having the usual powers under their special Act to take and use land for the purpose of the railway and works, cannot—whether for valuable consideration or otherwise—alienate for any purpose except the purposes of the Act, any portion of its land not being "superfluous land" within s. 127 of the Lands Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 18), and not being land taken for extraordinary purposes within s. 45 of the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), nor any easement over the same, *e.g.*, a right of way. But there may be instances where the particular right of way over the lands of the company is not inconsistent with the purposes for which the lands were taken, and in such a case the company have power to grant it (*In re Gonty and M. S. & L. Rail. Co.*, [1896] 2 Q. B. 439). See, further, *Foster* v. *L. C. & D. Rail. Co.*, [1895] 1 Q. B. 711; *Grand Junction Canal Co.* v. *Petty* (1888), 21 Q. B. D. 273; *S. Eastern Rail. Co.* v. *Associated Portland Cement Manufacturers, Ltd.*, [1910] 1 Ch. 12; and see *Caledonian Rail. Co.* v. *Turcan*, [1898] A. C. 256. A local authority, empowered to make byelaws for the regulation of buildings within its jurisdiction, has no power to sanction plans in contravention of byelaws properly made (*Yabbicom* v. *King*, [1899] 1 Q. B. 444, following *McIntosh* v. *Pontypridd Improvements Commissioners* (1892), 61 L. J. Q. B. 164); and see *Baxter* v. *Bedford* (1885), 1 T. L. R. 424; *R.* v. *Newcastle-upon-Tyne* (*Mayor etc. of*) (1889), 53 J. P. 788.

NOTE.

Gasworks are within the Factory Acts.

Gasworks are within the Factory and Workshop Acts. The Departmental Committee on Water Gas (see their Report, Parliamentary Paper, 1899, C. 9164), in referring to the danger of the manufacture and use of carburetted water gas, say: "As regards manufacture, the danger to the persons employed appears to be, with proper machinery and arrangements, not greater than that incurred in coal-gas making; and any danger that there may be can, we think, be dealt with adequately under the Factory and Workshop Acts, for the purposes of which gasworks are non-textile factories." A departmental memorandum, dated May, 1899, has been issued upon this subject, and will be found in the annual report of the chief inspector of factories and workshops for the year 1899 at p. 63 (Parliamentary Paper Cd. 223, of 1900). The Brighton and Hove Gas Company were summoned at the instance of an inspector of factories. The company contended that they were not within the Acts, and had never given notice of accident to the Board of Trade under the Factory Act of 1878. The magistrates held that the gasworks came within the Factory Acts, and imposed fines on six summonses (*Owner* v. *Brighton and Hove Gas Co.*, Jl. of G. L., August 28th, 1900, p. 529, and September 4th, 1900, p. 586). At Sevenoaks Petty Sessions the Sevenoaks Gas Co. were summoned for not keeping a register of employees under 16 years of age and for not affixing an abstract of the Factory Act on the walls of the works. A fine of £1 was imposed, Jl. of G. L., March 24th, 1903, p. 778. Further on the subject of notice of accidents, see the Notice of Accidents Acts, 1894 (57 & 58 Vict. c. 28) and 1906 (6 Edw. 7, c. 53).

Costs of promoting or opposing Bills in Parliament.

By the Borough Funds Acts, 1872 (35 & 36 Vict. c. 91), and 1903 (3 Edw. 7, c. 14), the costs of promoting or opposing Bills in Parliament or of prosecuting or defending any legal proceedings necessary for the promotion or protection of the interests of the inhabitants of the district may, upon the observance of certain conditions, be paid by the governing body out of the borough fund, borough rate, or other the public funds or rates; except in the case of Bills promoted by the governing body for the establishment of any gas or water works to compete with any existing gas or water company established under any Act of Parliament, or where the promotion or opposition of a Bill by the governing body has been decided by a committee of either House of Parliament to be unreasonable or vexatious. Before the passing of the Act of 1872 the general principle was that governing bodies were able to defray the expenses of opposing Bills out of the public funds or rates, if the opposition was undertaken in defence of the corporate property or rights, and this right is not taken away by the Act (*Attorney-General* v. *Brecon* (1879), 10 Ch. D. 204). See the authorities more fully considered later under the Borough Funds Acts, 1872 and 1903.

By the St. Helen's Improvement Act, 1869, the corporation obtained power *inter alia* to purchase on arbitration terms the undertaking of the gas company supplying the borough, and also power to raise money for the purpose. In the session of 1870, the gas company promoted a bill to increase their capital and enlarge the area of supply. The corporation in pursuance of a resolution of ratepayers, opposed the Bill, which they contended would have the effect of preventing the purchase of the gas undertaking by increasing the price. The relators, who were two ratepayers, sought to restrain this action of the corporation, and to prevent their applying the borough rates for that purpose. STUART, V.-C., refused the injunction (*Attorney-General* v. *St. Helen's Corporation*, [1870] W. N. 150).

Standing Orders.

By the Standing Orders of each House of Parliament, Bills for the establishment of gasworks are placed in the first class of private Bills (S. O. 1, L. & C.). Besides the ordinary subjects to be mentioned in notices by advertisement, the lands in or upon which the works are intended to be constructed are to be specified (S. O. 5 L. & C.), and a clause must be inserted in the Bill defining such lands (S. O. 139 L., and 187 C.); and, on or before the 15th day of December immediately preceding the application for a Bill, either for the construction of gasworks or for the construction of works for the manufacture or conversion of the residual products, the promoters must

Sect. 1.

NOTE.

serve a notice upon the owner, lessee, and occupier of every dwelling-house situated within 300 yards of the limits within which the works are intended to be constructed (S. O. 15, L. & C.). A copy of every Bill relating to gasworks must also be deposited at the office of the Board of Trade on or before December 21st (S. O. 33, L. & C.).

Winding up of companies.

The powers of the Chancery Division to order winding up extends under the Companies (Consolidation) Act, 1908 (8 Edw. 7, c. 69), s. 267, to companies and corporations not registered under that Act. Railway companies incorporated by Act of Parliament are excepted, but with that exception the power extends to all companies incorporated by Act of Parliament. In this way a ferry company (*Isle of Wight Ferry Co.* (1865), 2 H. & M. 597), a canal company (*Basingstoke Canal Co.* (1866), referred to L. R. 4 Eq. 198), a telegraph company (*Electric Telegraph of Ireland Co.* (1856), 22 Beav. 471), a dock company (*Exmouth Docks Co.* (1873), L. R. 17 Eq. 181), and a navigation company (*Bradford Navigation Co.* (1870), L. R. 5 Ch. 600), have been ordered to be wound up. The court will make the order, even though an Act of Parliament may be necessary to fully wind up and sell the company's property (*Bradford Navigation Co., supra*). The court has jurisdiction to make an order for the winding-up of a water company, incorporated by registration under the Companies Acts, upon which powers for the public benefit have been conferred by a provisional order of the Board of Trade (made under the Gas and Water Works Facilities Act, 1870 (33 & 34 Vict. c. 70), and afterwards confirmed by a special Act), though it might not be possible to sell the undertaking and property of the company without the authority of an Act of Parliament (*In re Barton-upon-Humber and District Water Co.* (1889), 42 Ch. D. 585). And see *Blaker* v. *Herts and Essex Waterworks Co.* (1889), 41 Ch. D. 399.

Supply of electricity by gas companies.

The Model Gas Bill formerly contained the following clause:

> "36. The company, if they think fit, may, under the provisions of the Electric Lighting Acts, 1882 and 1888, make application for a provisional order or licence to supply electrical energy for public and private purposes, and may apply their funds for the purpose of such application."

Gas companies existing under parliamentary authority, in the absence of a special power to the above effect, have no power to make such application or to apply their funds for that purpose. For an instance where such a company having no special power proceeded successfully by private Bill, see Walker and Wallsend Union Gas Act, 1899.

Where a gas company exists under the authority of the Companies Act, application may be made to alter the provisions of its memorandum of association so as to include the supply of electric energy. The following are instances of such applications: *Colombo Gas and Water Co.*, Jl. of G. L., July 20th, 1896, p. 179; *Hoylake and West Kirby Gas and Water Co.*, *ibid.* 911; *In re Oriental Telephone Co.*, [1891] W. N. 153; *In re Rugeley Gas Co.*, [1899] W. N. 127; and *In re Harrington Gas Co.*, Jl. of G. L., April 3rd, 1900, 879; *In re Uppingham Gas Co.*, Electrician, June 28th, 1901, p. 384; *Hessle Gas Co.*, Jl. of G. L., February 9th, 1904, p. 348; June 14th, 1904, p. 789.

When companies authorised works must comply with building Acts and byelaws.

Where gas, water, or other works are authorised to be erected by an Act of Parliament, the question often arises whether the company are bound to conform to building Acts or byelaws locally in force relating to buildings, *e.g.*, the building line. The guiding principle is that the company must conform to the building Acts or byelaws, unless there is something in the private Act which is inconsistent with the general provision of the building Acts or byelaws. Where a railway company was empowered to make a subway "with all necessary works connected therewith" upon certain scheduled land lying within the limits of deviation delineated on the deposited plans, and described in the deposited books of reference, and the company built within the limits of deviation, a station—which was found by the magistrate to be necessary and convenient for the purposes of the railway

—and a part of which projected beyond the line of buildings, it was held that the effect of the special Act was to repeal s. 75 of the Metropolis Management Amendment Act, 1862 (25 & 26 Vict. c. 102), so far as related to the station (*City and South London Rail. Co.* v. *London C. C.*, [1891] 2 Q. B. 513). So, where the school board for London, acting under the powers of a provisional order confirmed by Parliament, compulsorily acquired a piece of land for the purpose of providing school accommodation, the land being defined by metes and bounds in the schedule to the special Act, and the school board built upon the land a school with a playground attached, the external fence of the playground being within twenty feet of the centre of a public highway, it was held that the provisions of ss. 4 and 6 of the Metropolis Management and Buildings Acts Amendment Act, 1878, which forbade the erection, without the consent of the Metropolitan Board of Works, of any building, wall, or fence within twenty feet of the centre of a highway, were inconsistent with the statutory powers given to the school board (by ss. 18, 19 of the Elementary Education Act, 1870 (33 & 34 Vict. c. 75)) for the acquisition and user of the land, and that the school board could therefore use the land for the statutory purposes for which it was acquired free from the restrictions imposed by those provisions (*London C. C.* v. *School Board for London*, [1892] 2 Q. B. 606). See now the London Building Act, 1894 (57 & 58 Vict. c. ccxiii.), which repeals ss. 4 and 6 of the Act of 1878 and substitutes new provisions. See also *London and Blackwall Rail. Co.* v. *Limehouse District Board of Works* (1856), 26 L. J. Ch. 164.

Sect. 93 of the Waterworks Clauses Act, 1847 (10 & 11 Vict. c. 17), provides that nothing therein or in the special Act contained shall be deemed to exempt the undertakers "from any act for improving the sanitary conditions of towns and populous places which may be passed in the same session of Parliament in which the special Act is passed, or any future session of Parliament." A water company by their special Act, passed in 1897, and incorporating the Waterworks Clauses Act, 1847, were empowered to make and maintain "in the lines and situations and according to the levels shown on the deposited plans and sections the waterworks hereinafter described with all proper and necessary embankments," etc. Among the waterworks described was "a high-service water tower situated in the field or enclosure No. 1117 on the Ordnance Map (edition of 1888) of the said parish . . ." Shortly after the special Act came into force the local authority of the district, under the powers given by s. 157 of the Public Health Act, 1875 (38 & 39 Vict. c. 55), made byelaws providing that any person intending to erect a building should give the local authority notice of his intention, and of the date on which the building was to be commenced, and deliver to them plans and sections of it, and a description of the materials with which it was to be constructed:—*Held*, with respect to the erection of the water tower authorised by the special Act, that s. 93 of the Waterworks Clauses Act, 1847, had not the effect of exempting the water company from the provisions of the Public Health Act, 1875, and that the special Act contained no provision inconsistent with the Act of 1875, and, therefore, that the company were bound to comply with the byelaws made by the local authority under that Act (*Uckfield, R. D. C.* v. *Crowborough District Water Co.*, [1899] 2 Q. B. 664).

So where a gas company were authorised to erect on lands specified in the schedule to the Act, "such gasworks, whether for the manufacture, storing, and supply of gas or otherwise as they think fit," and in February, 1899, they proceeded on such land to build a purifying house, the external walls of which were within twenty feet of the centre of a highway, it was held (on a case stated) that the gas company's Act contained no powers inconsistent with the London Building Act, 1894 (57 & 58 Vict. c. ccxiii.), and that the company could only build subject to that Act (*London C. C.* v. *Wandsworth and Putney Gas Co.* (1900), 82 L. T. 562). *Cf. Charing Cross and Strand Electricity Supply Corporation* v. *Woodthorpe* (1903), 88 L. T. 772.

See also *London C. C.* v. *South Metropolitan Gas Co.*, Jl. of G. L., November 22nd, 1898, p. 1168, where the Greenwich magistrate imposed a fine on the defendants in connection with the erection of a coal shed at

Sect. 1.

NOTE.

Rotherhithe gasworks within the prescribed distance of twenty feet from the centre of a highway and without having first obtained the consent of the council.

A metropolitan district board of works having parliamentary power to supply electric energy and to execute works for the purpose, proceeded to construct street boxes or chambers under a street for the purpose of electric lighting without serving the building notice respecting it required by the London Building Act, 1894. They contended that this Act did not apply, as their special Act of 1892 was inconsistent therewith. The magistrate held that the Acts were not inconsistent, and imposed a fine. He also held that the street boxes were "buildings, structures or works" within the Building Act (*Crow* v. *Whitechapel Board of Works*, Jl. of G. L., June 12th, 1900, p. 1558; Electrician, June 8th, 1900, p. 263). On a case stated a Divisional Court confirmed this decision (84 L. T. 595).

A water company acquired compulsorily in 1853 a piece of land with power to construct waterworks. They constructed certain works upon it, and, from time to time, added thereto. In 1897 additional pumping accommodation having become necessary, they resolved to build, on a vacant portion of this piece of land, an engine-house in connection with their existing works. The local authority insisted that plans for such buildings should be deposited in accordance with the requirements of their byelaws, and that the building proposed to be erected was contrary to the provisions of the Public Health (Buildings in Streets) Act, 1888 (51 & 52 Vict. c. 52). The water company contended that by their private Act of 1852 they were in effect exempted from the operation of the provisions of the Act of 1888. The water company then commenced an action in the High Court, claiming a declaration that they were entitled to erect an engine-house and other buildings without the consent of the defendants. Thereupon the local authority took proceedings before the justices, who found that the plaintiff's building did project beyond the front main wall of the house or building on either side, and inflicted a fine. Afterwards, on a summons in the action to have the question of law raised by the defence decided before the action was further proceeded with, STIRLING, J., refused to interfere by way of injunction or declaration of right, holding that the legislature had provided in such cases for a mode of procedure before justices (*Grand Junction Waterworks Co.* v. *Hampton U. D. C.*, [1898] 2 Ch. 331).

Interpretations in this Act.

And with respect to the construction of this Act, and any Act incorporated therewith, be it enacted as follows:

"Special Act:"

"Prescribed:"

"The lands:"

"The undertaking:"

"The undertakers."

2. The expression "the special Act" used in this Act shall be construed to mean any Act which shall be hereafter passed authorising the construction of gasworks, and with which this Act shall be so incorporated as aforesaid; and the word "prescribed," used in this Act in reference to any matter herein stated, shall be construed to refer to such matter as the same shall be prescribed or provided for in the special Act, and the sentence in which such word occurs shall be construed as if, instead of the word "prescribed," the expression "prescribed for that purpose in the special Act" had been used; and the expression "the lands" shall mean the lands which shall by the special Act be authorised to be taken or used for the purposes thereof; and the expression "the undertaking" shall mean the gasworks, and the works connected therewith, by the special Act authorised to be so constructed; and the expression "the undertakers" shall mean the persons by the special Act authorised to construct the gasworks.

Interpretations in this and the special Act.

3. The following words and expressions in both this and the special Act, and any Act incorporated therewith, shall have the meanings hereby assigned to them, unless there be something in the subject or context repugnant to such construction; (that is to say,)

Number:

Words importing the singular number only shall include the plural number, and words importing the plural number only shall include also the singular number:

Gender:

Words importing the masculine gender shall include females:

"Person:"

The word "person" shall include corporation, whether aggregate or sole:

"Lands:"

The word "lands" shall include messuages, lands, tenements, and hereditaments, or heritages of any tenure:

"Street:"

The word "street" shall include any square, court, or alley, highway, lane, road, thoroughfare, or public passage or place within the limits of the special Act:

In *Maddock* v. *Wallasey Local Board* (1886), 50 J. P. 404, it was held that this definition did not include an open tract of land above mean high-water mark which belonged to the owner of enclosed land fronting the shore. It appeared that the inhabitants had been accustomed to pass and repass along this shore, and at high tide had been in the habit of going upon the tract of land in question, but had not crossed in any defined track.

See further a decision of magistrates reported 74 J. P. 567.

A clause is commonly inserted in recent gas Acts authorising the breaking up of streets, etc., not dedicated to the public, on the application of an owner or occupier of premises abutting or in course of building.

"The gasworks:"

The expression "the gasworks" shall mean the gasworks and the works connected therewith by the special Act authorised to be constructed:

"Gas rate:"

The expression "gas rate" shall include any rent, reward, or payment to be made to the undertakers for a supply of gas:

"Month:"

The word "month" shall mean calendar month:

At common law, the primary meaning of "month" is lunar month. See *Bruner* v. *Moore*, [1904] 1 Ch. 305, and the cases there cited.

"Superior courts:"

The expression "superior courts," where the matter submitted to the cognizance of the superior courts arises in England or Ireland, shall mean her Majesty's superior courts of record at Westminster or Dublin, as the case may require . . . ; and where such matter arises in Scotland, it shall mean the court of session:

Certain words here omitted are repealed by the Statute Law Revision Act, 1891 (54 & 55 Vict. c. 67).

"Oath:"

The word "oath" shall include affirmation in the case of Quakers, and any declaration lawfully substituted for an oath in the case of any other persons allowed by law to make a declaration instead of taking an oath:

See Oaths Act, 1888 (51 & 52 Vict. c. 46).

Sect. 3.

"County:" The word "county" shall include riding or other division of a county having a separate commission of the peace; and in Scotland . . . (*a*) any . . . (*b*) division of a county . . . (*a*) having a separate sheriff; and it shall also include county of a city or county of a town:

(*a*) Words omitted repealed by Statute Law Revision Act, 1891 (54 & 55 Vict. c. 67).

(*b*) Words omitted repealed by Statute Law Revision Act, 1893 (56 & 57 Vict. c. 14).

'Justice:" The word "justice" shall mean justice of the peace acting for the place where the matter requiring the cognizance of any such justice arises; and where any matter shall be authorised or required to be done by two justices, the expression "two justices" shall be understood to mean two or more justices met and acting together:

"Two justices:"

Metropolitan police magistrates and stipendiary magistrates may exercise the powers of two justices (2 & 3 Vict. c. 71, s. 14; 11 & 12 Vict. c. 43, s. 33; and 21 & 22 Vict. c. 73, s. 1).

Justices are by the common law disqualified from acting as such in any matter in which they are interested. This rule rests on the maxim that no man shall be a judge in his own cause. In *Dimes* v. *Grand Junction Canal Co.* (1852), 3 H. L. Cas. 759, the House of Lords set aside on this ground a decree of Lord Chancellor COTTENHAM in favour of a company in which he was a shareholder. In some statutes, such as the Companies, Railways, and Lands Clauses Acts of 1845, the justices authorised to act are required to be persons "who shall not be interested in the matter"; but these words have been held to be merely declaratory of the common law (*Wakefield L. B.* v. *West Riding etc. Rail. Co.* (1865), L. R. 1 Q. B. 84). Justices are by certain statutes authorised to act notwithstanding certain remote interests, *e.g.*, by the Public Health Act, 1875 (38 & 39 Vict. c. 55), s. 258. No justice is to be disqualified in cases under the Act by reason of his being a member of any local authority or being interested in any rate or fund, out of which any expenses incurred under the Act are to be defrayed; and by the Gasworks Clauses Act, 1871, s. 46, *post*, p. 248, no justice or judge of any county court or quarter sessions shall be disqualified from acting in the execution of that Act by reason of his being liable to the payment of any gas rent or other charge under the Act; and by the Municipal Corporations Act, 1882 (45 & 46 Vict. c. 50), a justice is not disqualified from acting in the execution of that Act by reason of his being liable to the borough rate. "Where there is no statutory relief the objection remains": *per* MATHEW, J., in *R.* v. *Gaisford*, [1892] 1 Q. B. 381. In this case, one Sayers had for many years been in the habit of depositing earth, seaweed, and manure upon a piece of land at the side of a highway. The defendant being a ratepayer in the parish, and a justice, proposed at a vestry meeting, called by the surveyor of highways to consider the question of the obstruction of the highway, a resolution that Sayers be called upon to remove the heap. Sayers having failed to do this, the surveyor took out a summons for obstruction which was heard before two justices, of whom the defendant was one, and an order was made that the surveyor should remove the heap and sell it, and apply the proceeds to the repair of the highway. The Queen's Bench Division decided that the defendant was disqualified from adjudicating upon the summons, because the part taken by him in moving the resolution afforded ground for a reasonable suspicion of bias on his part, though there might not have been bias in fact, and upon a further ground that, as a ratepayer, he was pecuniarily interested in the result of the summons. The second ground of this decision is, however, open to question for it appears to lose sight of s. 2 of the Justices of the Peace Act, 1867. See the authorities summarised in

NOTE.

Leeson v. *General Council of Medical Registration and Education* (1889), 43 Ch. D. 366. On the question of bias (or the possibility or probability of bias), apart from pecuniary interest, see *R.* v. *Milledge* (1879), 4 Q. B. D. 332; *R.* v. *Meyer* (1875), 1 Q. B. D. 173; *R.* v. *Cumberland* (1888), 58 L. T. 491; *R.* v. *JJ. Weymouth* (1879), 4 Q. B. D. 394; *R.* v. *JJ. Huntingdon* (1879), 4 Q. B. D. 522; *R.* v. *JJ. Lancashire* (1880), 6 Q. B. D. 168; *R.* v. *Handsley* (1881), 8 Q. B. D. 383; *R.* v. *JJ. Great Yarmouth* (1882), 8 Q. B. D. 525; *R.* v. *Lee* (1882), 9 Q. B. D. 394; *R.* v. *Henley*, [1892] 1 Q. B. 504; *Allinson* v. *General Medical Council*, [1894] 1 Q. B. 750; *R.* v. *Huggins*, [1895] 1 Q. B. 563; *R.* v. *JJ. London* (1896), 60 J. P. 726; *R.* v. *Burton*, [1897] 2 Q. B. 468; *R.* v. *JJ. Sunderland*, [1901] 2 K. B. 357; *Ex parte Wilder* (1902), 66 J. P. 761; *R.* v. *JJ. Lancashire* (1906), 70 J. P. 337; *R.* v. *Woodhouse*, [1906] 2 K. B. 501; on appeal, *sub nom. Leeds Corporation* v. *Ryder*, [1907] A. C. 420; *R.* v. *JJ. London* (1908), 72 J. P. 137; *R.* v. *JJ. Middlesex*, *Times*, April 7th, 1908. Since even bias, or the possibility of bias, will disqualify, it follows that pecuniary interest, even though remote (*R.* v. *Recorder of Cambridge* (1857), 8 E. & B. 637), will disqualify. Interest as a shareholder in a railway company was held to disqualify a justice from acting as such in the enforcement of its byelaws (*R.* v. *Hammond* (1863), 9 L. T. 423; *cf.* *R.* v. *Mackenzie*, [1892] 2 Q. B. 519; *R.* v. *Burton*, *supra*). Where a justice had endeavoured to bring about a settlement between the parties in the case of an assault, and was a surgeon attending the person assaulted, and was subpœnaed as a witness, the court set aside a writ of prohibition which had been obtained to prohibit him from sitting at the hearing (*R.* v. *Farrant* (1887), 20 Q. B. D. 58; and see *R.* v. *JJ. Surrey* (1852), 21 L. J. M. C. 195). Where the interest of the justice is known to the parties, it may be waived tacitly or otherwise (*R.* v. *Cheltenham Commissioners* (1841), 1 Q. B. 467; *Wakefield L. B.* v. *West Riding, etc. Rail. Co.* (1865), L. R. 1 Q. B. 84; *R.* v. *JJ. Antrim*, [1895] 2 I. R. 603). A justice of the peace becomes disqualified by bankruptcy (46 & 47 Vict. c. 52, s. 32; and see 53 & 54 Vict. c. 71, s. 9), and by corrupt practice at elections (46 & 47 Vict. c. 51, s. 38). The position of clerk to justices is incompatible with the office of justice of the peace (*R.* v. *Douglas*, [1898] 1 Q. B. 560).

"Sheriff:"

The word "sheriff" shall mean the sheriff depute of the county . . . (*a*) in Scotland . . . (*b*) in which the matter submitted to the cognizance of the sheriff arises, and shall include the substitutes of such sheriff depute . . . (*b*).

(*a*) Words omitted are repealed by the Statute Law Revision Act, 1893 (56 & 57 Vict. c. 14).

(*b*) Words omitted are repealed by the Statute Law Revision Act, 1891 (54 & 55 Vict. c. 67).

"Quarter sessions."

The expression "quarter sessions" shall mean quarter sessions as defined in the special Act; and if such expression be not there defined it shall mean the court of general or quarter sessions of the peace which shall be held at the place nearest to the gasworks, or the principal office thereof, for the county or place in which the gasworks are situate, or for some division of such county having a separate commission of the peace.

As to the interpretation generally of words and phrases used in Acts of Parliament, see the Interpretation Act, 1889 (52 & 53 Vict. c. 63)—"An Act for consolidating enactments relating to the construction of Acts of Parliament and for further shortening the language used in Acts of Parliament." This Act supersedes the earlier Act of 13 & 14 Vict. c. 21, having a like object.

Where an interpretation clause provides that a word shall "include" so and so, the meaning of the word is not necessarily confined to what it is to include, but may be much more extensive. See *per* Blackburn, J., in

Sect. 3.

NOTE.

Ex parte Ferguson (1871), L. R. 6 Q. B., at p. 291, and see *Robinson* v. *Barton-Eccles L. B.* (1883), 8 App. Cas. 798.

Where an explosion occurred in the course of a manufacture upon premises which were insured against fire, but with a condition that the insurers would not be responsible for loss or damage by explosion, except for such loss or damage as should arise from explosion by gas, the word "gas" was held by the court to mean gas used for illuminating purposes, whether manufactured from oil or coal, and not to include an inflammable and explosive vapour envolved in the process of extracting oil from shoddy (*Stanley* v. *The Western Insurance Co., Ltd.* (1868), L. R. 3 Ex. 71).

Gas shares, although in a company holding land for the purposes of their undertaking, were held not to be within the Mortmain Act, 9 Geo. 2, c. 36, which declared that all gifts, etc., of lands, tenements, or hereditaments, or of any estate or interest therein, or of any charge or incumbrance affecting any lands, tenements, or hereditaments made otherwise than prescribed by the Act, should be void (*Sparling* v. *Parker* (1846), 9 Beav. 457). See now the Mortmain and Charitable Uses Acts of 1888 (51 & 52 Vict. c. 42) and 1891 (54 & 55 Vict. c. 73), the former of which repeals (for the most part) the Act of Geo. 2, and substitutes other provisions. Metropolitan 3½ per cent. stock issued under the Metropolitan Board of Works (Loans) Act, 1869 (32 & 33 Vict. c. 102), involves an interest in land within the meaning of the Act of 1888, s. 10 (iii.) (*In re Crossley, Birrell* v. *Greenhough*, [1897] 1 Ch. 928). See further the notes to s. 7 of the Companies Clauses Consolidation Act, 1845, *post*. The Companies Clauses Consolidation Act, 1845, s. 7, and the Companies (Consolidation) Act, 1908, s. 22, respectively provide that shares in the undertaking or company shall be personal estate, and shall not be of the nature of real estate.

Citing the Act.

And with respect to citing this Act or any part thereof, be it enacted as follows:

Short title of the Act.

4. In citing this Act in other Acts of Parliament and in legal instruments it shall be enough to use the expression "The Gasworks Clauses Act, 1847."

Form in which portions of this Act may be incorporated in other Acts.

5. For the purpose of incorporating part only of this Act with any Act hereafter to be passed, it shall be enough to describe the clauses of this Act with respect to any matter in the words introductory to the enactment with respect to such matter, and to enact that the clauses so described, or that this Act, with the exception of the clauses so described, shall be incorporated with such Act; and thereupon all the clauses of this Act so incorporated shall, save so far as they are expressly varied or excepted by such Act, form part of such Act, and such Act shall be construed as if such clauses were set forth therein with reference to the matter to which such Act relates.

Section 1 of the Gasworks Clauses Act, 1871, provides that that Act and this Act shall be construed together as one Act, and the provisions of that Act are to repeal and supersede any inconsistent provisions in this Act. See cases cited in notes to s. 3 of the Act of 1871, *post*, p. 220.

Laying of pipes.

And with respect to the breaking up of streets for the purpose of laying pipes, be it enacted as follows:

Power to break up streets, etc.,

6. The undertakers, under such superintendence as is hereinafter specified, may open and break up the soil and pavement of the several streets and bridges within the limits of the special Act, and may open

Sect. 6.

under superintendence, and to open drains.

and break up any sewers, drains, or tunnels within or under such streets and bridges, and lay down and place within the same limits pipes, conduits, service pipes, and other works, and from time to time repair, alter, or remove the same, and also make any sewers that may be necessary for carrying off the washings and waste liquids which may arise in the making of gas, and for the purposes aforesaid may remove and use all earth and materials in and under such streets and bridges, and they may in such streets erect any pillars, lamps, and other works, and do all other acts which the undertakers shall from time to time deem necessary for supplying gas to the inhabitants of the district included within the said limits, doing as little damage as may be in the execution of the powers hereby or by the special Act granted, and making compensation for any damage which may be done in the execution of such powers.

"Street."

The word "street" is defined by s. 3. This definition differs from that in the Public Health Act, 1875, and from that in the Metropolis Management Act, 1855, and in other public Acts. Discrimination is therefore necessary in the consideration of cases relating to these other Acts.

See also as to the meaning of the word "street" the cases collected in the note under s. 7, *post*, p. 180.

It has been held under the corresponding section (s. 28) of the Waterworks Clauses Act, 1847, that the undertakers are not authorised to cut through plates lying on the top of a girder railway bridge carrying a public road for the purpose of suspending their pipes to the girders (*Glasgow* (*Lord Provost, etc.*) v. *Glasgow and S. W. Rail. Co.*, [1895] A. C. 376. They may, however, dig a trench and lay pipes resting on a bridge (see *Taff Vale Rail. Co.* v. *Cardiff Gas Light and Coke Co.* (1907), 71 J. P. 350).

Highway presumably extends to space between fences.

A highway presumably extends over the entire space between the fences which is capable of being used for passage. See and compare the following cases as to the presumption and the conditions to which it is subject: *R.* v. *United Kingdom Telegraph Co.* (1862), 2 B. & S. 647; *Turner* v. *Ringwood Highway Board* (1870), L. R. 9 Eq. 418; *Nicol* v. *Beaumont* (1883), 53 L. J. Ch. 853; *Harris* v. *Northamptonshire County Council* (1897), 61 J. P. 599; *Locke-King* v. *Woking Urban District Council* (1897), 77 L. T. (N.S.) 790; *Friern Barnet Urban District Council* v. *Richardson* (1898), 62 J. P. 547; *Neeld* v. *Hendon Urban District Council* (1899), 63 J. P. 724; *Evelyn* v. *Mirrielees* (1900), 17 T. L. R. 152; *Belmore* (*Countess of*) v. *Kent County Council*, [1901] 1 Ch. 873; *Attorney-General* v. *Esher Linoleum Co.*, [1901] 2 Ch. 647; *Conservators of River Thames* v. *Dennis*, *Times*, November 1st, 1902; *Ford* v. *Harrow Urban District Council* (1903), 67 J. P. 248; *Harvey* v. *Truro Rural District Council*, [1903] 2 Ch. 638; *Plumbley* v. *Lock* (1902), 67 J. P. 237; *Attorney-General* v. *Perry*, [1904] 1 I. R. 247; *Offin* v. *Rochford Rural District Council*, [1906] 1 Ch. 342; and *Attorney-General* v. *Moorsom-Roberts* (1908), 72 J. P. 123. It would not ordinarily include an open and unenclosed ditch by the side of it (*Field* v. *Thorne* (1869), 33 J. P. 727); although there is no rule of law that a ditch running alongside a highway cannot be dedicated as part of the highway merely because it is not part of the roadway and cannot be used by the public for purposes of passage (*Chorley Corporation* v. *Nightingale*, [1907] 2 K. B. 637). Nor would it include any part of the unenclosed land adjoining a highway which had never been dedicated as part of the highway though within fifteen feet of the centre of the road (*Easton* v. *Richmond Highway Board* (1871), L. R. 7 Q. B. 69). And see *Robinson* v. *Cowpen Local Board* (1894), 63 L. J. Q. B. 235.

As to laying pipes in the streets of the metropolis, see further the Metropolis Gas Act, 1860 (23 & 24 Vict. c. 125), ss. 49, 50, *post*, pp. 286, 288.

Sect. 6.

NOTE.

When the breaking up of streets, etc. without parliamentary authority will be restrained by injunction, etc.

The breaking up without parliamentary authority of public streets, roads, pavements or footways, in order to lay down, repair or replace, gas or water pipes is a nuisance at common law, and may be made the subject of indictment. It is another question whether injunction will be granted to restrain such breaking up, and the cases go to show that injunction will not readily be granted, especially if the alleged nuisance be trivial and transient. Prosecutions under s. 72 of the Highway Act, 1835 (5 & 6 Will. 4, c. 50), have also been sustained. By the Public Health Act, 1875 (38 & 39 Vict. c. 55), s. 144, and s. 25 of the Local Government Act, 1894, the powers of surveyors of highways and of vestries under the Highway Act, 1835, and Acts amending the same, are vested in urban and rural authorities. See further, *post*, p. 169. In what follows, the leading cases on this question of breaking up streets will be noticed.

Leading cases on the above subject.

In *Attorney-General* v. *The Sheffield Gas Consumers Co.* (February, 1853), 3 De G. M. & G. 304, it appeared that a company was incorporated by Act of Parliament for supplying the town of Sheffield with gas, and that afterwards a joint stock company was formed for the same purpose, and that they, with the permission of the board of surveyors of highways, commenced to break up the streets for the purpose of laying down their pipes. Upon an information filed by the Attorney-General at the relation of the parliamentary company, and a bill by the parliamentary company against the joint stock company, charging a public nuisance and private damage, the court refused to restrain the joint stock company from proceeding with their works, upon the ground that the damage was trivial and temporary, and further that the same principles will guide the interference of the court by injunction in the case both of public and private nuisance, viz., the inadequacy of the legal remedy for injury to property. It appeared in the course of the proceedings that the parliamentary company were also proceeding by indictment against the joint stock company. Lord Justice TURNER in the course of his judgment said: "As to the laying down the pipes, that appears to me to be a case of merely temporary inconvenience. At the utmost, according to the evidence, it is a case of two or three days. But when these pipes are laid down, the work which has been done is entirely completed, it is done once for all. . . . All these are nuisances in a greater or less degree, and with reference to what has been said, as to the continual taking up of the pavement, which would be consequent on those pipes having been laid down, it is true that there may be, and probably will be, some inconvenience resulting from that, but it is an inconvenience which will not affect the general body of the inhabitants of Sheffield. It is an inconvenience which may occur from time to time, probably in a much less degree than is anticipated by the parties. I think that inconvenience will be temporary, applying only to a particular part of the town, not affecting the general body of the inhabitants to any great extent. And it is not to be left out of consideration in determining this question, that to some extent the law has provided a remedy in respect of these inconveniences. There is some remedy under the Highway Act, and there are boards of surveyors here having the control of these streets who concur in these measures being taken, and as to any injury which any private individual may sustain, the law is open to him by an action on the case." The Lord Chancellor (Lord CRANWORTH) in the course of his judgment said: "It may be that the tearing up of the pavement is not, even for the purpose of laying down gas pipes, anything that was ever in contemplation, and that it cannot be done without the authority of the legislature, or some other competent authority. . . . If I thought the question turned on the decision of that point, I should probably have wished the matter to stand over till after the trial of the indictment. Not thinking so, but thinking that the evil, if any, which does exist is of such a very transient nature, that at no one spot, or to no one individual, can it be said to be more than a passing and almost imaginary evil, I am of opinion that no case is made out for restraining these parties." Lord Justice KNIGHT BRUCE *dissented*.

In *R.* v. *Sheffield Gas Consumers Co.* (June, 1853), 18 Jur. 146, n., a gas company were indicted for obstructing a highway by digging and keeping open a trench upon and along the same. The company was registered as

Note.

Breaking up of streets—*continued.*

a joint stock company and had no parliamentary powers. They had opened a trench in one of the public streets of Sheffield for the purpose of laying down their mains along the middle of the street, and they had obtained the permission of the highway board, as well as of the commissioners appointed under a local Act for lighting the town. It was admitted that the defendants had used reasonable despatch in laying down the pipes and restoring the road, but during the execution of the works the street was impassable. A verdict was entered for the Crown, leave being reserved to move to enter a verdict for the defendants. A rule *nisi* having been granted, the same was afterwards discharged, Lord Campbell, C.J., remarking, "The defendants should follow the usual course—submit their case to Parliament, and obtain the necessary powers under the necessary restrictions. Section 6 of the Gasworks Clauses Act, 10 & 11 Vict. c. 15, gives a power to break up the streets, but under great restrictions, limitations, and qualifications. The company claims a common law right to do the same thing unfettered by any restrictions."

In *R.* (*on the prosecution of the Stoke, Fenton, and Longton Gas Co.*) v. *The Longton Gas Co., Ltd.* (1860), 2 E. & E. 651; *S. C. sub nom. R.* v. *Knight*, 6 Jur. (n.s.) 601, the Court of Queen's Bench again held that it is an indictable nuisance to obstruct or to employ others to obstruct a public highway or footway, by placing earth and bricks thereon, taking up the pavement, and opening trenches for the purpose of laying down service pipes for the supply of gas from public mains to private houses, unless those who do or authorise such acts have parliamentary powers for the purpose; and further that such acts cannot be justified by the occupiers of the houses as an exercise of the right of every householder to make such a temporary obstruction of a highway or footway as may be necessarily incident to the enjoyment of his property. In this case it appeared that the Act of the improvement commissioners was passed in 1839, and that they were charged with certain duties as to public lighting, with power to contract. Soon after the passing of that Act the prosecuting company were formed under deed of settlement, and commenced and continued to supply gas both for public and private lighting in the town of Longton (the commissioners contracting with them for the former), and on June 14th, 1858, they obtained a private Act. On June 5th, 1858, the defendant company were established under the Joint Stock Companies Act, 1858, and before that company had commenced to lay any mains or pipes, the commissioners, rejecting the tender of the old company whose latest contract for the public supply of gas had expired, entered into a contract with the defendant company (through one of their directors authorised for the purpose) "to remove bricks and stones and cut trenches of sufficient width and depth and in the directions required for receiving the mains and service pipes in and throughout the town of Longton," and to fill in, etc., and "do as little damage as might be to the streets, roads and ways of Longton aforesaid, and the pavements and channels thereof, and as far as possible avoid injuring any gas or water pipes of other companies, or creating or causing any nuisance or annoyance whatever to the inhabitants of Longton or others in executing the said works." The defendants used all reasonable despatch in digging the trenches and laying down the mains and pipes, and in restoring the footpaths and pavements. Before doing the work the defendants had obtained the consent of the board of surveyors of highways of the town of Longton, and the approval and consent of the inhabitants of Longton in public meeting assembled, and the consent and licence of the lord of the manor which included the town of Longton, and the service pipes were laid at the request and by the direction of the owners of the houses, and it was found "that they had been so laid down carefully, without creating any unnecessary nuisance." Cockburn, C.J., in giving judgment, said: "We find no authority according to which so wide and large an exception to the general rule is established as would allow either a private person or a body acting at the request of private persons to open the streets for the purpose of supplying private houses with water or gas from sources from which a supply of water or gas may be procured. . . . The case does not seem to us to fall within what may be called the ordinary incidents and rights which, in common sense and from common use, are understood to appertain to the enjoyment of property. On

Sect. 6.

NOTE.

Breaking up of streets—*continued.*

the contrary, such a right as is here claimed, of interfering with the streets, is never exercised except under the authority of Acts of Parliament conferring special powers, with great care and under proper control in the case of gas, by placing the companies supplying it under the provisions of the General Gasworks Clauses Act, according to which the parties are subjected to wholesome restrictions and to the control of the magistrates. We think, therefore, that the obstructions in question are indictable, and that the conviction was right, and the verdict must be entered accordingly."

In *Goldsmid* v. *Tunbridge Wells Improvement Commissioners* (1866), L. R. 1 Ch. 349 (a case relating to the pollution of a stream), Lord Justice TURNER observed: "I adhere to the opinion which was expressed by me and by the Lord Chancellor in *Attorney-General* v. *Sheffield Gas Consumers Co.*, that it is not in every case of nuisance that this court should interfere. I think that it ought not to do so in cases in which the injury is merely temporary and trifling; but I think that it ought to do so in cases in which the injury is permanent and serious; and in determining whether the injury is serious or not, regard must be had to all the consequences which may flow from it." See also *Attorney-General* v. *Preston* (*Mayor of*) (1896), 13 T. L. R. 14.

In *Attorney-General* v. *Cambridge Consumers Gas Co.* (1868), L. R. 4 Ch. 71, the suit was commenced by information and bill, the relators and plaintiffs being the Cambridge University and Town Gaslight Company, which were empowered by various Acts or Parliament (commencing 4 Will. 4), which incorporated the general Act of 1847. By the Cambridge Improvement Act of 28 Geo. 3, certain commissioners were appointed in whom were vested the streets with power to order any of the pavements to be taken up, and to order the streets to be lighted and to contract, etc. By a contract between the plaintiffs and the commissioners, dated May 25th, 1854, the plaintiffs agreed to light the public streets of Cambridge for a term of fourteen years, from June 1st, 1854, and they were empowered to break up any street for the purpose of their contract. The plaintiffs purchased land, erected buildings, and laid down twenty miles of main pipes, and nearly 3,000 private service pipes, and erected 660 street lamps. On December 12th, 1867, the defendant company was registered as a limited company, and the commissioners made a contract with them (they having made a lower tender than the plaintiffs) for fourteen years from June 1st, 1868. The contract purported to empower the defendants to break up streets and lay down gas pipes. Upon their commencing to do so, the present information and bill was filed praying for an injunction. After the suit was at issue but before the hearing, the contract was rescinded; but the defendants still claimed to go on laying their pipes for the purpose of supplying private houses. Numerous affidavits from heads of colleges and others were filed by the plaintiffs to show injury and inconvenience from the operations of the defendants. The injunction was refused, and the decision in the *Sheffield Case* was followed. PAGE WOOD, L.J., in the course of his judgment remarked (p. 80): "Nothing that we are now doing, nor any sanction which we are now giving to that decision, holds out anything in the least contrary to that which was decided by the Court of Queen's Bench in *R.* v. *Longton Gas Co.*, where it was held, upon grounds in which I entirely acquiesce, that to say that any private individual or company may break up the pavements for the purpose of laying down gas pipes or water pipes or of making communications with the gas pipes or water pipes of another company without subjecting themselves to an indictment, would be to create confusion and discomfort to the inhabitants of a town. I agree that *Attorney-General* v. *Sheffield Gas Consumers Co.* (1853), 3 De G. M. & G. 304, must be taken upon its own circumstances; but it rests upon principles well established. One of them is this, that where the court interferes by way of injunction to prevent an injury in respect of which there is a legal remedy, it does so upon two grounds, which are of a totally distinct character; one is that the injury is irreparable, as in the case of cutting down trees, the other that the injury is continuous, and so continuous that the court acts upon the same principle as it used in older times with reference to bills of peace, and restrains the repeated acts which could only result in incessant actions, the continuous character of the wrong making it grievous and intolerable. As an illustration of this class of

NOTE.

Breaking up of streets—*continued.*

case, I may refer to *Soltau* v. *De Held* (1851), 2 Sim. (N.S.) 133, where the annoyance from the ringing of the bell was in itself slight, but it was so continuous that the court thought fit to arrest the nuisance *brevi manu*, and save the complainant all further annoyance. If, therefore, in the present case it had been made out that there was, either to the public, or to the owners of property adjoining the streets, such a continuous injury, an injunction would be granted, and we must accordingly look narrowly at the evidence, as the judges did in *Attorney-General* v. *Sheffield Gas Consumers Co.* (1853), 3 De G. M. & G. 304, to learn the amount of continuous injury which is likely to be inflicted. . . . In the present case, any member of the town has it in his power to proceed by way of indictment, and if the matter had been brought before us at the instance of a large number of inhabitants who had proceeded by way of indictment, and we saw that they would be obliged to have recourse to perpetual indictments, that might take the case out of the authority of *Attorney-General* v. *Sheffield Gas Consumers Co.* But here we have a body of commissioners incorporated from a very early period, consisting of the heads of all the colleges, and representatives of the borough in Parliament, the magistrates, and other persons, who have powers of the largest description over the carriage-way and the pathway, the soil of which is vested in them. Every stone that is dug out is a trespass upon their property, and if they thought it right, as representing the whole town, they might act in this matter. But they do nothing of the kind. We only find that the information is filed at the instigation of a rival gas company. A similar state of circumstances, in *Attorney-General* v. *Sheffield Gas Consumers Co.*, weighed in the decision come to by the learned judges upon the interlocutory motion." SELWYN, L.J., remarked (p. 86): "I agree with the Lord Justice in dissenting entirely from the proposition that the case of *Attorney-General* v. *Sheffield Gas Consumers Co.* has established any such result as has been contended for, namely, a general right for every gas company, without the authority of Parliament, to interfere as they think fit with the streets and public ways of a town. I think that a gas company which undertakes so to proceed without the authority of Parliament is exposed to a great number of perils, and I believe there are many instances in which companies, having tried to proceed without such parliamentary authority, have afterwards found themselves compelled to apply for and obtain such powers."

In *Edgeware Highway Board* v. *The Harrow District Gas Co.* (1874), L. R. 10 Q. B. 92, the declaration stated that a limited company had been formed for the purpose of supplying gas within a certain district, and that they had agreed with the plaintiffs that if the plaintiffs would give the company licence to open a certain public highway within their jurisdiction, the company would make good the surface of the road and would pay the plaintiffs 1*s.* per yard of the highway so opened; that afterwards the limited company were, by the Harrow Gas Act, 1873, dissolved, and a new company incorporated, and that all contracts, etc., entered into by the limited company became vested in the statutory company. Then it was alleged that after such licence was given by the plaintiffs, the highway was opened under such licence for 1,476 superficial yards by the limited company (see the report in 31 L. T. 402), and that neither the limited company nor the defendants had made good the surface of the highway, or paid to the plaintiffs the sum of 1*s.* per yard in respect of the 1,476 yards so opened. The contention of the defendants was (1) that there was no consideration for the agreement, and (2) that it was an agreement to commit a nuisance, and they relied on *R.* v. *Longton Gas Co.* The Court of Queen's Bench held on demurrer that there was good consideration for the agreement, and that the agreement was not illegal, and did not necessarily involve the committing of a nuisance by the company. BLACKBURN, J., said: "I do not think that the licence to open the highway is necessarily a licence to commit an indictable offence. It is quite possible to open the highway within the terms of the agreement without creating a nuisance. It is true that the public cannot use the spot opened, and if the defendants opened too much of the road at one time, it might be a nuisance; but they cannot take the objection that they themselves, by their own fault, might create a nuisance." MELLOR, J., said: "I am satisfied that the allegations on the record do not show that necessarily the licence is one to commit

Sect. 6.

NOTE.

Breaking up of streets—*continued.*

an indictable offence"; and LUSH, J., said: "It was said that the agreement is illegal, that the plaintiffs are authorising an indictable offence. But there is nothing to show that this is so; and even if it were, as at present advised, I doubt if the defendants could set up as a defence that the contract is illegal."

In the case of *Corporation of Preston* v. *Fullwood L. B.* (1886), 53 L. T. 718, the plaintiffs brought an action claiming an injunction restraining the defendants from stopping, taking up, or otherwise interfering with the mains, pipes, valves, and works of the plaintiffs, by which the plaintiffs supplied water to the district of Fullwood, a suburb of Preston, of which the defendants were the urban sanitary authority. The case was decided on the pleadings and certain admissions. The acts complained of by the defendants were the entering upon and breaking up the streets for the purpose of laying down, repairing, and restoring mains and water pipes. Among the admissions were the following: "(1) Irrevocable licences have been in fact granted by the defendants, or their predecessors in title, to the plaintiffs to do the acts complained of by the defendants hereinafter specified in some of the streets now vested in the defendants. (2) The plaintiffs have, for a period of twenty years and upwards before action, done the acts complained of, and hereinafter stated, without interruption, on all of the said streets now vested in the defendants, to which the said licences do not extend. (3) The plaintiffs have no parliamentary powers which enable them to do any of the acts complained of." Although the plaintiffs claimed an injunction in the action, the following preliminary question was raised pursuant to an order under R.S.C., O. 34, r. 2, "Whether the plaintiffs have any legal right to break up the streets vested in the defendants?" The plaintiffs relied on *Edgeware Highway Board* v. *Harrow District Gas Co.*, *supra*, and the defendants on *R.* v. *Longton Gas Co.*, *supra*. NORTH, J. (after reviewing most of the cases which have been above mentioned), said: "Under the circumstances I have no difficulty in answering the question, 'Whether the Corporation of Preston have any legal right to break up the streets vested in the defendants,' by saying that they have not shown anything to satisfy me that they have any such legal right, and that, in my opinion, they have none. . . . Such rights as the plaintiffs claim must, in my opinion, necessarily be a nuisance." A further point arose in the course of the case, viz., whether the defendants were estopped by conduct or acquiescence in such a way as to disentitle them to be heard to complain of what had been done. The point, however, was not raised by the pleadings, and the learned judge remarked that he could not deal with it in the absence of pleading raising the point. He pointed out, however, that "any amount of acquiescence could not confer a legal right on the plaintiffs, although it might prevent the defendants getting an injunction," and referred to the case of *Kerr* v. *Corporation of Preston* (1876), 6 Ch. D. 463, on the question of acquiescence.

See also the case of *Stockport District Waterworks Co.* v. *Corporation of Manchester* (1863), cited *ante*, p. 152, in which it was sought to restrain the Corporation of Manchester from supplying water outside their limits; and *Pudsey Coal Gas Co.* v. *Corporation of Bradford* (1873), also cited *ante*, p. 153, in which it was sought to restrain the Corporation of Bradford from supplying gas outside their limits.

Penalties under Highway Act, 1835.

By the Highway Act, 1835 (5 & 6 Will. 4, c. 50), s. 72, it is provided that, "If any person shall . . . or shall cause any injury or damage to be done to the said highway or the hedges, posts, rails, walls, or fences thereof; or shall wilfully obstruct the passage of any footway; or wilfully destroy or injure the surface of any highway . . . every person so offending in any of the cases aforesaid shall for each and every such offence forfeit and pay any sum not exceeding forty shillings, over and above the damages occasioned thereby." In *Hawkins* v. *Robinson* (1873), 37 J. P. 662, a summons was issued under this section of the Highway Act. The complaint was at the instance of the manager of the Aberdare Gas Consumers Company, who were incorporated by Act of Parliament within the then last two years against two of the servants of the Aberdare Old Gas Company, who were a joint stock company, and had been in existence for twenty-two years. The joint stock company obtained the consent of the local board in whom the streets were vested under the Public Health Act, 1848 (11 & 12 Vict. c. 63), s. 68. The act complained of was the cutting of a trench and the laying of a service pipe in the usual way. The surveyor subsequently viewed the spot and found the work done to his satisfaction. The justices dismissed the summons, but stated a case. In the Court of Queen's Bench, COCKBURN, C.J., said: "We think that though the street is under the management of the local board, still the general public are not to be deprived of their general right of passage, and that this proceeding did come within the Act. The local board may, no doubt, under s. 68 of the 11 & 12 Vict. c. 63, authorise the street to be taken up for works authorised by that Act, but this was not an exercise of that power. This case, however, is one in which the magistrate might very properly have inflicted a penalty of one farthing and refused the prosecutor his costs. The case will be remitted, with our opinion that an offence had been committed." In *Wright* v. *Stears*, reported Jl. of G. L., December 14th, 1886, vol. 48, p. 1068, a summons was taken out under s. 72 of the Highway Act, 1835, by the manager of the Pocklington Gas Light and Coke Company (who were established in 1834, and afterwards obtained a provisional order under the Gas and Water Works Facilities Act, 1870) against the contractor and workmen of a rival company having no parliamentary powers, who had obtained a contract for public lighting, and were breaking up streets to lay pipes. A nominal penalty of one shilling was inflicted, with costs.

Penalties under Public Health Act, 1875 (38 & 39 Vict. c. 55).

Sect. 149 of the Public Health Act, 1875, provides that all streets being, or which at any time become highways, repairable by the inhabitants at large within any urban district, and the pavements, stones and other materials thereof, and all buildings, implements and other things provided for the purposes thereof, shall vest in, and be under the control of the urban authority. The same section further enacts that: "Any person who without the consent of the urban authority wilfully displaces or takes up or who injures the pavement stones materials fences or posts of or the trees in any such street shall be liable to a penalty not exceeding five pounds, and to a further penalty not exceeding five shillings for every square foot of pavement stones or other materials so displaced, taken up or injured; he shall also be liable in case of any injury to trees to pay to the local authority such amount of compensation as the court may award."

Injunction to remove pipes laid without authority.

Where water pipes had, without parliamentary authority and without the consent of the owner of the subsoil, been laid in the subsoil of a highway, an injunction to restrain the continuance of the pipes was granted, the owner of the subsoil not being left to his remedy at law, and not being required to establish his right at law. The facts that the soil under the highway was of no value to the owner, and that his motive for applying to the court was not connected with the enjoyment of his land, were held not to be reasons against the granting of the injunction (*Goodson* v. *Richardson* (1874), L. R. 9 Ch. 221; *cf. Selby* v. *Crystal Palace District Gas Co.* (1862), 6 L. T. (N.S.) 790). As to the question of motive, see also *Bradford Corporation* v. *Pickles*, [1895] A. C. 587.

The London and North Western Railway Company constructed gasworks at Crewe primarily for supplying the company's own works. They afforded a supply to all private consumers who desired to obtain it. For the foregoing purposes they laid mains and service pipes in various streets with the assent of the local authority. In 1903 they included in an omnibus Bill, a clause authorising them to exercise the powers of the Gasworks Clauses Act, 1847, with reference to the breaking up of streets. The local authority (who had an electric light provisional order) opposed the Bill. The Bill did not propose to put the company under any of the obligations imposed on statutory gas companies, save as regards the breaking up of streets. A Committee of the House of Lords (Lord Camperdown, chairman) disallowed the clause, Jl. of G. L., May 26th, 1903, p. 529.

Sect. 6.

NOTE.

In 1905 the railway company again tried to obtain the clause but it was again struck out by a House of Commons Committee (Col. Bowles, Chairman), see *Times*, May 16th, 1905.

When companies may be liable for the negligence of contractor and his workmen.

Though a person employing a contractor to do a lawful act is not responsible for the negligence or misconduct of the contractor or his servants in executing that act, yet if the act itself is wrongful—as for example, the breaking up of streets, without parliamentary authority, for the purpose of laying or repairing gas or water pipes—the employer is responsible for the wrong so done by the contractor or his servants, and is liable to third persons who sustain damage from the doing of that wrong (*Ellis* v. *The Sheffield Gas Consumers Co.* (1853), 2 E. & B. 767). When a person employs a contractor to do work in a place where the public are in the habit of passing, which work will, unless precautions are taken, cause danger to the public, an obligation is thrown upon the person who orders the work to be done to see that the necessary precautions are taken; and if the necessary precautions are not taken, he cannot escape liability by seeking to throw the blame on the contractor; and no sound distinction in this respect can be drawn between the case of a public highway and a road which may be, and to the knowledge of the wrongdoer probably will in fact be, used by persons lawfully entitled so to do: *per* BRUCE, J., in *Penny* v. *Wimbledon U. D. C.*, [1898] 2 Q. B. 212, affirmed in Court of Appeal, [1899] 2 Q. B. 72. A merely casual or collateral act of negligence such as the negligent leaving of a pickaxe or the like in the road by a workman employed on the work, would be excepted from the above principle. See *per* A. L. SMITH, L.J., [1899] 2 Q. B. at p. 76. The following other cases illustrate the rule that notwithstanding the employment of a contractor, a duty may remain on a company or local authority employing him, towards the members of the public, to prevent any damage arising from the execution of the work of the undertakers: *Pickard* v. *Smith* (1861), 10 C. B. (N.S.) 470; *Gray* v. *Pullen* (1864), 5 B. & S. 970; *Hardaker* v. *Idle U. D. C.*, [1896] 1 Q. B. 335; *Hughes* v. *Percival* (1883), 8 App. Cas. 443; *Black* v. *Christchurch Finance Co.*, [1894] A. C. 48; *The Snark*, [1899] P. 74; *Hill* v. *Tottenham U. D. C.* (1899), 79 L. T. 495, and *Shoreditch Corporation* v. *Bull* (1904), 68 J. P. 415. The defendants, a telephone company, were lawfully engaged in laying telephone wires along a street. They passed the wires through tubes which they laid in a trench under the level of the pavement. The defendants contracted with a plumber to connect these tubes at the joints with lead and solder to the satisfaction of the defendants' foreman, at the sum of 12*s.* per joint. There was evidence that the work was done by the plumber under the supervision of the defendants' foreman, and that one of their men was assisting him in it. In order to make the connections between the tubes, it was necessary to obtain a flare from a benzoline lamp, which could not be done without the application of heat to the lamp. The lamp used for the purpose was provided with a safety-valve. The plumber, for the purpose of obtaining the necessary flare, dipped the lamp into a caldron of melted solder, which was placed over a fire on the footway for the purpose of the work, which was unprotected by any screen or tent. Dipping the lamp into the solder would have been a proper and useful mode of obtaining the flare, provided the lamp had been in good order. The safety-valve of the lamp not being in working order, as the plumber ought to have known, the lamp exploded, with the result that the plaintiff who was passing on the highway was splashed by the molten solder, and thereby injured. In an action by him against the defendants in the City of London Court for damages in respect of the injuries so occasioned to him, the deputy judge held that the plumber was not doing the work as an independent contractor, but under the defendants' supervision and control, and that the defendants were responsible for his negligence as above mentioned:—*Held* (reversing the judgment of a Divisional Court), that the judgment of the deputy judge was right on the grounds, first, that there was evidence that the defendants and the plumber were jointly engaged in the performance of the work under such circumstances as to render the defendants liable for the negligence of which the plumber had been guilty; and, secondly, that, even if the plumber were an independent contractor, the defendants, having authorised the performance upon a highway of work, which from its nature was likely to involve danger to persons using the highway, were bound to take care that those who executed the work for them did not negligently cause injury to such persons (*Holliday* v. *National Telephone Co.*, [1899] 2 Q. B. 392).

Right of support for gas pipes.

The Gasworks Clauses Acts do not contain any provision (such as that contained in s. 22 of the Waterworks Clauses Act, 1847) with regard to minerals. Gas companies are entitled to support for their pipes when laid with the authority of Parliament. The following case illustrates the distinction in this respect between a parliamentary and a non-parliamentary company. In 1874 a limited gas company, acting without any statutory authority, and without the authority of the landowner, but with the permission of the highway authority, laid pipes under the soil of a road set out as a public highway under an Inclosure Act. In 1878 the company obtained a private Act, which incorporated the Gasworks Clauses Acts, 1847 and 1871. The private Act provided for the dissolution of the limited company, and enacted that all the lands, gasworks, easements, mains, pipes, plant, and apparatus placed by, vested in or which were the property of the limited company immediately before the passing of the Act, should be similarly vested in the statutory company, and the statutory company were empowered to maintain the existing gasworks and to lay down and maintain additional mains and pipes. The defendants, the lessees of minerals under and adjacent to the highway under which the plaintiffs had laid their pipes, had, by working the coal thereunder, let down the soil of the highway and caused injury to the plaintiff's pipes:—*Held*, by the Court of Appeal, in an action by the plaintiffs for damages and an injunction, that the plaintiffs were entitled to support for their pipes, and that the landowner was entitled to compensation for the burden thus imposed upon him; that the plaintiffs could therefore recover damages by action for any injury caused to their pipes, while the owner of the minerals could recover compensation, not by a counterclaim, as was set up in this case, but in an arbitration under the Gasworks Clauses Act for the limitation thus put upon the user of his lands (*Normanton Gas Co.* v. *Pope* (1883), 52 L. J. Q. B. 629). The reason of the decision is thus stated by LINDLEY, L.J.: "The next point is that down to 1878, when the Normanton Gas Act was passed, the plaintiffs had no right to put down the pipes and no right of support, or anything of the kind. That Act, by incorporating the Gasworks Clauses Act, 1847, put the plaintiffs into this position that it either left them where they were, in which case the plaintiffs have no right of support and cannot sue, or it has given them a right of support, in which case I am of opinion they are bound to pay compensation. . . . The right of the plaintiffs to support follows from this—that the Act of 1878 gives them a right to keep these mains where they are, and to use and maintain them; and the Gasworks Clauses Act, 1871, imposes upon them the obligation of supplying gas as long as the mains are down. That comes to this, that the mains are lawfully where they are, and no one has any right to injure them. The defendants have injured them, and have thus done a wrong, and have infringed the plaintiffs' rights. It seems to me that the right of support is a necessary consequence of that which the plaintiffs are empowered and compelled to do. The question is whether the Act of 1878 and the incorporated Acts apply to mains laid down before that Act was passed. When we come to criticise the Act of 1878, it is difficult to say that it applies in words to the mains previously laid down. We meet with this difficulty that the Act is ridiculous unless it does. It is impossible to construe these Acts rationally, unless they apply to the old as well as to the new works" (32 W. R., at p. 137). See also *Benfieldside L. B.* v. *Consett Iron Co.* (1887), 3 Ex. D. 54. Where an express statutory right is given to make and maintain something requiring support, the statute, in the absence of a controlling context, must be taken to mean that the right of support shall accompany the right to make and maintain—that if the Act does not provide any means of obtaining compensation for the loss occasioned to the landowner by his having to leave support, this is a strong argument against the legislature having intended to give such right; but if it contains provisions under which compensation can be obtained, it needs a strong context to show that the right to support is not given (*L. & N. W. Rail. Co.* v. *Evans*, [1893] 1 Ch. 16; see also *Glamorganshire Canal Navigation* v. *Nixon's Navigation Co., Ltd.* (1902), 85 L. T. 53; *Clippens Oil Co., Ltd.*

Sect. 6.

NOTE.

v. *Edinborough and District Water Trustees,* [1904] A. C. 64; *cf. Metropolitan Board of Works* v. *Metropolitan Rail. Co.* (1869), L. R. 4 C. P. 192; and Public Health Act, 1875 (Support of Sewers) Amendment Act, 1883 (46 & 47 Vict. c. 37). This Act now regulates the vertical and lateral support of "sanitary works" as defined by s. 2. The definition includes works of lighting. See further as to the provisions of the Act, *post,* p. 939.

A gas company entered into an agreement with the proprietor of certain lands to supply his mansion house with gas, and laid down a branch line of pipes through his lands, it being part of the agreement that the pipes should belong to the company. The proprietor subsequently let the shale in his lands to an oil company, which became bound to pay him for surface and other damage caused by their operations, and to relieve him of all claims against him on account thereof. The result of the operations of the oil company was to cause a subsidence of the ground, which damaged the pipes belonging to the gas company. The gas company, with consent of the proprietor for his right and interest, commenced an action against the oil company, praying the sheriff to ordain them to renew, repair, and relay the pipes. The pursuers did not aver that the defenders had worked the minerals in an improper manner:—*Held,* that the defenders were not liable for damage caused by the subsidence, as it was not averred that they had worked the mineral improperly, and as they were under no obligation to the gas company, express or implied, to support the pipes (*Mid and East Calder Gaslight Co.* v. *Oakbank Oil Co.* (1891), 18 Ct. Sess. Cas., 4th series, 788).

Where no provision for compensation, strong argument that rights not taken away or interfered with.

It is a sound canon of construction that an intention to take away property without compensation should not be imputed to a legislature unless it be expressed in unequivocal terms (*Commissioners of Public Works* (*Cape Colony*) v. *Logan,* [1903] A. C. 355, following *Western Counties Rail. Co.* v. *Windsor and Annapolis Rail. Co.* (1882), 7 App. Cas. 178). "The Court has always held that the absence of a provision for compensation to a person whose legal rights are interfered with places a great difficulty in the way of those who contend that such rights are taken away" (*per* NORTH, J., in *Jordeson* v. *Sutton, Southcoates and Drypool Gas Co.,* [1898] 2 Ch. at p. 621). And see *per* Lord CAIRNS in *Hammersmith and City Rail.* v. *Brand* (1869) L. R. 4 H. L. at pp. 215—6, and see *per* BOWEN, L.J., in *London and North Western Rail. Co.* v. *Evans,* [1893] 1 Ch. at p. 28, and *per* Lord HERSCHELL, L.C., in *Bradford Corporation* v. *Pickles,* [1895] 1 Ch. at p. 152.

Injury to pipes by steam-rollers.

A gas company laid down pipes under the surface of certain streets, as they were bound by statute to do, for the purpose of supplying gas to light the streets and houses in the streets. The streets were vested in the defendants, the vestry of the parish, by certain statutes which gave them the authority of the surveyor of highways, and with the duty to repair, but without prescribing any particular mode of repair. The defendants used steam-rollers for the repair of the streets, as being a mode of repair most advantageous to both the ratepayers and the public, but the rollers they used were so heavy as to frequently injure the plaintiffs' pipes, though the pipes were sufficiently below the surface not to have been injured by the ordinary mode of repair if such rollers had not been used:—*Held,* that the plaintiffs were entitled not only to recover damages for the injury which had been done, but also to have an injunction to restrain the defendants from using steam-rollers in such a way as to injure the pipes of the plaintiffs (*Gaslight and Coke Co.* v. *Vestry of St. Mary Abbotts, Kensington* (1885), 15 Q. B. D. 1). A similar action was successfully brought against the Vestry of St. George's, Hanover Square. The jury, in answer to questions put by the judge at the trial, found "that all the pipes were broken by the defendants' roller; that the use of such roller was not reasonable and proper under the circumstances; that it was not used with sufficient care; and that the plaintiffs' pipes were reasonably made and laid." See Jl. of G. L. for April 26th, May 3rd, and December 6th, 1887, vol. 49, pp. 765, 811, and vol. 50, p. 1018. The Court of Appeal in Ireland granted an injunction "against using any steam-roller on any road under which the gas pipes of the plaintiffs have been laid so as to break or injure any pipes then properly laid under such road, regard being had to what, at the time of the laying of such pipes, was the ordinary traffic, and reasonable means of repairing and maintaining the road" (*Alliance and Dublin Consumers Gas Co.* v. *Dublin C. C.*, [1901] 1 I. R. 492, 507).

In a case in the county court decided at Watford by Sir ALFRED MARTEN, K.C., it appeared that the defendant used along the public highways a traction engine weighing about thirteen tons, drawing three trucks, and sometimes two, each weighing from three to four tons without the load, the average load being between five and six tons for each truck. It further appeared that these caused breakages in the pipes of the water company which were laid some at a depth of 3 ft. 6 in., others at 3 ft., and another at the depth of 2 ft. 9 in. For the defendant it was contended that the engine was duly licensed, and that he was using the highway in a lawful manner under the Locomotives Act, 1898, ss. 1, 6 and 7. His Honour gave judgment for the plaintiff company for the amount of the claim (*Colne Valley Water Co.* v. *Bretherton*, Jl. of G. L., May 20th, 1902, p. 1,364).

See also judgment of his Honour Sir HORATIO LOYD at the Wrexham County Court in *Wrexham Public Hall Co.* v. *Wrexham Gas Co.*, as reported in Jl. of G. L., June 23rd, 1903, p. 907. In that case he held that a depth of 18 in. was sufficient, having regard to the time when the pipes were originally laid, and laid it down that the question to be decided was " whether the pipes were laid at a sufficient depth, having regard to the state of the traffic upon the road at the time they were put down. Less than 18 in. he considered insufficient."

A local authority being the owners of the water undertaking in their district, brought an action against the owner of a traction engine for damage caused by the breaking of a water main. The pipes had been laid some thirty years. They were not, judged by the standard of to-day, of the best construction, being cast in such a way that on one side of the elliptical tube the middle was considerably thinner than on the other. They were laid in the soil without cement or other special preparation. They were laid at a depth which left a space of about 20 in. between the crown of the pipe and the crown of the road. Though they had been laid so long they were not corroded or decayed, and were substantially still fit to withstand the pressure of ordinary traffic. The defendants contended that engines such as that complained of had been in use on the road for twenty years, and that it was the duty of the plaintiffs as road authority to adapt the road from time to time to the various kinds of traffic, and relied on *Attorney-General* v. *Scott*, [1905] 2 K. B. 160. The county court judge found the following facts:—(1) No negligence on the part of the defendant or his employees; (2) the pipes were sufficiently strong to withstand the pressure of ordinary traffic; (3) the defendant's engine was by reason of its weight likely to damage pipes constructed and laid in the manner in which the pipes in question were constructed and laid; (4) he also found that there was no negligence on the part of the plaintiffs in their duty as the road authority. The county court judge considered that the case was governed by the decision in *Gaslight and Coke Co.* v. *St. Mary Abbotts*, and gave judgment for the plaintiffs. The Divisional Court, on appeal, affirmed this judgment (*Chichester Corporation* v. *Foster*, [1906] 1 K. B. 167).

A service pipe having been broken by a traction engine or steam-roller, the water company repaired the pipe and brought an action in the county court to recover the expense from the owner. It appeared that the pipe was originally laid at a depth of 2 ft. 6 in. in accordance with the company's rules, and that there had been no negligence on the part of the company. Judgment was given for the company for the amount claimed (*Leatherhead Water Co.* v. *Sears*, Jl. of G. L., June 9th, 1903, p. 679).

A gas company having proposed to lay a main 2 ft. 5 in. below the level of the roadway, the local authority, under s. 9, required them to lay it at 3 ft., and for non-compliance the company were summoned before a magistrate. Much expert evidence was given in the course of the hearing on both sides as to the proper depth at which a gas main would be safe from

Sect. 6.

NOTE.

injury by steam-rollers. In the result the magistrate decided that 2 ft. 5 in. was a sufficient depth, and dismissed the summons with 10 guineas costs (*Dublin County Council* v. *Alliance and Dublin Consumers Gas Co.*, Jl. of G. L., Oct. 27th, 1903, p. 233).

A somewhat similar case arose between the same parties when, after many adjournments, and after hearing the evidence of expert witnesses, the magistrate decided that a minimum depth of 2 ft. was sufficient for the main proposed to be laid by the company, and that a minimum depth of nine inches was sufficient in the case of the service pipes (*Alliance and Dublin Consumers Gas Co.* v. *Dublin County Council*, Jl. of G. L., May 24th, 1904, p. 518; June 28th, 1904, p. 971; July 12th, 1904, p. 120; October 25th, 1904, p. 271).

Both the foregoing cases were decided by the same stipendiary magistrate Mr. DRURY, at Kingstown Police Court. Gas mains are made of cast iron, and service pipes of wrought iron, which necessarily bear a great weight (Jl. of G. L., Oct. 18th, 1904, p. 158).

In the session of 1904 there were two instances where, at the instance of road authorities, a clause was inserted requiring pipes to be laid at a depth of not less than 2 ft., namely: Bishop's Stortford Gas Act, ss. 52 (ii.), 54 (ii.), and Harlow and Sawbridgeworth Gas Act, s. 49 (ii.). The Barnard Castle Act of the same session, s. 52, enacted that the road authority should not be answerable for damage caused to the pipes by steam-rolling the highways unless the pipes damaged are laid 2 ft. or more below the surface. And in the Chippenham Act. s. 88 (ii.) a similar provision is made, the depth being 2 ft. 6 in. instead of 2 ft.

The Highways and Locomotives Act, 1878 (41 & 42 Vict. c. 77), provides by s. 32, that "A county authority may . . . make . . . byelaws for granting annual licences to locomotives used within their county." By a byelaw made by the London County Council under that section it was provided that: "No locomotive shall be used on any highway within the county of London until an annual licence for the use of the same shall have been obtained from the council by the owner thereof":—*Held*, that a steam-roller which was not at the time being employed in road-making, but was merely passing through the county to a destination outside, was being "used within the county" within the meaning of the section and the byelaw (*London C. C.* v. *Wood*, [1897] 2 Q. B. 482). (S. 32 of the Act of 1878, above referred to, is repealed by the Locomotives Act, 1898 (61 & 62 Vict. c. 29), *q.v.*). A steam-roller, though lawfully on the highway, may be so used as to be a nuisance, in which case the owners are liable for damage caused thereby, though they have not been guilty of any negligence. It is a question for the jury in each case whether the steam-roller was or was not a nuisance on the occasion complained of. This action was brought to recover damages for injuries to the horse and cart of the plaintiff, through the horse taking fright at a steam-roller which emitted puffs of steam as it was being driven along the highway. The jury found that the steam-roller was a nuisance to the highway used as it was, and in the condition it was, on the occasion. The plaintiff recovered damages (*Jeffrey* v. *St. Pancras Vestry* (1894), 10 The Reports, 554; 63 L. J. Q. B. 618). Where a heavy steam-roller injured a gas main whereby gas escaped into a house and caused injury, it was held that there was evidence of negligence against the local authority (*Driscoll* v. *Poplar Board of Works* (1897), 14 T. L. R. 99).

Agreement in ignorance of rights under general Acts

The Metropolitan Railway Act, 1854, s. 108, provided that water and gas companies might enter upon the railway lands and premises for the purpose of laying any mains or pipes under or over the railway, etc. In 1855 the railway and the gas company entered into an agreement by which the former gave leave, on certain terms, for a gas main to be carried over a bridge at Vine Street. In 1892 the gas company sought to set this agreement aside on the ground that it was entered into by both parties in ignorance of the provisions on the subject contained in the Railways Clauses Act. WILLS, J., refused to set aside the agreement (*Gaslight and Coke Co.* v. *Metropolitan Rail. Co.* (1892), 9 T. L. R. 98).

Sect. 6.

Note.

Parliamentary authority to disturb the pipes of gas or water companies in certain cases.

By s. 153 of the Public Health Act, 1875, it is enacted, " Where for any purpose of this Act any urban authority deem it necessary to raise sink or otherwise alter the situation of any water or gas pipes mains plugs or other waterworks or gasworks laid in or under any street, they may by notice in writing require the owner of the pipes mains plugs or works to raise sink or otherwise alter the situation of the same in such manner and within such reasonable time as is specified in the notice; the expenses of or connected with any such alteration shall be paid by the urban authority; and if such notice is not complied with the urban authority may themselves make the alteration required: Provided that no such alteration shall be required or made which will permanently injure any such pipes mains plugs or works or prevent the water or gas from flowing as freely and conveniently as usual; and that where under any local Act of Parliament the expenses of or connected with the raising sinking or otherwise altering the situation of any water or gas pipes mains plugs or other waterworks or gasworks, are directed to be borne by the owner of such pipes or works, his liability in that respect shall continue in the same manner and under the same conditions in all respects as if this Act had not been passed." See a corresponding enactment in the Burgh Police (Scotland) Act, 1892 (55 & 56 Vict. c. 55), s. 149, as amended by the Burgh Police (Scotland) Act, 1903, s. 104, and Sched. See *post*, p. 980.

Railways Clauses Act, 1845.

By the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), ss. 18—23, a railway company, for the purposes of its construction, may alter the position of the mains and pipes of a gas company, under the superintendence of the company, after giving forty-eight hours' notice, but they cannot displace the pipes until they have laid down others for continuing the supply to the satisfaction of the engineer of the company, and in accordance with the Act of the company. They must also leave a minimum covering of eighteen inches of soil over pipes of the company when altering the level of any roads.

The railway company must make good any damage and make full compensation for any injury, and if they cross any pipes of the company must make a culvert so that the pipes may be accessible for repairs. If in doing any of these works the supply of gas is interrupted, the railway company are liable to a penalty of £20 for each day of such interruption; but the penalty is not paid to the gas company, but to the overseers of the poor of the parish in which the obstruction occurs.

By the Manchester and Liverpool Express Railway Act, 1902 (2 Edw. 7, c. xxiv.), it is provided that the provisions of ss. 18—23 of the Railways Clauses Consolidation Act, 1845, shall for the purposes of that Act extend and apply to the water and gas mains, pipes, and apparatus of any local authority. See s. 7.

In making a railway the levels shown on the deposited plans cannot be deviated to a greater extent than five feet (or in towns, villages, or land continuously built upon, two feet), without the previous consent of owners, occupiers, and others, including gas companies affected by such deviation. See ss. 11 and 12 of 8 & 9 Vict. c. 20; and *cf.* s. 4 of 26 & 27 Vict. c. 92.

Towns Improvement Act, 1847.

Under the Towns Improvement Clauses Act, 1847 (10 & 11 Vict. c. 34), s. 13, the commissioners are to prepare a plan of their district, upon which is to be marked the course of sewers, water and gas pipes, etc., within their district. They may also, by ss. 61 and 62, require the situation of water and gas pipes laid in the streets to be altered, but the expenses, also compensation for any damage done, are to be paid by the commissioners; and the works are not to be permanently injured, or the water or gas prevented from flowing as freely and conveniently as before. This Act extends only to towns or districts in England or Ireland which have by special Act incorporated the same (s. 1); but certain parts of it (not including s. 13) are incorporated with the Public Health Act, 1875.

Telegraph Act, 1863.

Under the powers conferred by the Telegraph Act, 1863 (26 & 27 Vict. c. 112), on companies, they may by s. 6 break up streets, alter the position of

Sect. 6.

NOTE.

any pipe not being a main for the supply of gas; but this power is regulated by s. 8, which provides that the work shall be done with as little detriment or inconvenience as possible, that they give twenty-four hours' notice, and that the work be done under the superintendence and to the reasonable satisfaction of the gas company. The costs of superintendence are to be paid by the telegraph company. In return for these privileges the gas company is also empowered to alter the works of the telegraph company *mutatis mutandis* under the like restrictions. See further provisions in the Telegraph Act, 1878 (41 & 42 Vict. c. 76), ss. 7, 8. The powers of this Act are now exercised by the Postmaster-General under the Telegraph Acts, 1863 to 1897.

Tramways Act, 1870.

By s. 30 of the Tramways Act, 1870 (33 & 34 Vict. c. 78), a tramway company may, for the purpose of their undertaking, alter the position of gas or water pipes, subject to the following restrictions:—(1) Seven days' notice to be given to the company whose mains or pipes will be interfered with, and the company may call upon the promoters to make such alterations of the pipes as will insure their safety, any difference as to the necessity for such alteration to be settled by a person nominated by the Board of Trade. (2) Before displacing any mains, pipes, plugs, etc., of the company, the tramway promoters shall, at their own expense, provide other mains, pipes, etc., to the satisfaction of the engineer or surveyor of the company. (3) The tramway promoters shall not lay down any such pipes contrary to the regulations of any Act of Parliament relating to such water or gas company. (4) The promoters to make good any damage. (5) The tramway promoters to be liable to a penalty, not exceeding £20, for every day during which they interrupt the supply of water or gas.

See as to notice to be given under this section, *Hastings Tramways Co.* v. *Hastings and St. Leonards Gas Co.*, [1906] 2 Ch. 578.

By s. 32 of the Act it is further provided as follows:—

> Nothing in this Act shall take away or abridge any power to open or break up any road along or across which any tramway is laid, or any other power vested in any local authority or road authority for any of the purposes for which such authority is respectively constituted, or in any company, body, or person for the purpose of laying down, repairing, altering, or removing any pipe for the supply of gas or water, or any tubes, wires, or apparatus for telegraphic or other purposes, but in the exercise of such power every such local authority, road authority, company body, or person shall be subject to the following restrictions; (that is to say,)
>
> 1. They shall cause as little detriment or inconvenience to the promoters and lessees as circumstances admit:
>
> 2. Before they commence any work whereby the traffic on the tramway will be interrupted they shall (except in cases of urgency, in which cases no notice shall be necessary) give to the promoters and lessees, if there be any, notice of their intention to commence such work, specifying the time at which they will begin to do so, such notice to be given eighteen hours at least before the commencement of the work:
>
> 3. They shall not be liable to pay to the promoters or lessees any compensation for injury done to the tramway by the execution of such work, or for loss of traffic occasioned thereby, or for the reasonable exercise of the powers so vested in them as aforesaid:
>
> 4. Whenever for the purpose of enabling them to execute such work the local authority or the road authority shall so require, the promoters or lessees shall either stop traffic on the tramway to which the notice shall refer, where it would otherwise interfere with such work, or shore up and secure the same at their own risk and cost during the execution of the work there: provided that such work shall always be completed by the local authority or the road authority, as the case may be, with all reasonable expedition:

> 5. Any company, body, or person shall not execute such work so far as it immediately affects the tramway except under the superintendence of the promoters, unless they refuse or neglect to give such superintendence at the time specified in the notice for the commencement of the work or discontinue the same during the progress of the work; and they shall execute such work at their own expense, and to the reasonable satisfaction of the promoters: provided that any additional expense imposed upon them by reason of the existence of the tramway in any road or place where any such mains, pipes, tubes, wires or apparatus shall have been laid before the construction of such tramway shall be borne by the promoters.

It has recently been held that the proviso to sub-s. (5) of this section does not apply in the case of work which is not such as to interrupt the tramway traffic (*In re An Arbitration between the Bristol Gas Co. and the Bristol Tramways and Carriage Co., Ltd.*, [1910] 1 K. B. 114).

The following further points were also decided in the same case, viz.:—That an interruption of the tramway traffic within the meaning of s. 32 (2) of the Act of 1870 was caused (1) when the tramway company, for the purpose of enabling the gas company to repair a fractured main which was causing a serious escape of gas, were deprived of the use of one of their lines, and had to conduct their traffic, both up and down, on one line only; (2) when tramcars were slowed down or brought to a standstill for a sufficient time to enable workmen of the gas company to get out of the trenches under or near the tram lines where they were at work on the pipes of the gas company; that the additional expense of the following works was recoverable from the promoters under s. 32 (5) of the Act of 1870:—(*a*) connecting a new service pipe laid for the first time since the construction of the tramway with a main laid before the construction of the tramway, such connection being an alteration of the main; (*b*) repairing, altering or removing a service pipe or a main laid before the tramway was constructed; but that the additional expense of the following works was not recoverable: (*c*) laying down a new service pipe for the first time since the construction of the tramway; (*d*) repairing, altering or removing a service pipe laid since the tramway was constructed, the main having been laid before the construction of the tramway.

By s. 33 of the Act it is further provided as follows:—

> If any difference arises between the promoters or lessees on the one hand and any local authority or road authority, or any gas or water company, or any company, body, or person to whom any sewer, drain, tube, wires, or apparatus for telegraphic or other purposes may belong, or any other company, on the other hand, with respect to any interference or control exercised, or claimed to be exercised, by them or him, or on their or his behalf, or by the promoters or lessees by virtue of this Act, in relation to any tramway or work, or in relation to any work or proceeding of the local authority, road authority, body, company, or person, or with respect to the propriety of or the mode of execution of any work relating to any tramway, or with respect to the amount of any compensation to be made by or to the promoters or lessees, or on the question whether any work is such as ought reasonably to satisfy the local authority, road authority, body, company, or person concerned, or with respect to any other subject or thing regulated by or comprised in this act, the matter in difference shall (unless otherwise specially provided by this act), be settled by an engineer or other fit person nominated as referee by the board of trade on the application of either party, and the expenses of the reference shall be borne and paid as the referee directs.

As to what is a "difference" within the meaning of this section reference might be made to *R.* v. *Croydon and Norwood Tramways Co.* (1887), 18 Q. B. D. 39; *Bristol Trams and Carriage Co.* v. *Bristol* (*Mayor of*) (1890), 25 Q. B. D. 427; *Norwich Corporation* v. *Norwich Electric Tramways*, [1906] 2 K. B. 119; *R.* v. *Garrett and Hammersmith Borough Council* (1909), 73 J. P. 188.

The provision for arbitration contained in the section ousts the jurisdiction of the High Court with regard to differences coming within the section, and the objection may be taken in the Court of Appeal, though not taken in the High Court (*Norwich Corporation* v. *Norwich Electric Tramways*, *supra*).

Sect. 6.

NOTE.

The Ilford District Council were authorised by provisional order, duly confirmed, to lay, and did lay, *inter alia*, a tramway extending two and a half miles along certain streets. Under these streets a gas company had laid, under statutory authority, a gas main. From this main service pipes led off to houses on either side; but for the greater part the houses had not been built or were in course of building. An intending consumer having applied for a service, the gas company encountered an obstruction by reason of the bed of concrete on which the tramway was laid. The gas company therefore, under s. 32, gave notice to the tramway company requiring them to alter the position of the whole of the gas mains along the route referred to, to such an extent and in such a manner that the tramway should not endanger such mains or interfere with the supply of gas. The Board of Trade appointed an arbitrator who awarded as follows:—"I award and adjudge that the gas mains laid down before the commencement of Tramway No. 12 in Ley Street and the termination of the same tramway in Cranbrook Road shall be lowered to a sufficient extent to admit of service pipes between this main and the houses on the side of the tramway remote from the main, being laid so as to enable these service pipes to be laid horizontally under the bottom of the trench in which the electric conduits are placed without having to cut through any concrete which may be used under the bottom of such trench. In those cases where the position of the gas main is underneath the tramway, or so close to it that access to the gas main could not be conveniently effected without interfering with the tramway, the gas main shall be moved laterally to such a distance as to enable such access to be obtained without interference with the concrete trench under the tramway." On a motion to set aside or refer back this award to the arbitrator, it was held that the arbitrator had not in any way exceeded his jurisdiction (*Ilford Urban District Council* v. *Ilford Gas Co.* (1903), 67 J. P. 239).

For a report of an arbitration between the East London Waterworks Company and the West Ham Gas Company, on the one hand, and the West Ham Corporation on the other, with respect to a dispute regarding the necessity for altering gas and water mains and services in consequence of the laying down of a tramway authorised by the corporation's Act of 1900, see Jl. of G. L., August 9th, 1904, p. 410; August 16th, 1904, p. 480.

Notwithstanding the provisions of ss. 30 and 32 of the Tramways Act, 1870, the point has repeatedly been raised by gas and water companies whether the provisions of those sections afford adequate protection for their mains and pipes, and the contention on their behalf has been that the companies ought to be allowed, after the service of the notice, to elect to do the work themselves and to recover the cost from the tramway undertakers. The Court of Referees have taken the view that ss. 30—32 afford sufficient protection: Lea Bridge, Leyton and Walthamstow Tramways Bill on the petition of the East London Waterworks Company, 3 C. & R. 72; Scarborough Tramways Bill, on the opposition of the Scarborough Gas Company, 2 Saund. & Aust., 145; Camberwell and Dulwich Tramways Bill, 1904, on the opposition of the South Metropolitan Gas Company, Jl. of G. L., March 29th, 1904, p. 850. There are, nevertheless, many precedents in which the clause has been inserted: Wrexham District Tramways Order, 1899 (confirmed by 62 & 63 Vict. c. cclxxiv.), s. 12; Croydon Corporation Act, 1900, s. 53; Bexley Tramways Act, 1901, s. 33; Bournemouth Corporation Act, 1901, s. 6; London County Council (Tramways and Improvements) Act, 1901, ss. 48 and 49; London United Tramways Act, 1902, s. 17; London County Council (Subways and Tramways) Act, 1902, s. 21; South Shields Corporation Act, 1903, s. 31; Preston, Chorley and Horwick Tramways Act, 1903, s. 39 (3); Folkestone, Sandgate and Hythe Tramways Act, 1906, s. 81; Manchester Corporation Tramways Act, 1907, s. 16; Oxford and District Tramways Act, 1907, s. 66.

Metropolitan Acts.

In various Metropolitan Acts special powers have been inserted authorising alteration of gas and water pipes. See *e.g.*, the Metropolitan Board of Works (Various Powers) Acts, 1887 and 1888, ss. 18 and 21 respectively, and the London County Council (General Powers) Acts, 1892, 1898, and 1899, ss. 17, 19, and 21 respectively. Now, by the London Government Act, 1899 (62 & 63 Vict. c. 14), as regards the area within the administrative county of London, the duties of the vestries as road authority devolve upon the metropolitan borough councils. By that Act it is provided:

"6.—(1.) As from the appointed day the power and duty of maintaining any main road existing at the passing of this Act within a borough shall be transferred to the borough council, and the road shall vest in the borough council and shall cease to be a main road.

"(2.) Where a highway in a borough is repairable by the London County Council by reason of its being the roadway or footway of a bridge, embankment, or otherwise, the borough council shall, if so required by the county council, undertake the maintenance and repair thereof in consideration of such annual payment by the county council as may from time to time be agreed on, or in default of agreement be finally determined by the Local Government Board; and for the purpose of the undertaking the borough council shall have the same powers and be subject to the same duties and liabilities as if the highway were vested in them."

The Metropolis Management Act, 1855, s. 98, enacts that "It shall be lawful for every vestry and district board from time to time to cause all or any of the streets within their parish or district, or any part thereof respectively, to be paved or repaired, when and as often and in such form and manner and with such materials as such vestry or board think fit, and to cause the ground or soil thereof to be raised or lowered, and the course of the channels running in, into, or through the same to be turned or altered, in such manner as they think proper, and to alter the position of any mains or pipes in or under such street, such alteration to be made subject to the approval of the engineer of the company to which such mains or pipes belong." See the note to s. 47, *post*, p. 218.

As to Kensington see L. C. C. (General Powers) Act, 1903 (3 Edw. 7, c. clxxxvii.), ss. 41, 42.

A water company in exercise of statutory powers laid down pipes under the surface of a street, and the highway authority of the district afterwards, in exercise of the powers given by s. 98 of the Metropolis Management Act, 1855, proposed to lower the surface of the street, and to do so without altering or disturbing the position of the pipes, but so as to leave only a few inches of soil over them. In an action by the water company to restrain the highway authority from lowering the surface of the street without at the same time lowering the pipes of the company to a corresponding depth under the new surface:—*Held*, that s. 98 of the Act of 1855 did not impose upon the highway authority when exercising the power thereby given to them of altering the level of a street, any express or implied duty to exercise also at their own expense the power by the same section given of altering the position of the pipes thereunder, for the benefit of the water company, in a case where the highway authority did not require for their own purposes to interfere with such pipes (*Southwark and Vauxhall Waterworks Co.* v. *Wandsworth Board of Works*, [1898] 2 Ch. 603). As to the breaking up of streets by companies for the purpose of laying gas or water pipes in the metropolis, see further the Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), ss. 109—115.

Electric Lighting Act.

Under the Electric Lighting Act, 1882 (45 & 46 Vict. c. 56), s. 12, the provisions of the Gasworks Clauses Act, 1847, with respect to the breaking up of streets and various other powers of that Act and of the Gasworks Clauses Act, 1871, are incorporated. By s. 15 the undertakers are authorised under certain conditions to alter the position of any pipes or wires under streets authorised to be broken up. Before the passing of the Electric Lighting (Clauses) Act, 1899 (62 & 63 Vict. c. 19), the Board of Trade inserted in each Provisional Order detailed provisions upon this subject. Sections 17 and 18 of the schedule to this Act of 1899 now contain these provisions. The first-mentioned of these sections provides that electric lighting undertakers may, subject to the provisions therein set out, alter the position of pipes which may interfere with the exercise of their powers; and the section also makes provision for the alteration by any body or person of the position of electric lines or works which may interfere with the exercise of any powers vested in that body or person. Section 18 provides that where electric lighting undertakers require to dig trenches for electric lines (other than service lines) or other works near to which any . . . watercourse . . . or work of a local authority, or any main, pipe . . . or other work of a gas . . . or water company has

Sect. 6.

NOTE.

been placed, or where any gas or water company require to dig a trench for laying down or constructing new mains or pipes (other than service pipes) near to which lines or works of electric lighting undertakers have been placed, the undertakers or gas or water company (as the case may be) shall, unless it is otherwise agreed, or in cases of sudden emergency, give not less than three days' notice to the local authority or the gas company, water company or electric lighting company (as the case may be) before commencing to dig the trench; and the section makes provision as to superintendence of the work and compliance with reasonable requirements for protecting from injury such watercourses . . . mains, pipes . . . electric lines, etc., and for securing access thereto, and imposes an obligation to repair any damage which may be done. The section makes further provision as to the undermining of pipes, etc., the insulation of electric lines, the determination of differences and the payment of compensation on non-compliance with the provisions of the section.

Light Railways Act, 1896.

In Orders under the Light Railways Act, 1896 (59 & 60 Vict. c. 48), special provisions may be inserted for the protection of the pipes of gas and water companies, and power may be given to alter the position of the same under prescribed conditions and restrictions. (See *e.g.*, the Barking and Beckton Light Railways Order, 1899, printed as a Parliamentary paper, No. C 9211 of 1899.) A special clause is apparently now inserted in every Order. See *e.g.* clause 36 of Dartford Light Railways Order, 1901. See also the Burgh Police (Scotland) Act, 1892, s. 149, *post*, p. 980.

"Doing as little damage as may be."

As to the meaning of the words "doing as little damage as may be," see *R.* v. *East and West India Docks* (1853) 2 E. & B. 466, and *Fenwick* v. *East London Rail. Co.* (1875), L. R. 20 Eq. 544. The corporation of a town were authorised to carry on gasworks to light the town. The profits were to go partly in improving the town and partly in reducing the water rates :—*Held*, that the corporation were bound to make compensation for an injury arising from the negligence of their servants in laying down gas pipes (*Scott* v. *Mayor of Manchester* (1857), 26 L. J. Ex. 132, 406). The servant of the defendant company, whilst breaking up a concrete pavement for the purposes of the company's undertaking and within the limits of their special Act, accidentally caused a piece of concrete to fly up and break a window in a neighbouring house :—*Held*, that the company was liable for the damage so done (*Hornby* v. *Liverpool United Gas Co.* (1883), 47 J. P. 231).

If by a reasonable exercise of powers given by statute damage can be prevented, it is "negligence" on the part of the undertakers not to make such reasonable exercise of their powers (*Geddis* v. *Bann Reservoir Proprietors* (1878), 3 App. Cas. 430; *Baroda* (*Gaekwar of*) v. *Gandhi Kachrabhair Kasturchand* (1903), L. R. 30 Indian App. 60, and other cases cited, *post*, p. 390; *cf. East Fremantle Corporation* v. *Annois*, [1902] A. C. 213; and *Ash* v. *Great Northern, Piccadilly, and Brompton Rail. Co.* (1903), 67 J. P. 417.

Not to enter on private land without consent.

7. Provided always, that nothing herein shall authorise or empower the undertakers to lay down or place any pipe or other works into, through, or against any building, or in any land, not dedicated to public use, without the consent of the owners and occupiers thereof; except that the undertakers may at any time enter upon and lay or place any new pipe in the place of an existing pipe in any land wherein any pipe hath been already lawfully laid down or placed in pursuance of this or the special Act or any other Act of Parliament, and may repair or alter any pipe so laid down.

Questions as to what is private land.

A road passed alongside the plaintiff's premises and over certain arches occupied by him as cellars. The defendants, a company constituted under a local Act incorporating the general Act of 1847, in opening and breaking up the soil of the road for the purpose of laying down gas pipes damaged the arches :—*Held*, that the arches were buildings within the above section, and that the defendants could not justify breaking through them (*Thompson* v. *Sunderland Gas Co.* (1877), 2 Ex. D. 429).

As to railway bridges, see the cases cited in the note under s. 6, *ante*, p. 163; and see *Taff Vale Rail. Co.* v. *Pontypridd Urban District Council*, *post*, p. 182.

A gas company laid down main pipes between two villages on the seashore in an open tract of land above mean high-water mark, which belonged to the owner of the enclosed land fronting the shore. The inhabitants of the villages had always gone to and fro between them along the shore, and at high-water passed over this piece of land as they chose, and in accordance with the tide, but by no defined track. The owners brought an action for a mandatory injunction to compel the company to remove the pipes:—*Held*, that the tract of land in question was not a "street" within the definition in s. 3 of the Gasworks Clauses Act, 1847 (*Maddock* v. *Wallasey L. B.* (1886), 55 L. J. Q. B. 267). See also *Curtis* v. *Embery* (1872), L. R. 7 Ex. 369, and *Bellamy* v. *Liverpool United Gaslight Co.*, cited in the notes to s. 36 of Act of 1871, *post*, p. 241.

An urban authority, and also a rural authority on being invested with urban powers, may require streets not repairable by the inhabitants at large to be provided (*inter alia*) with proper means for lighting, under s. 150 of the Public Health Act, 1875, and may afterwards declare them public (s. 152). See further as to such streets the Public Health Acts Amendment Act, 1890 (53 & 54 Vict. c. 59), s. 41, and the Private Streets Works Act, 1892 (55 & 56 Vict. c. 57), s. 25. These Acts are adoptive.

Where water pipes had, without any parliamentary authority and without the consent of the owner of the soil, been laid in the soil of a highway, an injunction to restrain the continuance of the pipes was granted; the owner of the soil not being left to his remedy at law, and not being required to establish his right at law; and the facts that the soil under the highway was of no value to the owner, and that his motive for applying to the court was not connected with the enjoyment of his land, and was to cripple the operations of a rival water company, were held not to be reasons against the granting of the injunction (*Goodson* v. *Richardson* (1874), L. R. 9 Ch. 221). In this case the court refused to leave the plaintiff to his remedy at law (*Deere* v. *Guest* (1836), 1 My. & C. 516), because (as put by MELLISH, L.J.) "it is extremely doubtful whether he could remove the pipes without rendering himself subject to being indicted by the highway board; and in my opinion he is entitled to be relieved from that difficulty."

The owners of a house had had for many years a supply of water by pipes passing through the adjoining land under circumstances which in the view of the court created an easement. The owner of part of the adjoining land proceeded to build a house over part of the line of pipes:—*Held*, that the owners of the house had a right to go on the adjoining land and repair the pipes when necessary, and that by the building of the house their means of access to the pipes would be materially interfered with and rendered more expensive; and an injunction was granted to restrain the building of the house (*Goodhart* v. *Hyett* (1883), 25 Ch. D. 182).

For a case in which an old ten foot road had been widened to thirty feet by the owners of adjoining land on either side, and in which questions arose as to dedication, liability to repair, and responsibility for accident, see *Owen* v. *De Winton* (1894), 10 T. L. R. 534.

Occupation roads laid out through an estate for the use and convenience of the inhabitants are not thereby dedicated to the public. An estate was purchased for the purpose of building houses; a part was laid out as private roads, and upon a partition, the owners taking the roads covenanted that the other freeholders and the occupiers of the houses should have the full use and enjoyment of the roads in as absolute a manner as if they were public roads:—*Held*, by Sir J. ROMILLY, M.R., that a request to be supplied with gas by a minority of the occupiers of houses was sufficient, without the consent of the freeholder, to justify the breaking up of the roads by a gas company (who had obtained a special Act incorporating the general Act of 1847) to lay down their pipes to comply with such request. On appeal to the Lords Justices, the decision was affirmed, as every occupier had the same right for the purpose of his use and enjoyment to call in all such aid as he might have done if the roads had been public roads (*Selby* v. *The Crystal Palace District Gas Co.* (1862), 31 L. J. Ch. 595).

Sect. 7.

NOTE.

A gas main had been laid for many years over a certain bridge, and a railway company brought an action claiming a declaration that the defendants were not entitled to maintain their gas main across the bridge on the ground that the bridge was their private property and had not been dedicated to the public use and that they had not consented to the laying of the pipes. The real object of the railway company was to obtain an acknowledgment of their right as owners, and payment to them of a nominal yearly sum for the easement or wayleave. BUCKLEY, J., found that the railway company had not dedicated and could not dedicate the bridge to the use of the public; but in the circumstances he made no order upon the defendants as to the removal of the pipe (*Taff Vale Rail. Co.* v. *Pontypridd U. D. C.* (1905), 69 J. P. 351).

A local board having claimed under the powers of the Lighting and Watching Act, 1833 (3 & 4 Will. 4, c. 90), and the Public Health Act, 1848, s. 46, to fix a gas lamp to a private tenement without leave, the court held there was no such right (*Meek* v. *Langdon* (1862), 37 L. T. Journ. 181).

Footpaths.

A footpath may or may not be a highway. See as to footpaths across arable fields, and when they may lawfully be ploughed up, *Mercer* v. *Woodgate*, (1869), L. R. 5 Q. B. 26; *Arnold* v. *Blaker* (1871), L. R. 6 Ex. 433; *Arnold* v. *Holbrook* (1873), L. R. 8 Q. B. 96; *Brackenborough* v. *Thorsby* (1869), 19 L. T. 692.

Notice to be served on persons having control, etc., before breaking up streets or opening drains.

8. Before the undertakers proceed to open or break up any street, bridge, sewer, drain, or tunnel, they shall give to the persons under whose control or management the same may be, or to their clerk, surveyor, or other officer, notice in writing of their intention to open or break up the same, not less than three clear days before beginning such work, except in cases of emergency arising from defects in any of the pipes or other works, and then so soon as is possible after the beginning of the work, or the necessity for the same shall have arisen.

An Act empowering a company to contract for purposes of public advantage ought not to receive a narrow construction. Therefore in construing a gas company's Act, which, after requiring the consent of certain local commissioners to the breaking up of the pavements, provided that where any consent was required and should be obtained by the company to break up any pavement to lay down pipes, or for any other purpose which might be required under the Act, nothing in the Act contained should (after such consent obtained and after twenty-four hours' notice) prevent the company from breaking up the pavement for the purpose of laying down pipes or for any other purpose which might be required under the Act:—*Held*, by the Lords Justices, that a construction *reddendo singula singulis* was not the correct one, and that the power to break up the pavement was not to be confined to the particular purpose to which the consent had been expressly given (*Dover Gaslight Co.* v. *Mayor, etc. of Dover* (1855), 7 De G. M. & G. 545).

Where tramways are laid along a public street or road the tramway company are, under the Act of 1870, bound to keep in repair so much of the street or road as lies between a distance of eighteen inches on either side of the outer line of the tramways. In such a case it was held that the National Telephone Company, acting under licence from the Postmaster-General, are not bound to obtain the previous consent of the tramway company before proceeding to break up the street to lay their wires, the tramway company not being a "landowner or other person liable for the repair" of the street within the meaning of s. 13 of the Telegraph Act, 1863 (26 & 27 Vict. c. 112) (*Bristol Tramways and Carriage Co.* v. *National Telephone Co.*, [1899] 2 Ch. 282).

The Chippenham Gas Bill in the Session of 1904 was opposed by the Wilts County Council on various points, including the length of notice required under the above section. The company conceded an extension from three to seven days.

Streets or drains not to be broken up except under superintendence of persons having control of the same.

9. No such street, bridge, sewer, drain, or tunnel shall, except in the cases of emergency aforesaid, be opened or broken up except under the superintendence of the persons having the control or management thereof, or of their officer, and according to such plan as shall be approved of by such persons or their officer, or in case of any difference respecting such plan, then according to such plan as shall be determined by two justices; and such justices may, on the application of the persons having the control or management of any such sewer or drain, or their officer, require the undertakers to make such temporary or other works as they may think necessary for guarding against any interruption of the drainage during the execution of any works which interfere with any such sewer or drain: Provided always, that if the persons having such control or management as aforesaid, and their officer, fail to attend at the time fixed for the opening of any such street, bridge, sewer, drain, or tunnel, after having had such notice of the undertakers' intention as aforesaid, or shall not propose any plan for breaking up or opening the same, or shall refuse or neglect to superintend the operation, the undertakers may perform the work specified in such notice without the superintendence of such persons or their officer.

If persons having the control, etc., fail to superintend, undertakers may perform the work without them.

See the notes to s. 31 of the Waterworks Clauses Act, 1847, *post.*

Streets, etc., broken up to be reinstated without delay.

10. When the undertakers open or break up the road or pavement or any street or bridge, or any sewer, drain, or tunnel, they shall with all convenient speed complete the work for which the same shall be broken up, and fill in the ground, and reinstate and make good the road or pavement, or the sewer, drain, or tunnel, so opened or broken up, and carry away the rubbish occasioned thereby, and shall at all times, whilst any such road or pavement shall be so opened or broken up, cause the same to be fenced and guarded, and shall cause a light sufficient for the warning of passengers to be set up and maintained against or near such road or pavement, where the same shall be open or broken up, every night during which the same shall be continued open or broken up, and shall keep the road or pavement which has been so broken up in good repair for three months after replacing and making good the same, and for such further time, if any, not being more than twelve months in the whole, as the soil so broken up shall continue to subside.

See also Towns Improvement Clauses Act, 1847, ss. 79—83, incorporated with the Public Health Act, 1875, by s. 160. Section 80 is repealed by the Public Health Acts Amendment Act, 1890 (53 & 54 Vict. c. 59), s. 34 (3), where Part III. of that Act has been adopted.

An action was brought against an incorporated gas company for that by negligence a piece of metal was projected against plaintiff. To this it was pleaded that the grievance was done in execution of the powers of the company, and that there was no negligence of the company otherwise than by their workmen. It was held that this was no answer to the action (*Scott* v. *Manchester* (*Mayor, etc.*) (1857), 2 H. & N. 204 (Ex. Ch.)). See *Hornby* v. *Liverpool United Gas Co.* (1883), 47 J. P. 231, *ante*, p. 180.

In an action against a gas company for injury caused to plaintiff, who was thrown out of a vehicle owing to the imperfect reinstatement of a road after

Sect. 10.

NOTE.

laying a pipe, the defendant company contended that they were only liable to penalty under the next section. Lord RUSSELL OF KILLOWEN, L.C.J., held that the action would lie because there had been more than mere breach of duty, the jury having found nuisance, and because of s. 29, p. 198, and s. 9 of the Act of 1871 (*Goodson* v. *Sunbury Consumers Gas Co.* (1896), 75 L. T. 251).

See further the notes to s. 36 of the Act of 1871, *post*, p. 241.

As to the breaking up of streets by companies for the purpose of laying gas, water or other pipes in the metropolis, see Michael Angelo Taylor's Act (57 Geo. 3. c. ccxxix.), s. 23, and Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), ss. 109—115. Under the powers of s. 114 the vestry or district board (now the borough council) may themselves do the work of reinstating and recover the expenses from the company or person by whom the street is opened. Where under this section a borough council elected to do the work and the plaintiff suffered injury through the negligent way in which the work was done it was held that the company were not liable (*Cressy* v. *South Metropolitan Gas Co.* (1906), 70 J. P. 405). As to whether the expenses recoverable by a local authority include the expense of superintendence, see *New River Co.* v. *Westminster Corporation* (1904), 73 L. J. K. B. 109 and *S. C.* in C. A. *sub nom. Metropolitan Water Board* v. *Westminster Corporation* (1905), 70 J. P. 52. Where a borough council reinstated under the above-mentioned Acts and used concrete where no concrete was used before and in other places more concrete than had been used before, it was held that they were entitled to recover from the gas company the expense of such concrete where the same was necessary (according to the finding of the magistrate) to make the street as good as it was before (*Commercial Gas Co.* v. *Poplar Borough Council* (1906), 94 L. T. 222).

See also as to the above-mentioned sections, *Metropolitan Water Board* v. *Bradley* (1910), 74 J. P. 331.

Under the Turnpike Roads (Scotland) Act, 1831 (1 & 2 Will. 4, c. 43), s. 100, incorporated with the Roads and Bridges (Scotland) Act, 1878 (41 & 42 Vict. c. 51), s. 123, road authorities are given certain special powers in regard to the repairing of roads opened for the purpose of laying pipes. See *Lanarkshire Upper Ward District Committee* v. *Airdrie, Coatbridge and District Water Trustees* (1906), 43 S. L. R. 526.

Penalty for delay in reinstating streets, etc.

11. If the undertakers open or break up any street or bridge, or any sewer, drain, or tunnel, without giving such notice as aforesaid, or in a manner different from that which shall have been approved of or determined as aforesaid, or without making such temporary or other works as aforesaid when so required, except in the cases in which the undertakers are hereby authorised to perform such works without any superintendence or notice, or if the undertakers make any delay in completing any such work, or in filling in the ground, or reinstating and making good the road or pavement, or the sewer, drain, or tunnel, so opened or broken up, or in carrying away the rubbish occasioned thereby, or if they neglect to cause the place where such road or pavement has been broken up to be fenced, guarded, and lighted, or neglect to keep the road or pavement in repair for the space of three months next after the same is made good, or such further time as aforesaid, they shall forfeit to the persons having the control or management of the street, bridge, sewer, drain, or tunnel, in respect of which such default is made, a sum not exceeding five pounds for every such offence, and they shall forfeit an additional sum of five pounds for each day during which any such delay as aforesaid shall continue after they shall have received notice thereof.

As to what is a sufficient "plan," see the notes to s. 31 of the Waterworks Clauses Act, 1847, *post*. See also *Goodson* v. *Sunbury Consumers Gas Co.*, cited under the last section, and the notes under s. 36 of the Act of 1871, *post*, p. 241.

In case of delay other parties may reinstate, and recover the expenses.

12. If any such delay or omission as aforesaid take place, the persons having the control or management of the street, bridge, sewer, drain, or tunnel, in respect of which such delay or omission shall take place, may cause the work so delayed or omitted to be executed, and the expense of executing the same shall be repaid to such persons by the undertakers; and such expenses may be recovered in the same manner as damages are recoverable under this or the special Act.

Supply of Gas.

And with respect to the supply of gas, and the recovery of the rent to be paid for the same, be it enacted as follows:

Power of the company to contract for lighting streets, etc.

13. The undertakers may from time to time enter into any contract with any person for lighting or supplying with gas any public or private building, or for providing any person with pipes, burners, meters, and lamps, and for the repair thereof; and may also from time to time enter into any contract with the commissioners, trustees, or other persons having the control of the streets within the limits of the special Act for lighting the same or any of them with gas, and for providing such commissioners, trustees, or persons with lamps, lamp posts, burners, and pipes for such purpose, and for the repairs thereof, in such manner and upon such terms as shall be agreed upon between the undertakers and the said commissioners, trustees, or other persons.

In clause 1 of the Model Gas Bill there is now added to the words incorporating the Gasworks Clauses Acts, 1847 and 1871, the following proviso:—"Provided that s. 13 of the former Act shall be read as if the words 'or any premises' were inserted after the words 'private building.'"

Prior to the passing of the Gasworks Clauses Act, 1871, there was no obligation upon a gas company to supply a customer with gas or to continue to do so for any particular period, nor did the circumstance of quarterly payments, or the hiring of a meter by the customer, or of the company being the only one in the neighbourhood, afford any ground for implying a contract to that effect (*Hoddesdon Gas and Coke Co.* v. *Haselwood* (1859), 6 C. B. (N.S.) 239). By s. 11 of that Act, the undertakers are required to furnish a sufficient supply of gas to owners and occupiers within the limits of the special Act upon certain conditions.

Effect of an equality clause.

In the absence of an equality clause, a gas company is not bound to charge a like price to all consumers of gas. A company, empowered by statute to take tolls in return for a public service is not bound, independently of express enactment, to exact the same tolls from all persons alike, but is at liberty to remit the tolls, or any portion of them, to particular persons, or to a particular class of persons, at its pleasure and discretion (*Hungerford Market Co.* v. *City Steamboat Co.* (1860), 3 E. & E. 365). Cockburn, C.J., observed, in giving judgment: "The result then is that, in our opinion, there neither arises upon these Acts of Parliament, or exists at common law, any obligation on this company to exact uniform tolls, provided they keep within the amount fixed and appointed conformably to statute 11 Geo. 4, c. lxx." "At common law a person holding himself out as a common carrier of goods was not under any obligation to treat all customers equally": *per* Blackburn, J., in *G. W. Rail. Co.* v. *Sutton* (1868), L. R. 4 H. L., at p. 237. The following are

Sect. 13.

NOTE.

instances of equality clauses: Railway Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), s. 90; Railway and Canal Traffic Act, 1854 (17 & 18 Vict. c. 31), s. 2; the Railway and Canal Traffic Act, 1888 (51 & 52 Vict. c. 25), s. 25; and the Electric Lighting Act, 1882 (45 & 46 Vict. c. 56), s. 20. Sometimes where differential rates are sanctioned in different areas within the limits of supply, provision is specially made as to the proportion which should be maintained between these differential rates. For an instance of an equality clause in a gas Act, see New Swindon Gas Act, 1893, s. 62. As to charging a differential rate within the same borough without express statutory authority, see *Northampton Corporation* v. *Ellen*, [1904] 1 K. B. 299, and *Bridport Waterworks Co.* v. *Hounsell*, cited *post*, p. 513.

Present provisions as to equality of charges.

In 1904 there was included in the Model Gas Bill the following clause as to "discounts":—"The company may, if they think fit, allow discounts or rebates to consumers of gas in consideration of prompt payment of gas charges not exceeding in any case ten per centum, and in addition thereto or irrespective thereof they may if they think fit allow discounts or rebates to large consumers not exceeding in any case fifteen per centum: Provided that all discounts or rebates shall be of equal amount under like circumstances to all consumers: Provided also, that notice of the effect of this enactment shall be endorsed on every demand note for gas charges."

In the Model Bill of 1906 an alternative provision was made as follows:—"There is in clause 1 now added to the words incorporating the Gasworks Clauses Acts, 1847 and 1871, a proviso that s. 13 of the former Act shall be read as if the words 'Provided also that every such contract entered into by the company shall be alike in terms and amount under like circumstances to all consumers' were added at the end of that section." At the same time the following footnote was appended to the "Discounts" clause above set out:—"This clause is not required where s. 13 of the Gasworks Clauses Act, 1847, is amended, as appears in clause 1," *i.e.*, as above mentioned. See further hereon the Introduction at p. 48.

Public lighting.

A gas company who are under a statutory obligation to supply a fixed quantity of gas to the public lamps in a district at a fixed price during a certain period are not liable to a reduction in that price, if by reason of an occurrence over which they have no control (such as a frost of exceptional severity) the fixed amount of gas has not been supplied during a part of that period (*Richmond Gas Co. and Richmond* (*Mayor*), *In re* [1893] 1 Q. B. 56). *Quære*, whether the court in this case gave sufficient consideration to the principle of law that in local and personal Acts a statutory provision, such as existed in the above case, must be regarded as a contract between the parties, whether made by their mutual agreement, or forced on them by the legislature. See *per* Lord WATSON in *Countess of Rothes* v. *Kirkcaldy and Dysart Waterworks Commissioners* (1882), 7 App. Cas. 694; and see *per* Lord SELBORNE, in *Milnes* v. *Mayor, etc. of Huddersfield* (1886), 11 App. Cas., at p. 523.

As to public lighting, see further the notes to s. 24 of the Act of 1871, *post*, p. 235.

The courts will not interfere by injunction at the instance of a gas company to prevent another gas company from supplying gas beyond the limits of their special Act, as there is not such a private injury as the court could take notice of. Any question of injury to the public by the exercise of powers in excess of those granted by Parliament must be determined upon an information by the Attorney-General (*The Pudsey Coal Gas Co.* v. *The Mayor, etc. of Bradford* (1873), L. R. 15 Eq. 167; and other cases cited *ante*, pp. 152 *et seq.*).

An urban authority is empowered by the Public Health Act, 1875, s. 161, to contract with any person for the supply of gas, or other means of lighting the streets, markets, and public buildings in their district, and may provide such lamps, lamp posts, and other materials and apparatus as they may think

NOTE.

necessary for lighting the same. See further, *post*, as to the powers of local authorities in relation to gas supply.

By the Municipal Corporations Act, 1882 (45 & 46 Vict. c. 50), s. 136, trustees acting under any local Act of Parliament for lighting or supplying with gas or water, etc., within a borough, may transfer their powers to the municipal corporation of the borough. For like powers which existed under the now repealed Acts of 1835 and 1857, relating to municipal corporations, see 5 & 6 Will. 4, c. 76, s. 75, and 20 & 21 Vict. c. 50, s. 2.

Public Health Act, 1875.

Lighting and Watching Act, 1833.

Public lighting may also be provided, in any parish where there is no urban authority, under the provisions of the 3 & 4 Will. 4, c. 90 (Lighting and Watching Act, 1833), which repealed the old Lighting and Watching Act of 11 Geo. 4, c. 27. In urban districts it is in its turn superseded by the Public Health Act, 1875. See s. 163 of the latter Act, which provides that "Where in any place which after the passing of this Act becomes constituted or included in an urban district, or which by virtue of any order of the Local Government Board, becomes subject to this enactment, the Act passed in the fourth year of the reign of King William the Fourth, intituled 'An Act to repeal an Act of the eleventh year of his late Majesty King George the Fourth, for the lighting and watching of parishes in England and Wales, and to make other provisions in lieu thereof,' has been adopted, the said Act shall be superseded by this Act, and all lamps, lamp posts, gas pipes, fire engines, hose, and other property vested in the inspectors for the time being under the said Act, shall vest in the authority having under this Act jurisdiction in such place." The Local Government Act, 1894 (56 & 57 Vict. c. 73), s. 7, enacts that as from the appointed day in every rural parish the parish meeting shall exclusively have the power of adopting the Lighting and Watching Act, 1833. See more fully *post*, p. 819, where the subject of the rights and duties of local authorities on the subject of lighting are dealt with.

Contracts may also be entered into by town councils and commissioners for lighting baths and washhouses (9 & 10 Vict. c. 74, ss. 26, 28). Urban authorities under the Public Health Act, 1875, now exercise authority under this and certain amending Acts. See s. 10 of the Public Health Act, 1875. Under the Local Government Act, 1894, s. 7, parish meetings, in rural parishes, have exclusively the power of adopting the Baths and Washhouses Acts, 1846 to 1899, and in parishes which have a parish council, that council is, generally speaking, the authority for the execution of the Acts.

Under the powers of the Towns Improvement Clauses Act, 1847 (10 & 11 Vict. c. 34), ss. 119, 120, commissioners may contract for lighting the streets with gas for any period prescribed in the special Act, or if there be no prescribed period, then for any period not exceeding three years. They may also provide lamps, posts, and other works necessary for lighting the streets, and in case of any dispute as to price, this is to be settled by arbitration in accordance with the provisions of the Lands Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 18).

Under the Housing of the Working Classes Act, 1890 (53 & 54 Vict. c. 70), s. 69, repealing and substantially re-enacting the Labouring Classes Lodging-Houses Act, 1851, power is given to commissioners, trustees or companies to supply gas and water to lodging-houses under the Act, either without charge or on such favourable terms as they shall think fit.

Metropolis.

The quality and price to be charged for gas supplied to the metropolis were regulated by the Metropolis Gas Act, 1860 (23 & 24 Vict. c. 125); but this Act has been much varied by special Acts, which will be noted in their place, *post*. See *Great Central Gas Consumers Co.* v. *Clarke* (1862), 13 C. B. (N.S.) 838.

As to the effect of the Metropolis Gas Act, 1860, on gas companies not enumerated in it, see *Imperial Gaslight and Coke Co.* v. *West London Junction Gaslight Co.* (1867), 14 W. R. 1019, cited *post*, in the notes to that Act.

Scotland.

As to gas supply in Scotland, see *post*.

Sect. 14.

Power to undertakers to let meters.

[*Repealed.*]

Meters not liable to distraint for rent.

14. [*The undertakers may let for hire any meter for ascertaining the quantity of gas consumed or supplied, and any fittings for the gas, for such remuneration in money as shall be agreed upon between the undertakers and any person to whom the same may be so let, and such remuneration shall be recoverable in the same manner as the rents or sums due to the undertakers for gas; and such meters and fittings shall not be subject to distress, or to the landlord's hypothec for rent of the premises where the same may be used, nor to be taken in execution under any process of a court of law or equity, or any fiat or sequestration in bankruptcy, against the person in whose possession the same may be.*]

The above section is repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66), except so far as incorporated with special Acts to which the Gasworks Clauses Act, 1871, does not apply. See now ss. 18 and 19 of the Gasworks Clauses Act, 1871, *post*, pp. 230 *et seq.*

A gas stove let for hire is a "fitting for the gas" within the meaning of this section, and is therefore not subject to distress for rent (*Gaslight and Coke Co.* v. *Hardy* (1886), 17 Q. B. D. 619). See a comment on this case, *post*, p. 220. It will be observed that the wording of s. 18 of the Act of 1871 differs from that of the section in the text. The stove in the above case was used for heating purposes only (56 L. J. Q. B. 168). In a later case the stove was used for cooking "containing besides the burners and the chamber in which the gas was consumed, other chambers together with the grates, hot plates, and such arrangements for the reception of cooking utensils." STEPHEN, J., at the trial, held that the stove was a "fitting for the gas" within s. 14 of the Act of 1847, and that the case came within the decision in *Hardy's Case*, *supra* (*Gaslight and Coke Co.* v. *Herbert Smith* (1886), 3 T. L. R. 15).

Undertakers may enter buildings for ascertaining quantities of gas consumed.

15. [*The clerk, engineer, or other officer duly appointed for the purpose by the undertakers may at all reasonable times enter any building or place lighted with gas supplied by the undertakers, in order to inspect the meters, fittings, and works for regulating the supply of gas, and for the purpose of ascertaining the quantity of gas consumed or supplied; and if any person hinder such officer as aforesaid from entering and making such inspection as aforesaid at any reasonable time, he shall for every such offence forfeit to the undertakers a sum not exceeding five pounds.*]

This section is repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66), except so far as incorporated with special Acts to which the Gasworks Clauses Act, 1871, does not apply. See s. 21 of the Gasworks Clauses Act, 1871, *post*, p. 234.

Recovery of rents due for gas.

16. If any person supplied with gas by virtue of this or the special Act neglect to pay the rent due for the same to the undertakers, the undertakers may stop the gas from entering the premises of such person, by cutting off the service pipe, or by such means as the undertakers shall think fit [*and recover the rent due from such person, if less than twenty pounds, together with the expense of cutting off the gas, and the costs of recovering the rent, in the same manner as any damages for the recovery of which no special provision is made are recoverable under this or the special Act; or, if the rent so due amount to twenty pounds or upwards, the undertakers may recover the same, together with the expenses of cutting off the gas, by action in any court of competent jurisdiction*].

The words italicised are repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66), except so far as incorporated with special Acts to which

NOTE.

the Gasworks Clauses Act, 1871, does not apply. The substituted provisions are ss. 23, 40 and 41 of the Act of 1871, *post*, pp. 235, 246, 247. See those sections and the notes thereunder. As to the duty of a gas company to supply gas to owners and occupiers, and their right to refuse a supply when arrears are owing, see the note under s. 11 of the Act of 1871.

A municipal corporation supplying gas were held liable for damages caused by an explosion of gas which arose from an unskilful and negligent cutting off of the supply of gas by one of their servants (*Paterson* v. *Mayor, etc. of Blackburn* (1892), 9 T. L. R. 55). See also *Dominion National Gas Co., Ltd.* v. *Collins*, [1909] A. C. 640.

A large mansion divided into separate flats was supplied with gas by the gas company through one large meter. Each flat was supplied through a smaller subsidiary meter, placed and maintained by the landlord. For a case in which, under such circumstances, an injunction was granted to prevent the landlord from cutting off the supply, see *Hersey* v. *White* (1893), 9 T. L. R. 335.

In an action to recover the price of 7,129,300 cubic feet of gas sold and delivered during a period of five years, at 2*s.* 5*d.* per cubic foot, the defendant, as to part of the claim, paid money into court, and pleaded, as to the residue, "never indebted" and payment. He then obtained an order under the Common Law Procedure Act, 1854, s. 3, compulsorily referring the action, on the ground that the matter in dispute was wholly or in part one of "mere account," which could not conveniently be tried by a jury. The plaintiffs applied to rescind this order, alleging that they proposed at the trial to attempt to prove that the defendant had been guilty of fraudulent conduct by the secret abstraction of their gas, and that upon this question, which would regulate the damages awarded, they were entitled to the verdict of a jury:—*Held*, that the nature of the dispute was not altered because the plaintiffs imputed fraud to the defendant in relation to it: that, substantially, the matter was one wholly or in part of mere account, which could not be conveniently tried by a jury, and that therefore the order was rightly made (*The Birmingham and Staffordshire Gas Co.* v. *Ratcliffe* (1871), L. R. 6 Ex. 224).

Power to take away pipes, etc., when supply of gas discontinued.

17. [*In all cases in which the undertakers are authorised to cut off and take away the supply of gas from any house or building or premises, under the provisions of this or the special Act, the undertakers, their agents or workmen, after giving twenty-four hours previous notice to the occupier, may enter into any such house, building, or premises, between the hours of nine in the forenoon and four in the afternoon, and remove and carry away any pipe, meter, fittings, or other works the property of the undertakers.*]

This section is repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66), except so far as incorporated with special Acts, to which the Gasworks Clauses Act, 1871, does not apply. See s. 22 of the Act of 1871, which gives a similar power to undertakers, *post*, p. 234.

And with respect to waste or misuse of the gas, or injury to the pipes and other works, be it enacted as follows:

Penalty for fraudulently using the gas of the undertakers.

18. Every person who shall lay or cause to be laid any pipe to communicate with any pipe belonging to the undertakers without their consent, or shall fraudulently injure any such meter as aforesaid, or who, in case the gas supplied by the undertakers is not ascertained by meter, shall use any burner other than such as has been provided or approved of by the undertakers, or of larger dimensions than he has contracted to pay for, or shall keep the lights burning for a longer

Sect. 18. time than he has contracted to pay for, or who shall otherwise improperly use or burn such gas, or shall supply any other person with any part of the gas supplied to him by the undertakers, shall forfeit to the undertakers the sum of five pounds for every such offence, and also the sum of forty shillings for every day such pipe shall so remain, or such works or burner shall be so used, or such excess be so committed or continued, or such supply furnished; and the undertakers may take off the gas from the house and premises of the person so offending, notwithstanding any contract which may have been previously entered into.

See *Birmingham and Staffordshire Gas Co.* v. *Ratcliffe* (1871), cited under s. 16, *ante*, p. 189.

A consumer, being dissatisfied with the measurement shown by the company's meter, put up a second meter of his own without the consent of the company, and was summoned and fined under the above section (*Re Gaslight and Coke Co.*, Jl. of G. L., June 16th, 1891, vol. 57, p. 1196). And see *Johnson* v. *Gunnhill*, *post*, p. 229.

There is nothing in the nature of gas to prevent it being the subject of larceny; therefore a conviction for stealing a quantity of gas by fraudulently arranging the pipes, so that a large quantity did not pass through the meter to be registered, was held to be good (*R.* v. *White* (1853), 22 L. J. M. C. 123). See also *R.* v. *Firth* (1865), L. R. 1 C. R. R. 172. Water, also, may be the subject of larceny (*Ferens* v. *O'Brien* (1883), 11 Q. B. D. 21).

The appellants, on their own premises, substituted for part of a gas pipe belonging to the respondents a larger pipe for the purpose of increasing their supply. This was done without any fraud, waste, or misuse of the gas, but without the respondents' consent, although notice of intention to disconnect the pipe from the meter was duly given under s. 15 of the Gasworks Clauses Act, 1871. Upon summons, a stipendiary magistrate convicted the appellants under s. 18:—*Held*, upon a case stated, that the appellants had, within the meaning of that section, caused to be laid a pipe to communicate with a pipe belonging to the undertakers without their consent, and that the magistrate rightly convicted them (*Wood* v. *West Ham Gas Co.* (1885), 52 L. T. 817; *S. C.*, *sub nom. West Ham Gas Co.* v. *Harrison, Wood & Co.* (1885), 1 T. L. R. 558).

Since the passing of the Judicature Act, 1873, s. 25 (11), where there is any variance between the rules of equity and the rules of common law with reference to the same matter, the rules of equity shall prevail. In *Imperial Gaslight and Coke Co.* v. *London Gaslight Co.* (1854), 10 Ex. 39, which arose before the passing of that Act, it was decided at common law that it was no answer to a plea of the statute of limitations that the plaintiff was prevented by the fraud of the defendants from knowing of the cause of action until after the time of limitation had run. The plaintiffs alleged that the defendants had fraudulently abstracted gas from their mains and concealed the fact. (A count, however, for cutting into the mains, to which the statute was not pleaded, was held good.) A similar decision was given in *Hunter* v. *Gibbons* (1856), 1 H. & N. 459. But equity always relieved against fraud, and since the Judicature Act, in cases where the wrongful act is not merely not found out, but can be affirmatively shown to have been fraudulently concealed by the wrongdoer, that will afford a good answer to the statute of limitations (*Gibbs* v. *Guild* (1882), 9 Q. B. D. 59; *Armstrong* v. *Milburn* (1886), 54 L. T. 723 (C. A.); and see *Moore* v. *Knight*, [1891] 1 Ch. 547; *Thorne* v. *Heard*, [1895] A. C. 495; *Betjemann* v. *Betjemann*, [1895] 2 Ch. 474; and *Bulli Mining Co.* v. *Osborne*, [1899] A. C. 351).

A. stole gas for the use of a manufactory by means of a pipe which drew off the gas from the main without allowing it to pass through the meter. The gas from this pipe was burnt every day and turned off at night. The

Note.

pipe was never closed at its junction with the main, and consequently always remained full of gas:—*Held*, upon an indictment, that as the pipe always remained full, there was, in fact, a continuous taking of gas, and not a series of separate takings, and therefore that the circumstances attending the abstraction of gas for the whole of the time were rightly given in evidence; and the prosecutor was not called upon to elect to proceed on one particular act of taking, or on any three acts committed within the space of six months from the first to the last of such acts, under 24 & 25 Vict. c. 96, s. 6 (*R.* v. *Firth* (1869), L. R. 1 C. C. 172).

Penalty for wilfully damaging pipes.

19. Every person who shall wilfully remove, destroy, or damage any pipe, pillar, post, plug, lamp, or other work of the undertakers for supplying gas, or who shall wilfully extinguish any of the public lamps or lights, or waste or improperly use any of the gas supplied by the undertakers, shall for each such offence forfeit to the undertakers any sum not exceeding five pounds, in addition to the amount of the damage done.

Satisfaction for accidentally damaging pipes.

20. Every person who shall carelessly or accidentally break, throw down, or damage any pipe, pillar, or lamp belonging to the undertakers, or under their control, shall pay such sum of money by way of satisfaction to the undertakers for the damage done, not exceeding five pounds, as any two justices or the sheriff shall think reasonable.

In a case decided under the similarly worded section (s. 207) of the Metropolitan Management Act, 1855, it was held that a master was not liable to summary proceedings in respect of damages to a lamp caused accidentally by his servant (*Harding* v. *Barker* (1889), 53 J. P. 308). The lamp post of a gas company having been injured by the negligent driving of the defendant's servant, proceedings were taken under the above section against the defendant, before a magistrate who held that the remedy provided by the section was one against the person who did the act complained of, and not against the master, and the summons was dismissed. The gas company then brought an action in the county court, against the master to recover damages for injuries to the lamp post caused by the negligent driving of the servant. It was contended, on behalf of the defendants, that the plaintiffs' common law remedy by action for damages was ousted by s. 20, which provides a specific remedy, and reliance was placed on *St. Pancras Vestry* v. *Batterbury* (1857), 2 C. B. (N. S.) 477. The divisional court, on appeal from the county court, held that the plaintiffs' common law remedy by action for damages was not ousted, and that the principle in *St. Pancras Vestry* v. *Batterbury*, only applied where a new offence was created, and in the same Act a remedy was given (*Crystal Palace Gas Co.* v. *Idris* (1900), 82 L. T. 200). See also as to the remedy by action in respect of damage to lamps, *Walton* v. *Vanguard Motor Bus Co.* (1908), 72 J. P. 505; *Barnes U. D. C.* v. *London General Omnibus Co.* (1908), 73 J. P. 68.

A driver may be made responsible under the section, although the lamp is placed in an unsafe position and is broken without any negligence on his part (*Burgess* v. *Morris* (1897), 61 J. P. 553). If a summons charge damage as done unlawfully and carelessly, it need not say "carelessly or accidentally," and a conviction will be good if there be evidence of carelessness, though short of what might be called negligence (*Ashton* v. *Eccles Corporation* (1907), 71 J. P. 55).

Nuisance from Gas.

And with respect to the provision for guarding against fouling water, or other nuisance from the gas, be it enacted as follows:

Penalty on undertakers for causing water to be corrupted.

21. If the undertakers shall at any time cause or suffer to be brought or to flow into any stream, reservoir, or aqueduct, pond, or place for water, or into any drain communicating therewith, any washing or other

Sect. 21. substance produced in making or supplying gas, or shall wilfully do any act connected with the making or supplying of gas whereby the water in any such stream, reservoir, aqueduct, pond or place for water shall be fouled, the undertakers shall forfeit for every such offence the sum of two hundred pounds.

By s. 25, it is provided that whenever any water within the limits of the special Act shall be fouled by the gas of the undertakers, they shall be liable to a penalty.

By s. 68 of the Public Health Act, 1875 (38 & 39 Vict. c. 55), any person engaged in the manufacture of gas who—

(1) Causes or suffers to be brought or to flow into any stream reservoir aqueduct pond or place for water, or into any drain or pipe communicating therewith, any washing or other substance produced in making or supplying gas; or

(2) Wilfully does any act connected with the making or supplying of gas whereby the water in any such stream reservoir aqueduct pond or place for water is fouled,

shall forfeit for every such offence the sum of £200, and, after the expiration of twenty-four hours notice from the local authority, or the person to whom the water belongs, in that behalf, a further sum of £20 for every day during which the offence is continued, or during the continuance of the act whereby the water is fouled.

Every such penalty may be recovered, with full costs of suit, in any of the superior courts, in the case of water belonging to or under the control of the local authority by the local authority, and in any other case by the person into whose water such washing or other substance is conveyed or flows or whose water is fouled by any such act as aforesaid, or in default of proceedings by such person, after notice to him from the local authority of their intention to proceed for such penalty, by the local authority; but such penalty shall not be recoverable unless it be sued for during the continuance of the offence, or within six months after it has ceased.

Similar, but not identical, sections occur in the Public Health (London) Act, 1891 (54 & 55 Vict. c. 76) (s. 52), and in the Waterworks Clauses Act, 1847 (10 & 11 Vict. c. 17) (s. 62). And see Rivers Pollution Prevention Act, 1876 (39 & 40 Vict. c. 75), s. 4.

Several enactments for the protection of water companies in the metropolis will be found in the Metropolis Gas Act, 1860, *post*, p. 271.

The Public Health (Scotland) Act, 1897 (60 & 61 Vict. c. 38), ss. 127—129, impose penalties for causing water to be corrupted by gas washings, etc.

The directors of a gas company are responsible for the acts of their superintendents and engineer, under a general authority to manage the works, for any nuisance arising from any process employed by such manager, etc., although used without their knowledge, and contrary to the usual processes employed, and which the directors supposed not to be departed from (*Rex* v. *Medley* (1834), 6 C. & P. 292).

A private Act of Parliament, which incorporated a gas company and empowered them to make the necessary works, contained an enactment (s. 160), that if the company should at any time cause or suffer to be conveyed or to flow into any stream, etc., or place for water within the limits of the Act any washing produced in making gas, or do any act to the water contained in any such stream, etc., or place for water, whereby the water therein should be fouled or corrupted, then the company should forfeit for every such offence £200. Section 161 imposed an additional penalty of £20 per day for the continuance of such pollution more than twenty-four hours after notice. Section 165 made the company liable if any water was polluted by the escape of gas. The site of the gas tank was selected by an experienced engineer, and the company built it in a proper manner, and with all ordinary care and prudence. They knew that mines had been worked in the neighbourhood, but did not know that any mines had been worked under their own lands. After some years the gas tank cracked at the bottom, the washings produced in the process of making gas escaped, percolated underground through the earth, and polluted the water in the plaintiff's well. The company then found on inquiry that mines had been worked by strangers to them under part of their land and close up to their tank. The crack in the tank was caused by the subsidence of the soil, owing, in all probability, to the mining operations :—*Held*, that the company were liable, under s. 120, to the penalty of £200 for polluting the plaintiff's water by their gas washings (*Hipkins* v. *Birmingham and Staffordshire Gaslight Co.* (1860), 6 H. & N. 250).

In *Millington* v. *Griffiths* (1874), 30 L. T. 65, it was held that a well which, on account of its having become contaminated, had been disused by the owner for several years, and had been covered over, did not cease to be a well within the meaning of the Lighting and Watching Act, 1833, which imposed a penalty of £200 on any gas company "who shall suffer any washings . . . to be conveyed into any well." See s. 26, *post*, p. 197, giving to the person to whom the water supposed to be fouled shall belong, power to dig up the ground and examine pipes of the undertakers, after certain notices and on certain conditions, for the purpose of ascertaining the cause of contamination.

The Thames Conservancy Act, 1894 (57 & 58 Vict. c. clxxxvii.), contains stringent provisions for preventing pollution of the river Thames, as by that Act defined, by refuse from gasworks or otherwise (ss. 90—108). See provisions in the Lee Conservancy Act, 1900 (63 & 64 Vict. c. cxvii.), ss. 27—32. The Salmon Fishery Act, 1861 (24 & 25 Vict. c. 109), also contains an enactment against pollution (s. 5).

A gas company permitted offensive matter, which "largely consisted of liquid ammonia," to pass into the sewers of a town, and thence through the sewers and a sewage farm into a stream which was a tributary of the river Thames. The Thames Conservators, under their Act of 1894, s. 92, proceeded against the gas company for penalties, and the company were fined. They further proceeded against the town in whom were vested the sewers and the sewage farm ; but the court held, on a case stated by the justices, that in the circumstances of the case the town had not wilfully allowed the offensive matter to enter the stream (*High Wycombe Corporation* v. *Thames Conservators* (1898), 79 L. T. 463 ; and see *Southall Norwood Urban District Council* v. *Middlesex County Council*, cited, *post*, p. 731).

It was held to be no defence to an action for damages, where a river was fouled by substances of poisonous, deleterious, and impure character being thrown into it necessarily and unavoidably in the carrying on of a business, that the defendant's trade or manufacture, by which the river was fouled, was carried on in a reasonable and proper manner, and in a proper place, and was carried on for purposes necessary and useful to the community (*Bamford* v. *Turnley* (1862), 3 B. & S. 66 ; overruling *Hole* v. *Barlow* (1858), 11 C. B. (N.S.) 334). See more fully, *post*, pp. 198, 199. As to when the court will interfere by injunction, see *Attorney-General* v. *Gee* (1870), L. R. 10 Eq. 131 ; and *Goldsmid* v. *Tunbridge Wells Improvement Commissioners* (1866), L. R. 1 Ch. 349, *per* Turner, L.J.

Penalty to be sued for in superior court within six months.

22. The said penalty of two hundred pounds shall be recovered, with full costs of suit, in any of the superior courts, by the person into whose water such washing or other substance shall be conveyed or shall flow, or whose water shall be fouled by any such act as aforesaid ; but such penalty shall not be recoverable unless it be sued for during the

Sect. 22. continuance of the offence, or within six months after it shall have ceased.

By a local Act passed before the date of this Act, a penalty (recoverable by a common informer) was imposed on any gas or other company for suffering any impure matter to flow into any stream. By a later special Act of the same company the Act of 1847 was incorporated:—*Held*, that the section in the text repealed *pro tanto* the section in the local Act, and therefore that the penalties were not cumulative (*Parry* v. *Croydon Commercial Gas Co.* (1863), 15 C. B. (N.S.) 568).

Daily penalty during the continuance of the offence.

23. In addition to the said penalty of two hundred pounds (and whether such penalty shall have been recovered or not) the undertakers shall forfeit the sum of twenty pounds (to be recovered in like manner) for each day during which such washing or other substance shall be brought or shall flow as aforesaid, or the act by which such water shall be fouled shall continue, after the expiration of twenty-four hours from the time when notice of the offence shall have been served on the undertakers by the person into whose water such washing or other substance shall be brought or shall flow, or whose water shall be fouled thereby, and such penalty shall be paid to such last-mentioned person.

Daily penalty during escape of gas after notice.

24. Whenever any gas shall escape from any pipe laid down or set up by or belonging to the undertakers, they shall, immediately after receiving notice thereof in writing, prevent such gas from escaping; and in case the undertakers shall not within twenty-four hours next after service of such notice effectually prevent the gas from escaping, and wholly remove the cause of complaint, they shall for every such offence forfeit the sum of five pounds for each day during which the gas shall be suffered to escape after the expiration of twenty-four hours from the service of such notice.

Liability for escape of gas.

A gas company, incorporated by Act of Parliament, had for some years supplied gas to a house belonging to the plaintiff, the only means of shutting it off being by a stop-cock within the house, the key of which was kept by the occupier. The last tenant, on quitting, gave notice to the company that he should not require any further supply; and one of the company's workmen, at his request, removed a chandelier from one of the rooms, leaving the end of the pipe properly secured. The internal fittings were the property of the plaintiff. Whilst the house remained untenanted, the gas by some unexplained means escaped, and an explosion took place, by which the house was considerably damaged. In an action for damages brought against the company, alleging a breach of duty on their part in not taking proper means to prevent the influx of the gas into the house, it was held that a nonsuit was rightly directed on the above facts (*Holden* v. *Liverpool Gas Co.* (1846), 3 C. B. 1).

A declaration stated that the plaintiff was possessed of premises, that the defendant was employed in laying on gas to the premises adjoining, and that he did the work so negligently that the gas escaped and ignited, and the premises adjoining the plaintiff's were set on fire, and thereby his premises were set on fire and burnt:—*Held*, that the declaration disclosed a good cause of action; that it was unnecessary to negative negligence in the owner of the adjoining house in not putting out the fire before it communicated with the plaintiff's house (*Blenkiron* v. *Great Central Gas Consumers Co.* (1863), 3 L. T. (N.S.) 317).

In an action against a gas company for negligently allowing the escape of gas from their main into premises where lights were known to be burning, it was shown that the gas found entrance through an open window nearly level with the trench from the main, after a hole had been made in the main for the insertion of the service pipe:—*Held*, that even if the jury thought that the gas entered in the manner alleged, it was a question for them whether the company's men might reasonably have foreseen it, and were bound to have the window closed (*S. C.*, 2 F. & F. 437).

A gas company is bound to keep up such a reasonable inspection of their mains and pipes as may enable them to detect when there is such an escape of gas, by fracture or imperfection of pipes, as may lead to danger of an explosion; and if an explosion take place from a fracture or defect which has existed for several days, during which time it has also been discoverable by reason of the smell of the escaped gas, and would have been discovered by proper inspection, that is evidence of negligence on the part of the company; nor is it enough to relieve them from liability that upon notice of the escape they sent a workman to repair the defect, he arriving too late to do so (*Mose* v. *Hastings and St. Leonards Gas Co.* (1865), 4 F. & F. 324). *Cf.* the summing up of Huddleston, B., in *Snook* v. *Grand Junction Waterworks Co.* (1886), 2 T. L. R. 308.

Owing to excavations made by the Commissioners of Sewers within two and a half inches of a gas main embedded in a highway at a depth of ten and a half inches, one of the gas pipes was deprived of support from beneath. The weight of the traffic above cracked the pipe, and an escape and accumulation of gas occurred for two or three days, resulting in an explosion which injured a man passing. The gas company were unaware of the escape of gas, as well as of the excavation, of which they had received no notice. The county court judge found that there had been negligence, and gave a verdict and judgment for the plaintiff. On appeal to a Divisional Court, it was contended for the company that actual negligence must be proved, and that there had been no evidence of it, and further that s. 24 of the Gasworks Clauses Act, 1847, imposed a daily penalty during the escape of gas after notice, and that this was the only liability imposed upon the defendants in the event of an escape of gas:—*Held*, that the character of the crack in the pipe, the length of time the gas was escaping, and the absence of anyone on behalf of the gas company at the time of the excavation, constituted evidence of negligence on their part, and the appeal was dismissed (*Price* v. *South Metropolitan Gas Co.* (1895), 65 L. J. Q. B. 126). *Cf. Stacey* v. *Gas Light and Coke Co.* (1910), 9 L. G. R. 174.

Conduits for telephone wires were laid in the footway of a public street and at intervals small boxes were let in through which the wires passed. These boxes were so placed for the purpose of enabling access to be obtained for the purpose of localising and repairing any faults. In the neighbourhood were various gas mains and supply pipes. Owing to leakage from the pipes, gas escaped into and accumulated in the telephone boxes in Glasshouse Street, Regent Street. It appeared that written notice of this escape of gas had been given in July to the gas company, who endeavoured to find the escape of gas, but failed to do so, and nothing further was done until October, when workmen in the employment of the Post Office had to do some work in connection with one of these telephone boxes and one of them had occasion to apply a light to the orifice of the box containing the cables. A series of violent explosions immediately occurred whereby plaintiffs were injured. Darling, J., left the case to the jury, who found negligence on the part of the gas company and gave a verdict for the plaintiffs. The Court of Appeal affirmed this judgment (*Ogden* v. *Gaslight and Coke Co.*, Times, 4th July, 1906).

The learned judge at the conclusion of the last-mentioned case suggested that it might be well worth while for the authorities to consider whether these dangers could not be obviated by the same sort of ventilation being applied to telephone boxes as was applied to electric light boxes, and counsel undertook that the matter should be brought to the attention of the Postmaster-General. On 31st March, 1905, Sir T. Dewar asked the Postmaster-General whether his attention had been called to a recent action to recover damages for personal injuries sustained through the explosion of gas in a telephone inspection

Sect. 24.

NOTE.

chamber fixed in the footway in Regent Street; and, seeing that both judge and jury had expressed the opinion that, in the interests of public safety, the accumulation of gas in these telephone inspection chambers should be prevented by a system of ventilation, whether he would state if he proposed to adopt the suggestion. Lord STANLEY replied that the case had been carefully considered. He feared that ventilation of the inspection chambers was not practicable, as he did not think the local authorities would consent to his fixing ventilating pillars in the footways, and the owners of private houses would not allow him to carry pipes up the walls. Ventilating covers could not be adopted, because they would not keep the cables free from mud and water. He was proposing to lay down certain precautions to be taken by his staff when opening manholes in which the presence of gas was suspected; but so far as the facts were known to him, no precautions taken by his employees would have prevented the recent explosions in Regent Street. Hansard, vol. 144, p. 19.

A service pipe became corroded and caused an escape of gas which exploded and caused damage to adjoining property. The jury found negligence against the undertakers, and the plaintiff recovered a verdict for £260 and costs (*Partington* v. *Leigh Corporation*, Jl. G. L., November 21st, 1905, p. 549). The judge granted a stay of execution with a view to an appeal on the legal points raised.

The defendants, a gas company, having contracted to supply the plaintiff with a service pipe from their main to the meter on his premises, laid down a defective pipe from which the gas escaped. A workman in the employ of a gasfitter, employed by the plaintiff to lay down the pipes leading from the meter to different parts of the premises, negligently took a lighted candle for the purpose of finding out whence the escape proceeded. An explosion then took place, whereby damage was occasioned to the plaintiff's premises, to recover compensation for which the plaintiff brought his action against the defendants:—*Held*, that the damage was not too remote, and that the plaintiff, not being the master of the workman, could not be considered as contributing to the damage by reason of his act, and was, therefore, entitled to recover (*Burrows* v. *March Gas and Coke Co.* (1872), L. R. 7 Ex. 96).

The plaintiff was the owner of a new house, which was divided into two separate flats, an upper and a lower one, each flat having a separate entrance into the street. When the house was built the plaintiff laid a service pipe for gas from the street under the hall door steps, inside the wall of the house, to the upper flat. The tenant to whom the upper flat was let gave notice to the defendants, under s. 11 of the Gasworks Clauses Act, 1871, requiring them to give a supply of gas to the flat. The defendants thereupon made the connection by a pipe from the main under the street to the service pipe, and supplied and fixed a meter in the flat, and turned on the gas. About an hour afterwards an explosion took place, caused by an escape of gas owing to a defect in the service pipe, which the plaintiff had laid, leading to the meter. In an action to recover for the damage done to the house by the explosion, the plaintiff contended that it was the duty of the defendants to see that the pipes by which they supplied the gas to the flat were fit for the purpose; that as the gas belonged to the defendants until it passed through the meter, it was not supplied to the flat until then; and that if the defendants chose to make use of a pipe not laid by themselves, it was their duty to test it to see if it was in good condition. At the trial, COLLINS, J., ruled that there was no duty on the defendants to test the service pipe, and, the jury having found that the defendants had made the connections properly and had not caused the defect in the service pipe, judgment was entered for the defendants. On motion for a new trial, the Court of Appeal dismissed the application, holding that there was no duty on the defendants to test the service pipe laid by the plaintiff, and the case was distinguished from *Burrows* v. *March Gas Co.*, where the service pipe was supplied and laid by the gas company (*Henderson* v. *Newcastle and Gateshead Gas Co.* (1893), 37 Sol. J. 403).

Note.

Owing to a defect in the joining of gas mains, gas escaped into a sewer and thence into a private house, injuring the plaintiff and his family. It was held that the undertakers were liable (*Crowley* v. *Youghal Town Commissioners* (1897), 30 I. L. T. 151).

Owing to an escape of gas in the neighbourhood, a manager of a gas company entered into an adjoining shop to examine the supply pipes with a lighted match which ignited the gas accumulated under the shop floor and caused a serious explosion, whereby two working men in the plaintiff's employ were injured:—*Held*, that the gas company were liable (*Hughes* v. *Ballynahinch Gas Co.* (1899), 33 I. L. T. R. 74). A ruling of Palles, C.B., as to the measure of damage in such cases, *ib.*

As to the common law liability of a gas company for nuisances, see the note under s. 29, *post*, p. 198.

Penalty if water contaminated by gas.

25. Whenever any water within the limits of the special Act shall be fouled by the gas of the undertakers, they shall forfeit to the person whose water shall be so fouled for every such offence a sum not exceeding twenty pounds, and a further sum not exceeding ten pounds for each day during which the offence shall continue after the expiration of twenty-four hours from the service of notice of such offence.

See provisions of the Public Health and other Acts cited, *ante*, p. 192. And see hereon *Batcheller* v. *Tunbridge Wells Gas Go.*, cited at p. 199.

Power to examine gas pipes to ascertain cause of contamination, if notice be given of the same.

26. For the purpose of ascertaining whether such water be fouled by the gas of the undertakers the person to whom the water supposed to be fouled shall belong may dig up the ground and examine the pipes, conduits and works of the undertakers; provided that such person, before proceeding so to dig and examine, shall give twenty-four hours notice in writing to the undertakers of the time at which such digging and examination is intended to take place, and shall give the like notice to the persons having the control or management of the road, pavement, or place where such digging is to take place; and they shall be subject to the like obligation of reinstating the said road and pavement, and the same penalties for delay or any nonfeasance or misfeasance therein, as are hereinbefore provided with respect to roads and pavements broken up by the undertakers for the purpose of laying their pipes.

See a similar section (s. 65) in the Waterworks Clauses Acts, 1847.

Expenses to abide result of examination.

27. If upon any such examination it appeared that such water has been fouled by any gas belonging to the undertakers, the expenses of the digging, examination, and repair of the street or place disturbed in any such examination shall be paid by the undertakers; but if upon such examination it appear that the water has not been fouled by the gas of the undertakers, the person causing such examination to be made shall pay all such expenses, and shall also make good to the undertakers any injury which may be occasioned to their works by such examination.

How expenses to be ascertained.

28. The amount of the expenses of every such examination and repair, and of any injury done to the undertakers, shall, in case of any dispute about the same, together with the costs of ascertaining and recovering the same, be ascertained and recovered in the same manner as damages

Sect. 28. for the ascertaining and recovery whereof no special provision is made are to be ascertained and recovered.

See s. 40, *post*, p. 214, and notes thereto.

Nothing to exempt undertakers from being indicted for a nuisance.

29. Nothing in this or the special Act contained shall prevent the undertakers from being liable to an indictment for nuisance, or to any other legal proceeding to which they may be liable, in consequence of making or supplying gas.

See also s. 9 of the Act of 1871, which also provides that the undertakers shall not be exonerated "from any indictment, action, or other proceeding for nuisance." In *Jordeson* v. *Sutton, Southcoates, and Drypool Gas Co.*, [1899] 2 Ch., at p. 236, LINDLEY, M.R., points out that s. 9 of the Act of 1871 is wider than s. 29 of the Act of 1847, which "may perhaps be confined to nuisances by gas."

Works authorised by Parliament and carried on without negligence may involve a nuisance, for which a company may not be liable (*Brand* v. *Hammersmith Rail. Co.* (1868), L. R. 4 H. L. 171 (vibration occasioned, without negligence, by the passing of trains after a railway was brought into use); *L. B. & S. C. Rail. Co.* v. *Truman* (1885), 11 App. Cas. 45 (yard for cattle traffic which was a nuisance to neighbours)). Where the terms of a statute are not imperative, but permissive, there is a distinction (*Metropolitan Asylum District Managers* v. *Hill* (1881), 6 App. Cas. 193). See also *Canadian Pacific Rail. Co.* v. *Roy*, [1902] A. C. 220; *Withington Local Board* v. *Manchester Corporation*, [1893] 2 Ch. 19; *Attorney-General* v. *Manchester Corporation*, [1893] 2 Ch. 87; *Attorney-General* v. *Guildford Joint Hospital Board* (1895), 12 T. L. R. 54; *Harrop* v. *Ossett (Mayor of)* (1898), 14 T. L. R. 308; *Attorney-General* v. *Rathmines and Pembroke Joint Hospital Board*, [1904] 1 I. R. 161 and *Attorney-General* v. *Nottingham Corporation*, [1904] 1 Ch. 673.

Where undertakers are bound by a nuisance clause similar to that in the text they may be liable for injury caused by the nuisance irrespective of any question of negligence (*Midwood* v. *Manchester Corporation*, [1905] 2 K. B. 597).

Nuisance is anything which renders the enjoyment of life and property uncomfortable (*per* Lord MANSFIELD, *R.* v. *White* (1756), 1 Burr. 337). The matter complained of may be a nuisance although it be not injurious to health (*Ibid.; Bishop Auckland L. B.* v. *Bishop Auckland Iron Co.* (1882), 10 Q. B. D. 138; and *Gaskell* v. *Bayley* (1874), 30 L. T. (N.S.) 516).

By the special Act of a company which incorporated the Gasworks Clauses Act, 1847, it was enacted that the gas should be of a certain purity:—*Held*, by FRY, J., that the company was not justified in causing a nuisance, even if the gas could not be made of sufficient purity without so doing (*Attorney-General* v. *Gaslight and Coke Co.* (1877), 7 Ch. D. 217; *cf. Metropolitan Asylum District Managers* v. *Hill* (1881), 6 App. Cas. 193).

A gas company were authorised by their special Act, which incorporated the general Acts of 1847 and 1871, to construct gasholders and other works on certain land. They proceeded to excavate the land for the purpose of erecting a gasholder. In doing so, they penetrated an underground stratum of quicksand, or sand loaded with stagnant water, geologically known as running silt, which extended into the plaintiff's land as well as their own, the silt or sand largely preponderating over the water. In draining their excavation, the defendants withdrew a large quantity of the running silt from under the plaintiff's land, and thus caused a subsidence of the surface, with consequent structural injury to his houses. The Court of Appeal held that the company's works occasioned a nuisance within the meaning of the nuisance clause in the general Acts. A majority of the judges also held that the plaintiff's land was, under the circumstances, supported not by a stratum of water only, but by a bed of wet sand or running silt, and that, as the subsidence of the plaintiff's land had been caused by the withdrawing of this support, an actionable nuisance at common law had been committed, and that the plaintiff was entitled to damages (*Jordeson* v. *Sutton, Southcoates, and Drypool Gas Co.*,[1899] 2 Ch. 217). This case shows that the nuisance referred to in s. 29 of the Act of 1847, and s. 9 of the Act of 1871, may arise from the construction of works as well as from the process of manufacturing gas, and it also shows that the sections referred to include private nuisance as well as public nuisance.

Under statutory powers the Municipal Corporation of Birkenhead acquired, in connection with their waterworks undertaking, a piece of land distant 150 yards from the plaintiff's dwelling-house and thereon sank a well or bore-hole, and pumped thence large quantities of water which brought with it large quantities of wet running silt. The foundation of the plaintiff's house was thus injured. The plaintiff claimed compensation under s. 12 or s. 6 of the Waterworks Clauses Act, 1847; and arbitrators were duly appointed. Upon their differing the umpire made his award in the form of a special case. He assessed the amount of compensation at £1,200 if the plaintiff was entitled to recover. He found that the defendants were authorised by their Act to do what they had done; that the damage was not caused by the abstraction of water merely but "by the abstraction of the water which carried with it silt from under the premises of the claimant"; and that the weight of the buildings had not caused the damages. BRAY, J., held that the plaintiff was entitled to recover (*Fletcher* v. *Mayor of Birkenhead* (1906), 1 K. B. 605; affirmed on appeal, [1907] 1 K. B. 205).

The plaintiff obtained a supply of water to his house from a well by means of a pipe laid in the main road. The defendants were a statutory gas company with whose special Act the general Acts of 1847 and 1871 were incorporated. The plaintiff brought an action for injunction complaining that owing to the negligence of the company and to the defective state of their gas pipes the water coming to his house was polluted with coal gas and rendered unfit for use. The company sought to prove (1) that these pipes were well laid and that in course of time some escape or diffusion of gas was unavoidable; (2) that the plaintiff's water pipe was itself defective; (3) that the plaintiff's water supply was otherwise unfit for domestic purposes. The court held these contentions to be irrelevant. Inasmuch, however, as the nuisance had ceased after action brought, injunction was not granted; but the court made a declaration that the defendants were not entitled to pollute the plaintiff's water (*Batcheller* v. *Tunbridge Wells Gas Co.* (1901), 65 J. P. 680).

The South Shields Gas Company were authorised to supply gas within their area, and afterwards the corporation obtained a provisional order to supply electricity. In both cases the usual statutory powers to break up streets applied. Owing to the breakage of a gas pipe an escape of gas was caused which found its way into a street box. An explosion of this gas was caused by a spark from the switch connected with an arc lamp pillar. The explosion caused damage to the street box and conduits amounting to £227; and this sum the corporation sought to recover from the South Shields Gas Company. No negligence on the part of the gas company was alleged. The case was tried before Mr. Commissioner A. T. Lawrence, K. C., without a jury. It appeared from the evidence that a builder was employed by the owner or occupier of certain premises to connect their drains with the main sewer. For this purpose he applied to and obtained permission from the borough engineer and surveyor to break up the street. The work was done and the street was reinstated under supervision of the local authority. It was in fact so imperfectly done that in the result the gas pipe became fractured. The learned commissioner held that the cause of the accident was the inadequate way in which the trench had been filled in, and that the work was not properly supervised by the officer of the corporation who had the supervision of it. Judgment was therefore given for the defendants with costs (*South Shields Corporation* v. *South Shields Gas Co.*, Jl. of G. L., March 10th, 1903, p. 643).

Sect. 29.

NOTE.

In *Imperial Gaslight and Coke Co.* v. *Broadbent* (1859), 7 H. L. Cas. 600, the plaintiff being a market gardener at Fulham, brought an action for damages caused to his business by the operations which were carried on at the defendant company's gasworks, which were at first 240 feet off, and had lately been brought nearer to his market garden by the building of a new retort house. The action was referred to arbitration, and nearly two years elapsed before the award was made. The arbitrator awarded damages up to the date of his award. The defendants then still further increased their works. (See the report in 29 L. J. Ch. 377.) The plaintiffs thereupon applied for an injunction. The Vice-Chancellor treated the finding of the arbitrator as equivalent to the finding of a jury, and granted a perpetual injunction. This decision was afterwards confirmed by the Lord Chancellor. On appeal to the House of Lords it was held that there had not been any such acquiescence as to deprive the plaintiff of his right to the injunction, and the orders appealed from were therefore affirmed. The case further decided that the mischief complained of, not having been authorised by the defendants' Acts, the plaintiff's common law remedy was properly applicable, and that he was not left to seek compensation under s. 68 of the Lands Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 18).

When a trade is a nuisance.

It had been decided in *Hole* v. *Barlow* (1858), 4 C. B. (N.S.) 334, that no action lies for the reasonable exercise of a lawful trade in a convenient and proper manner; and this ruling appears to have been based upon a passage in Comyn's Digest, tit. *Action on the case for a Nuisance* (*C*). It subsequently appeared from the judgment of MARTIN, B., in *Stockport Waterworks Co.* v. *Potter* (1861), 7 H. & N. 160, that the jury, in the case of *Hole* v. *Barlow*, found in fact that there was no nuisance; and it was held in the *Stockport Case* that the expression "convenient place" means a place where a nuisance will not be caused to another. Following on that came the case of *Bamford* v. *Turnley* (1862), 3 B. & S. 66, in which the Exchequer Chamber overruled the case of *Hole* v. *Barlow*, and decided that where a man by an act on his own land, such as burning bricks, causes so much annoyance to another in the enjoyment of a neighbouring tenement as to amount *primâ facie* to a cause of action, it is no answer that the act was done in a proper and convenient spot and was a reasonable use of the land: and further, that the fitness of the locality does not prevent the carrying on of an offensive though lawful trade from being a nuisance. This decision was followed by *Cavey* v. *Ledbitter* (1862), 13 C. B. (N.S.) 470, which is to the same effect. And in *Shotts Iron Co.* v. *Inglis* (1882), 7 App. Cas. 518, the House of Lords, referring to *Hole* v. *Barlow* as having been overruled, held that the calcining of iron ore in the open air in the neighbourhood of the respondent's land, whereby his ornamental plantations were being destroyed by fumes, was a nuisance. See also *Attorney-General* v. *Cole & Son*, [1901] 1 Ch. 205; *Colwell* v. *St. Pancras Borough Council*, [1904] 1 Ch. 707; 68 J. P. 286; *Knight* v. *Isle of Wight Electric Light and Power Co.* (1904), 68 J. P. 266.

In *St. Helen's Smelting Co.* v. *Tipping* (1865), 11 H. L. Cas. 642, it appeared that the plaintiff bought an estate in a neighbourhood where many manufacturing works were carried on. Among others there were the works of a copper smelting company. It was not proved whether these works were in actual operation when the estate was bought. The vapours from these works when they were in operation were proved to be injurious to the trees on the plaintiff's estate. At the trial the judge told the jury that (unless by a prescriptive right) every man must so use his own property as not to injure that of his neighbour; but that the law did not regard trifling inconveniences; everything must be looked at from a reasonable point of view, and therefore, in the case of an alleged injury to property, as from noxious vapours from a manufactory, the injury, to be actionable, must be such as visibly to diminish the value of the property; that locality and all other circumstances must be taken into consideration, and that in counties where great works had been and were carried on parties must not stand on extreme rights. The House of Lords held that the direction was right. In this case an important distinction was drawn between an action for a nuisance in respect of an act producing a material injury to property, and one brought in respect of an act producing personal discomfort. It was pointed out in the judgment of WESTBURY, L.C., that, as regards the latter, there were cases where one would have to submit to the discomfort of the circumstances of the place, but that where an occupation is carried on with the result of materially injuring neighbouring property a very different consideration arises. See *Sturgess* v. *Bridgman* (1879), 11 Ch. D. 865.

In a Belfast case, where the plaintiff complained of nuisance caused by large quantities of smoke, smut, colley and grime issuing from a retort house within 70 feet of the premises of the plaintiff, Barton, J., held that the facts proved established the plaintiff's case, and laid down certain principles applicable to such complaints in a busy industrial town. An injunction was granted (*Thompson* v. *Belfast Corporation*, Jl. of G. L., August 2nd, 1904, p. 338).

Other cases as to nuisances.

Where a prescriptive right to foul a stream has been acquired, the fouling must not be enlarged to the prejudice of others (*Crossley* v. *Lightowler* (1867), L. R. 2 Ch. 478; *Baxendale* v. *McMurray* (1867), L. R. 2 Ch. 790).

It has been held in Scotland that when a person has for forty years been committing a nuisance and polluting the atmosphere so as to injure his neighbour's property, the neighbour, having made no complaint during the forty years, cannot sustain an action unless the nuisance is substantially increased. It makes no difference that his own land has been used during the forty years for manufacturing purposes, and is now for the first time being used for residential purposes (*Harvie* v. *Robertson* (1903), 5 F. 338).

Injunction will not be granted in cases where the alleged injury is trifling and transient (*Attorney-General* v. *Cambridge Consumers Gas Co.*, and other cases cited *ante*, pp. 20—25). Where a maker of cocoa-nut matting, using chloride of tin in his bleaching liquid, complained of injury to his fabrics by reason of the chloride of tin being discoloured by sulphuretted hydrogen thrown off in a manufacturing process carried on by the defendant upon adjoining premises, and the evidence showed that, owing to the defendant's precautions, on three occasions only had an appreciable escape taken place, and then only from accidental defects which were immediately remedied—an injunction was refused without prejudice to an action at law (*Cooke* v. *Forbes* (1867), L. R. 5 Eq. 166). Anyone seeking an injunction to restrain an alleged future nuisance, whether public or private, must show a strong case of probability that the apprehended mischief will in fact arise (*Attorney-General* v. *Corporation of Manchester*, [1893] 2 Ch. 87). See also *Attorney-General* v. *Nottingham Corporation* and the cases cited therewith, *ante*, p. 198.

For a case in which the owner of an estate, on which over five hundred houses had been built on leases for ninety-nine years, sought to recover compensation from a gas company for alleged injury to his property by the manner in which the company's works were carried on, see *Chapman* v. *South Metropolitan Gas Co.*, Jl. of G. L., Feb. 28th, 1893, vol. 61, pp. 359, 415, 460.

The owner and occupier of a vacant piece of land in the metropolis surrounded it by a hoarding. People threw filth and refuse over and broke up the hoarding, so that the condition of the land and the use to which it was put constituted a continuing public nuisance. In an action by the Attorney-General (at the relation of the vestry of the parish), it was held that it was a common law duty of the owner of the piece of land to prevent it from being so used as to be a public nuisance, and that the Attorney-General was entitled to an injunction to enforce the performance of that duty (*Attorney-General* v. *Tod Heatley*, [1897] 1 Ch. 560). See further report in 75 L. T. 452. See sequel, 13 T. L. R. 220.

Action by local authority.

By the Public Health (London) Act, 1891 (54 & 55 Vict. c. 76), s. 21 (1), it is provided that "Where any manufactory, building, or premises used for any trade, business process, or manufacture causing effluvia is certified to the sanitary authority by their medical officer of health, or by any two legally qualified medical practitioners, or by any ten inhabitants of the district of such authority, to be a nuisance or injurious or dangerous to the health of any of the inhabitants of the district, such authority shall make a complaint,

Sect. 29.

NOTE.

and if it appears to the petty sessional court hearing the complaint that the trade, business process, or manufacture carried on by the person complained of is a nuisance, or causes any effluvia which is a nuisance or injurious or dangerous to the health of any of the inhabitants of the district, then, unless it is shown that such person has used the best practical means for abating the nuisance, or preventing or counter-acting the effluvia, the person so offending (being the owner or occupier of the premises, or being a foreman or other person employed by such owner or occupier) shall be liable to a fine not exceeding fifty pounds" . . .

See s. 114 of the Public Health Act, 1875, which is similar to but not absolutely identical with the above section.

Under the above section of the Act of 1891, six summonses were issued at the instance of the *Lewisham Borough Council* against the *Crystal Palace Gas Co.*, and were heard at the Greenwich Police Court before Mr. D'Eyncourt. At the earlier period of the proceedings the magistrate expressed himself satisfied that there was sufficient evidence of nuisance, but the company contended that they were using "the best practical means" in their process of gas purification. After much expert evidence and an adjournment under sub-s. (2) of sect. 21, and after certain changes had been made in the coal gas purifiers, the magistrate came to the conclusion that what had been done rectified the nuisance. Inasmuch as to attain this result the borough council had been put to considerable expense, an arrangement was effected on this head between the parties to the satisfaction of the magistrate, and in the final result the summonses were withdrawn. See the proceedings and evidence reported in the Jl. of G. L., Nov. 18th, 1902, pp. 135 *et seq.*

See also the sections (ss. 91 *et seq.*) of the Public Health Act, 1875, and ss. 2 *et seq.* of the Public Health (London) Act, 1891, relating to the summary abatement of nuisances.

Electric lighting provisional orders.

The Board of Trade prior to the passing of the Electric Lighting (Clauses) Act, 1899 (62 & 63 Vict. c. 19), always inserted in provisional orders under the Electric Lighting Acts, a provision to the effect that nothing in the order should exonerate the undertakers from any indictment, action, or other proceedings for nuisance. An enactment to that effect is now contained in s. 81 of the schedule to the Act of 1899.

Where an electric lighting company caused structural injury to a neighbouring house and annoyance and discomfort to the lessee, owing to excavations for the foundations of their engines and to vibration and noise from the working of the same, an injunction was granted (*Shelfer* v. *City of London Electric Lighting Co.*; *Meux's Brewery Co.* v. *City of London Electric Lighting Co.*, [1895] 1 Ch. 287). See further, [1895] 2 Ch. 388. See also *Knight* v. *Isle of Wight Electric Light and Power Co.* (1904), 68 J. P. 266; *Colwell* v. *St. Pancras Borough Council*, [1904] 1 Ch. 707; *Heath* v. *Brighton Corporation* (1908), 72 J. P. 225.

Public Authorities Protection Act, 1893.

The Public Authorities Protection Act, 1893, *post*, p. 1062, provides for a six months' limitation and other protection in the case of any action, prosecution, or other proceeding "against any person for any act done in pursuance or execution or intended execution of any Act of Parliament or of any public duty or authority or in respect of any alleged neglect or default in the execution of any such act, duty, or authority."

Profits of the Company.

And with respect to the amount of profit to be received by the undertakers when the gasworks are carried on for their benefit, be it enacted as follows:

Profits of the company limited.

30. The profits of the undertaking to be divided amongst the undertakers in any year shall not exceed the prescribed rate, or where no rate is prescribed they shall not exceed the rate of ten pounds in the hundred by the year on the paid-up capital in the undertaking, which

Sect. 30.

in such case shall be deemed the prescribed rate, unless a larger dividend be at any time necessary to make up the deficiency of any previous dividend which shall have fallen short of the said yearly rate.

The undertakers cannot pay the income tax in addition to the prescribed rate of dividend (*Ashton Gas Co.* v. *Attorney-General and Others*, [1906] A. C. 10). The undertakers are liable to pay income tax on the whole of the profits when such profits exceed the prescribed rate.

New capital.

When new or additional capital is authorised by Parliament the maximum rate of dividend on such capital is generally fixed at 7 per cent. on the ordinary and 5 per cent. on the preference shares. Since 1876 the sliding scale of price and dividend has been very generally (but not invariably) introduced. The following Standing Order of the House of Commons makes provision with regard to the sale of new shares by auction or tender, and also with regard to the sliding scale:

Gas or water companies—additional capital.

"188. In every bill by which an existing gas or water company is authorised to raise additional capital, provision shall be made for the offer of such capital by public auction or tender at the best price which can be obtained, unless the committee on the bill shall report that such provision ought not to be required, with the reasons on which their opinion is founded.

Sliding scale.

"In the case of every such gas bill it shall be competent to the committee so to regulate the price of the gas to be charged to consumers that any reduction of an authorised standard price shall entitle the company to make a proportionate increase of the authorised dividend, and that any increase above the standard price shall involve a proportionate decrease of dividend."

See also S. O. 140A of the House of Lords, which applies only to auction and tender, and not to sliding scale.

Liability of local authorities possessing gas or waterworks to income tax and other taxes.

The Corporation of Limerick having under the powers of their special Act purchased the Limerick Gasworks, manufactured and sold gas; and the surplus profits, after providing for certain charges and expenses, were applied, in pursuance of the provisions of the special Act, in reducing the town improvement rate:—*Held*, that the gasworks were not occupied for a "public purpose" within the meaning of the Valuation (Ireland) Act, 1854 (17 & 18 Vict. c. 8), s. 2, and were not, therefore, exempt from being rated (*Mayor, etc. of Limerick* v. *Commissioners of Valuation* (1872), Ir. R. 6 Q. B. 420). A harbour board was empowered by Act of Parliament to levy dock dues, etc., to be applied in maintaining the concern, and in paying interest on moneys borrowed; any surplus of income remaining after meeting these charges was directed to be applied in forming a sinking fund to extinguish the debt incurred in the construction of the docks:—*Held*, that the surplus was profit assessable to the income tax (*Mersey Docks and Harbour Board* v. *Lucas* (1883), 8 App. Cas. 891).

The burgh of Irvine, under statutory authority, supplied with water two outside authorities who contracted to pay for the same by levying a compulsory water rate:—*Held*, that as regards the burgh of Irvine, the payment, though derived from taxation, was profit and chargeable with income tax and (following *Mersey Docks and Harbour Board* v. *Lucas*, *supra*) that it was not a valid ground of exemption that the profit so earned was appropriated to a sinking fund (*Harris* v. *Corporation of Irvine* (1900) (Ct. Sess.), 2 F. 1080; 65 J. P. 663).

The Glasgow Water Commissioners were appointed under a local Act of Parliament, by which they were authorised to borrow money on annuities and mortgages, and to acquire the works of certain private water companies which had formerly supplied the city with water, and to bring in an additional supply of water. They were empowered to levy a compulsory rate within the municipal boundary, and also a rate on persons who chose to take the water outside the boundary, and to sell the water to manufacturers and others. The Act required the commissioners to levy a rate sufficient,

Sect. 30.

NOTE.

along with the other income, to cover all actual expenses, including a sum of not less than 1 per cent. on the money borrowed, to be accumulated as a sinking fund for redemption of the annuities and mortgages, and to be applied to no other purpose, any balance to be applied to reduce the rate of the following year:—*Held*, that the surplus after paying expenses was not assessable as profits under the Income Tax Acts (*Glasgow Corporation Water Company* v. *The Solicitor of Inland Revenue* (1875), 2 C. of S. Cas., Rettie, 708). In a later case between the same parties it was held, that while the rates levied within the compulsory area were to be regarded as sums levied to defray the cost of water supply within the district, so that any surplus remaining over could not be regarded as profit, yet any surplus of rates above outlay collected beyond the compulsory area or from sales to manufacturers, was profit, which went to reduce the cost of water supply to those within the compulsory area, and was liable to assessment for income tax under Sched. D. (*Glasgow Water Commissioners* v. *Miller* (1886), 13 C. of S. Cas., Rettie, 489; 2 Tax Cas. 131). Waterworks commissioners were held liable to be assessed in respect of profits derived from selling water by meter to barracks within the area of compulsory supply (*Allan* v. *Hamilton Waterworks Commissioners* (1887), 51 J. P. 727; *cf. Attorney-General* v. *Black* (1871), L. R. 6 Ex. 308; *Attorney-General* v. *Scott* (1873), 28 L. T. 302; and *Mersey Docks and Harbour Board* v. *Lucas* (1883), 8 App. Cas. 891). The Glasgow Corporation Gas Commissioners were empowered to supply gas to the city and its suburbs. The receipts were to be applied: (1) in payment of incidental expenses; (2) in payment of expenses of management and maintenance; (3) in payment of annuities and interest on borrowed moneys; (4) in providing a sinking fund and carrying out extensions; (5) any surplus might be carried to the credit of the corporation for general purposes:—*Held*, that the surplus, including the sum set apart for the sinking fund, was assessable profit (*In re Glasgow Gas Commissioners* (1876), 1 Tax Cas. 122). An English company owning gasworks abroad was held chargeable for the whole profits under the first case of Sched. D., and not merely for the sums remitted to this country under the first case (*Imperial Continental Gas Association* v. *Nicholson* (1878), 37 L. T. 717). A corporation claimed to set off against its profits from market losses which it sustained in the utilization of sewage, in industrial schools, and in baths and parks. Set-off not allowed (*In re Corporation of Birmingham* (1876), 1 Tax Cas. 26). The Corporation of King's Lynn contributed £60,000 towards the making of a cut from the Wash to King's Lynn, and, to enable the corporation to repay the money borrowed for the purpose, the harbour moorings commissioners were empowered by Act of Parliament to levy dues for the use of the corporation on all ships using the cut:—*Held*, that the dues are profits assessable to the income tax (*Sowrey* v. *King's Lynn Harbour Moorings Commissioners* (1886), 2 Tax Cas. 201). A municipal corporation purchasing gasworks in a defective structural condition is not entitled, in the ascertainment of their profits for income tax purposes, to deduct sums set aside annually to be expended in future years on restoring the plant and apparatus (*Clayton* v. *Newcastle-under-Lyme Corporation* (1888), 2 Tax Cas. 416). By the Dublin Corporation Waterworks Act, 1861, the corporation were empowered to construct waterworks for the supply of water to the borough of Dublin and certain extra-municipal districts, and were authorised to borrow money for the purposes of the Act on the rates leviable under it, and were empowered to levy certain rates on the owners and occupiers of property within the borough. They were also authorised to contract with owners or occupiers of property in the extra-municipal districts for the supply of water for domestic use, and to charge a rate or rent for such supply to be called a "contract water rate." By the Dublin Waterworks Act, 1870, it was provided that the income derived from the extra-municipal districts should form, with the city rates, a consolidated fund, available for the payment of principal and interest of loans, and applicable to all purposes of the Act:—*Held*, that the excess of receipts over expenditure in respect of extra-municipal districts was liable to income tax (*Lord Mayor, etc. of Dublin* v. *M'Adam* (1887), 20 L. R. Ir. 497). By a local Act the duty was imposed upon a municipal corporation of lighting a town with gas, and the Act further provided that it should be lawful for the corporation, after lighting the town, to supply private customers with gas. The corporation, from the supply of gas to private consumers, earned profits, on which they were assessed to income tax. They claimed to deduct from these profits the expenses incurred in lighting the town, as being money wholly and exclusively laid out or expended for the purposes of a trade, within the meaning of 5 & 6 Vict. c. 35, s. 100, Sched. D., r. 1, of the rules applying to the first and second cases:—*Held*, that the lighting of the town and the supply of gas to private customers were separate and distinct operations; that no trade was carried on until the respondents, after having lighted the town, began to supply gas to private customers, and therefore the expenses incurred in lighting the town were not money laid out or expended for the purposes of a trade, and the deductions could not be allowed (*Dillon* v. *Corporation of Haverfordwest*, [1891] 1 Q. B. 575).

Rating of gasworks.

In the rating of gasworks the method of valuation is to find what a hypothetical tenant carrying on the same business would give as the rent of the concern, and not to assess on the profits (*Rex* v. *Birmingham Gas Co.* (1823), 1 B. & C. 506). See, however, as to the taking of profits into account, the *Sheffield Case*, *infra*. In respect of land occupied by their pipes, gas companies are rateable to the extent of the increased value of the land in consequence of the pipes being used for the purpose of conveying the gas (*Rex* v. *Brighton Gas Co.* (1826), 5 B. & C. 466; *R.* v. *Cambridge Gaslight Co.* (1838), 8 A. & E. 73; *Rex* v. *Birmingham and Staffordshire Gaslight Co.* (1837), 6 A. & E. 634).

Sheffield Case, 1863.

The property of a gas company lay in five townships (of which the respondent township was one), and consisted of—(1) lands and buildings, with retorts and furnaces and pipes attached thereto, used for the making of gas; (2) of buildings used as storehouses; (3) of buildings used as offices; and (4) of land occupied by mains and pipes for conveying the gas to the company's customers. Of these different kinds of property, the first, second, and third were situated in the respondent and in one of the other townships; but the mains and pipes extended through the respondent and partly into each of the other four townships. The Court of Queen's Bench decided that the rateable value of the whole of the property of the company should be ascertained by—(1) taking from the latest published accounts of the company the sum of the annual gross receipts for sale of gas, and of the residuary products, and for the hire of gas meters and fittings, and work done; (2) by deducting from this amount the gross expenditure, thus leaving the net receipts; and (3) by deducting from such net receipts a proper sum for tenant's profits, and for interest on capital, rates and taxes, the cost of renewal, repairs, and insurance of buildings and plant, and renewal of the mains. The court also held, in accordance with *The Queen* v. *Mile End Old Town* (1847), 10 Q. B. 208, and *The Queen* v. *The West Middlesex Waterworks Co.* (1859), 1 E. & E. 716, that the stations, works, buildings, etc., ought to be valued as fixed property, deriving some additional value from their being used as part of the gasworks. *Held*, also, that the rateable value of the mains and pipes, which would be the residue, after deducting the net rateable value of the stations, works, buildings, and lands within the respondents' township from the value of the whole rateable property of the company, must be apportioned among the different townships, not simply according to the extent of the mains contained in each, but keeping in view also the fact that part of them contributed directly, and part only indirectly, to the profits, as had been held in *The Queen* v. *The West Middlesex Waterworks Co.*, *supra* (*The Queen* v. *The Sheffield United Gaslight Co.* (1863), 32 L. J. M. C. 169; *S. C.*, *sub nom. Sheffield United Gaslight Co.* v. *Sheffield Overseers* (1863), 4 B. & S. 135). Further, as to apportionment between different parishes, see *Sculcoates Union* v. *Hull Dock Co.*, [1895] A. C. 137. See further hereon, the cases cited *post*, p. 520, as to the rating of waterworks.

Lee Case, 1866.

In the *Lee Case*, the following important points were decided:—(1) On assessing gasworks to the poor rate, in ascertaining the gross estimated rental, a deduction ought to be allowed in respect of the cost of the meters, which belong to the gas company, but are put up on the premises of the consumers, and are connected with the service pipes by solder, and by means of those pipes with the company's main, as they are mere chattels; but (2) deductions

Sect. 30.

NOTE.

ought not to be allowed in respect of—1. *Retorts*, which are instruments in which the coals are carbonized and the gas produced, consisting of circular pieces of clay, to which the heat is applied, and also the arches which contain them, and the pipes through which the gas passes to the purifiers, the whole being distinct and severable from the floor and not attached to it by cement or mortar, but only packed with fire-clay.—2. *Purifiers*, which are massive iron vessels standing on a brick base, but not fixed to it, connected with the pipes passing through the soil to the retorts by screw bolts, and in the same way with the pipes passing through the soil to the tanks and gasholders.—3. *Steam engines*, used for driving the machinery, fastened by screw bolts to a stone base fixed in the soil.—4. *Boilers*, set in brickwork, fixed in the soil.—5. *Gasholders*, which are hollow cylindrical vessels of plate-iron, covered at the top, but open at the bottom, and rising and falling by means of pillars and pulleys into circular tanks sunk in the soil, into which the gas passes through purifiers from the retorts.—6. *Trade fixtures*, such as pumps and exhausters, which are fixed to the freehold, but would be removable as tenant's fixtures. For all of these are things which, though capable of being removed, are yet so far attached as that it was intended that they should remain permanently connected with the freehold, viz., the gasworks, and remain permanent appendages to them, as essential for the purpose for which the works were made. And it makes no difference that, by the practice in letting gasworks, the tenant would be compelled to take to and find capital for the purchase of all the above property (*R.* v. *Inhabitants of Lee* (1866), L. R. 1 Q. B. 241).

In the above case the following was the statement relied on by the company:

Gross Receipts.			
Total rental for gas light for the year ending December, 1863			£143,68
Working Expenses.		£	
Coals, 78,563 tons at 15*s.* 3*d.*		59,888	
Materials for purification		984	
		60,872	
Less residual products, viz., coke, breeze, tar and ammoniacal liquor		33,394	
		27,478	
Wages.			
Salaries and commissions		21,537	
Office expenses and stationery		2,014	
Maintenance of works, retorts, etc., including the expenses not only of repairs, but also of reinstatement		20,576	
Meter repairs and fixing		3,100	
Lighting, cleansing and repairing public lamps		2,891	
Bad debts and overcharges		715	
Law expenses		1,000	
Directors and auditors		2,100	
Rates and taxes, 5*s.* 6*d.* in the pound on an assessment of £15,429		4,244	
			85,655
Net receipts			58,034
Occupiers' Share.	£		
Working capital	50,000		
Present value of meters	35,000		
**Present value of retorts ... ...*	*18,000*		
**Present value of fixtures and utensils ... ...*	*97,000*		
	£200,000		
		£	

---

* These two items disallowed by the court.

Occupiers' Share.	£	
Interest 5 per cent. thereon	10,000	
Trade profits, 10 per cent. thereon	20,000	
Risk and casualties, 2½ per cent. thereon	5,000	
		35,000
Gross estimated rental		23,034
Statutable Deductions.		
	£	
Probable average annual costs of renewals and insurance of buildings and apparatus	2,655	
Annual sinking fund, for renewal of trade fixtures and utensils	3,000	
Annual sinking fund for reproduction of mains and pipes	1,950	
		7,605
Rateable value of the whole works		£15,429

	£
Rateable value of the whole works	15,429
Estimated rateable value of stations (not including the meters, retorts, fixtures and utensils, in respect of which above deductions are made)	8,628
Rateable value of mains and pipes	£6,801

As	£143,689	:	£6,801	:	£5,144	:	£243
	Gross Receipts.		Rateable Value of the mains.		Receipts in Lee.		Rateable value of the mains in Lee.

It will be seen by the decision in this case that £18,000 for retorts and £97,000 for fixtures and utensils were not allowed; but the rate of deduction for interest, trade profits and risks, namely, 17½ per cent., was considered fair. The foregoing statement—subject to the alterations made on it consequent on the judgment of the court—remains a guide in estimating rateable value in similar cases. Since the date of the decision (1866) it has been improved upon in some respects. See the valuations employed by the various expert witnesses in the following cases:—*South Metropolitan Gas Co.* v. *St. Olave's Union*, Ryde's Rating Appeals, 1871—1885, p. 305; Jl. of G. L., vol. 37, p. 369; *Gaslight and Coke Co.* v. *City of London Union*, Ryde's Rating Appeals, 1891—1893, p. 204; and Jl. of G. L., vol. 58, pp. 214, 260, 355, 403, 717, 761, 807, 853, 903, 1051; vol. 59, pp. 117, 299, 345, 397, 541, 584; and vol. 61, p. 599. In the course of the latter case the following questions were discussed, but in the judgment they are not separately dealt with:

"(1.) What is the proper rate of interest on tenant's capital?

"(2.) Whether repairs to the rateable hereditament can be regarded as a charge falling on the hypothetical tenant?

"(3.) Whether directors' fees, or the expenses of promoting or opposing bills in Parliament, can be so regarded?

"(4.) Whether superannuation allowances paid to officers retired in consequence of the amalgamation of several companies can be treated as part of the working expenses?

"(5.) On what principle are directly and indirectly productive mains to be distinguished?

"(6.) Whether an unexpected increase in expenditure causing a diminution of profits made up by drawing upon a reserve fund can be regarded as chargeable against the fund represented by the allowance of 2½ per cent. interest on tenant's capital for 'risks and casualties'?" (Ryde's Rating Appeals, 1891—1893, p. 204).

The directly productive mains of a gas company had been assessed in the valuation lists of various parishes at rateable values approximating to

Sect. 30.

NOTE.

9½ per cent. of the gross receipts. The court dismissed the appeals against the lists. In arriving at their decision, the court did not consider the results of any particular year, and declined to lay down any principle as to what year's accounts should be considered. The appellants claimed an allowance of 17½ per cent. on the tenant's capital. The court declined to recognise that there was any rule as to what percentage should be allowed, and did not state what percentage they allowed in this particular case (*South Metropolitan Gas Co.* v. *Woolwich Union Assessment Committee* (1907), 1 Konst. Rating Appeals, 48, London Quarter Sessions).

A gas company supplied to some of the consumers of their gas, prepayment meters (otherwise called "penny-in-the-slot" meters), that is, meters with a box attached into which a penny can be dropped so as to allow a measured quantity of gas to pass through the meters. They also supplied pipes, burners, and other fittings for use with the prepayment meters. The hire of the prepayment meter and fittings was paid for by the consumer by means of an increased price per 1,000 cubic feet of gas consumed. The company also supplied to some of the consumers cooking stoves, some of the stoves being used in connection with ordinary meters, and some in connection with prepayment meters. The hire of the stove was paid for separately by the consumer. In rating the gas company's undertaking upon a basis of the company's gross receipts (which included the sums paid for hire of the prepayment meters, stoves, and fittings), the Recorder held that these articles should be treated as being provided by the hypothetical tenant of the undertaking. He therefore took the value of these articles into account as part of the tenant's capital:—*Held* (assuming the question to be one of law), that the decision of the Recorder was right (*Ipswich Gaslight Co.* v. *Ipswich Union* (1907), 2 Konst. Rating Appeals, 699, K. B. D.).

The owner of a block of artizans' dwellings, consisting of separate tenements, the access to which was by means of a common stair, let the tenements upon the terms of the tenants paying a certain weekly sum by way of rent, and also a further sum for the lighting and cleaning of the common stair:—*Held*, that for the purpose of arriving at the gross value of the tenements under the Valuation (Metropolis) Act, 1869, the sum paid for lighting and cleaning the stair must be added to the rent reserved (*Pullen* v. *St. Saviour's Union*, [1900] 1 Q. B. 138).

The local board of Birkdale had the exclusive right of laying down gas mains and pipes within that township, and were obliged to keep all present and future gas mains and public lamps in good repair, and were to afford the Corporation of Southport (who were the owners and occupiers of gasworks, and were empowered by statute to supply gas in the township of Birkdale) the use of the same mains for the supply of gas for public and private purposes within that township, in consideration of certain payments to be made by the corporation to the local board for every thousand cubic feet of gas supplied to private consumers. The local board had laid mains within the township, and had kept them in repair, and had afforded the corporation the use of the same for the supply of gas. The mains were not used for any purpose other than the supply of gas by the corporation. The corporation laid the service pipes from the mains to the premises of private consumers at the cost of the latter, kept the service pipes in repair, and charged and collected all gas rents:—*Held* (affirming the decision of the Queen's Bench Division, [1893] 2 Q. B. 468), that the corporation had only a right to the use of the mains for the sole purpose of the supply of gas, and had no exclusive occupation of the mains so as to render them liable to be rated in respect of them (*Mayor, etc. of Southport* v. *Ormskirk Union Assessment Committee*, [1894] 1 Q. B. 196).

For an example of the method of valuing a gas undertaking, see *Malton Gas Co.* v. *Malton Union* (1911), 75 J. P. 79.

For a rating case turning on the construction of certain Colonial Acts, see *Melbourne and Metropolitan Board of Works* v. *Metropolitan Gas Co.*, [1905] A. C. 595.

As to assessment of gasworks in Scotland, see *Dundee Gas Commissioners* (1881), 9 Rettie, 1240; *Assessor for Falkirk* v. *Falkirk Gas Co., Ltd.* (1883), 10 Rettie, 651; *Magistrates of Glasgow* v. *Hay* (1884), 12 Rettie, 3, and the

Lands Valuation (Scotland) Amendment Act, 1895 (58 & 59 Vict. c. 41); and *Kirkcaldy Gaslight Co., Ltd.* v. *Assessor for Kirkcaldy* (1905), 42 S. L. R. 510.

The subject of the rateability of gas and water works is further treated, *post*, in the notes to s. 75 of the Waterworks Clauses Act, 1847 (10 & 11 Vict. c. 17).

Arrears of dividend.

The sum required to make up the deficiency for antecedent years may be taken from the profits of any year; see *Matthews* v. *G. N. Rail. Co.* (1859), 28 L. J. Ch. 375.

For some recent instances of clauses inserted in Gas Acts limiting the period for which back dividends may be paid, see Gorleston and Southtown Gas Act, 1903 (3 Edw. 7, c. xxxviii.), s. 14 (no deficiency to be made up "previous to December 31st, 1892"); British Gaslight Company, Limited (Norwich) Act, 1903 (3 Edw. 7, c. xcvii.), s. 5 (no deficiency to be made up "after the expiration of five years from the year in which the deficiency occurred").

Where there are different capitals with the same or different rates of dividend, and there are several years of deficiency of dividends to be made up, it will be better to commence paying off such deficiencies of dividend as have accrued in the immediately preceding years. As the whole capital has earned the profit above what is necessary to pay the statutory dividend, so the whole capital should receive the benefit of being paid back dividends. In this way the previous deficiency of the smaller capital will be at last reached and made good to the holders of the shares representing the then capital.

By their special Act a gas company established before 1847 was authorised to pay dividends limited to 10 per cent. in any one year, and when the sum was reached, if there was a surplus, the price of gas was to be reduced; there was also a provision for a reserve or contingent fund, to be limited to £5,000; afterwards the dividends and interest thereon were to be no longer invested, but applied to any of the general purposes of the undertaking to which the profits of the company were applicable. By another section of the Act it was enacted, that if in any year after the passing of the Act the profit should not amount to 10 per cent. per annum on the amount paid on the shares (whether such deficiency should have occurred before or subsequently to the formation of the contingent fund), such a sum might be taken from the contingent fund as, with the actual divisible profits of such year, would enable the company to make a dividend of 10 per cent. per annum. The dividends paid ranged from 5 to 9 per cent. up to July, 1862, but since then 10 per cent. had been paid, and £3,992 had been accumulated out of the surplus profits. The company sought to apply this sum of £3,992 to the payment of back dividends of past years:—*Held*, by Sir GEORGE JESSEL, M.R., that as long as the company paid 10 per cent. they could not touch the contingent fund, and that they were not entitled in any one year to divide more than 10 per cent., whether from profits or contingent fund, and were not entitled to apply the fund in making up the dividends of past years to 10 per cent. (*Chamberlain* v. *The New Worcester Gaslight Co.*, Jl. of G. L., June 8th, 1875; Times, June 5th, 1875).

The West Kent Water Company was incorporated in 1809. By later Acts of 1811, 1850 and 1862 further capital and additional powers were conferred but none of these incorporated the Waterworks Clauses Act, 1847, or imposed any limitation in regard to dividend. In 1860 another water company was incorporated by special Act, which incorporated the Waterworks Clauses Act, 1847. In 1864, the original company obtained an Act authorising amalgamation with the other company, and this Act incorporated the Waterworks Clauses Act, 1847. Of late years the company had been sufficiently prosperous to be able to make up all deficiencies on previous dividends back to the year 1864, and it now proposed to continue making up to its ordinary shareholders a dividend of 10 per cent. on their stock from the year 1809 down to June 30th, 1864. The capital of the second company being small, it was agreed at the trial not to deal with that matter as a separate issue. Upon the broad question of whether the West Kent Company were entitled to pay

Sect. 30.

NOTE.

back dividends as proposed anterior to 1864 the House of Lords, affirming the decision of the Court of Appeal, held that they were not so entitled (*Kent Waterworks Co.* v. *Lamplough*, [1904] A. C. 27). As to the claim of the Chelsea Waterworks Company to back dividends, made before the Tribunal of Arbitration in connection with the purchase of the Metropolitan Water Companies, see *Chelsea Waterworks Co.* v. *The Metropolitan Water Board*, [1904] 2 K. B. 77, cited *post*, p. 519.

If profits exceed the amount limited, excess to be invested and form a reserved fund.

31. If the clear profits of the undertaking in any year amount to a larger sum than is sufficient, after making up the deficiency in the dividends of any previous year as aforesaid, to make a dividend at the prescribed rate, the excess beyond the sum necessary for such purpose shall from time to time be invested in government or other securities, and the dividends and interest arising from such securities shall also be invested in the same or like securities, in order that the same may accumulate at compound interest until the fund so formed amounts to the prescribed sum, or if no sum be prescribed a sum equal to one-tenth of the nominal capital of the undertakers, which sum shall form a reserved fund to answer any deficiency which may at any time happen in the amount of divisible profits, or to meet any extraordinary claim or demand which may at any time arise against the undertakers; and if such fund be at any time reduced, it may thereafter be again restored to the said sum, and so from time to time as often as such reduction shall happen.

Insurance fund.

Reserve fund.

In more recent gas legislation, where the sliding scale was introduced, the objects of this section were generally secured by two distinct sections, the one providing for the formation of an insurance fund to meet extraordinary claims, and the other providing for the formation of a reserve fund applicable to the making up of the dividend to the authorised rate, but these sections have now been superseded See the Introduction at pp. 10, 11.

Reserved fund not to be resorted to, unless to meet an extraordinary claim.

32. Provided always, that no sum of money shall be taken from the said fund for the purpose of meeting any extraordinary claim, unless it be first certified in England or Ireland by two justices, and in Scotland by the sheriff, that the sum so proposed to be taken is required for the purpose of meeting an extraordinary claim within the meaning of this or the special Act.

As to the reserve fund in undertakings coming under the new legislation and adopting the sliding scale, see the Introduction at p. 11.

Money taken from the "reserved fund," under s. 34, *infra*, for the purpose of making up deficiency in the amount of dividend, is not an extraordinary claim or demand, and therefore does not require to be certified by two justices or the sheriff.

When fund amounts to prescribed sum, interest to be applied to undertaking.

33. When such fund shall, by accumulation or otherwise, amount to the prescribed sum, or one-tenth of the nominal capital of the company, as the case may be, the interest and dividends thereon shall no longer be invested, but shall be applied to any of the general purposes of the undertaking to which the profits thereof are applicable.

If profits are less than the prescribed rate, the re-

34. If in any year the profits of the undertaking divisible amongst the undertakers shall not amount to the prescribed rate, such a sum may be taken from the reserved fund as, with the actual divisible profits of such year, will enable the undertakers to make a dividend of the amount aforesaid, and so from time to time as often as the occasion shall require.

Sect. 34.

served fund to supply deficiency.

See the Introduction at p. 11.

35. In England or Ireland the court of quarter sessions, and in Scotland the sheriff, may, on the petition of any two gas ratepayers within the limits of the special Act, nominate and appoint some accountant or other competent person, not being a proprietor of any gasworks, to examine and ascertain, at the expense of the undertakers (the amount of such expense to be determined by the said court or sheriff), the actual state and condition of the concerns of the undertakers, and to make report thereof to the said court at the then present or some following sessions, or to the sheriff; and the said court or sheriff may examine any witnesses upon oath touching the truth of the said accounts and the matters therein referred to; and if it thereupon appear to the said court or sheriff that the profits of the undertakers for the preceding year have exceeded the prescribed rate, the undertakers shall, in case the whole of the said reserved fund has been and then remains invested as aforesaid, and in case dividends to the amount hereinbefore limited have been paid, make such a rateable reduction in the rate for gas to be furnished by them as in the judgment of the said court or sheriff shall be proper, but so as such rates, when reduced, shall ensure to the undertakers (regard being had to the amount of profit before received) a profit as near as may be to the prescribed rate.

If profits are more than the amount prescribed, a rateable reduction to be made in the price of gas.

Where the sliding scale is sanctioned, and the modern enactments as to insurance fund and reserve fund and the enactments by which these have in turn been superseded have been introduced, the above section is superseded (see the Introduction at p. 10). Certain consumers of gas brought an action against the Ashton Gas Company, alleging that the company had created a reserved fund greatly in excess of that authorised by its special Acts, and had carried over from year to year large undivided profits, thereby avoiding the obligation upon the company to reduce the price of the gas:—*Held* (Lord ESHER, M.R., *dissentiente*), that no such duty as alleged was imposed by the Acts on the company; that the consumers had no control over the affairs of the company, and were not, therefore, entitled to raise the question, the shareholders alone being interested, and that the court could not order the reserve fund and undivided profits to be applied in reduction of the price of the gas in the manner suggested (*Mason* v. *Ashton Gas Co.* (1886), 54 L. T. 708). The case had been tried before MATHEW, J., who granted a *mandamus* directing the defendants to reduce the price of their gas so as to exhaust the excess in their reserved fund. This judgment was reversed in the Court of Appeal. The Ashton Gas Act, 1877, had introduced the sliding scale, and authorised the formation of an insurance fund and a reserve fund in the terms at that time usual upon adoption of the sliding scale. In delivering the judgment of LINDLEY, L.J., and himself, LOPES, L.J., remarked: "The plaintiffs, as gas consumers, have no interest whatever in the assets of the company, except this, that if the company were to raise the price of gas and not diminish their dividends, as required by s. 17, the gas consumers might obtain an injunction to restrain the company for so doing. But no such case as this was raised before us; and in the view we take of the absence of all right on the part of the plaintiffs to have the price of gas fixed or regulated by the court, it follows that, in our opinion, the plaintiffs are not entitled to raise any question as to whether the gas insurance and reserve funds are, or are not, larger than the Act authorises. Those are matters

Insurance fund; reserve fund; special purposes fund.

Sect. 35.

NOTE.

with which the plaintiffs have no concern. The only persons competent to raise such questions are the shareholders or the Attorney-General. It was suggested that the accumulated profit having arisen from overcharging the gas consumers, it belonged to them. Even if the accumulated fund had so arisen, it would not be right to order the fund to be applied in reducing the price of gas, for that would be in effect to distribute the fund, not amongst those who had been overcharged, and from whom the fund had been obtained, but amongst future consumers of gas—a different class of persons."

The court of quarter sessions has no jurisdiction, under s. 35 of the Gasworks Clauses Act, 1847, to appoint a gas engineer to assist an accountant appointed thereunder to examine and ascertain the actual state and condition of the concerns of the gas company, and where such order is made a writ of *certiorari* will lie to bring the order up to be quashed (*R.* v. *Brindley* (1886), 54 L. T. 435).

A petition was, under the above section, presented to the Recorder of Hanley praying him to appoint a person to inquire into the actual condition of the undertaking of the prosecutors, and an accountant was appointed. During the inquiry he examined not only the accounts of the then previous year, but re-opened all the accounts of previous years to 1871, and a report based upon this inquiry was sent in by him to the recorder. It was admitted that the whole of the reserved fund was not then and never had been invested, and that the prescribed maximum dividend had not been paid. The recorder being of opinion that the accounts when amended showed that the company had in point of fact earned enough to pay the prescribed maximum dividend, and to have invested and kept invested the whole of the reserve fund, made an order reducing the price of gas 6*d.* per 1,000 cubic feet. He further ordered the prosecutors to pay £650, the expense of the proceedings before the accountant, and to pay to the petitioners £2,433 6*s.* 6*d.*, "their costs of and incident to the petition." Upon an application for a writ of *certiorari* to quash the order as having been made without jurisdiction:—*Held*, that the order to reduce the price of gas was bad, the power of the recorder being absolutely restricted by s. 35 to cases where the whole of the reserved fund has been invested and the prescribed dividend paid; and that the recorder acted without jurisdiction in ordering the costs of the petitioners to be paid by the prosecutors. *Per curiam:* The accountant and the recorder had jurisdiction to inquire into the accounts of past years for the purpose of ascertaining the actual condition of the concern; but *semble* that they had no power to disallow and re-cast them, and by so doing vary the accounts of the year into which they were inquiring (*R.* v. *The Recorder of Hanley* (1887), 19 Q. B. D. 481).

For some other instances in which proceedings have been taken before justices or recorders under s. 35, see the following cases reported in the Journal of Gas Lighting:—*Winchester Water and Gas Co.*, 1881, vol. 38, pp. 755, 837 (also reported 45 J. P. 472, 851); *Stretford Gas Co.*, 1882, vol. 39, p. 1073; *Leamington Gas Co.*, 1886-7, vol. 48, pp. 25, 750; vol. 49, pp. 73, 680; *Rastrick Gas Co.*, 1888, vol. 52, p. 723; *Liverpool United Gaslight Co.*, 1895, vol. 66, p. 925; *Ossett Gas Co.*, 1899, vol. 73, p. 923, and vol. 74, p. 61; *Devonport Gas Co.*, 1901, vol. 77, p. 148 and p. 1004.

For an instance where instead of two "gas ratepayers" a local authority has been authorised by a special gas Act to put the above section into operation, see the Scarborough Gas Act, 1895, s. 19.

Court may order petitioner to pay costs of groundless petition.

36. Provided always, that if, in the case of any petition so presented, it appear to the said court or sheriff that there was no sufficient ground for presenting the same, the said court or sheriff may, if they or he think fit, order the petitioner to pay the whole or any part of the costs of or incident to such petition (the amount thereof to be determined by the said court or sheriff), and the costs so ordered to be paid shall be recoverable in the same way as damages are recoverable under this or the special Act.

Penalty on undertakers for refusing to produce books, vouchers, etc.

37. If the undertakers shall, for seven days after being required to produce to the said court or sheriff, or to the said accountant or other person as aforesaid, any books of account or other books, bills, receipts, vouchers, or papers relating to the pecuniary affairs of the undertakers, refuse or neglect to produce such books, bills, receipts, vouchers, or papers, they shall forfeit the sum of one hundred pounds for every such refusal or wilful neglect, and the further sum of ten pounds for every day such refusal or wilful neglect shall continue after the expiration of the said seven days; such respective penalties to be recovered by any person who will sue for the same, with full costs of suit, in any of the superior courts.

Annual account to be made up by undertakers, and sent to the clerk of the peace in England or Ireland, or to the sheriff clerk in Scotland, and to be open to inspection.

38. And with respect to the yearly receipt and expenditure of the undertakers, be it enacted, that the undertakers shall, in each year after they have begun to supply gas under the provisions of this or the special Act, cause an account in abstract to be prepared of the total receipts and expenditure of all rents or funds levied under the powers of this or the special Act for the year preceding, under the several distinct heads of receipt and expenditure, with a statement of the balance of such account, duly audited and certified by the chairman of the undertakers, and also by the auditors thereof, if any; and a copy of such annual account, if the gasworks be situated in England or Ireland, shall be transmitted, free of charge, to the clerk of the peace for the county in which the gasworks are situate, and if the gasworks be situated in Scotland, such copy shall be transmitted, free of charge as aforesaid, to the sheriff clerk of such county, and such transmission shall be made on or before the thirty-first day of January in each year, under a penalty of twenty pounds for each default; and the copy of such account so sent to the said clerk of the peace or sheriff clerk shall be kept by him, and shall be open to inspection by all persons at all seasonable hours, on payment of one shilling for each inspection.

See notes to s. 35 of the Act of 1871, *post*, p. 240, which prescribes forms of account, and requires a copy to be sent to the local authority. These forms as well as a working statement will be found, *post*, at pp. 250—257. And see ss. 101 *et. seq* of the Companies Clauses Consolidation Act, 1845, as to auditors.

See also *Leamington Priors Gas Co.* v. *Davis*, cited in the note under s. 35 of the Act of 1871.

39. [*Tender of Amends.*]

This section has been repealed by the Statute Law Revision Act, 1894, possibly on the assumption that the protection of the Public Authorities Protection Act, 1893 (56 & 57 Vict. c. 61), applies to all gas undertakers, whether local authorities or gas companies. The decided cases under the Act of 1893 show, however, that the Act does not protect trading companies. The Act and the cases will be found at p. 1062, *post*. The corresponding section (141) as to tender of amends in the Companies Clauses Consolidation Act, 1845, has also been repealed by the Statute Law Revision Act, 1894, but s. 135 of the Lands Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 18), remains unrepealed.

Sect. 39.

Recovery of damages and penalties.

And with respect to the recovery of damages not specially provided for, and of penalties, and to the determination of any other matter referred to justices or to the sheriff, be it enacted as follows:

The Railways Clauses Consolidation Act, 1845, as to damages, etc., to be incorporated with this and the special Act.

40. If the gasworks be in England or Ireland, the clauses of the Railways Clauses Consolidation Act, 1845, with respect to the recovery of damages not specially provided for, and of penalties, and to the determination of any other matter referred to justices, shall be incorporated with this and the special Act; and if the gasworks be in Scotland, the clauses of the Railways Clauses Consolidation Act (Scotland), 1845, with respect to the recovery of damages not specially provided for, and to the determination of any other matter referred to the sheriff or to justices, shall be incorporated with this and the special Act, and such clauses shall apply to the gasworks and to the undertakers respectively, and shall be construed as if the word "undertakers" had been inserted therein instead of the word "company."

Railways Clauses Act, 1845.

The following are the sections of the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), applicable to recovery of damages and penalties:

> Section 140. In all cases where any damages, costs, or expenses are by this or the special Act, or any Act incorporated therewith, directed to be paid, and the method of ascertaining the amount or enforcing the payment thereof is not provided for, such amount, in case of dispute, shall be ascertained and determined by two justices; and if the amount so ascertained be not paid by the company or other party liable to pay the same within seven days after demand the amount may be recovered by distress of the goods of the company or other party liable as aforesaid; and the justices by whom the same shall have been ordered to be paid, or either of them, or any other justice on application, shall issue their or his warrant accordingly.
>
> Section 141. Enacts that, if sufficient goods of the company cannot be found, distress may, in cases not exceeding £20, issue against goods of treasurer after notice, who may sue the company for recovery of same.
>
> Section 142. Gives justices power to issue summons and to determine the question raised in the summons and award costs.
>
> Section 143. The company are to publish short particulars of any offences for which penalty is imposed, and affix the same on a board in some conspicuous place—and renew the same when obliterated.
>
> Section 144. Provides a penalty on anyone defacing boards used for such publication.
>
> Section 145. Every penalty or forfeiture imposed by this or the special Act, or by any byelaw made in pursuance thereof, the recovery of which is not otherwise provided for, may be recovered by summary proceeding before two justices.
>
> Section 146. *Provides that penalties and costs may be levied by distress.*
>
> Section 147. *Empowers justices to detain offenders until return is made to warrant of distress, and if no sufficient distress, offenders may be committed to gaol for any period not exceeding three months.*
>
> Section 148. Directs distress to be levied by sale of goods of party, and the overplus, if any, to be repaid.
>
> Section 149. Provides that the distress is not to be unlawful for want of form.

Section 150. Allows justices to award one half of penalty to informer and remainder to overseers. [*Cf.* s. 43 of the Waterworks Clauses Act, 1847, and s. 36 of the Gasworks Clauses Act, 1871.]

Section 151. *All penalties must be sued for within six months after commission of offence.*

Section 152. If there be any damage, this is to be made good in addition to the penalty.

Section 153. *Authorises justices to summon witnesses, who are to be liable to a penalty of £5 for non-appearance or refusing to be examined.*

Section 154. Authorises officers of company to detain persons who have committed any offence, if their name and residence be unknown.

Section 155. *Gives the form of conviction.*

Section 156. Directs that proceedings are not to be vacated for want of form.

Section 157. Provides an appeal to quarter sessions.

Section 158. Enables quarter sessions to hear and determine the appeal, and to adjudge costs.

Section 159. Penalties accruing in the metropolitan district to be paid to receiver of metropolitan police district, in accordance with provisions of the Act for regulating the police courts of the metropolis (2 & 3 Vict. c. 71).

Section 160. Provides that persons giving false evidence shall be liable to the penalties of wilful and corrupt perjury.

By the Summary Jurisdiction Act, 1884 (47 & 48 Vict. c. 43), those of the foregoing sections which are in italics are repealed (as also are parts of ss. 145 and 157) with regard to England, and the provisions of the Summary Jurisdiction Act, 1848 (11 & 12 Vict. c. 43), amended by the Summary Jurisdiction Act, 1879 (42 & 43 Vict. c. 49), are substituted. Proceedings for the recovery of penalties will in future be regulated by the Summary Jurisdiction Acts. Section 5 of the Act of 1884 provides that "Where by virtue of the repeal enacted by this Act or otherwise any statute authorising the infliction by any justice or justices of a penalty or fine, either as a sole punishment or as an alternative punishment for imprisonment, provides no method for the recovery of such penalty or fine, sections nineteen and twenty-one of the Summary Jurisdiction Act, 1848, as amended by section twenty-one of the Summary Jurisdiction Act, 1879, shall apply to the recovery of such penalty or fine." "Damages, costs and expenses" will continue to be recoverable as hitherto under the provisions of s. 140 of the Railways Clauses Consolidation Act, 1845.

By the Summary Jurisdiction Act, 1848 (11 & 12 Vict. c. 43), s. 33, any metropolitan police magistrate, and any stipendiary magistrate appointed for any town, liberty, borough, or place, and sitting at a police court or other place appointed in that behalf, shall have full power to do alone whatever is authorised to be done by one or more justice or justices of the peace. See also 21 & 22 Vict. c. 73, s. 1, and especially s. 42, *infra.*

In Scotland the proceeding is under the corresponding sections of the Railways Clauses (Scotland) Act, 1845. The remedy is poinding instead of distress, and the tribunal is the sheriff substitute instead of justices. Various sections and parts of sections of the Railways Clauses (Scotland) Act have been repealed by the Statute Law Revision Act, 1892. The Summary Jurisdiction (Scotland) Act, 1908, now governs the procedure in Scotland for recovery of penalties.

The section in the text is identical with s. 85 of the Waterworks Clauses Act, 1847, *post.* Under that Act it has been decided that the Summary Jurisdiction Act, 1848 (11 & 12 Vict. c. 43), s. 11 (which limits the time for making a complaint to six months from the time when the matter of

Sect. 40.

NOTE.

such complaint arose) applies to the hearing of a summons before justices for arrears of water rate under s. 85 of the Waterworks Clauses Act, 1847, and s. 140 of the Railways Clauses Act, 1845 (*East London Waterworks Co.* v. *Charles*, [1894] 2 Q. B. 730).

In the above case of *East London Waterworks Co.* v. *Charles*, no question was raised as to whether it was necessary to demand payment in writing before it could be said that a matter of complaint arose within the meaning of s. 11 of the Summary Jurisdiction Act, 1848. Notice in writing had in fact been given in that case, and more than six months expired since the giving of the notice. In a case decided a few months later, the question was raised as to whether previous notice in writing was necessary, a summons having been taken out under s. 74 of the Waterworks Clauses Act, 1847, to recover water rates due. The magistrate decided that no demand having been made, there could be no neglect to pay within the meaning of s. 74. A Divisional Court on a case stated, held that, as under s. 70 the water rates were payable in advance, no previous demand was necessary, and therefore that a demand was not a condition precedent to the right to proceed summarily (*East London Waterworks Co.* v. *Kyffin*, [1895] 1 Q. B. 55). This decision must be taken in connection with the following words of MATHEW, J., in giving judgment: "It is said that he had no means of knowing this amount, and that he was therefore justified in not paying until he did know it. I cannot think why a formal demand should be necessary in order to tell the owner the exact amount that is due. As I have already said that is a thing which he would be likely to know, and it is not stated in the case that he did not know it." This question as to whether previous demand is or is not a condition precedent to the jurisdiction of justices, again arose incidentally in *Elliott* v. *Russell*, [1902] 2 K. B. 748, but it was not necessary for the purposes of that case that the court should decide the point. Lord ALVERSTONE, C.J., in the course of his judgment remarked, "I do not think that the decision in *East London Waterworks Co.* v. *Kyffin* is in conflict with our decision in this case, nor do I think that the court intended to lay down any such general principle as was contended for, namely, that under no circumstances was any demand necessary. I do not understand the decision to go that length; and if it did go that length, I should doubt whether sufficient consideration was given to the matter. MATHEW, J., in that case pointed out that the dispute between the parties had been known for some time, and the whole question was whether a formal notice was necessary before the man could be summoned; but I do not understand MATHEW, J., as laying down the proposition that under no circumstances is any demand necessary before the time begins to run. I think that the case was used in argument here for supporting propositions larger than the decision justifies." This case is more fully referred to *post*, p. 511. In a case which arose under the Metropolitan Building Act, 1855 (18 & 19 Vict. c. 122), it appeared that s. 73 of that Act authorised the commissioners under that Act, in certain cases, to take down, etc., dangerous structures, and to recover the expense incurred from the owner in a summary manner as directed by the 11 & 12 Vict. c. 43. Demand was made in writing for payment, and afterwards a summons was issued. The question arose as to the period from which the six months limited by s. 11 of the last-mentioned Act was to run. For this purpose it was necessary to decide whether the demand in writing was necessary or not:—*Held*, that the demand in writing was necessary, and that the six months ran from the demand and refusal, and not from the incurring of the expense. Lord CAMPBELL, C.J., observed, "It is true that a demand is not expressly required; but I think that till then the liability does not accrue" (*Labalmondiere* v. *Addison* (1858), 1 E. & E. 41).

Sect. 73 of the Town Police Clauses Act, 1847, is identical with s. 40 of the Gasworks Clauses Act, 1847, and it has been held that a determination of justices under s. 33 of the Town Police Clauses Act, 1847, of the amount of the expenses incurred by a local authority in sending a fire brigade to a fire outside their district is not "an order for payment or otherwise" within the meaning of s. 8 of the Summary Jurisdiction Act, 1848; and that, therefore,

NOTE.

a complaint with reference to such determination under s. 33 need not be made within six months of the fire, as s. 11 of the Summary Jurisdiction Act, 1848, does not apply to such a complaint (*R.* v. *Part* (1906), 70 J. P. 398).

Sect. 145 of the Railways Clauses Consolidation Act, 1845, applies only to penalties or forfeitures, "the recovery of which is not otherwise provided for." A water Act provided for compensation water being supplied to certain streams, and enacted that "the corporation shall for every day on which such neglect occurs forfeit and pay to the occupiers of each of the mills and works affected thereby (who may sue for and recover the same) the sum of £5. . . ." Certain millowners having brought actions to recover £5 for each day of default in sending down compensation water, the point was raised whether the remedy of the plaintiff ought not to be under s. 145 of the Railways Clauses Act. The court decided that the special Act had otherwise provided by the use of the words "who may sue for and recover the same" (*Meltham Spinning Co., Ltd.* v. *Huddersfield Corporation; Bent Ley Silk Mills Co.* v. *Same* (1903), 89 L. T. 403).

A corporation cannot sue for penalties as a common informer, unless expressly empowered by statute so to do (*St. Leonard's, Shoreditch* (*Guardians of*) v. *Franklin* (1878), 3 C. P. D. 377). *Cf. R.* v. *Londonderry, JJ.*, [1903] 2 Ir. 747.

In Ireland part of penalties to be paid to guardians of unions.

41. [*Repealed by the Statute Law Revision Act,* 1875 (38 & 39 Vict. c. 66).]

All things required to be done by two justices in England and Ireland may in certain cases, be done by one, and in Scotland by the sheriff, etc.

42. All things herein or in the special Act, or any Act incorporated therewith, authorised or required to be done by two justices, may and shall be done in England and Ireland by any one magistrate having by law authority to act alone for any purpose with the powers of two or more justices, and in Scotland by the sheriff . . . of any county . . . or his substitute.

Certain words omitted repealed by Statute Law Revision Acts, 1891 and 1894 (54 & 55 Vict. c. 67, and 57 & 58 Vict. c. 56).

See 11 & 12 Vict. c. 43, s. 33, cited in notes to s. 40, and 21 & 22 Vict. c. 73, s. 1.

Penalties, etc. imposed in respect of offences committed within the metropolitan police district to be paid to the receiver, and applied under 2 & 3 Vict. c. 71.

43. Every penalty or forfeiture imposed by this or the special Act, or any Act incorporated therewith, or by any byelaw in pursuance thereof, in respect of any offence which shall take place within the metropolitan police district, shall be recovered, enforced, accounted for, and, except where the application thereof is otherwise specially provided for, shall be paid to the receiver of the metropolitan police district, and shall be applied, in the same manner as penalties or forfeitures, other than fines upon drunken persons, or upon constables for misconduct, or for assaults upon police constables, are directed to be recovered, enforced, accounted for, paid, and applied, by an Act passed in the third year of the reign of her present Majesty, intituled "An Act for regulating the police courts in the metropolis"; and every order or conviction of any of the police magistrates in respect of any such forfeiture or penalty shall be subject to the like appeal, and upon the same terms, as is provided in respect of any order or conviction of any of the said police magistrates by the said last-mentioned Act; and every magistrate by whom any order or conviction shall have been made shall have the same power of binding over the witnesses who shall have

Sect. 43. been examined; and such witnesses shall be entitled to the same allowance of expenses, as they would have had or been entitled to in case the order, conviction, and appeal had been made in pursuance of the provisions of the said last-mentioned Act.

See s. 47 of the Act here mentioned, which may now be cited as the Metropolitan Police Courts Act, 1839 (Short Titles Act, 1896 (59 & 60 Vict. c. 14)).

Persons giving false evidence liable to penalties of perjury.

44. Every person who, upon any examination upon oath under the provisions of this or the special Act, or any Act incorporated therewith, shall wilfully and corruptly give false evidence, shall be liable to the penalties of wilful and corrupt perjury.

Access to special Act.

And with respect to access to the special Act, be it enacted as follows:

Copies of special Act to be kept by undertakers in their office, and deposited with the clerks of the peace, etc., and be open to inspection.

45. The undertakers shall at all times after the expiration of six months after the passing of the special Act keep in their principal office of business a copy of the special Act, printed by the printers to her Majesty, or some of them, and shall also within the space of such six months deposit in the office of the clerk of the peace in England or Ireland, and of the sheriff clerk in Scotland, of the county in which the undertaking is situated, a copy of such special Act, so printed as aforesaid; and the said clerk of the peace and sheriff clerk shall receive, and they and the undertakers respectively shall keep, the said copies of the special Act, and shall permit all persons interested to inspect the same, and make extracts or copies therefrom, in the like manner and upon the like terms, and under the like penalty for default, as is provided in the case of certain plans and sections by an Act passed in the first year of the reign of her present Majesty, intituled "An Act to compel clerks of the peace for counties, and other persons, to take the custody of such documents as shall be directed to be deposited with them under the standing orders of either House of Parliament."

7 Will. 4 & 1 Vict. c. 83.

This Act of 7 Will. 4 & 1 Vict. c. 83, may now be cited as "The Parliamentary Documents Deposit Act, 1837" (Short Titles Act, 1896). See its provisions, *post.*

Penalty on undertakers failing to keep or deposit such copies.

46. If the undertakers fail to keep or deposit, as hereinbefore mentioned, any of the said copies of the special Act, they shall forfeit twenty pounds for every such offence, and also five pounds for every day afterwards during which such copy shall be not so kept or deposited.

Undertakers not exempt from the provisions of 57 Geo. 3, c. cxxix. or from the laws regulating sewers.

47. And be it enacted, that nothing in this Act contained shall be deemed to exempt the undertakers from the provisions of an Act passed in the fifty-seventh year of the reign of his late Majesty King George the Third, intituled "An Act for better paving, improving, and regulating the streets of the metropolis, and removing and preventing nuisances and obstructions therein," or from the laws of sewers for the time being in force within ten miles from the Royal Exchange in the City of London.

Sect. 47.

NOTE.

The Act here referred to is generally known as Michael Angelo Taylor's Act. It is a local and personal Act. It will be found in Chitty's Statutes under "Metropolis." The Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), ss. 110 *et seq.*, and the Metropolis Management Act, 1862 (25 & 26 Vict. c. 102), s. 82, contain certain provisions in regard to the breaking up and reinstatement of streets by gas and water companies. Under these Acts it has been held that a local authority is entitled to recover from a water company not only the cost of reinstating and making good the soil and pavement of any street which has been opened up for the purposes of such company, but also a reasonable charge for the supervision of the work (*New River Co.* v. *Westminster Corporation* (1904), 73 L. J. K. B. 1009).

Nothing in this or the special Act to affect the rights of the Crown.

48. Nothing in this or the special Act shall be deemed to extend to or affect any Act of Parliament relating to her Majesty's duties of customs or excise, or any other revenue of the Crown, or to extend to or affect any claim of her Majesty in right of her Crown or otherwise howsoever, or any proceedings at law or in equity, by or on behalf of her Majesty, in any part of the United Kingdom of Great Britain and Ireland.

Undertakers not exempted from provisions of any future general Act.

49. Nothing herein or in the special Act contained shall be deemed to exempt the undertakers from any general Act relating to gasworks, or any Act for improving the sanitary condition of towns and populous districts, which may be passed in the same session in which the special Act is passed, or any future session of Parliament.

See *Dudley Gasworks Co.* v. *Warmington*, cited *post*, p. 221.

50. [*Act may be amended, etc.*]

Repealed by Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66).

GASWORKS CLAUSES ACT, 1871.

(34 & 35 VICT. c. 41.)

An Act to amend the Gasworks Clauses Act, 1847.
[13th July, 1871.]

WHEREAS it is expedient that the provisions contained in the Gasworks Clauses Act, 1847, should be amended: Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords spiritual and temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows: (that is to say,)

10 & 11 Vict. c. 15, and this Act to be construed together.

1. The Gasworks Clauses Act, 1847, and this Act, shall be construed together as one Act, and the provisions of this Act shall be held to repeal and supersede such of the provisions of that Act as are inconsistent with this Act.

Short title.

2. This Act may be cited as "The Gasworks Clauses Act, 1871."

Sect. 3.

Application of Act.

3. The provisions of this Act shall apply to every gas undertaking authorised by any special Act hereafter passed, or by any provisional order made under the authority of the Gas and Water Works Facilities Act, 1870, save where the said provisions are expressly varied or excepted by any such special Act or provisional order; and every such special Act and provisional order is in this Act included in the term "the special Act."

This provision differs from the preamble and fifth clause of the Act of 1847, which made the incorporation of that Act permissive.

By s. 2 of the Metropolis Gas Act, 1860, the Act of 1847 is incorporated with that Act, and made to apply to the several metropolitan gas companies enumerated. By s. 1 of the Act of 1871, the Act of 1847, and that Act, "shall be construed together as one Act." A question arose whether one of the enumerated metropolitan gas companies became subject to the Act of 1871 by reason of the Act of 1847 having been made by the Act of 1860 to apply to them. It was held that all the enumerated companies became subject to the Act of 1871 (*Commercial Gas Co.* v. *Scott* (1875), L. R. 10 Q. B. 400). Accordingly, where the company had improperly cut off the supply of gas from the respondent, it was held that the company were liable to the penalties provided by s. 36 of the Act of 1871, where the undertakers "neglect or refuse to supply gas to any owner or occupier of premises within the limits of the special Act entitled to the same." The words of LUSH, J., at p. 404, "I cannot therefore entertain the slightest doubt that every provision in the Act of 1871 governs all the London gas companies," must be taken with this caution, that the private Acts of these companies contain various special provisions which alter or qualify the corresponding provisions of the general Acts on particular points. The decision in *Commercial Gas Co.* v. *Scott* was given on June 8th, 1875, and the company, having then a private Bill in Parliament (which afterwards became law on August 11th, 1875) obtained the insertion therein of a provision to the effect that the Gasworks Clauses Act, 1871, shall not extend or apply to the Commercial Company. See s. 3 of the Act, *post*, p. 309.

In *South Metropolitan Gas Co.* v. *Noakes* (1889), 61 L. T. 556, the same question arose. The company is one of the companies enumerated in the Metropolis Gas Act, 1860. By s. 17 of the Act of 1860, a penalty is imposed upon a gas company if they wilfully fail for seven days after notice in writing by the consumer to furnish a supply of gas. If the Act of 1871 applied, then s. 11 provides that every owner or occupier of a house requiring a supply of gas shall serve a notice upon the undertakers specifying the premises and the day (not being an earlier day than a reasonable time after such notice) upon which such supply is to commence. It was again held that the Act of 1871 applied to the enumerated metropolitan companies, and that, s. 11 of the Act of 1871 being inconsistent with the provision as to seven days' notice in s. 17 of the Act of 1860, these companies are bound to give a supply of gas within a reasonable time after notice by the consumer, and are not entitled to seven days' notice. It seems to have been overlooked in this case that by the South Metropolitan Gas Act, 1881 (44 & 45 Vict. c. clxxii.), s. 2, it is enacted that "the . . . and the Gasworks Clauses Act, 1847, except where expressly varied by this Act, are incorporated with and form part of this Act, and the Gasworks Clauses Act, 1871, shall apply to the existing undertaking of the company as if the same were hereby authorised"; and also that by the South Metropolitan Gas Act, 1882 (45 Vict. c. xxxviii.), s. 2, it is enacted that "the . . . and the Gasworks Clauses Act, 1847, except where expressly varied by this Act, are incorporated with and form part of this Act, and the Gasworks Clauses Act, 1871, shall continue to apply to the existing undertaking of the company as modified or enlarged by this Act."

In *Gaslight and Coke Co.* v. *Hardy* (1886), 17 Q. B. D. 619, *ante*, p. 188, where it appears to have been assumed that the Act of 1871 did not apply

Sect. 3.

Note.

to the plaintiff company, and that it only operates (*per* Fry, L.J., at p. 624) "upon gas companies which may be formed after the passing of the Act of 1871," the *Commercial* and *South Metropolitan* cases were not cited, so far as the report shows.

In *Dudley Gasworks Co.* v. *Warmington* (1881), 50 L. J. M. C. 69, it appeared that the company's special Act of 1853 incorporated the Act of 1847. After the passing of the Act of 1871, the company, not regarding it as applying to them, omitted to send accounts to the local authority, as required by s. 35, and they were held by the court, on a case stated by justices, to have been rightly convicted, because the appellants were subject to the provisions of the Act of 1871, which amended not only the Act of 1847, but also every private Act with which the Act of 1847 had been incorporated. In this case reliance was also placed on s. 49 of the Act of 1847, which enacted that nothing therein or in the special Act contained shall be deemed to exempt the undertakers from any general Act relating to gasworks . . . which may be passed . . . in any future session of Parliament (*Cf. Leamington Priors Gas Co.* v. *Davis* (1886), cited under sect. 35, *post*, p. 240).

As a general rule, whenever it is possible to put upon an Act of Parliament a construction which is not retrospective, the courts will adopt that construction (*Gardner* v. *Lucas* (1878), 3 App. Cas. 582; *Reid* v. *Reid* (1886), 31 Ch. D. 402; *R.* v. *Smith* (1873), L. R. 8 Q. B. 146; and *R.* v. *Vine* (1875), L. R. 10 Q. B. 195; *cf. The Ydun*, [1899] P. 236). It is a cardinal principle in the interpretation of a statute, that if there are two inconsistent enactments, it must be seen if one cannot be read as a qualification of the other (*per* James, L.J., in *Ebbs* v. *Boulnois* (1875), L. R. 10 Ch. 484).

A *general* Act of Parliament does not repeal a previous *particular* Act, unless there are express words, or unless the two Acts are necessarily inconsistent (*Thorpe* v. *Adams* (1871), L. R. 6 C. P. 125; *London and Blackwall Rail. Co.* v. *Limehouse B. of W.* (1856), 3 K. & J. 123; *Earl of Shrewsbury* v. *Scott* (1860), 6 C. B. (n.s.) 1, 221; and see *R.* v. *Champneys* (1871), L. R. 6 C. P. at p. 394; *Ashton-under-Lyne Corporation* v. *Pugh*, [1898] 1 Q. B. 45; *L. & N. W. Rail. Co.* v. *Runcorn R. D. C.*, [1898] 1 Ch. 561). See further the cases cited at p. 156, in reference to local Building Acts. Where a general Act of Parliament is incorporated with a special Act, if there is any contradiction between them, the special Act is to prevail (*Attorney-General* v. *G. E. Rail. Co.* (1873), L. R. 6 H. L. 367). As to the repeal of a general Act by an inconsistent local and personal Act, see *Ex parte Kelly* (1874), 9 Ir. R. C. L. 114; *Hill* v. *Hall* (1876), 1 Ex. D. 411; *Fortescue* v. *Vestry of St. Matthew, Bethnal Green*, [1891] 2 Q. B. 170. Where the legislature has vested special powers in a particular body for certain special purposes, a general Act subsequently passed will not override those special powers (*London and Blackwall Rail. Co.* v. *Limehouse B. of W.*, *supra*).

As to the construction of ambiguous enactments imposing rates, see *South Staffordshire Waterworks Co.* v. *Barrow* (1897), 61 J. P. 661, cited more fully *post*, p. 512 (notes to s. 68 of Waterworks Clauses Act, 1847). As to whether a proviso can be so construed as to enlarge by implication the effect of the section to which it is a proviso, see *per* Lord Halsbury, L.C., in *West Derby Union* v. *Metropolitan Life Assurance Co.*, [1897] A. C., at p. 651, and *per* Collins, M.R., in *In re Arbitration between New River Co. and Metropolitan Water Board* (1904), 68 J. P. 329.

It is well settled that marginal notes to the sections of an Act of Parliament cannot be referred to for the purpose of construing the Act. The contrary opinion originated in a mistake, and it has been exploded long ago (*per* Lord Macnaghten in *Thakurain Balraj Kunwar* v. *Rae Jagatpal Singh*, L. R. 3 Ind. App. at p. 142).

Interpretation of terms.

4. Terms used in this Act have the same meanings respectively as the same terms have when used in the Gasworks Clauses Act, 1847, and in the Gas and Water Works Facilities Act, 1870.

Sect. 4.

The term "prescribed" in this Act shall mean prescribed by the special Act:

The term "premises" in this Act shall include house and building:

And the expression "superior courts" or "court of competent jurisdiction" in this Act, or in any Act wholly or partially incorporated herewith, shall be read and have effect as if the debt or demand in respect of which the expression is used were an ordinary simple contract debt and not a debt or demand created by statute.

GENERAL PROVISIONS.

Prohibition against erecting gasworks elsewhere than on lands specified in schedule.

5. The undertakers shall not manufacture gas, or any residual products, except upon lands described in the special Act, and they shall not store gas, except upon those lands, without the previous consent in writing of the owner, lessee, and occupier of every dwelling-house situate within three hundred yards of the limits of the site where such gas is intended to be stored.

See Standing Orders, referred to *ante*, p. 155.

It is usual to insert in gas bills a clause giving power to the company to purchase additional land not exceeding a certain limited quantity and providing that the company shall not create or permit nuisance on such lands, nor use the same for the manufacture of gas or residual products. See Model Gas Bill.

Sale of superfluous lands.

6. The undertakers may sell and dispose of any lands which are vested in them, or which they are authorised to purchase, or which they may hereafter acquire, and which shall not be required for the purposes of the undertaking, and the provisions of the Lands Clauses Consolidation Act, 1845, sections 128 to 132 (both sections inclusive), shall apply to any such sale; and the undertakers may also from time to time sell and dispose of any works, buildings, or erections on any lands belonging to them which shall not be required for the purposes of the undertaking.

Sects. 128 to 132 and the cases decided under them will be found later under the Lands Clauses Consolidation Act, 1845.

Receipts of guardians, etc., to be sufficient discharge.

7. If any money be payable to a shareholder in a gas undertaking, being a minor, idiot, or lunatic, the receipt of his or her respective guardian or committee shall be a sufficient discharge to the undertakers for the same.

For appointment of receiver.

8. The mortgagees of the undertakers may enforce payment of arrears of interest or principal, or principal and interest, due on their mortgages, in England and Ireland by the appointment of a receiver, and in Scotland by the appointment of a judicial factor; and in order to authorise the appointment of a receiver or judicial factor in respect of principal, or principal and interest, the amount owing to the mortgagees by whom the application for a receiver is made shall not be less than in the whole one thousand pounds, or such sum as shall be specified in the special Act.

Undertakers not exempted from indictment.

9. Nothing in this or the special Act shall exonerate the undertakers from any indictment, action, or other proceeding for nuisance in the event of any nuisance being caused by them.

See s. 29 of the Act of 1847, and notes thereto, *ante*, p. 198.

Power to take easements, etc., by agreement.

10. Persons empowered by the Lands Clauses Consolidation Act, 1845, to sell and convey or release lands, may, if they think fit, subject to the provisions of that Act, and of the Lands Clauses Consolidation Acts Amendment Act, 1860, grant to the undertakers any easement, right, or privilege, not being an easement of water, required for the purposes of the special Act, in, over, or affecting any such lands; and the provisions of the last-mentioned Acts with respect to lands and rentcharges, as far as the same are applicable in this behalf, shall extend and apply to such grants, or to such easement, rights, or privileges as aforesaid.

See s. 7 of the Lands Clauses Consolidation Act, 1845, *post*. See further the notes to s. 6 of the Waterworks Clauses Act, 1847, at p. 382.

SUPPLY OF GAS TO OWNERS AND OCCUPIERS OF PREMISES.

Undertakers to furnish sufficient supply of gas, to owners and occupiers within the limits of the special Act.

11. The undertakers shall, upon being required so to do by the owner or occupier of any premises situate within twenty-five yards from any main of the undertakers, or such other distance as may be prescribed, give and continue to give a supply of gas for such premises, under such pressure in the main as may be prescribed, and they shall furnish and lay any pipe that may be necessary for such purpose, subject to the conditions following; (that is to say,)

The cost of so much of any pipe for the supply of gas to any owner or occupier as may be laid upon the property of such owner or in the possession of such occupier, and of so much of any such pipe as may be laid for a greater distance than thirty feet from any pipe of the undertakers, although not on such property, shall be defrayed by such owner or occupier.

Every owner or occupier of premises requiring a supply of gas shall—

Serve a notice upon the undertakers at their office specifying the premises in respect of which such supply is required, and the day (not being an earlier day than a reasonable time * after the date of the service of such notice) upon which such supply is required to commence;

Enter into a written contract with the undertakers (if required by them so to do) to continue to receive and pay for a supply of gas for a period of at least two years, of such an amount that

---

* The provision of this section (where applicable) as to reasonable times supersedes the requirement of seven days notice in s. 17 of the Metropolis Gas Act, 1860. See *ante*, pp. 220, 221, for the decisions as to whether the Act of 1871 applies to the enumerated metropolitan companies, and see particularly *South Metropolitan Gas Co.* v. *Noakes* (1889), 61 L. T. 556, *ante*, p. 220.

Sect. 11.

the rent payable for the same shall not be less than twenty pounds per centum per annum on the outlay incurred by the undertakers in providing any pipe to be provided by them for the purpose of such supply; and

Give to the undertakers (if required by them so to do) security for the payment to them of all moneys which may become due to them by such owner or occupier in respect of any pipe to be furnished by the undertakers and in respect of gas to be supplied by them.

Provided always, that the undertakers may, after they have given a supply of gas for any premises, by notice in writing, require the owner or occupier of such premises, within seven days after the date of the service of such notice, to give to them security for the payment of all moneys which may from time to time become due to them in respect of such supply, in case such owner or occupier has not already given such security, or in case any security given has become invalid, or is insufficient, and in case any such owner or occupier fails to comply with the terms of such notice, the undertakers may, if they please, discontinue to supply gas for such premises so long as such failure continues.

Position of successor to a defaulting occupier.

Before the passing of this Act it was not compulsory on a gas company to supply gas. The Act of 1847, s. 13, merely gave them the power to contract, and s. 16 of the same Act gave them power to cut off the supply where the persons supplied failed to pay the rent due. Now, subject to the conditions of this section being fulfilled, a gas company is compelled to supply gas to an owner or occupier requiring it, and though they may cut off the supply from a defaulting occupier they cannot refuse to supply a succeeding occupier who requires a supply, even though arrears are due from his predecessor, unless the incoming tenant has undertaken with the former tenant to pay or exonerate him from the payment of such arrears (s. 39). This is the position under the general Acts, and s. 39 of the Metropolis Gas Act, 1860, has provisions similar to those contained in s. 39 of this Act. The Gas Light and Coke Co. have in their special Act provisions considerably wider than these, and have endeavoured to establish a right to recover from an incoming tenant by suing him for arrears due from the outgoing tenant. Sect. 18 of their private Act of 1872 provides that, "In case any consumer leave the premises where gas was supplied to him without paying to the company the rate or meter rent due from him, the company shall not require from the next tenant of the premises payment of the arrears so left unpaid, unless the incoming tenant agreed with the defaulting consumer to pay the arrears; or unless the incoming tenant shall continue the trade or business of the outgoing tenant, and shall have paid to the owner, lessee, or mortgagee in possession, or to the outgoing tenant of such premises a consideration for so doing. . . ." It was held in *Gaslight and Coke Co.* v. *Mead* (1876), 45 L. J. M. C. 71, that they had no power to recover from, by suing, an incoming tenant who was within the exceptions set out in the above section, the arrears due from the outgoer, but only to require payment of the arrears from the incoming tenant as a condition of their supplying him with gas. This case was approved in *Gaslight and Coke Co.* v. *Cannon Brewery Co.*, [1904] A. C. 321, and it may be now taken to be settled law that there is no power in a gas company to recover from an incoming tenant, by suing him, arrears due from his predecessor.

Extent of power to cut

The power of cutting off the supply of gas in case of refusal to pay what is due for gas supplied would appear to extend to all the premises

NOTE.

at which the defaulting consumer is using the undertakers' gas, even though the arrears may be in respect of one or some only of the premises. By a statute of the province of Canada a gas company was authorised to supply gas. This Act contained a clause based upon the unrepealed portion of s. 16 of the Gasworks Clauses Act, 1847, and was to the following effect: "If any person . . . supplied with gas by the company shall neglect to pay any rate, rent, or charge due to the . . . company at any of the times fixed for the payment thereof, it shall be lawful for the company . . . on giving twenty-four hours' previous notice to stop the gas from entering the premises, service pipes, or lamps of any such person . . . by cutting off the said service pipe or pipes or by such other means as the company shall think fit:"—*Held*, by the Judicial Committee of the Privy Council, that where a consumer is supplied with gas for several houses or places of business, and he neglects or refuses to pay what is due for gas supplied to any one of them, the gas company are entitled under the section to cut off the supply to all of them (*Montreal Gas Co.* v. *Cadieux*, [1899] A. C. 589). The judgment of the Privy Council was delivered by Sir Henry Strong, who said: "The case appears to their Lordships to be too clear for argument. The only question is a question of fact. Is the respondent, in the words of the Act, a person supplied with gas by the company who has neglected to pay a rate, rent, or charge due to the company at the time fixed for payment thereof? It cannot be disputed that he is. The occasion, therefore, has arisen which authorises the company to stop the gas from entering his service pipes. There is nothing in the Act to limit the right of the company to the service pipes of the defaulter in a particular building or connected with a particular meter in respect of which the default has been committed. There is nothing in the Act to throw the rate, rent, or charge for gas upon the premises for which the supply is furnished or to make it payable out of the premises of the defaulter. The supply is to the consumer and the default is the consumer's default. His liability to the company is a liability for the whole of the debt which he owes them at the time." *Cf.* the terms of s. 74 of the Waterworks Clauses Act, 1847, *post*, p. 515.

off supply of gas.

Refusal of supply to person in arrear at other premises.

A special clause has been commonly inserted in recent Gas Acts authorising gas companies to refuse a supply to persons in arrear in respect of other premises, and by clause 32 of the Model Gas Bill, at p. 370, *post*, it is provided that "if a person requiring a supply of gas from the company has previously quitted premises at which gas was supplied to him by the company without paying to them all the gas charges and meter rents due from him to the company, they may refuse to furnish to him a supply of gas until he pays the same."

Gas Light and Coke Company.

Under the Gas Light and Coke Company's Act, 1870 (34 Vict. c. cxxi.), s. 12, "every occupier of premises shall, if required by the company, sign a contract with the company in the form as nearly as may be in the 2nd Schedule to this Act annexed, and if any occupier shall refuse to sign such contract, if so required, the company shall be at liberty to discontinue the supply of gas forthwith, and to remove the meter. The form in the 2nd Schedule to the Act is as follows:—

THE GAS LIGHT AND COKE COMPANY.

I, of , do hereby contract with the Gas Light and Coke Company for a supply of gas by meter, per thousand cubic feet, and per quarter for the use of the Company's light meter, and if the meter shall from any cause cease or omit to register accurately the quantity of gas used, I hereby agree to pay, in respect of the gas consumed, a reasonable portion at the above rate, for and during the period of such non-registration, and I agree to pay the rent [quarterly] and hold myself liable for all gas consumed on the above premises whether by myself or others until notice in writing be given by me to the Company.

Sect. 11.

NOTE.

I also agree that the meter shall be accessible at all reasonable times to the inspection of the Company's inspector or servants.

(Signed) , Consumer.
Witness, , Inspector.

"Owners or occupiers," who are under particular circumstances.

No definition is given in the Gasworks Clauses Act, 1871 of the term "owner or occupier" used in s. 11, and difficulties have arisen in determining who is the occupier of premises where a defaulter has got into financial difficulties. Such defaulter may be a private individual or a company, and it is proposed to shortly summarise the cases on this point.

(1.) Where a receiving order has been made the official receiver is not an "occupier," and so entitled to demand a supply of gas, but is merely a "caretaker," and the debtor remains the occupier, notwithstanding the appointment of the official receiver (*Re Smith, Ex parte Mason*, [1893] 1 Q. B. 323). In that case a receiving order having been made against a debtor, the gas company cut off the supply of gas to his premises, and refused to reconnect it until the arrears of gas rent due from him were paid, whereupon the official receiver paid the amount under protest. The debtor having been adjudicated bankrupt:—*Held*, that the trustee in bankruptcy was not entitled to recover back from the gas company the amount so paid by the official receiver, for, notwithstanding the receiving order, the debtor continued to be the occupier of the premises, and there was consequently no obligation on the part of the company to supply gas to such premises without payment of the arrears due to them. VAUGHAN WILLIAMS, J., said: "There cannot be two owners or occupiers of the same undivided premises at the same time, and, that being so, it is plain that the receiver could not claim a supply of gas as 'occupier' here unless he was in a position to say that the occupation of the debtor had come to an end. It seems to me quite plain that the occupation of the debtor had not come to an end. The case of *Rhodes* v. *Dawson* (1886), 16 Q. B. D. 548, shows that his estate is unaltered by the making of the receiving order."

(2.) Where a receiver and manager of a business is appointed, such receiver is not an incoming tenant entitled as "occupier" to demand a supply of gas, but the undertakers may first insist on the arrears of rent being paid. In *Paterson* v. *Gaslight and Coke Co.*, [1896] 2 Ch. 476 (a case decided under s. 18 of the Gaslight and Coke Company's Act, 1872), a limited company was supplied with gas by a gas company. P. was appointed receiver and manager of the business by debenture-holders, and shortly afterwards P. and S. were appointed by the court joint receivers and managers in an action on behalf of a higher class of debenture holders. They entered and carried on the business and were supplied with gas by the gas company. At the time when P. was appointed there was due to the gas company £90 for gas supplied to the business. The gas company threatened to cut off the supply unless the £90 arrears were paid, and the receiver brought an action to restrain them:—*Held*, on appeal, that the relation of the plaintiffs to the mill company was not that of incoming and outgoing tenant, but of caretaker and owner, and that the plaintiffs were in no better position against the gas company than the mill company were, and could not claim a supply of gas except on payment of arrears. LINDLEY, L.J., said: "The term 'occupier' is ambiguous. In one sense a caretaker is an occupier, but in another sense his occupation is that of some other person . . . The plaintiffs' rights as receivers and managers were mainly those of custodians of the mill company's property. The relation of the mill company to the plaintiffs was not the relation of outgoing and incoming tenant, nor of vendor or purchaser, but that of owner and caretaker. See also as to the position of a receiver, *Gosling* v. *Gaskell*, [1897] A. C. 575. In *In re Marriage, Neave & Co., North of England Trustee Debenture and Assets Corporation* v. *Marriage, Neave & Co.*, [1896] 2 Ch. 663 (a case analogous to *Paterson's Case*, *supra*), where the question was whether there had been a change of occupation within s. 16 of the Poor Rate Assessment and Collection Act, 1869, it was held that when an order is made appointing a receiver and manager of a company's business, but not directing delivery up of possession to him, and thereupon the receiver and manager enters upon the company's premises for the purpose of managing and carrying on the business, there is no change of occupation within s. 16 of the Poor Rate Assessment and Collection Act, 1869; and accordingly, under s. 2 of 43 Eliz. c. 2, and s. 161 of the Metropolis Management Act, 1855, the company's goods are liable to distress for the whole of the parish rates made for the half-year in which the order has been made, and this right of distress vested in the churchwardens and overseers of the parish prevails as against the equitable charge created by debentures charging, in the usual form, all the property of the company, where there is no assignment of chattels in the covering deed. At the date when a receiver was appointed in a debenture-holders' action against a company, the company owed a sum of money to a gas company for gas supplied, which the receiver refused to pay. The debentures were not secured by a trust deed and operated only as an equitable charge on the company's property and assets. The gas company obtained, under s. 23 of the Gasworks Clauses Act, 1871, and s. 74 of their special Act (which provided that sums payable to the company might be recovered summarily or by action), an order and warrant from justices empowering them to levy a distress on the company's goods and chattels for the amount of the debt, and then applied in the debenture-holders' action for leave to proceed with the distress:—*Held*, that the statutory rights of the gas company overrode the equitable rights of the debenture-holders, and leave was granted them to proceed with the distress (*Johnson and Hughes* v. *Adolphe Crosbie, Ltd.* (1909), 74 J. P. 25); *cf. In re London Pressed Hinge Co., Ltd.*, [1905] 1 Ch. 576. The principle of *Paterson* v. *The Gaslight and Coke Co.*, *supra*, was followed in *Husey* v. *The Gaslight and Coke Co.* (1902), 18 T. L. R. 299. In this case a receiver had been appointed as in *Paterson's Case*, but the order directed the company to give the receiver "possession of the premises so far as is necessary for the purposes of such receivership," whereas in *Paterson's Case* there was no provision in the order appointing the receiver upon his taking actual possession. SWINFEN EADY, J., held that the receiver was not in occupation or the incoming tenant of any of the premises (*cf.* also *Husey* v. *London Electric Supply Corporation*, [1902] 1 Ch. 416). It is submitted that in the case of a private debtor, where there has been an assignment to a trustee for the benefit of the creditors, the trustee is in no better position than the debtor, and cannot demand a supply of gas as "occupier" unless he can show that he is the legal occupier of the premises. So also in the case of a liquidator of a company, the position of the liquidator would appear to be only that of a caretaker.

(3.) As between a mortgagor and mortgagee in the event of a mortgagor making default in the payment of the principal or interest, the position would depend upon the course adopted by the mortgagee. He might either appoint a receiver under s. 19 of the Conveyancing Act, 1881, or he might enter into possession. In the first case, as by s. 24 of the Conveyancing Act, 1881, the receiver would be the agent of the mortgagor, there would be no change of occupation; but in the latter case the mortgagee would, it is submitted, be entitled to claim a supply of gas without being required to first pay any arrears due from the mortgagor. In *In re Mannesmann Tube Co., Ltd., Von Siemens* v. *Mannesmann Tube Co., Ltd.*, [1901] 2 Ch. 93, where holders of debentures of a company commenced an action to enforce their security, and a receiver was appointed, and the company subsequently went into liquidation, it was held that the poor rate and district rate due from the company at the date of the winding-up, and which had been paid by the receiver for the debenture-holders, must be repaid by the liquidator out of the general assets of the company, as the question was one between mortgagor and mortgagee; the mortgagors being liable to pay, the mortgagees were to be recouped what they had paid on behalf of the mortgagors.

(4.) Where a debtor has been adjudged bankrupt it would seem that the official receiver or trustee in bankruptcy is in a different position to that of the receiver where a receiving order only has been made. In that case, as we have seen, the receiver is not an "occupier," but where an adjudication order has been made the official receiver or trustee in bankruptcy

Sect. 11.

NOTE.

will be entitled to demand a supply of gas without being required to first pay off arrears of rent. There has been no direct decision on this point under the Gas Acts, but this would seem to be good law as the result of *In re Flack, Ex parte Berry*, [1900] 2 Q. B. 32. That case was decided under s. 48 of the Metropolis Water Act, 1871, and the provisions of that section are similar to those of s. 39 of this Act. It was there held that the trustee in bankruptcy, who had taken possession of the premises and paid arrears of water rate under protest, was in the position of an "incoming tenant," and was not liable for the arrears, and was entitled to recover from the water company the amount paid under protest. WRIGHT, J., stated the position thus: "The debtor on being adjudicated bankrupt ceased to be the tenant or the occupier of the shops which the trustee then took possession of with the view of carrying on the business for the benefit of the estate. The trustee was therefore in the position of an incoming tenant." It is apprehended that the position of the trustee would be exactly the same under the Gas Acts. In the case of a debtor making a composition with his creditors, if a trustee is appointed in pursuance of a composition or scheme the trustee will be in the same position as a trustee in bankruptcy by virtue of s. 3 (17) of the Bankruptcy Act, 1870, and s. 54 of the Bankruptcy Act, 1883.

As to security, see further s. 16, *post*, p. 229, and as to security for meter, see s. 14, *post*, p. 229.

By the Electric Lighting Act, 1882 (45 & 46 Vict. c. 56), it is provided as follows:

Power for Board of Trade to relieve gas undertakers from obligation to supply gas in certain cases.

Sect. 29. "Where a supply of electricity is authorised in any area by any licence, order, or special Act, and a supply of gas by any gas undertakers is also authorised within such area or any part thereof by any provisional order or special Act under the provisions of which such gas undertakers are under any general or limited obligation to supply gas upon demand, the Board of Trade may, upon the application of such gas undertakers, inquire into the circumstances of the case, and if they are satisfied that any specified part of such area is sufficiently supplied with electric light, and that the supply of gas in such specified part has ceased to be remunerative to the gas undertakers, and that it is just that such gas undertakers should be relieved from the obligation to supply gas upon demand as aforesaid, the Board of Trade may in their discretion make an order relieving the gas undertakers from such obligation, within such specified part of such area, either wholly or in part, and upon such terms and conditions as they may think proper; and from and after the date of such order such gas undertakers shall be so relieved accordingly. All expenses of the Board of Trade in connection with any such inquiry or order shall be borne and paid by the gas undertakers upon whose application the inquiry or order was made."

Penalties for breach of contract by employers.

See the Conspiracy and Protection of Property Act, 1875, *post*, which exposes to penalties any person employed by a municipal authority, company, etc., for breaches of contract, the probable consequence of which will be to deprive the inhabitants of a supply of gas or water.

Quality of gas.

12. The quality of the gas supplied by the undertakers shall, with respect to its illuminating power, be such as to produce at the testing place provided in conformity with this Act a light equal in intensity to that produced by the prescribed number of sperm candles of six in the pound, and such gas shall as to its purity not exhibit any trace of sulphuretted hydrogen when tested in accordance with the rules prescribed in that behalf in Part II. of the Schedule A. to this Act annexed.

The minimum illuminating power now usually required in gas Acts and provisional orders is a light equal to fourteen sperm candles. See the Introduction at p. 15. As to the method of testing under this Act, see *post*, pp. 248, 249.

Sect. 12.

NOTE.

As to the metropolitan companies, see the Metropolis Gas Act, 1860, and the provisions of the special Acts of 1875, 1876, 1880, 1900, 1902, 1903, 1906 and 1909; and the London Gas Act, 1905, *post.*

See the Introduction at p. 14 as to sulphur impurities.

Undertakers may require consumers to use meters.

Sale of Gas Act, 1859, *post*.

13. Every consumer of gas supplied by the undertakers shall, if required to do so by them, consume such gas by a meter duly stamped under the authority of an Act passed in the session of Parliament held in the twenty-second and twenty-third years of the reign of her present Majesty, intituled "An Act for regulating measures used in sales of gas," and being a legal meter within the meaning of the said Act, or by a meter supplied or approved by the undertakers: Provided always, that where the provisions of the said Act are in force no meter shall be used unless the same be a legal meter within the meaning of the said Act, and that elsewhere the undertakers shall not refuse to approve of any meter which when duly tested according to the rules contained in the said Act for regulating measures used in sales of gas is found to be correct within the meaning of the said Act.

See notes to ss. 18 and 19, *post,* pp. 230, 232.

Undertakers to supply meters.

14. The undertakers shall supply to any owner or occupier of premises within the limits of the special Act requiring the same a meter for registering gas supplied by them: Provided always, that such owner or occupier shall, if required, previous to receiving such meter, give to the undertakers security for payment to them of the price of such meter if he desires to purchase the same, or of the rent of such meter if he desires to hire the same.

Cf. ss. 11 and 16 on the subject of security.

Meters not to be connected or disconnected without notice.

15. No consumer shall connect any meter with any pipe through which gas is supplied by the undertakers to such meter, or disconnect any meter from any such pipe, unless he shall have given to the undertakers not less than twenty-four hours notice in writing of his intention so to do, and if any person acts in contravention of this section he shall be liable for each offence to a penalty not exceeding forty shillings.

See *Re Gaslight and Coke Co.* (1891), cited *ante,* p. 190.

The manager of a co-operative society sent for a jobbing plumber to do certain work on the society's premises. Amongst other things he directed the plumber to disconnect a gas meter. The plumber was summoned before the justices by the company for having disconnected without notice. The magistrates held that the manager and not the plumber was the person responsible. A Divisional Court, on appeal, affirmed that decision (*Johnson* v. *Gunnhill,* Jl. of G. L., February 9th, 1904).

Nature and amount of security.

16. Where any owner or occupier is required by the special Act to give security to the undertakers, such security may be by way of deposit or otherwise, and of such amount as he and the undertakers agree on, or as, in default of agreement, may be determined, on the application of either party, by two justices, who may also order by which of the parties the costs of the proceedings before them shall

Sect. 16. be paid, and the decision of the justices shall be final and binding on all parties.

As to metropolis, see ss. 15 and 16 of the Metropolis Gas Act, 1860 (23 & 24 Vict. c. 125), and various provisions in the special Acts.

Sometimes provision is made in special Acts for the payment of interest on such deposit. See clause 29 of the Model Gas Bill, *post*, p. 369.

The Preston Gas Act, 1894, s. 43, enables the company to require prepayment for an estimated amount of consumption. A clause to this effect is now frequently inserted.

Consumer to keep his meter in proper order.

17. Every consumer of gas supplied by the undertakers shall at all times, at his own expense, keep all meters belonging to him whereby any gas of the undertakers is registered in proper order for correctly registering such gas, and in default of his so doing the undertakers may cease to supply gas through such meter. The undertakers shall have access to and be at liberty to take off, remove, test, inspect, and replace any such meter at all reasonable times, such taking off, removal, testing, inspecting, and replacing to be done at the expense of the undertakers if the meter be found in proper order, but otherwise at the expense of the consumer.

Power to the undertakers to let meters.

18. The undertakers may let for hire any meter for ascertaining the quantity of gas consumed or supplied and any fittings thereto, for such remuneration in money, and on such terms with respect to the repair of such meter and fittings, and for securing the safety and return to the undertakers of such meter, as may be agreed upon between the hirer and the undertakers, and such remuneration shall be recoverable in the same manner as the rents or sums due to the undertakers for gas, and such meters and fittings shall not be subject to distress, or to the landlord's remedy for rent of the premises where the same may be used, nor to be taken in execution under any process of a court of law or equity, or any proceedings in bankruptcy against the persons in whose possession the same may be.

A gas stove let for hire has been held to be a "fitting for the gas" within the meaning of s. 14 of the Act of 1847, and therefore not liable to distress for rent (*Gaslight and Coke Co.* v. *Hardy* (1886), 17 Q. B. D. 619). See cases noted under that section, *ante*, p. 188.

A gas engine was let upon what is known as the hire and purchase system under an agreement in writing which provided that it should not become the property of the hirer until all the instalments stipulated for had been paid, and also that, on failure to pay any instalment, the same might be removed by the owner. The engine was affixed to freehold land of the hirer by bolts and screws to prevent it from rocking, and was used by him for the purpose of working a saw-mill. Default having been made in payment of the instalments, the engine was claimed by the owner and also by a mortgagee of the land who took his mortgage after the hiring agreement and without notice of it, and had entered into possession while the engine was still on the land:—*Held*, that the engine was sufficiently annexed to the land to become a fixture and that any intention to be inferred from the terms of the hiring agreement that it would remain a chattel did not prevent it from becoming a fixture, and consequently that it passed to the mortgagee as part of the freehold (*Hobson* v. *Gorringe*, [1897] 1 Ch. 182). This case was followed in *Reynolds* v. *Ashby*, [1904] A. C. 466.

NOTE.

A company hired machinery, fixed on its business premises, from L. & H. on the terms of a hire-purchase agreement which provided that the company was to pay a monthly rent for the hire of the machinery, and should become the purchaser on payment of a certain sum, in which event credit should be given for the previous payments of rent. Until the purchase the company was to be a mere bailee of the machinery, and in case of default in making the monthly payments or breach of the conditions of the agreement, L. & H. were empowered to enter and remove the machinery. Subsequently the company gave to a bank an equitable mortgage of the business premises by a deposit of the deeds thereof, accompanied by a written charge under the common seal of the company containing an agreement to give a legal mortgage on demand. The bank took without notice of the hire-purchase agreement. The company failed to pay the instalments and committed breaches of the conditions of the hire-purchase agreement; L. & H. demanded delivery up of the machinery and a winding-up order was made against the company. The principal secured to the bank was due, with an arrear of interest:—*Held*, that the bank being merely an equitable mortgagee, and L. & H. having an equitable interest in the machinery under their hire-purchase agreement, the interest under that agreement had priority over the interest of the bank. *Hobson* v. *Gorringe*, *supra*, and *Reynolds* v. *Ashby*, *supra*, were distinguished (*In re Samuel Allen & Sons, Ltd.*, [1907] 1 Ch. 575).

In the absence of express stipulation to the contrary a mortgagor in possession has the right to permit trade fixtures to be put up and removed from the mortgaged premises provided they are removed before the mortgagee takes possession, but this right of removal ceases when possession is taken by the mortgagee.

In November, 1902, a freehold laundry was mortgaged in the usual form for £400, the mortgagor covenanting not to remove any fixtures without the written consent of the mortgagee. In June, 1903, trade machinery was fixed up in the premises under a hire and purchase agreement, which provided that it should not become the property of the hirer until all instalments had been paid, and should be removable by the owner on the failure of the hirer to pay any instalment. Default having been made in payment of an instalment, the owner entered and removed the machinery. In an action by the mortgagee against the owner of the machinery for wrongful removal:—*Held* (reversing the decision of PHILLIMORE, J.), that the machinery passed to the mortgagee as part of the freehold (*Ellis* v. *Glover & Hobson, Ltd.*, [1908] 1 K. B. 388).

In recent gas Acts a clause has frequently been inserted to the effect that the company may purchase, provide, supply, sell, let for hire, use and otherwise deal in, fit up, alter, repair, remove (but shall not manufacture) engines, machines, stoves, ranges, burners, meters, fittings, pipes, and other apparatus, appliances, and conveniences for heating, ventilating, motive power, cooking, and other domestic, manufacturing, industrial, or other purposes for which gas can or may be used; and the clause goes on to exempt all such things from distress for rent or from liability to be taken in execution under any process of any court or any proceedings in bankruptcy against the persons in whose possession the same may be. The clause also provides that a distinguishing metal plate shall be affixed. See clause 30 of the Model Gas Bill, *post*, p. 369. A provision has also frequently been inserted in recent Gas Acts that notwithstanding that gas engines, motors, etc., may be affixed to a building or to the soil, they shall continue to be the property of and removable by the company. See, *e.g.*, s. 3. (2) of the South Suburban Gas Act, 1905 (5 Edw. 7, c. 18), which provides as follows:

(2.) Subject as hereinafter provided, all engines, motors, dynamos, fittings, apparatus and appliances let by the company on hire shall, notwithstanding that they be fixed or fastened to any part of any premises in which they may be situate or to the soil under any such premises, at all times continue to be the property of and removable by the company: Provided that nothing in this sub-section shall affect the amount of the assessment for rating of

Sect. 18. any premises upon which any such engines, motors, dynamos, fittings, apparatus and appliances are or shall be fixed.

NOTE.

Sub-sect. (1) of the same section contains the usual provision as to fittings not being subject to distress or execution, and by sub-s. (3) it is provided that the company shall only be entitled to the privileges and exemptions conferred by this section in respect of such engines, motors, dynamos, fittings, apparatus and appliances as shall have upon them respectively a distinguishing metal plate affixed to a conspicuous part thereof, or a distinguishing brand or other mark conspicuously impressed or made thereon sufficiently indicating the company as the actual owners thereof.

Cf. the Shepton Mallet Gas Company (Electric Lighting) Act, 1905, s. 11, which, after the usual words providing that the fittings, etc., let shall not be liable to distress or to the landlord's remedy for rent or to be taken in execution under any process of any court of law or equity or any proceedings in bankruptcy against the person in whose possession the same may be, adds the following words: "or be deemed to be landlord's fixtures or pass with any conveyance or mortgage of the premises wherein the same may be fixed." Provisions of this nature vary what would otherwise be the law as laid down in the cases cited *supra*.

A gas engine was let on an agreement on the hire and purchase system to a manufacturing cooper. The lessee paid the first instalment and the engine was placed on his premises, and while it was still there he became bankrupt, some instalments being overdue. No question arose with mortgagees. It was held by the House of Lords, affirming the decision of the Court of Appeal in Ireland, that upon the true construction of the agreement the property in the engine never passed to the lessee but remained in the lessors; that the transaction was not within the Bills of Sale Acts, and that the lessors were entitled to an order of the Bankruptcy Court for delivery of the engine to them (*McEntire* v. *Crossley Brothers, Ltd.*, [1895] A. C. 457).

All gas meters since 1870 must be stamped in accordance with the provisions of the Act for regulating measures used in sales of gas—the Sale of Gas Act, 1859 (22 & 23 Vict. c. 66), amended by the Sale of Gas Act, 1860 (23 & 24 Vict. c. 146); and as regards the metropolis, by the Metropolis Gas Act, 1861 (24 & 25 Vict. c. 79). See these Acts, *post*, pp. 258 *et seq.* On assessing gasworks to the poor rate, in ascertaining the gross estimated rental a deduction ought to be allowed in respect of the cost of the meters, which belong to the gas company, but are put up on the premises of the consumers and are connected with the service pipes by solder, and by means of those pipes with the company's mains; as they are mere chattels (*R. on the prosecution of the Phœnix Gaslight and Coke Co.* v. *The Inhabitants of Lee* (1866), L. R. 1 Q. B. 241). See also *Ipswich Gaslight Co.* v. *Ipswich Union*, cited *ante*, p. 208).

Undertakers to keep meter let for hire in repair.

19. The undertakers shall at all times, at their own expense, keep all meters let for hire by them to any consumer in proper order for correctly registering gas, and in default of their so doing the consumer shall not be liable to pay rent for the same during such time as such default continues. The undertakers shall, for the purposes aforesaid, have access to and be at liberty to remove, test, inspect, and replace any such meter at all reasonable times.

See notes to s. 14 of the Gasworks Clauses Act, 1847, *ante*, p. 188.

Register of gas meters to be primâ facie evidence.

20. The register of the meter shall be primâ facie evidence of the quantity of gas consumed, and in respect of which any rent is charged and sought to be recovered by the undertakers: Provided always, that if the undertakers and the consumer differ as to the quantity consumed, such difference may be determined, upon the application of either party, by two justices, who may also order by which of the parties the costs of the proceedings before them shall be paid, and the decision of the justices shall be final and binding on all parties.

See the following cases where disputes under this section were adjudicated upon by magistrates:—

Cresswell v. *Gaslight and Coke Co.*, reported Jl. of G. L., November 2nd, 1897, p. 951, and the *Wandsworth Case* and the *Richmond Case* there cited.

Where through the defective mechanism of a prepayment meter, more gas was given out and used than the coins in the box warranted, it was held, in an action in the county court, that the company could not recover from the consumer for the difference in the absence of special agreement to that effect (*Kendal Gas and Water Co.* v. *Atkinson*, Jl. of G. L., May 22nd, 1894, vol. 63, p. 967). A decision to the like effect was given at Dolgelly County Court in the case of *Barmouth Gas Co.* v. *Hughes*, Jl. of G. L., December 15th, 1903, p. 695.

The relations between the consumer and a gas company in regard to prepayment meters depend entirely on the terms of the agreement signed by the consumer. These agreements vary. This may explain the fact of the seeming contradictions in the cases which will now be noted.

Where coins deposited in a prepayment meter were stolen without any neglect on the part of the consumer, it was held that the gas company could not recover the money from the consumer who had already paid for the gas according to the contract by dropping the coin into the slot (*Edmundson* v. *Longton Corporation* (1902), 19 T. L. R. 15). In a prosecution at a later date for larceny of coins from a prepayment meter, the property in the coins was laid in the gas company. The Chairman of Quarter Sessions ruled that the property had been wrongly laid in the gas company, and directed a verdict of not guilty. The *Longton Case, supra*, was not cited (*Re Blyth and Cowper Gas Co.*, Jl. of G. L., July 7th, 1903, p. 53; Electrician, July 10, 1903, p. 508).

A slot meter and sundry fittings thereto let by a gas company for hire were destroyed by a fire at the consumer's premises. The agreement which he signed contained the following: "And I undertake that the above-named articles shall not be sold, removed or damaged (fair wear and tear excepted) whilst hired by me." The company having sued the consumer for the value of the things destroyed, His Honour Judge Tindal Atkinson at the Waltham Abbey County Court gave judgment for the plaintiff (*Enfield Gas Co.* v. *Davies*, Jl. of G. L., January 19th, 1904, p. 158).

At the West London Police Court the Gas Light and Coke Co. summoned a number of gas consumers (chiefly belonging to the working class) for the price of gas registered as having been consumed by a prepayment meter. The defence was that someone falsely representing himself as one of the company's collectors went round to the consumers' houses and by means of a key opened the meters and took away the coins. The agreement contained the following clause: "If from any cause the money in the meters does not correspond with the amount of gas consumed, the consumer must make good the deficiency." The magistrate held upon this that the consumers were liable, but suggested a compromise which was afterwards effected (see Jl. of G. L., February 19th, 1904, p. 348).

Three several consumers by the slot meter system were summoned at the Marylebone Police Court before Mr. Curtis Bennett for the recovery of the amount due for gas supplied. The defence was that a sham collector in uniform had called and taken away the money in each case. The magistrate held that under the terms of the agreement between the parties, the responsibility of the defendants did not end when the coin was put into the meter, but continued until the money had been collected by the authorised agent of

Sect. 20.

NOTE.

the company. Orders were accordingly made for the payment of costs in each case. See Jl. of G. L. January 19th, 1904, p. 158.

Cf. a decision under the Electric Lighting Acts (*City of London Electric Lighting Co.* v. *Oakley*, Times, November 12th, 1902; Electrician, November 14th 1902, p. 158; Electrical Review, November 14th, 1902, p. 817; Jl. of G. L., November 18th, 1902, p. 1332). See further on this subject, in the INTRODUCTION.

A meter having registered insufficiently for many years, the gas company, on discovering this, brought an action to recover £884 in respect of the last six years, and recovered judgment (*South Metropolitan Gas Co.* v. *Bermondsey Borough Council* (1901), 17 T. L. R. 530).

In certain granaries certain large lights were installed by a gas company, each having a separate meter. The owners brought an action in the county court to recover £71 3*s.* 5*d.* as the amount overpaid to the defendants for gas, through the meters registering too fast. The defendants had, in fact, made an allowance for a period of five months. For the company, it was contended that there was a clause in the conditions printed on the card attached to the meter, that no allowance could be made for gas registration except for the current quarter. His Honour Judge Emden held, on the evidence, that four of these meters had registered too fast, and he gave judgment for the plaintiffs, holding that there was a duty on the company to keep their meters in proper order so as to correctly register the gas which passed through them; and he also held, on the evidence, that there was an inference that the meters had been registering incorrectly for a longer period than the five months for which the company had made allowance (*Vogan* v. *South Metropolitan Gas Co.*, Jl. of G. L., October 24th, 1905, p. 247; October 31st, 1905, p. 319).

The following clause is now contained in the Model Gas Bill (No. 34) and is inserted in all recent gas Acts:

As to incorrect meters in certain cases.

In the event of any meter used by a consumer of gas being tested in manner provided by the Sale of Gas Act, 1859, and being proved to register erroneously within the meaning of the said Act, such erroneous registration shall be deemed to have first arisen during the then last preceding quarter of the year, unless it be proved to have first arisen during the then current quarter. The amount of the allowance to be made to, or of the surcharge to be made upon, the consumer by the company shall be paid by or to the company to or by the consumer, as the case may be, and shall be recoverable in the like manner as gas rents are recoverable by the company.

Power to enter buildings for ascertaining quantities of gas consumed.

21. Any officer appointed by the undertakers may at all reasonable times enter any building or land lighted with gas supplied by the undertakers, in order to inspect the meters, fittings, and works for the supply of gas, and for the purpose of ascertaining the quantity of gas consumed or supplied; and if any person hinder such officer as aforesaid from entering and making such inspection as aforesaid at any reasonable time, he shall for every such offence forfeit to the undertakers a sum not exceeding five pounds.

A collector calling at a house, where a slot meter was fixed, and the inmates of which happened to be out, knocked at the door and received no answer, whereupon he pulled a string which lifted the latch, and entered the house and took the pennies from the slot meter. The county court judge held this to be a trespass, and gave judgment for 6*d.*, in addition to 5*s.* which had been paid into court, with costs (*Birsdall* v. *Wakefield Gas Co.*, Jl. of G. L., December 17th, 1901, p. 1604).

Power to remove meter and fittings.

22. In all cases in which a consumer of gas supplied by the undertakers ceases to require a supply of such gas, and in all cases in which the undertakers are authorised to take away and cut off the supply of gas from any premises, it shall be lawful for the undertakers, their agents, or workmen, after twenty-four hours' notice in writing, under the hand of the secretary or other properly authorised officer of the undertakers, to the occupier, or if unoccupied, then to the owner or lessee, or to the agent of the owner or lessee, of any premises in which any pipes, meters, fittings, or apparatus belonging to the undertakers are laid or fixed, and through or in which the supply of gas is from any such cause discontinued, to enter such premises between the hours of nine in the morning and four in the evening, for the purpose of removing and to remove such pipes, meters, fittings, or apparatus, repairing all damage caused by such entry or removal.

This section takes the place of s. 17 of the Act of 1847, repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict, c. 66), except so far as incorporated with special Acts to which the Act of 1871 does not apply.

Difficulties may perhaps arise under this section when the fittings are affixed to premises which have been mortgaged (see the cases cited in the note under s. 18, *ante*, p. 230), or when at the request of a tenant they have been fixed to the freehold and thus belong to the freeholder.

Recovery of charges for gas.

23. In case any person who shall have been supplied with gas by the undertakers shall neglect or refuse to pay the amount due in respect of such supply, any justice may issue his summons to such person, requiring him to appear at a time and place named therein, and then and there to show cause why the sum so demanded should not be paid; and if on the appearance of such person, or in default of appearance after proof of the service of the summons, either personally or at the last known place of abode or of business of such person, no sufficient cause can be shown to the contrary, any justice may issue his warrant of distress for the seizure and sale of the goods and chattels of such person, for the recovery of the amount which may be proved before such justice to be due from such person, together with such costs, including the cost of cutting off the gas, if the same shall have been cut off by the undertakers, as to such justice shall seem just and reasonable.

Cf. s. 40, *post*, p. 246.

SUPPLY OF GAS TO LOCAL AUTHORITIES.

Supply and price of gas to public lamps.

24. The undertakers shall supply gas to any public lamps within the distance of fifty yards from any of the mains of the undertakers in such quantities as the local authority of each district or the trustees of any turnpike road or any highway board within the limits of the special Act may from time to time require to be supplied, and the price to be charged by the undertakers and to be paid to them for all gas so supplied shall be settled by agreement between the local authorities and the undertakers, and in case of difference by arbitration, regard being had to the circumstances of the case and the prices charged to private consumers in the district.

Sect. 24.

NOTE.

Sect. 27 provides that the arbitration shall be in manner provided by the Companies Clauses Consolidation Act, 1845.

A gas company is under no obligation under this Act to supply gas to the public lamps at a price less than that charged to private consumers.

In an arbitration in 1867 to settle price, the umpire (the Hon. G. DENMAN, Q.C., afterwards Mr. Justice DENMAN) adopted the following calculation. (See report of the Gravesend Arbitration, Jl. of G. L., December 24th, 1867, vol. 16, p. 1031.)

" Statement showing cost price of gas for year ending June, 1867.

	s.	*d.*
Net cost of manufacture	2	1·62
" distribution	0	1·28
" management	0	2·71
General charges	0	5·18
	2	10·79
Annual contribution to reserved fund, 1 per cent. on capital ...	0	1·87
Dividend, 10 per cent.	1	6·78
Total charge for public lamps per 1,000 feet	4	7·44"

The percentage of dividend may vary where there is a sliding scale.

Many special Acts contain an enactment to the effect that the company shall not charge a higher price per 1,000 cubic feet for gas supplied to any local authority than the lowest rate per 1,000 cubic feet from time to time charged by them to any private consumers in the district supplied by the company. Similar provisions are to be found in provisional orders.

As to the lighting of streets in urban districts, see, further, ss. 150, 161 of the Public Health Act, 1875, *post;* and as to public lamps in rural districts, see the Public Health Act, 1875, s. 163, and notes thereto, *post,* and the Lighting and Watching Act, 1833, *post.* By s. 276 urban powers may be conferred on a rural authority by the Local Government Board.

As to the metropolis, s. 37 of the Metropolis Gas Act, 1860, has been repealed and superseded by special provisions of the special Acts of metropolitan companies. See, *e.g.*, City of London Gas Act, 1868, ss. 3, 86; Gaslight and Coke Company's Act, 1868, ss. 8, 109; Commercial Gas Act, 1875, ss. 3, 69; Gaslight and Coke Company's Act, 1876, s. 8, Sched. B; South Metropolitan Gas Act, 1869, ss. 4, 68.

In a case turning on the construction of a special Act, a gas company was held to be entitled to the full price of gas supplied to public lamps, though by reason of exceptional frosts they had been unable to afford a full supply. (See *In re Richmond Gas Co. and the Mayor, etc. of Richmond,* cited *ante,* p. 186.)

See s. 36, *post,* p. 241, which imposes a penalty for neglect or refusal to supply gas to public lamps, and see also the notes thereunder.

A Bill promoted by a gas company to raise the price of gas to private consumers does not affect the rights, privileges, or duties of the local authority, being large consumers for public lighting in the district, so as to enable the local authority (independently of the powers obtainable under the Borough Funds Acts) to pay the costs of opposing the Bill out of public funds under their control (*Attorney-General* v. *Swansea Corporation,* [1898] 1 Ch. 602; 62 J. P. 405).

By the Oldham Gas Act, 1886, s. 31, a differential rate charged on outside districts was abolished, and by s. 30 the corporation were not to make any greater profit on gas than was necessary to pay defined charges, any surplus enuring to the benefit of all consumers, within and without the district, in reduction of price. By s. 96 of the Oldham Act, 1865, the corporation were entitled to supply gas or water gratuitously for "public advantage."

NOTE.

They accordingly lighted the borough of Oldham gratuitously. The outlying districts contended that the benefit of this public lighting (which was said to be £6,000 a year) should be brought into account in a question with outlying districts. It was held by COLLINS, J., and afterwards by the Court of Appeal, that the lighting of the streets of Oldham was a public advantage; that the corporation obtained no "receipts" in respect thereof, and were therefore not bound to bring the same into account (*Attorney-General* v. *Oldham Corporation*, Jl. of G. L., 1891, vol. 58, p. 804, and vol. 59, p. 759).

As to the cost of the pipes necessary for the conveyance of gas to public lamps, see *Liverpool United Gaslight Co.* v. *Liverpool Corporation*, Jl. of G. L., 1910, vol. 110, pp. 251, 383.

As to consumption of gas supplied to the public lamps.

25. The gas supplied to the public lamps within the limits of the special Act shall be consumed by meter, at the option either of the local authority of the district or the undertakers, and in case of its being consumed by meter the meter shall be provided and fixed by the undertakers, and be paid for by the party requiring it.

If the gas is supplied to the public lamps in any district by average meter indication, the undertakers shall, for securing uniformity of consumption between metered and unmetered lamps, from time to time provide the public lamps in such district with proper self-acting pressure regulators and burners to the satisfaction of the local authority of such district; and the average amount of the indications of all the meters attached to the public lamps within such district under the control of the local authority shall, except as hereinafter mentioned, be deemed to be the amount consumed by each such lamp in such district.

As to the metropolis, see *post*, Commercial Gas Act, 1875, s. 84; Gaslight and Coke Company's Act, 1876, s. 32; and South Metropolitan Act, 1876, s. 33.

Governors for street lamps.

26. In case gas is supplied to the public lamps in any district by the undertakers, they or the local authority of such district may, at their own expense, cause to be affixed to each lamp the instrument known as a street lamp governor, and the undertakers or such local authority (as the case requires) shall be entitled to have access thereto for the purpose of examining the same.

For settlement of differences between the undertakers and the local authority.

27. Any difference which may arise between the undertakers and any local authority in relation to the supply or consumption of gas to or by such local authority shall be from time to time settled by arbitration in manner provided by the Companies Clauses Consolidation Act, 1845, with respect to the settlement of disputes by arbitration.

With respect to the settlement of disputes by arbitration under the Companies Clauses Consolidation Act, 1845, see ss. 128 *et seq.* of that Act, *post.*

TESTING OF GAS.

Testing place

28. The undertakers shall cause to be provided, at the place prescribed and within the prescribed time, a testing place, with apparatus therein, for the purposes following, or such of them as may be prescribed by the special Act, that is to say,—

1. For testing the illuminating power of the gas supplied:

Sect. 28.

2. For testing the presence of sulphuretted hydrogen in the gas supplied.

The said apparatus shall be in accordance with the regulations prescribed in Part I. of the Schedule A. to this Act annexed, or according to such rules as may from time to time be substituted in lieu thereof by any special Act, and shall be so situated and arranged as to be used for the purpose of testing the illuminating power and purity of the gas supplied by the undertakers, and the undertakers shall at all times thereafter keep and maintain such testing place and apparatus in good repair and working order.

Special Acts since this date prescribe the testing place. See clause 24 in the Model Gas Bill.

For a section authorising a local authority (the gas undertaking being in the hands of a company) to provide and maintain a testing place at their own cost at the municipal offices, or other municipal buildings, with apparatus for testing purity and illuminating power, see Bridgwater Gas Act, 1903 (3 Edw. 7, c. xix.), s. 79; North Middlesex Gas Act, 1903 (3 Edw. 7, c. viii.), s. 21; Colney Hatch Gas Act, 1904 (4 Edw. 7, c. xlii.), s. 38.

The Felixstowe Gas Act, 1904, s. 63, enacts that the prescribed testing place shall be a place to be provided by the urban district council at the Town Hall, and that the company shall not be required to provide a testing place under the Act of 1871; and the section further requires two hours' previous notice to be given to the company of the time at which any testing shall be conducted.

A section occurs in the South Shields Company's Gas Act, 1904, authorising the South Shields Corporation and the Jarrow Corporation respectively to provide suitable testing places in their respective boroughs, the company to provide and fix the necessary apparatus for testing. One hour's previous notice is provided for (s. 68).

As to quality of gas in the metropolis, see the Metropolis Gas Acts, *post.*

Appointment and powers of gas examiners.

29. The local authority of any district within the limits of the special Act, where the gas is not supplied by such local authority, may after the passing of the special Act from time to time appoint, or may appoint and keep appointed, a competent and impartial person to be a gas examiner to test the gas at the testing place provided in conformity with the provisions of this Act; and such gas examiner may there test the illuminating power and purity of the gas supplied by the undertakers, on any or every day between the hours of five o'clock and ten o'clock in the afternoon from the first day of October to the thirty-first day of March, both inclusive, and on any or every day between the hours of eight o'clock and eleven o'clock in the afternoon from the first day of April to the thirtieth day of September both inclusive.

Provision is now usually made in special Acts that gas examiners under this section shall test for pressure. See clause 26 (2) in the Model Gas Bill.

In making provisional orders in favour of urban authorities for gas supply, under the Gas and Water Works Facilities Acts, it is the practice of the Local Government Board to except this and certain other sections from incorporation. The following special clause is inserted:

NOTE.

"For the purposes of the Gasworks Clauses Act, 1871, the prescribed testing place shall be the testing place provided by the corporation as aforesaid and the burner to be used for testing the gas shall be the Metropolitan Argand No. 2 with a six-inch by one and three-quarter-inch glass chimney and if at any time the gas flame tails over the top of the glass a six-inch by two-inch chimney shall be used.

"The Board of Trade may on the application of the corporation approve the use of any other burner photometer or standard light that may appear to that Board to be equally or more suitable for the testing.

"Any gas examiner appointed under the Gasworks Clauses Act, 1871, for the purposes of this order may from time to time subject to the terms of his appointment at the said testing place or elsewhere not being the immediate approach to any railway bridge or railway station as and when he thinks fit test the pressure at which the gas is supplied and for that purpose may open any street, road, passage, or place vested in or under the control of any local or road authority and two hours' previous notice shall be given to the corporation of the time and place at which any testing for pressure elsewhere than at the testing place will be conducted."

Orders made by the Board of Trade—that is to say, orders in favour of companies or individuals—contain similar provisions (though not in the same words), and such orders generally incorporate the Acts of 1847 and 1871, "except where the same are expressly varied by or are inconsistent with this order." Reference may be made to such orders of the Board for the exact terms of the provisions inserted in this behalf.

The question of testing in the metropolis is governed by special provisions. See the Introduction at pp. 63—65.

See further hereon, *London County Council* v. *South Metropolitan Gas Co.*, *post*, p. 335, a case decided under the Acts relating to the metropolis, in which the Court of Appeal had to place a construction upon the word "daily," and decided that Sunday testings were permissible.

30. Where no such gas examiner is appointed, or where the testing of the gas is imperfectly attended to by the local authority, two justices, on the application of consumers of the gas of the undertakers, not being less than five, by order in writing may appoint some competent and impartial person to be gas examiner, and such person may at any time within the hours aforesaid, on producing the said order, enter on the premises of the undertakers, and there test the illuminating power and purity of the gas supplied by them.

Two justices may appoint gas examiner.

31. The undertakers may, if they think fit, on each occasion of the testing of the gas by the gas examiner, be represented by some officer, but such officer shall not interfere in the testing.

Representation of undertakers.

32. Any tests taken in pursuance of this Act shall be taken in accordance with the rules prescribed in Part II. of the Schedule A. to this Act annexed.

Mode of testing.

33. The gas examiner shall, on the day immediately following that on which the testing of the illuminating power or purity of the gas has been conducted, make and deliver a report of the results of his testing to the local authority or justices by whom he was appointed, and to the undertakers, and such report shall be receivable in evidence.

Report of gas examiner.

Sect. 34.

Access to testing place.

34. The undertakers shall give to the gas examiner and to his assistants, and to every local authority within the limits of the special Act, and their agents, access to the testing place and shall afford all facilities for the proper execution of this Act; and in case the undertakers make default in complying with any of the provisions of this section they shall for every such default be liable to a penalty not exceeding five pounds to the local authority, or to the persons making the application.

ACCOUNTS.

Accounts, etc.

35. The undertakers shall fill up and forward to the local authority of every district within the limits of the special Act, on or before the twenty-fifth day of March in each year, an annual statement of accounts, made up to the thirty-first day of December then next preceding, as near as may be in the form and containing the particulars specified in the Schedule B. to this Act annexed.

The undertakers shall keep copies of such annual statement at their office, and sell the same to any applicant at a price not exceeding one shilling for each such copy.

The Board of Trade, with the consent of the undertakers, may alter the said forms for the purpose of adapting them to the circumstances of the undertaking, or of better carrying into effect the objects of this section.

In case the undertakers make default in complying with the provisions of this section they shall be liable to a penalty not exceeding forty shillings for each day during which such default continues.

Section 38 of the Act of 1847, *ante*, p. 213, requires a copy of the account to be transmitted to the clerk of the peace in England or Ireland or to the sheriff clerk in Scotland.

See *The Dudley Gas Works Co.* v. *Warmington* (1881), 50 L. J. M. C. 69, cited *ante*, p. 221. The Leamington Priors Gas Company's Act, 1865 (which incorporated the Gasworks Clauses Act, 1847, except so far as it might be varied by any provision of the special Act), prescribes by s. 32 a special form in accordance with which the annual accounts of the company were to be made up, in lieu of provisions as to accounts contained in s. 38 of the Act of 1847. By s. 49 of the Act of 1847, undertakers are not to be exempted from any general Act relating to gasworks which may be passed in any future session. By s. 1 of the Gasworks Clauses Act, 1871, that Act and the Act of 1847 are to be construed as one Act, and by s. 35 in the text the undertakers are to make an annual statement of accounts in the form prescribed by that Act, and to furnish copies of the same to any applicant. The appellants made out their annual statement of accounts in the form prescribed by s. 32 of their special Act, and did not furnish to the respondent, on application, a copy of an annual statement of their accounts made out in the form prescribed by the Act of 1871:—*Held* (distinguishing *Dudley Gas Works Co.* v. *Warmington*), that, as the appellant's special Act prescribed the form in which the annual statement of accounts was to be made up, the provisions relating to the form of accounts in s. 35 of the Gasworks Clauses Act, 1871, did not apply (*Leamington Priors Gas Co.* v. *Davis* (1886), 18 Q. B. D. 107).

In provisional orders for gas supply in favour of urban sanitary authorities under the Gas and Water Works Facilities Acts, this section in regard to accounts is not incorporated, nor is Schedule B. containing forms of annual accounts. Special provisions are substituted which will be found in the notes to those Acts.

The instances in which the Board of Trade have altered the form of accounts under the powers of this section are recorded from time to time in the annual Statutory Rules and Orders. They have not been included in the General Index, published 1900, "on account of their local character" (p. 292).

As to the appointment of auditors, *cf.* the provisions of s. 101 of the C. C. C. Act, 1845.

When both gas and water undertakings are in the hands of the same undertakers there is usually to be found in their special Acts an enactment requiring separate accounts to be kept. For an exception see Rhymney and Aber Valleys Gas and Water Act, 1905, s. 8. A similar enactment is generally to be found when gas and electric supply undertakings are in the same hands. See, *e.g.*, Andover Lighting and Power Act, 1905, s. 77, and Shepton Mallet Gas Co. (Electric Lighting) Act, 1905, s. 32.

PENALTIES.

Penalty for failure to supply gas.

36. Whenever the undertakers neglect or refuse to give a supply of gas to any owner or occupier of premises within the limits of the special Act entitled to the same, under such pressure as is prescribed, they shall be liable to a penalty not exceeding forty shillings for each day during which such default continues.

Whenever the undertakers neglect or refuse to supply gas as by this Act required to all or any of the public lamps in accordance with the provisions of this Act, they shall be liable to a penalty not exceeding forty shillings for each default.

If it shall be proved to the satisfaction of any two justices, not being shareholders in the undertaking, after hearing the parties, that on any day the gas supplied by the undertakers is under less pressure of less illuminating power, or of less purity than it ought to be according to the provisions of this or the special Act, the undertakers shall in every such case forfeit and pay to the local authority or other persons making application for testing the gas such sum not exceeding twenty pounds as the justices shall determine.

Penalties not cumulative.

Penalties imposed on the undertakers for one and the same offence by several Acts of Parliament shall not be cumulative, and for such purpose the special Act and the Acts incorporated therewith shall be deemed several Acts.

The penalties provided for by this section may be recovered not only where there is a neglect or refusal to supply gas under such pressure as is prescribed, but also where there is a neglect or refusal to supply gas at all; and consequently the section applies in a case where the gas company have improperly cut off the supply of gas (*Commercial Gas Co.* v. *Scott* (1875), L. R. 10 Q. B. 400).

Where a case has been stated on a conviction under this section there is no right of appeal from the decision of the Divisional Court, for it is a decision in a "criminal cause or matter" (*Southport* (*Mayor, etc. of*) v. *Birkdale U. D. C.* (1897), 76 L. T. 318).

There is no provision in the general Gas Acts, 1847 and 1871, excusing default if due to unavoidable cause or accident, such as is found in the

Sect. 36.

NOTE.

Waterworks Clauses Act, 1847, ss. 36, 42, and the Waterworks Clauses Act, 1863, s. 13. Some special Gas Acts of local authorities and also of companies contain a clause excusing default for neglect or refusal to supply gas or for insufficiency of pressure, defect of illuminating power or excess of impurity when caused by circumstances beyond the control of the local authority. See, *e.g.*, Doncaster Corporation Act, 1904, s. 51. Sometimes the words "or was of so slight or unimportant a character as not materially to affect the value of the supply" are added to the clause, *e.g.*, Rotherham Corporation Act, 1904, s. 20. See p. 48.

No person will be entitled to a supply of gas who neglects or refuses to pay the gas and meter rent due.

It will be observed that the section speaks of "such pressure as is prescribed." This Act of 1871 does not itself prescribe the pressure, and unless the special Act does so there is no obligation on a gas company as to the pressure to be maintained by them. In recent gas Acts pressure is always provided for, viz., "such pressure as to balance a column of water not less than eight-tenths of one inch in height at the main or as near as may be to the junction therewith of the service pipe supplying the consumer." See Model Gas Bill, cl. 26.

In the special Acts relating to the metropolis, pressure is prescribed. The corresponding heights are six-tenths of an inch from midnight to sunset, and one inch from sunset to midnight. See s. 71 of the Commercial Gas Act, 1875; s. 26 of the Gaslight and Coke Company Act, 1876; and s. 27 of the South Metropolitan Gas Act, 1876.

Sect. 21 of the Brentford Gas Act, 1868, enacts that all the gas supplied by the appellant company shall be of such quality as to produce from an Argand burner having fifteen holes and a seven-inch chimney, and consuming five cubic feet of gas per hour, a light equal in intensity to the light produced by fourteen sperm candles of six in the pound, each burning 120 grains per hour. The respondents, the local authority, under their statutory powers, appointed a gas examiner to test the gas supplied by the appellants. The result of the gas examiner's test showed that the illuminating quality of the appellants' gas was equivalent to 11·24 candles. For the purpose of the test the gas examiner used an Argand burner having fifteen holes and a seven-inch chimney, and consuming five cubic feet of gas per hour, of a character and pattern invented by a Dr. Letheby previously to 1868, and known as a Letheby-Sugg burner. Such pattern of burner was, at the passing of the Brentford Gas Act, 1868, the best burner at that time known for testing the illuminating power of gas, but since that date considerable improvements have been made in such burner. The appellants were summoned for supplying gas of illuminating quality inferior to that required by s. 21 of the above Act; it was held that the appellants were not liable to be convicted upon the result of the test made with the pattern of Argand burner used by the gas examiner (*Brentford Gas Co.* v. *Chiswick U. D. C.* (1908), 72 J. P. 378).

A gas company was summoned under the above section for not supplying gas to a public lamp. The company could not supply the lamp without laying a communication along a private passage, which, by s. 7 of the Act of 1847, they had no power to do. The magistrate declined to convict and a Divisional Court upheld his decision (*Bellamy* v. *Liverpool United Gaslight Co.* (1904), 68 J. P. 540). The court intimated that the appellants (the corporation) should have proceeded against the owners or occupiers of the premises adjoining the passage requiring them to provide proper means of lighting under s. 150 of the Public Health Act, 1875. See, further, as to "public lamps," *Liverpool United Gaslight Co.* v. *Liverpool Corporation*, Jl. of G. L., 1910, Vol. 110, pp. 251, 383.

The provisions of s. 29 of the Electric Lighting Act, 1882, ought to be here referred to. It provides as follows:

> "29. Where a supply of electricity is authorised in an area by any license, order, or special act, and a supply of gas by any gas undertakers is also authorised within such area or any part thereof by any

> provisional order or special act under the provisions of which such gas undertakers are under any general or limited obligation to supply gas upon demand, the board of trade may, upon the application of such gas undertakers, inquire into the circumstances of the case, and if they are satisfied that any specified part of such area is sufficiently supplied with electric light, and that the supply of gas in such specified part has ceased to be remunerative to the gas undertakers, and that it is just that such gas undertakers should be relieved from the obligation to supply gas upon demand as aforesaid, the board of trade may in their discretion make an order relieving the gas undertakers from such obligation, within such specified part of such area, either wholly or in part, and upon such terms and conditions as they may think proper; and from and after the date of such order such gas undertakers shall be so relieved accordingly. All expenses of the board of trade in connection with any such inquiry or order shall be borne and paid by the gas undertakers upon whose application the inquiry or order was made."

Effect of penalty clause on right of action.

Where a gas company become liable to penalties for neglect or refusal, it follows that no action will lie for damages, and that the penalties form the only remedy. This is the result of the decision in *Atkinson* v. *Newcastle Waterworks Co.* (1877), 2 Ex. D. 441. The earlier case of *Couch* v. *Steel* (1854), 3 E. & B. 402, had decided (1) that if a statutory duty is enforceable by a penalty which can be recovered by the party aggrieved by the non-performance, there is no other remedy than that given by the Act either for the public or the private wrong, and (2) that where the penalty is not recoverable by the person aggrieved, but is recoverable by someone else, as, for example, by a common informer or a public authority, then the person aggrieved may maintain an action. The judges in the case of *Atkinson* v. *Newcastle Waterworks Co.*, while approving of the first of these propositions, disapproved of the second, and held that even where the penalty is not recoverable by the person aggrieved, he cannot maintain an action for damages. Lord CAIRNS added that the question is one that must depend to a great extent "on the purview of the legislature in the particular statute"; and this view has been recognised in later cases, as by the Privy Council in *Bathurst (Borough of)* v. *Macpherson* (1879), 4 App. Cas., at p. 268. See also *Great Northern Fishing Co.* v. *Edgehill* (1883), 11 Q. B. D. 225; *Stevens* v. *Jeacocke* (1848), 11 Q. B. 731; *Vallance* v. *Falle* (1884), 13 Q. B. D. 109; *Denaby Main Colliery Co.* v. *M. S. & L. Rail. Co.* (1885), 11 App. Cas. 97; 14 Q. B. D. 221; *Melliss* v. *Shirley L. B.* (1885), 14 Q. B. D. 911; *R.* v. *Hall*, [1891] 1 Q. B. 747. *Cf. Gale* v. *Rhymney and Aber Valleys Gas and Water Co.* (1903), cited *post*, p. 498, and *Morris and Bastert, Ltd.* v. *Loughborough Corporation*, [1908] 1 K. B. 205.

The same point was again raised in *Clegg, Parkinson & Co.* v. *Earby Gas Co.*, [1896] 1 Q. B. 592. This was an action claiming damages in respect of the alleged insufficiency and impurity of the gas supplied, the plaintiffs relying upon ss. 11, 12 of the Act of 1871. On appeal from the county court (where the judge held that the action was not maintainable) the Divisional Court held that where a general obligation is created by statute, and the same statute prescribes a specific remedy, that is the only remedy, and therefore that the action was not maintainable. *Cf.* the judgment in *Simpson* v. *South Oxfordshire Water and Gas Co.*, cited in the notes to s. 43, of the Waterworks Clauses Act, 1847, *post*, p. 489, and *Morris and Bastert, Ltd.* v. *Loughborough Corporation*, *supra*.

Circumstances in which an action may be maintainable.

Where a gas company failed to properly reinstate a public road after laying a pipe and the plaintiff thereby sustained damage, Lord RUSSELL OF KILLOWEN, L.C.J., held that the action would lie because there had been more than mere breach of duty, the jury having found nuisance, and because of s. 29 of the Act of 1847, and s. 9 of the Act of 1871 (*Goodson* v. *Sunbury Consumers Gas Co.* (1896), 75 L. T. 251). In *Hartley* v. *Rochdale (Mayor, etc. of)*, [1908] 2 K. B. 594, it was held that the mere passive omission by a road authority to rectify a subsidence in a road in their area, which had been originally occasioned by the neglect of a water company to make good the

Sect. 36.

NOTE.

road after having broken it up for the purposes of their undertaking, did not exonerate the water company from liability for an injury caused to a person using the road by reason of the subsidence. Where it was alleged that a municipal corporation supplied soft water which acted upon lead pipes, and which it was contended was not pure and wholesome within s. 35 of the Waterworks Clauses Act, 1847, and the plaintiff brought an action for damages, the majority of the House of Lords held that the obligation of s. 35 was fulfilled when pure and wholesome water was put into the mains, but Lords SELBORNE and WATSON held that the undertakers were liable, on the ground that the water contained some special and peculiar solvent of lead, which made it poisonous after passing through the leaden pipes, although it would have been harmless if it could have been drunk direct from the mains (*Milnes* v. *Huddersfield Corporation* (1886), 11 App. Cas. 511). In this case the point was taken that on the facts alleged the undertakers were liable to penalties, but not to an action. The decision, however, was given on the merits and not on this preliminary point. *Cf.* the judgment in *Simpson* v. *South Oxfordshire Water and Gas Co.*, cited in the notes to s. 43 of the Waterworks Clauses Act, 1847, *post*, p. 489.

See also *Crystal Palace Gas Co.* v. *Idris*, cited, *ante*, p. 191.

By the Tendring Hundred Waterworks Act, 1884, it was provided that: "Water supplied by the company need not be constantly laid on under pressure, but the Local Government Board may at any time or times after the expiration of five years from the passing of this Act order that the water supplied within the whole or any part of the company's water limits shall be constantly laid on under pressure, and the company shall be bound by such order as if the same were herein enacted. . . ." The limits of the Act embraced various districts including the borough of Harwich. The corporation of that borough, after the lapse of five years, complained to the Local Government Board of deficiency in the supply afforded them, and that board made an order on the company in 1892 to provide a supply of water constantly laid on under pressure within the limits of the borough of Harwich. In 1900 the corporation, complaining of default, applied for *mandamus* to compel the company to obey the order of the Local Government Board. The defendants contended that *mandamus* would not lie as the company were liable to penalties. For the corporation it was contended that there was no complete remedy provided by the Act, and that the remedy of penalties was not "equally convenient, beneficial, and appropriate." The court made absolute the rule for *mandamus* (*R.* v. *Tendring Hundred Waterworks Co.*, Jl. of G. L., August 14th, 1900, p. 417).

Where by an Act extending the powers of a Toronto Gas Company certain duties and obligations were imposed on it for the benefit of its consumers, with a view to the reduction of the price of gas contingent on the amount of surplus net profit, but no pecuniary penalty was imposed for default, and no right of action given to persons aggrieved, provision being made, however, for its accounts being audited by direction of the mayor of the corporation, with whose consent the company was originally established:—*Held*, that no individual customer had a right of action against the company for non-compliance with the provisions of the Act. Such a right only arises where given by the Act, and especially so where the Act, as in this case, is in the nature of a private legislative bargain, and not one of public and general policy (*Johnston* v. *Toronto Consumers Gas Co.*, [1898] A. C. 447).

Where a statute gives a right to recover expenses in a court of summary jurisdiction from a person who is not otherwise liable, there is no right to come to the High Court for a declaration that the applicant has a right to recover the expenses in a court of summary jurisdiction. He can only take proceedings in the latter court. The construction of s. 56 of the Harbours, Docks, and Piers Clauses Act, 1847 (10 & 11 Vict. c. 27), adopted in *The Crystal*, [1894] A. C. 508, applied to s. 47 of the Aire and Calder Navigation Act, 1889 (52 & 53 Vict. c. lxxxii.) (*Barraclough* v. *Brown*, [1897] A. C. 615).

Action for *mandamus* will not lie against a local authority to construct sewers, the remedy for neglect being by complaint to the Local Government

Board (s. 299 of the Public Health Act, 1875) (*Peebles* v. *Oswaldtwistle U. D. C.*, [1897] 1 Q. B. 625, affirmed H. L. *sub nom. Pasmore* v. *Oswaldtwistle U. D. C.*, [1898] A. C. 386). See also on the same point *Robinson* v. *Workington Corporation*, [1897] 1 Q. B. 619.

Sect. 36.

Note.

Costs of experiment to be paid according to event.

37. Where the gas examiner is appointed by the justices as aforesaid, the costs of and attending such experiment, including the remuneration to be paid to the persons making the same, and the costs of the proceedings before the justices, shall be ascertained by such justices, and in the event of any penalty being imposed on the undertakers shall be paid, together with such penalty, by the undertakers, but in the event of no penalty being imposed the costs shall be in the discretion of the justices.

Penalty for injuring meters.

38. Every person who wilfully, fraudulently, or by culpable negligence injures or suffers to be injured any pipes, meter, or fittings belonging to the undertakers, or alters the index to any meter, or prevents any meter from duly registering the quantity of gas supplied, or fraudulently abstracts, consumes, or uses gas of the undertakers, shall (without prejudice to any other right or remedy for the protection of the undertakers or the punishment of the offender) for every such offence forfeit and pay to the undertakers a sum not exceeding five pounds, and the undertakers may in addition thereto recover the amount of any damage by them sustained; and in any case in which any person has wilfully or fraudulently injured or suffered to be injured any pipes, meter, or fittings belonging to the undertakers, or altered the index to any meter, or prevented any meter from duly registering the quantity of gas supplied, the undertakers may also, until the matter complained of has been remedied, but no longer, discontinue the supply of gas to the person so offending (notwithstanding any contract previously existing); and the existence of artificial means for causing such alteration or prevention, or for abstracting, consuming, or using gas of undertakers, when such meter is under the custody or control of the consumer, shall be primâ facie evidence that such alteration, prevention, abstraction, or consumption, as the case may be, has been fraudulently, knowingly, and wilfully caused by the consumer using such meter.

Recovery of Gas Rents.

Incoming tenants not liable to pay arrears of gas rents, etc.

39. In case any consumer of gas supplied by the undertakers leaves the premises where such gas has been supplied to him, without paying the gas rent or meter rent due from him, the undertakers shall not be entitled to require from the next tenant of such premises the payment of the arrears left unpaid by the former tenant, unless such incoming tenant has undertaken with the former tenant to pay or exonerate him from the payment of such arrears.

Companies have power to require security. See s. 11, *ante*, p. 223.

The cases relevant to the construction of this section have already been fully noticed in the note under s. 11 *ante*, p. 223

Sect. 39.

NOTE.

In recent Gas Acts a clause providing for notice of removal by an outgoing tenant is generally inserted. The following are taken from the Bristol Gas Act, 1899 (62 & 63 Vict. c. clxxix.):

Notice of removal.

Gas consumers to give notice to company before removing.

> "20. Twenty-four hours notice in writing shall be given to the company by every gas consumer before he shall quit any premises supplied with gas by the company, and in default of such notice the consumer so quitting shall be liable to pay to the company the money accruing due in respect of such supply until the expiration of twenty-four hours after he shall have given to the company notice that he has quitted such premises: Provided that such liability shall in no case continue beyond the next usual period for ascertaining the register of the meter on such premises or the date from which any subsequent occupier of such premises shall require the company to supply gas to such premises whichever shall first occur. Notice of the effect of this enactment shall be endorsed on every demand note for gas rent.

Notice to discontinue supply of gas.

> "21. A notice to the company from a consumer for the discontinuance of a supply of gas shall not be of any effect unless it be in writing signed by or on behalf of the consumer, and be left at or sent by post to the office for the time being of the company."

See clauses 31 & 33 of the Model Gas Bill, *post*, pp. 369, 370.

Recovery of rents, etc.

40. If any person supplied with gas or with any gas meter or fittings by the undertakers neglects to pay to the undertakers the rent due for such gas or the rent or money due to the undertakers for the hire or fixing of such meter, or any expenses lawfully incurred by the undertakers in cutting off the gas from the premises of such person, the undertakers may recover the sum so due in like manner as a penalty under this Act.

See also as to recovery of gas charges s. 23, *ante*, p. 235, and the note under s. 11, *ante*, p. 223.

As to the recovery of penalties see s. 44, *post*, p. 247, and s. 40 of the Gas Works Clauses Act, 1847, *ante*, p. 214.

Distress for rent was held not to be an "execution or legal process" within the meaning of s. 13 of the Bankruptcy Act, 1869 (32 & 33 Vict. c. 71) (see now s. 10 of the Bankruptcy Act, 1883 (46 & 47 Vict. c. 52), and, therefore, where a gas company, who by their special Act were authorised to recover rent and charges due to them for gas "by the same means as landlords are by law empowered to recover rent in arrear," after notice of the filing of a petition for liquidation by arrangement distrained upon the goods of the petitioning debtors for a sum due for gas supplied, and the county court judge granted an injunction under the Act of 1869 restraining further proceedings in the distress, it was held by the chief judge that the injunction had been improperly granted, and that the distress was good against the trustee under the liquidation (*Ex parte Birmingham and Staffordshire Gaslight Co., In re Fanshaw* (1871), L. R. 11 Eq. 615; and see *Ex parte Birmingham Gaslight and Coke Co., In re Adams* (1870), L. R. 11 Eq. 204). In a subsequent case, the Coventry Gas Company had a section in their special Act of 1856, which authorised them to levy all sums due for gas by distress (the words "by the same means as landlords may recover rent in arrear," which occur in the *Birmingham Case, supra*, being absent from the section). The company, after one of their customers had filed a liquidation petition, and with notice of the petition, proceeded to seize his goods under a distress warrant. It was held that the company did not come within the words "landlord or other person to whom any rent is due from the bankrupt" in s. 34 of the Bankruptcy Act, 1869, and the company were restrained from enforcing the distress (*Ex parte Hill, In re Roberts* (1877), 6 Ch. D. 63). In the judgment, BAGGALLAY, L.J., distinguished this from *Ex parte Birmingham and Staffordshire Gaslight Co.*, because of the absence of the words "by the same means

NOTE.

as landlords are by law empowered to recover rent in arrear." The Corporation of Walsall were, by their special Act (39 & 40 Vict. c. cxix.), s. 44, empowered to "recover from any person any rent or charge due to them by him for gas supplied, by the like means as landlords are for the time being by law allowed to recover rent in arrear":—*Held*, by the Court of Appeal, after reviewing the two last-mentioned cases—(1) that, after the filing of a liquidation petition by a customer, the corporation were entitled, as against the trustee in the liquidation, to levy a distress in respect of a sum due by the debtor for gas supplied to him before the filing of the petition:—*Held*, (2) that the corporation were not, within the meaning of s. 34 of the Bankruptcy Act, 1869, "other persons" to whom any rent was due by the debtor, but that, by virtue of s. 44 of the special Act, they were entitled to the rights given to landlords by s. 34; and *Held* (3) that the payment due to a gas company for gas supplied, though it is called "rent" in some Acts of Parliament, is not really of the nature of rent, and consequently a gas company does not come within the words, "other person to whom any rent is due," in s. 34 of the Bankruptcy Act, 1869. Those words only apply to a person who, though he is not the landlord of the bankrupt, fills a position analogous to that of the landlord, because he is entitled to receive that which is "rent" strictly so called (*Ex parte Harrison, In re Peake* (1884), 13 Q. B. D. 753). See also *In re Smith, Ex parte Mason* (cited *ante*, p. 226, s. 42 of the Bankruptcy Act, 1883, and s. 28 of the Bankruptcy Act, 1890).

Recovery of sums due to undertakers.

41. Whenever any person neglects to pay any rent or sum due and payable by him to the undertakers, the undertakers may recover the same with full costs of suit, in any court of competent jurisdiction, and the remedy of the undertakers under this enactment shall be in addition to their other remedies for the recovery of such rent or sum.

See note to s. 16 of the Act of 1847, *ante*, p. 188.

Many modern Acts contain the following provision, which is now numbered 25 in the Miscellaneous clauses in the Model Bill:—"Proceedings for the recovery of any demand made under the authority of this Act [or the former Acts] or any incorporated enactment whether provision is or is not made for the recovery in any specified court or manner may be taken in any county court having otherwise jurisdiction in the matter provided that the demand does not exceed the amount recoverable in that court in a personal action."

In connection herewith it should be noticed that the jurisdiction of the county court has now been extended to £100 (see County Courts Act, 1903 (3 Edw. 7, c. 42), s. 3).

LEGAL PROCEEDINGS.

Contents of summons or warrant.

42. Any summons or warrant issued for any of the purposes of this Act may contain, in the body thereof or in a schedule thereto, several names and several sums.

Warrant of distress shall include costs.

43. Any justice who issues a warrant of distress in pursuance of the provisions of this Act may order that the costs of the proceedings for the recovery of the money to be levied shall be paid by the person liable to pay such money, and such costs shall be ascertained by the justice, and shall be included in the warrant of distress for the recovery of such money.

Summary proceedings

44. All offences and penalties under this Act, and all money forfeited, and all money and costs by this Act directed to be recovered as penalties,

Sect. 44.

for offences, penalties, etc.

may be prosecuted and recovered in manner directed by the Gasworks Clauses Act, 1847, with respect to the recovery of penalties.

See *ante*, pp. 214 *et seq.*

The Model Gas Bill (Miscellaneous Clauses) contains the following clause as to " Recovery of Penalties " : " Save as otherwise by this Act expressly provided all offences against this Act and all penalties forfeitures costs and expenses imposed or recoverable under this Act or any byelaw made in pursuance thereof may be prosecuted and recovered in a summary manner. Provided that costs or expenses except such as are recoverable along with a penalty shall not be recovered as penalties but may be recovered summarily as civil debts."

Service of notices by undertakers.

45. Every notice which the undertakers are by this Act required to serve upon any person shall be served by being delivered to the person for whom it is intended, or by being left at his usual or last known place of abode, or sent by post addressed to such persons, or if such person or his address be not known to the undertakers, and cannot after due inquiry be found or ascertained, then by being affixed for three days to some conspicuous part of the premises to which such notice relates.

Liability to gas rent, not to disqualify justices from acting.

46. No justice or judge of any county court or quarter sessions shall be disqualified from acting in the execution of this Act by reason of his being liable to the payment of any gas rent or other charge under this Act.

SCHEDULE A.*

PART I.

Regulations in respect of Testing Apparatus.

1. *The apparatus for testing the illuminating power of the gas* shall consist of the improved form of Bunsen's photometer, known as Letheby's open 60-inch photometer, or Evans' enclosed 100-inch photometer, together with a proper meter, minute clock, governor, pressure-gauge, and balance.

The burner to be used for testing the gas shall be such as shall be prescribed.

The candles used for testing the gas shall be sperm candles of six to the pound, and two candles shall be used together.

2. *The apparatus—*

(*a*) *For testing the presence in the gas of sulphuretted hydrogen.*—A glass vessel containing a strip of bibulous paper moistened with a solution of acetate of lead, containing sixty grains of crystallized acetate of lead dissolved in one fluid ounce of water.

---

* As regards the metropolis, it must be kept in view that special provisions on the subject of this schedule are contained in the Metropolis Gas Act, 1860, and in the special Acts of 1875, 1876, 1880, and 1900, and in the London Gas Act, 1905. As regards provisional orders under the Gas and Water Works Facilities Acts, see note to s. 29 of the Act of 1871, *ante*, p. 238.

SCHEDULE A.

Part II.

Rules as to Mode of Testing Gas.

I.—*Mode of Testing for Illuminating Power.*

The gas in the photometer is to be lighted at least fifteen minutes before the testings begin, and it is to be kept continuously burning from the beginning to the end of the tests.

Each testing shall include ten observations of the photometer, made at intervals of a minute.

The consumption of the gas is to be carefully adjusted to five cubic feet per hour.

The candles are to be lighted at least ten minutes before beginning each testing, so as to arrive at their normal rate of burning, which is shown when the wick is slightly bent and the tip glowing. The standard rate of consumption for the candles shall be 120 grains each per hour. Before and after making each set of ten observations of the photometer the gas examiner shall weigh the candles, and if the combustion shall have been more or less per candle than 120 grains per hour, he shall make and record the calculations requisite to neutralize the effects of this difference.

The average of each set of ten observations is to be taken as representing the illuminating power of that testing.*

II.—*Mode of Testing.*

(*a*) *For sulphuretted hydrogen.*—The gas shall be passed through the glass vessel containing the strip of bibulous paper moistened with the solution of the acetate of lead for a period of three minutes, or such longer period as may be prescribed; and if any discoloration of the test paper is found to have taken place this is to be held conclusive as to the presence of sulphuretted hydrogen in the gas.

---

* Under the special Gas Acts relating to the metropolis, and the notifications of the gas referees made thereunder, provision is made for correcting the readings for variations in barometrical pressure and temperature. No such provisions are made in the Act of 1871.

In *Walthamstow L. B.* v. *Lea Bridge District Gas Co.*, Jl. of G. L., January 24th, 1893, vol. 61, p. 144, it was contended on behalf of the gas company that the words "each testing shall include ten observations of the photometer made, etc." coupled with these words "the gas in the photometer is to be lighted at least fifteen minutes before the testings begin . . . from the beginning to the end of the *tests*," show that one testing of ten observations is insufficient to support a conviction, and that the words "the average of each set of ten observations" show that it was intended that there should be several testings of ten observations, and that the average of those should be taken. Mr. William Sugg gave evidence that "there should be at least three tests." In the result, the magistrates refused to convict on the summons applicable to that particular test.

Sched. B.

SCHEDULE B.

Form of Annual Accounts.

The Gas Company.

Year ended 31st December, 18 .

A —STATEMENT OF SHARE CAPITAL, on the 31st December, 18 .

1. Description of Capital.	2. Maximum Dividend authorised.	3. Number of Shares issued.	4. Nominal Amount of Share.	5. Called up per Share.	6. Total paid up.	7. Amount issued but not paid up.	8. Remaining to be issued.	9. Total Amounts. authorised.

B.—STATEMENT OF LOAN CAPITAL, on the 31st December, 18 .

1. Description of Loan (Mortgage), Bond, Debenture Stock, etc.).	2. Rate per Cent. of Interest.	3. Total Amounts borrowed at 31st December, 18 .	4. Remaining to be borrowed.	5. Total Amounts authorised.

Total Share Capital paid up (see A.) ... ... £
Do. Loan do. borrowed (see B.) ... ... £

Total Capital received ... ... £

Messrs. Wood, Drew & Co., of 6 and 7, Queen Street, Cheapside, E.C., have kindly supplied the editor with the following note to Forms **A.** and B., *supra* :—"The particulars of Share and Loan Capital should be preceded by the title of the Act of Parliament (or Order) authorising the capital. In the case of capital bearing a Standard Dividend subject to a sliding scale, particulars of such sliding scale should be inserted immediately following Form A."

Sched. B.

C.—CAPITAL ACCOUNT, for the year ended 31st December, 18 .

—	Expenditure to 31st December, 18 .	Expended this Year.	Total to 31st December, 18 .	—	Certified Receipts, 31st December, 18 .	Received during Year.	Total Receipts to 31st December, 18 .
	£ s. d.	£ s. d.	£ s. d.		£ s. d.	£ s. d.	£ s. d.
1. To expenditure to 31st December, 18				1. By ordinary shares of £ each ...			
Since that Date.				2. ,, ditto of £ each			
2. To lands acquired, including law charges				3. ,, preference shares of £ each ...			
3. ,, new buildings, manufacturing plant, machines, storage, works, and other structures connected with manufacture				4. ,, debenture stock			
4. ,, new mains and service pipes (not being in place of old ones), including laying same, paving, and other works connected with distribution				5. ,, mortgages and bonds			
5. ,, new meters (not in place of old ones), including fixing				6. ,, amount received in anticipation of calls			
6. ,, costs of promoting special Act ...							
7. ,, special items (if any)							
Total expenditure				Total ... ... £			
To balance of capital account							
£							

Messrs. Wood, Drew & Co. have kindly supplied the editor with the following note to the above Form:—"It is usual to include stoves as an additional heading of expenditure following that of meters (item 5). Premiums received on the issue of capital should form an additional heading on the receipts side."

TO MANAGEMENT.			By other items (if any)		
12. Directors' allowances					
13. Salaries of secretary, accountant, and clerks, office keepers, and messengers					
14. Collectors' commission or salaries					
15. Stationery and printing					
16. General establishment charges and incidentals...					
17. Auditor					
TO LAW AND PARLIAMENTARY CHARGES.					
18. Law					
19. Parliamentary (oppositions)					
20. To depreciation fund for works on leasehold lands (if any)					
21. To bad debts...					
To other items (if any)					
Total expenditure					
Balance carried to profit and loss account, E. ... ... £			Total receipts ... ... £		

Messrs. Wood, Drew & Co. have kindly supplied the editor with the following note to the above Form:—"Additional headings on the expenditure side are frequently required for (a) oil for carburetted water gas; (b) coke and breeze for carburetted water gas; (c) repair and renewal of stoves; (d) fittings. Also it is customary to charge under item (2) purifying materials and labour only, carrying oil and sundries to repair and maintenance of works (item 5). On the receipts side the heading of public lighting and under contracts (item 3) should be confined to the charges for street lamps and other charges of a similar nature. Under item 8 sulphate of ammonia frequently takes the place of ammoniacal liquor."

Sched. B.

Dr. E.—PROFIT AND LOSS ACCOUNT (NET REVENUE), for the Year ended 31st December, 18 . *Cr.*

	£ s. d.		£ s. d.

---

* The Act of 1871 and the accounts scheduled contemplate that the gasworks and all necessary plant shall be maintained out of revenue. Some attempts have been made by gas companies to depart from this rule, and to start a depreciation fund. See a leading article on this subject, Journal of Gas Lighting, 6th September, 1904, p. 649, and a leaderette at p. 720.

WORKING STATEMENT.

Gas undertakers, whether companies or local authorities, will find it desirable to make up each year a working statement. The following form contains all the latest improvements which experience has suggested, and for it the Editor is indebted to Messrs. Wood, Drew & Co., Chartered Accountants. See note at p. 258.

Form of Working Statement.

NOTE.—The above working statement is drawn for the use of companies, but can be adapted for the use of local authorities.

Uses of a working statement.

In a paper read by Mr. Alfred Lass, F.C.A., at Bristol, on June 13th, 1877, on the subject of the Form of Accounts prescribed by the Act of 1871, he pointed out that these accounts could be made the basis upon which an analytical working statement could be constructed, and he strongly advocated the use of such working statements, and gave a form prepared by him. As to the usefulness and advantages of such working statements, his words on that occasion may be quoted: "I am of opinion that the prescribed form of accounts meets the requirements of gas companies, because, after the preparation of a working statement similar to the above, the results of the working can be easily compared, not only with those of previous years, but with the working of the metropolitan and other gas companies, and the benefit arising therefrom to a manager who is desirous of becoming thoroughly efficient in his profession is incalculable, as it not only reveals to him the weak points, but enables him to guard against and rectify them in the future. And I am of opinion that the prescribed form of accounts meets the requirements of gas companies, because after a series of years the working statements become very valuable data not only for evidence, should it be necessary at any time to apply to Parliament for statutory powers, additional capital, or a maximum price, but also for the computation of the commercial value of the undertaking should the local authorities at any time deem it desirable, in the interest of the ratepayers to buy up the same."

For form of a working statement applicable to water undertakings, see *post.*

SALE OF GAS ACT, 1859.

(22 & 23 VICT. c. 66.*)

An Act for regulating Measures used in Sales of Gas.

[13th August, 1859.]

[*Preamble repealed by Statute Law Revision Act*, 1892 (55 & 56 *Vict. c.* 19.]

Interpretation of words "meter" and "person."

1. In construing this Act the word "meter" shall mean gas meter, and shall include every kind of machine used for measuring gas; and the word "person" shall include corporations.

Fixing unit of measure.

2. The only legal standard or unit of measure for the sale of gas by meter shall be the cubic foot containing 62·321 pounds avoirdupois weight of distilled or rain water weighed in air at the temperature of sixty-two degrees of Fahrenheit's thermometer, the barometer being at thirty inches.

---

* By the Short Titles Act, 1896, this Act may be cited as "The Sale of Gas Act, 1859." This Act was saved by s. 66 of the Weights and Measures Act, 1878, and by the same Act, s. 33, the powers of the Treasury under this Act were transferred to the Board of Trade.

By the Metropolis Gas Act, 1861, *post*, it was provided that the powers conferred on justices of the peace under the above Act, as amended by the Sale of Gas Act, 1860, *post*, shall, in so far as relates to the metropolis, be transferred to and vested in the Metropolitan Board of Works. These powers are now vested in the London County Council under the Local Government Act, 1888 (51 & 52 Vict. c. 41), s. 40 (8). See further the notes to s. 4, *post*, p. 261.

Sect. 2.

Portions of s. 2 repealed by the Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19), are omitted.

Under the powers of this Act, an Order in Council, dated March 24th, 1871, was made whereby certain wet and dry gas meters were legalised, their measuring capacity being accurately determined in relation to the cubic foot, the unit of measure fixed by the above section. See Statutory Rules and Orders Revised, vol. 8, p. 122.

Models of measures to be made and verified under the direction of the Treasury. (*Board of Trade.*)

3. From time to time models of such multiples and decimal parts of the said cubic foot as the lord high treasurer or the said commissioners shall from time to time think expedient, shall be carefully made, with proper balances, indices, and apparatus, for testing the measurement and registration of meters; and such models shall be verified under the direction of the lord high treasurer or the said commissioners, and when so made and verified shall be deposited in the office of the comptroller-general of the exchequer at Westminster; and copies of the models so from time to time deposited, verified as aforesaid shall be sent to the Lord Mayor of London, and the chief magistrate of Edinburgh and Dublin, and to the chief magistrate of such other cities and boroughs, and to such other places and persons in Her Majesty's dominions as the said lord high treasurer or the aforesaid commissioners may from time to time direct; and the said lord high treasurer or the said commissioners shall appoint a competent person or persons to design and make, subject to the approval and by direction of such lord high treasurer or the said commissioners, stamps of a uniform design to be used for stamping meters throughout the United Kingdom, with only such variations of numbers or marks thereon as shall be sufficient to distinguish each inspector's district.

Models to be deposited. (*Board of Trade.*)

Portions of s. 3, repealed by the Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19), have been omitted.

The powers and duties of the Treasury under this Act were vested in the Board of Trade by the Weights and Measures Act, 1878 (41 & 42 Vict. c. 49). The last-mentioned Act has been amended and extended by 4 Edw. 7, c. 28, which authorises the Board of Trade to make general regulations. In the Board of Trade Report under the Weights and Measures Acts, 1878 and 1889, dated August 4th, 1899 (Parliamentary Paper 333 of 1899), the following statement occurs: "In pursuance of s. 3 of the Sale of Gas Act, 1859, and s. 33 of the Weights and Measures Act, 1878, the Standards Department is now issuing to local authorities stamps of a uniform design for the year 1900, to be used for the inspection and stamping of meters throughout the United Kingdom, with such variation of number thereon as shall be sufficient to distinguish the district of each inspector of gas meters." And in the Report dated August 3rd, 1900 (Parliamentary Paper No. 341), it is stated that new gas meter stamps had been issued to the several local authorities mentioned in Appendix 10. There is also given a list of the gas companies and corporations whose gas measuring standards have been verified since the previous year.

Gas meter stamps.

The following question was asked and answered in the House of Commons in Session 1906:—

MR. S. COLLINGS (Lambeth, Kennington): I beg to ask the President of the Board of Trade if he is aware that the Sale of Gas Act, 1859, prescribes

Sect. 3.

NOTE.

the method of testing gas meters, but makes no provision for testing the indices of these meters, although the largest amount of errors is likely to arise in such indices; that the Astronomer Royal reported to the Treasury in 1860 that this omission rendered the Act nugatory and useless; that a Select Committee of the House reported in favour of amending the Act; that in 1870 the Standards Commission also reported that the Act should be amended and the Board of Trade given power to make regulations; and that the Board of Trade prepared the draft of an amending Bill in 1882; and whether the Board of Trade is now prepared to introduce a Bill, or to take any other measures to remedy the present state of the law as to testing gas meters.

MR. LLOYD GEORGE: The Act in question does not specifically lay down the method of testing the indices of gas meters, but it does require that no meter shall be stamped unless it registers correctly within certain limits. I am aware that, as stated by my hon. friend, attention has from time to time been called to the absence of precise directions as to testing of indices, but the Board of Trade have not received any complaint on this point for some years past. I shall, however, be happy to look further into the matter, and to consider whether any steps seem necessary.—*Hansard*, Vol. 154, p. 864.

Copies of the models of gas-holder to be provided by order of general or quarter sessions in England, and by meetings of justices in Scotland.

4. In England at some general or quarter sessions of the peace within nine months next after the passing of this Act the justices of the peace of every county, riding, or division, or county of a city or county of a town, in general or quarter sessions assembled, and in such boroughs as may adopt this Act, as hereinafter provided, the town council at the meeting next after such adoption, and in Scotland the justices of the peace at a meeting to be called for the purpose by the sheriff of each county, and the magistrates of each royal burgh within nine months after the passing of this Act, and so from time to time at any subsequent general or quarter sessions or meeting so called, shall determine the number of copies of the said models of gasholders, with proper balances, indices, and apparatus as aforesaid, which they shall deem requisite for the testing of meters within their respective jurisdictions, and shall direct that such copies, verified and stamped at the exchequer, together with such number of stamps for stamping meters as they shall deem requisite, shall be provided for the use of the same, and shall fix the places at which such copies and stamps shall be deposited, and shall appoint a sufficient number of inspectors of meters for the safe custody of such copies and stamps, and for the discharge of the other duties hereinafter mentioned, and shall allot to each inspector a separate district, and from time to time, when necessary, shall sub-divide and re-allot such districts; and all such districts shall be distinguished by the number or mark applied thereto on such stamps; and they shall direct what reasonable remuneration shall be paid to such inspectors for the discharge of such duties as they shall have been ordered by such justices or town council or magistrates as aforesaid to perform; and they are hereby empowered to suspend or dismiss any inspectors so appointed, or to appoint additional inspectors as occasion may require: Provided always, that nothing herein contained shall extend to compel any town council in England or royal burgh of Scotland, except such as are county towns, wherein gas is used, to provide copies of the said models and stamps, or to appoint an inspector or inspectors for the performance of the duties

Appointment of inspectors.

Sect. 4.

prescribed by this Act; and that it shall be lawful for the justices of the peace in any county, and for the magistrates of any royal burgh within such county, where they shall agree, to unite the whole or a portion of the county with such royal burgh, and to appoint one inspector therefor, and to provide at their joint expense copies of the said models and stamps to be used within such united districts: Provided always, that in every borough in England where there is a town council, not being a manufacturer or seller of gas, it shall be lawful for such town council within six months after the passing of this Act, after one month's notice duly given in the manner in which notices are usually published by such town council, to adopt this Act, if the majority of the members present at any council meeting at which the subject is appointed to be considered, shall so determine; and if no resolution to that effect shall be passed within such time, then the justices aforesaid, at their next practicable general or quarter sessions after the expiration of such six months, shall, in reference to any borough not so adopting this Act, carry this Act into effect; and in all boroughs as aforesaid in which the town council is a manufacturer or seller of gas, the justices of such boroughs shall have such and the like powers of adopting and carrying into effect the provisions of this Act within such boroughs as by this Act are given to town councils not being manufacturers or sellers of gas.

An Order in Council, dated June 29th, 1882, fixes the amount of error to be tolerated in any copies of the models of gasholders verified and deposited in the Standards Department of the Board of Trade as are provided by any justices, council, commissioners, or any other local authority. See Statutory Rules and Orders Revised, vol. 8, p. 134.

By the Weights and Measures Act, 1889 (52 & 53 Vict. c. 21), s. 15, the provisions of the Weights and Measures Act, 1878 (41 & 42 Vict. c. 49), and of that Act, as to the verification and reverification of local and working standards shall apply to the standards used by any local authority in testing meters under the Sale of Gas Act, 1859.

Powers transferred to county councils.

The powers conferred by this Act (as amended by the 23 & 24 Vict. c. 146), in so far as relates to the metropolis, were by the Metropolis Gas Act, 1861 (24 & 25 Vict. c. 79), transferred to the Metropolitan Board of Works, and under the Local Government Act, 1888 (51 & 52 Vict. c. 41), s. 40 (8), are now possessed by the London County Council. By the Local Government (England and Wales) Act, 1888 (51 & 52 Vict. c. 41), s. 3 (xiii.), the execution as local authority of the Acts relating to gas meters is transferred to the county council of each county. By s. 39 of the same Act, sub-s. (1), it is provided that where a borough, whether with or without a separate court of quarter sessions, contained according to the census of 1881, a population of less than 10,000, the powers, duties, and liabilities of the local authority in relation to gas meters shall cease, and the area of the borough shall for all the purposes of the Acts form part of the county in like manner as if it were not a borough. As regards county boroughs, s. 34 (3), enacts that the provisions of that Act with respect to gas meters, shall not apply to them.

Scotland.

See Sale of Gas (Scotland) Act, 1864 (27 & 28 Vict. c. 96), s. 1, *post*, p. 271, as to the adoption of the Act in royal burghs not co-extensive with the parliamentary boundaries. By the Local Government (Scotland) Act, 1889 (52 & 53 Vict. c. 50), s. 11, the administrative powers and duties of justices in regard to the execution as local authority of the Acts relating to gas meters are transferred to the county councils.

Sect. 5.

Models and copies of gasholders to be provided by town councils, town commissioners, etc., and inspectors appointed.

5. In Ireland the town council or town commissioners of every borough or town, such town council or commissioners not being manufacturers or sellers of gas, shall, at a meeting of the town council or commissioners to be held within nine months after the passing of this Act, and so from time to time at any subsequent meeting, determine the number of copies of the said models of gasholders, with proper balances, indices, and apparatus as aforesaid, which they shall deem requisite for the testing of meters within their towns or boroughs respectively, and, shall direct that such copies, verified and stamped at the exchequer, together with such number of stamps for stamping meters as they shall deem requisite, shall be provided for the use of the same, and shall fix the places at which such copies and stamps shall be deposited, and shall appoint a sufficient number of inspectors of meters for the safe custody of such copies and stamps, and for the discharge of the other duties hereinafter mentioned, and shall allot to each inspector a separate district, and from time to time, when necessary, shall sub-divide and re-allot such districts, and shall direct what reasonable remuneration shall be paid to such inspectors; and they are hereby empowered to suspend or dismiss any inspector so appointed, or to appoint additional inspectors from time to time as occasion may require; and in all boroughs and towns in which the town council or town commissioners shall be manufacturers or sellers of gas, the justices of such boroughs and the grand jury of the county in which such boroughs or towns not having a separate commission of the peace shall be situate respectively shall have such and the like powers as by this Act are given to the town council, and town commissioners, not being manufacturers or sellers of gas, for carrying into effect the provisions of this Act within such boroughs and towns: Provided always, that the jurisdiction of such town council and town commissioners, justices, and grand juries respectively shall extend to all meters out of such boroughs or towns for measuring gas manufactured at any gasworks by which any such borough or town shall be supplied with gas.

By the Local Government (Ireland) Act, 1898 (61 & 62 Vict. c. 37), ss. 4 (1) and 21, the powers of the grand jury are transferred to the county councils.

Officers of the exchequer at Westminster to stamp copies of models.

6. The copies of the said models so directed by the said justices, magistrates, or town council to be verified and stamped at the exchequer shall be compared with the models deposited with the comptroller general of the exchequer as aforesaid, and if correct shall be verified and stamped by the comptroller general, or some other officer of the exchequer at Westminster, duly authorised . . . and no stamp duty shall be payable thereon.

By the Standards of Weights, Measures and Coinage Act, 1866 (29 & 30 Vict. c. 82), s. 14, a provision in this section relating to payment of fees upon verification and stamping a set of measures was repealed. The Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66), repeals s. 14. That repeal does not revive the enactment as to fees. See Interpretation Act, 1889, s. 38 (2) (a). By s. 9 of the Act of 1866, it is provided that from and after the passing of that Act, an indenture of verification of any standard or any endorsement on any such indenture shall not be liable to stamp duty, nor shall any fee be payable on the verification or reverification of any standard.

Sect. 6.

Note.

Expense of providing copies of models, and remuneration of inspectors, defrayed out of county rates, etc.

7. The expense of providing and transmitting such copies of models of gasholders, with proper balances, indices, and apparatus as aforesaid, and of the stamp to be used by the inspectors, and the remuneration to the inspectors, shall be paid in England out of the stock raised in such counties, ridings, divisions, counties of cities or counties of towns, and in boroughs out of any funds applicable to lighting purposes, and if no such funds then out of the borough fund; and in Scotland such expenses in the respective shires and stewartries, and cities or royal burghs, shall be assessed by the commissioners of supply upon such shires and stewartries, and upon cities or royal burghs by the magistrates thereof, according to the real rent of lands and heritages as appearing on the valuation roll of such shires, stewartries, and burghs respectively, and in such manner and by such persons as the said commissioners of supply and magistrates respectively may determine and appoint; and such assessments shall be collected under the same powers of levying and recovery as are competent for levying and recovering the land tax: Provided always, that in the city of London the expenses and remuneration aforesaid shall be paid out of the consolidated rate raised by the commissioners of sewers of the city of London; and in Ireland such expenses in the respective boroughs and towns shall be provided for and paid respectively out of any funds applicable to lighting purposes, and, if no such fund, then out of any other borough or town fund.

The Commissioners of Sewers have now been superseded by the Common Council. See City of London Sewers Act, 1897, s. 7.

No maker or seller of meter, or person in the service of any gas company or manufacturer of meters or gas to be an inspector.

Inspector to enter into recognizances.

8. No maker, repairer, or seller of meters or of gas, or person employed in the making, repairing, or selling of meters or gas, shall be an inspector of meters under the provisions of this Act; and every inspector shall forthwith enter into a bond or recognizance to the Queen, to be sued for in any courts of record, in such sum, and either with or without a surety or sureties, as the justices, magistrates, town council, or other persons by whom he may have been appointed shall fix, for the due and punctual performance of the duties of his office, and for the due and punctual payment, at such time or times as he may be directed by the justices, magistrates, town council, or other persons by whom he may have been appointed, of all fees received by him under the authority of this Act, and for the safety of the said copies of models and stamps committed to his charge, and for their due restoration and surrender to such person or persons as may be appointed to receive them by the justices, magistrates, town council, or other persons aforesaid, immediately on his removal or other cessation from office.

Inspectors to attend at towns where gas is consumed, when

9. In England the justices in general or quarter sessions assembled, or the town council in boroughs adopting this Act at any meeting thereof, and in Scotland the justices or magistrates at a meeting called for the purpose, and in Ireland the town council or town commissioners

Sect. 9.

required by justices.

of any such borough or town as aforesaid, shall determine and appoint on what days, at what hours, and what places each and every inspector shall attend with the said copies of models and stamps in his custody at each of the several towns and districts within their respective jurisdictions, as they shall deem expedient; and every such inspector so attending shall examine, test, and, if found correct, stamp all such meters as shall be required under the provisions of this Act to be so examined, tested, and stamped, and shall deface or destroy the stamp on any meter tested and found incorrect under the provisions of this Act; and he shall keep a book wherein he shall enter minutes of all such examinations and testings, with the numbers of identity and capacity marked by the manufacturer on such meters, and give, if required, a certificate under his hand of every such stamping and defacing; and every inspector shall once in every quarter of a year account to the treasurer of the county, riding, division, county of a city or county of a town, or borough or town, or to such other person as shall be duly authorised by those by whom he may have been appointed, for all fees received by him under this Act, and shall pay the amount thereof to such treasurer as aforesaid, who shall account for the same.

Inspector to pay fees to treasurer of county, etc.

Meters when stamped need not be restamped.

10. No meter duly stamped under the authority of this Act shall be liable to be restamped, although the same be used in any other place than that at which the same was originally stamped, but shall be considered as a legal meter throughout the United Kingdom, unless found to be incorrect within the meaning of this Act.

Penalty on inspector for misconduct.

11. In case any inspector of meters shall stamp any meter without duly testing and finding the same to be correct, or shall refuse, or for three days after being so required under the provisions of this Act neglect, without lawful excuse, to test any meter or to stamp any meter found to be correct on being so tested, or shall be guilty of a breach of any duty imposed upon him by this Act, or shall otherwise misconduct himself in the execution of his offence, every such offender shall upon conviction forfeit a sum not exceeding five pounds for every such offence.

Meters not to be stamped if incorrect by more than 2 per cent. in favour of the seller or 3 per cent. in favour of the consumer, and to be stamped if erroneous to no greater extent.

12. No meter shall be stamped which shall be found by the inspector to register, or be capable of being made by any contrivance for that purpose, or by increase or by decrease of the water in such meter, or by any other means practically prevented in good meters, to register, quantities varying from the true standard measure of gas more than two per centum in favour of the seller or three per centum in favour of the consumer; and every meter, whether stamped or unstamped, which shall be found by such inspector to register or be so capable of being made to register quantities varying beyond the limits aforesaid, shall be deemed incorrect within the meaning of this Act; and every meter which shall be found by such inspector to measure and register quantities accurately, or not varying beyond the limits aforesaid, and shall be found incapable by any such means as aforesaid of being made to register quantities varying beyond the limits aforesaid, shall be considered to be correct, and be stamped as aforesaid in such manner and on such part of the meter as shall be specially directed by the authority appointing him, or, in default of such direction, as shall in his opinion best prevent fraud: Provided always, that every meter having a measuring capacity at one revolution or complete action of the meter of not less than five cubic feet, and having permanently marked upon it in some conspicuous place the words "without float," shall be stamped by the inspectors if found correct, within the meaning of this Act, in all other respects except that it is capable of being made by abstraction of water to register incorrectly against the seller of gas; but it shall not be lawful after the time aforesaid to use in the sale of gas any such meter, when so stamped by the inspector, except by written agreement between the buyer and seller specifying that this description of meter shall be used.

Certain meters incorrect against the seller of gas may be used by agreement.

See notes to s. 4, *ante*, p. 261.

13. The following rules shall be observed by the inspector in testing meters under the provisions of this Act:

Rules for testing meters.

Firstly, the meter shall be tested for soundness or leakage only, and not for percentage of error, when fixed on a horizontal base, and with gas under a pressure equal to a column of water three inches high, with a light or lights consuming not more than one-twentieth part of its measuring capacity per hour marked thereon, not less than one-half of a cubic foot per hour, for all meters of a measuring capacity not exceeding one hundred cubic feet per hour, and not more than one-fortieth part of its said measuring capacity per hour for all meters of any greater measuring capacity per hour than one hundred cubic feet; and all meters found to work under such test shall be deemed sound meters, and any meter found not to work under such test shall not be stamped:

The meter to be tested for percentage of error shall be fixed on a horizontal base, and shall be tested at a pressure equal to a column of water five-tenths of an inch high, and passing the quantity of gas or atmospheric air per hour which shall be marked thereon as its measuring capacity per hour; and the water used in such testing, and the air of the room in which such testing shall be made, shall be as nearly as practicable of the same temperature as the gas or air passed through the meter.

See notes to s. 4, *ante*, p. 261.

14. If any person or persons shall make, except under the authority of this Act, or forge or counterfeit, or cause or procure to be made, except as aforesaid, or forged or counterfeited, or knowingly act or assist in the making, except as aforesaid, or forging or counterfeiting, any stamp or mark which may be hereafter used for the stamping or marking of any meter under this Act, every person so offending shall for every such offence forfeit on conviction a sum not exceeding fifty pounds or less than ten pounds; and if any person shall knowingly sell, utter, or

Penalty for counterfeiting stamps.

Sect. 14.

dispose of, let, lend, or expose to sale, any meter with such forged stamp or mark thereon, every person so offending shall for every such offence forfeit on conviction a sum not exceeding ten pounds or less than forty shillings ; and all meters with such forged or counterfeited stamps shall be forfeited and destroyed.

Penalty for obstructing inspector.

15. Any person who shall knowingly repair or alter, or knowingly cause to be repaired or altered, or knowingly tamper with, or do any other act in relation to any stamped meter, so as to cause such meter to register unjustly or fraudulently, or who shall prevent or refuse to allow lawful access to any meter in his possession or control, or the supply of water thereto as hereinafter provided, or shall obstruct or hinder any examination or testing authorised by this Act of any such meter, shall on conviction forfeit a sum not exceeding five pounds, pay the fees for removing and testing, and the expense of purchasing and fixing a new meter ; provided that the payment of any such penalty as aforesaid shall not exempt the person paying from liability to indictment or other proceeding at law to which he would otherwise be liable, or deprive any person of the right to recover damages against such person for any loss or injury sustained by such act or default.

Consumers may use any stamped meter.

16. Every consumer of gas may purchase and use for the measurement of the gas supplied to him any meter duly stamped under the authority of this Act ; provided that the gas to be consumed per hour shall not exceed the quantity per hour the meter is intended to measure, so marked on the outside thereof as aforesaid.

After ten years all meters to be stamped.

17. After the expiration of ten years from the passing of this Act, all meters whatsoever not previously stamped which shall be used for buying and selling gas, or for the collecting of any rates or duties, or for making any charges on the passage, transmission, or conveyance of gas, shall be examined and tested under the authority of this Act, and stamped if found correct ; and every person who shall after the times respectively fixed by this Act knowingly use any meter which has not been so stamped as aforesaid, shall on conviction forfeit a sum not exceeding five pounds ; and any contract, bargain, or sale made by any such meter shall be void ; and every such meter so used shall, on being discovered by any inspector so appointed as aforesaid, be seized, and, on conviction of the person knowingly using or possessing the same, shall be forfeited and destroyed.

After twelve months, no meter to be sold, etc., unless stamped ; and unstamped meters may be stamped, if required, or stamped

18. No meter for the purpose of ascertaining the quantity of gas sold shall be fixed for use after the expiration of twelve months after the passing of this Act, unless the same shall have its measuring capacity at one revolution or complete action of the meter, and also the quantity per hour it is intended to measure in cubic feet, or multiples or decimal parts of a cubic foot, denominated or marked on the outside thereof in legible letters or figures, and shall be stamped by an inspector of meters under the provisions of this Act ; and every person who, after the

Sect. 18.

meters substituted, at the expense of the person requiring it.

expiration of such twelve months, shall fix for use any such meter before it has been so stamped, shall be liable to a penalty of five pounds for every such unstamped meter; and all meters required to be tested and stamped, except as hereinafter mentioned, shall be delivered to the inspector at the place where his testing gasholder and apparatus may be kept; and every purchaser and seller of gas by meter may, at his own expense, at any time after the expiration of the said twelve months, require any unstamped meter by which his gas is measured to be examined, tested, and, if found correct, stamped; or he may at his own expense substitute a stamped meter in the place of any such unstamped meter: Provided always, that such purchaser or seller of gas shall, before removal of any such unstamped meter for the purposes aforesaid, give twenty-four hours notice in writing of such intended removal to the other party to the contract.

Fees for testing and stamping meters.

19. The fees for examination, comparison, and testing, with or without stamping, meters, shall be sixpence for each meter delivering a cubic foot of gas in four or more revolutions or complete repetitions of the action of the meter, and one shilling for each meter delivering a cubic foot of gas by any less number of revolutions or complete actions, or one revolution or complete action, and for each meter delivering more than one cubic foot of gas by one revolution or complete action the further sum of one shilling for every cubic foot of gas delivered at one revolution or complete action beyond the first cubic foot.

Power to justices and inspectors to enter houses, etc., and inspect gas measures and meters.

20. In England and in such boroughs and towns as aforesaid in Ireland it shall be lawful for any inspector authorised in writing under the hand of any justice of the peace in England or Ireland, or of any sheriff, justice, or magistrate in Scotland, at the request and expense of any buyer or seller of gas, who shall have given twenty-four hours notice in writing to the other party to the contract, at all seasonable times to enter any house or shop, store, warehouse, still, yard, or place whatsoever within his jurisdiction where any meter, whether stamped or unstamped, shall be fixed or used, and to examine and test the same, and, if necessary for such purpose, to remove such meter, doing as little damage thereby as may be; and if upon such examination and testing it shall appear that any such meter is incorrect within the meaning of this Act, or fraudulent, the same shall not be refixed or used again unless and until altered and repaired so as to measure and register correctly, and stamped; and the fees on such removal, examination, and testing of a meter, whether stamped and replaced or not, shall be double the fees hereinbefore made payable for testing and stamping, and shall be payable by the buyer or seller of gas, as the justice of the peace in England or Ireland, or the sheriff, justice, or magistrate in Scotland, as the case may be, shall determine, and shall be recoverable accordingly; Provided always, that in case the head office of the person or company to whom such notice is to be given shall be more than twenty miles distant from the meter referred to in such notice, three days notice in writing shall be given instead of twenty-four hours notice as aforesaid;

Sect. 20.

Supply of water to meters.

and provided also, that any person duly authorised by any company or persons selling gas by meter may supply water to any meter, so as to keep the water at the correct level.

Disputed decision of inspector to be referred to two inspectors of adjoining districts, etc.

21. In case of any dispute between the buyer and seller of gas by meter, or between any owner of a meter and any inspector of meters under this Act, respecting the correctness of any meter, the inspector shall, if required by any such person dissatisfied with his decision, give such party his reasons in writing for such decision, and such party may require such meter to be examined and re-tested by two inspectors of adjoining or neighbouring districts, to be named by any justice of the peace having jurisdiction in the district where such meter shall have been tested; and the unanimous decision of such last-mentioned inspectors shall be final as to the correctness or incorrectness of such meter, except in case of appeal to the general or quarter sessions; and in case such two inspectors shall not agree, the decision of the inspector of the district to which such meter belongs shall be considered final, except in case of appeal to the general or quarter sessions, as hereinafter provided; and the expenses of the proceedings to be taken under the powers hereby granted shall be ascertained by the justice, who shall also determine by and to whom the same shall be paid; and such expenses may be recovered in any court of competent jurisdiction.

Persons aggrieved may appeal to quarter sessions.

22. In England and in such boroughs and towns as aforesaid in Ireland all persons who may think themselves aggrieved by any act or decision of any inspector or inspectors of meters, or by any order, judgment, or determination of any justice of the peace, mayor, or chief magistrate, relating to any matter or thing in this Act mentioned or contained, may appeal to the justices of the peace, recorder, or other presiding officer at the then next practicable general or quarter sessions [*to be held for the city, borough, or county within which the alleged cause of appeal shall arise, first giving seven days notice in writing of such intention to appeal, and the grounds and nature thereof, to the party against whom such complaint is intended to be made, and forthwith after such notice entering into a recognizance before some justice of the peace, mayor, or other chief magistrate, with two sufficient sureties, conditioned to try such appeal and abide the order and award of the said court thereon; and the said justices, recorder, or other presiding officer shall either hear and determine the said complaints at such general or quarter sessions, or, if they think proper, shall adjourn the hearing thereof till the following general or quarter sessions of the peace to be held for such city, borough, or county*]; and the said justices, recorder, or other presiding officer may, if they or he see cause, reverse or alter such decision, and mitigate any penalty or forfeiture, [*and may order any money to be returned which may have been levied in pursuance of such order or determination, and may also order any such further satisfaction to be made to the party injured as they or he shall judge reasonable, and may also order such costs to be paid by the party complained against to the party appealing, or vice versâ, as they shall think reasonable*].

Sect. 22.

NOTE.

The portions of this section in italics are repealed by the Summary Jurisdiction Act, 1884 (47 & 48 Vict. c. 43), "so far as relates to any order, judgment, or determination of a justice of the peace, mayor, or chief magistrate." The procedure in such cases will now be governed by the Summary Jurisdiction Acts in force in England, Scotland, and Ireland respectively. These are defined by the Interpretation Act, 1889 (52 & 53 Vict. c. 63).

This Act and existing powers not to be cumulative.

23. Where any municipal corporation, local board of health, or two or more justices, or any other corporation or person now have powers of appointing inspectors of meters, and they or such inspectors now have powers of stamping, restamping, examining, or testing meters, those powers and the provisions of this Act shall not be cumulative; but after the expiration of nine months after the passing of this Act the provisions of this Act shall supersede all such powers.

Proceedings not to be quashed for want of form, or removed.

24. No proceeding to be had or taken in pursuance of this Act shall be quashed or vacated for want of form, or be removed by certiorari or by any other writ or proceeding whatsoever into any of her Majesty's courts of record at Westminster or elsewhere, any law or statute to the contrary notwithstanding.

As to recovery and application of penalties.

25. In England and in such boroughs and towns as aforesaid in Ireland all fees and penalties received and recovered under this Act shall be applied in aid of the stock or fund out of which the expenses of carrying the Act into effect shall be defrayed; and in Scotland all penalties incurred under the provisions of this Act shall be recoverable, with expenses, either before the sheriff of the county or the magistrates of the burgh or town corporate wherein the same may be incurred or where the offender may reside, or before two or more justices of the peace of such county, at the instance either of the procurator fiscal of court or any person who may prosecute for the same; and the whole penalties, after deducting all charges, and such remuneration to the person prosecuting as the said justices shall think fit, shall be applied in aid of the funds liable under the provisions of this Act to the cost of providing and maintaining copies of the said models in the place where such penalties shall be awarded; and it is hereby provided that it shall be competent for the said courts respectively to proceed in a summary way and to grant warrant for bringing the parties complained of before them, and, upon proof on oath by one or more credible witnesses, or on the confession of the offender, or on other legal evidence, forthwith to give judgment on such complaint without any written pleadings or record of evidence, and to grant warrant for the recovery of such penalties and expenses decerned for, failing payment within fourteen days after conviction, by poinding, or by imprisonment . . .

A portion of this section, repealed by the Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19), is omitted.

Appeal in Scotland to commissioners of justiciary at circuit court.

26. In Scotland . . . it shall not be competent to appeal from or to bring the judgment of any sheriff or justices of the peace acting under this Act under review by suspension or reduction . . .

A portion of this section, repealed by the Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19), is omitted.

Sects. 27 & 28.

27 & 28. *These sections, relating to limitation, etc., of actions and tender of amends, are repealed by the Public Authorities Protection Act,* 1893 (56 *&* 57 *Vict. c.* 61), *which see at p.* 1062, post.

SALE OF GAS ACT, 1860.

(23 & 24 VICT. C. 146.)

An Act to amend the Act for regulating Measures used in Sales of Gas. [28th August, 1860.]

[*Preamble repealed by the Statute Law Revision Act,* 1892 (55 *&* 56 *Vict. c.* 19).]

Calculation of time specified in recited Act.

1. Except as to things done before the passing of this Act under the authority of the said Act, where in the said Act anything is required to be done within a specified time after the passing of the same, such time shall be calculated as if the thirteenth day of October, one thousand eight hundred and sixty, had been the date of the passing of the said Act: Provided always, that, notwithstanding anything in the said Act contained, the said Act shall not come into operation in any county of England until the magistrates of such county in quarter sessions, or in any county in Scotland until the commissioners of supply of such county, or in any county of Ireland until the grand jury of such county, shall have resolved to bring such county under the operation of the Act.

This Act may now be cited as The Sale of Gas Act, 1860 (Short Titles Act, 1896).

The proviso was, so far as respects the metropolis, repealed by the Metropolis Gas Act, 1861 (24 & 25 Vict. c. 79), s. 2. That section was in turn repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66). That repeal does not revive the proviso so far as respects the metropolis. See Interpretation Act, 1889 (52 & 53 Vict. c. 63), ss. 11 (1) and 38 (2) (a).

The powers given to quarter sessions in England under the above section were transferred to county councils by the Local Government Act, 1888 (51 & 52 Vict. c. 41), ss. 3 (xiii.) and 39 (1). As to county boroughs, see s. 34 (3) (e). In like manner the powers of Commissioners of Supply in Scotland have been transferred to the county councils by the Local Government (Scotland) Act, 1889 (52 & 53 Vict. c. 50), s. 11 (5) (i). The powers of the Grand Jury in Ireland have been transferred to the county councils by the Local Government (Ireland) Act, 1898 (61 & 62 Vict. c. 37), ss. 4 (1), 21.

Construction of Acts and recovery of penalties

2. This Act and the recited Act shall be construed together as one Act, and all penalties and forfeitures incurred under the provisions of either Act shall be sued for and recoverable in all counties, ridings or divisions in England and Ireland before two or more justices of the peace at petty sessions, or before the mayor or other chief magistrate of any city, borough, town, or place.

SALE OF GAS (SCOTLAND) ACT, 1864.*

(27 & 28 Vict. c. 96.)

An Act to enable certain Royal and Parliamentary Burghs in Scotland to avail themselves of the Provisions of the Acts Twenty-second and Twenty-third Victoria, Chapter Sixty-six, and Twenty-third and Twenty-fourth Victoria, Chapter One hundred and forty-six, for regulating the Sale of Gas. [29th July, 1864.]

[*Preamble repealed by Statute Law Revision Act,* 1893 (56 *&* 57 *Vict. c.* 14).]

Magistrates of certain burghs may apply to their district provisions of recited Acts.

1. The magistrates of any royal burgh whose ordinary jurisdiction has been extended beyond the bounds thereof by Act or Acts of Parliament, or of any parliamentary burgh having a population of twenty thousand, in which burgh the said Acts have not been brought into operation, may, at any meeting to be called for the purpose, resolve that the provisions of the said recited Acts shall be applicable to the whole district subject to their jurisdiction on and after a certain date to be fixed by them; and on the said resolution being come to the magistrates shall publish the same and make proclamation thereof at least three months before the said date so fixed, and thereafter the said recited Acts shall apply to and may be enforced by the said magistrates within the whole district subject to the jurisdiction of the said magistrates: Provided always, that where in the first recited Act anything is required to be done within a specified time after the passing thereof, such time shall for the purposes of this Act be calculated from the date fixed in the said resolution for the provisions of the said recited Acts coming into operation with respect to such district.

METROPOLIS GAS ACT, 1860.

(23 & 24 Vict. c. 125.)

An Act for better regulating the Supply of Gas to the Metropolis. [August 28th, 1860.]

Whereas the following gas companies, (that is to say) "The Gaslight and Coke Company," "The City of London Gaslight and Coke Company," "The Commercial Gaslight and Coke Company," "The Equitable Gaslight Company," "The Great Central Gas Consumers Company,"

---

* This short title is authorised by the Short Titles Act, 1896 (59 & 60 Vict. c. 14).

"The Independent Gaslight and Coke Company," "The London Gaslight Company," "The Phœnix Gaslight and Coke Company," "The Ratcliff Gaslight and Coke Company," "The Surrey Consumers Gas Company," "The South Metropolitan Gaslight and Coke Company," "The Western Gaslight Company (Limited)," "The Imperial Gaslight and Coke Company," or some of them, are respectively incorporated under the authority of Parliament for the purpose of supplying several districts of the metropolis with gas; and the said companies, instead of supplying gas by several mains in the same district, have agreed, as far as possible, each one to confine its supply to a separate district, in order to economise capital and avoid the too frequent opening of the public streets; and, subject to the provisions and restrictions of this Act, it is expedient that such districting should receive the sanction of Parliament: And whereas the regulations to which those companies are subject are not uniform: And whereas it is expedient that provision be made for the due regulation of all companies and persons supplying gas within the metropolis: May it therefore please your Majesty that it may be enacted; and be it enacted by the Queen's most excellent Majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in this present Parliament assembled, and by the authority of the same, as follows; (that is to say,)

Main objects of the Act of 1860.

Prior to the passing of this Act the metropolitan gas companies were not bound to supply gas to their customers, and the districts within which they had statutory powers were so interlaced that much inconvenience ensued, *e.g.*, from the frequent breaking up of streets. Section 6 of the Act assigned a certain defined district to each metropolitan gas company, and provided that no other company or person should supply gas for sale within the said limits unless authorised by Parliament; and by s. 14, the supply of gas to the owners or occupiers (requiring such supply) of premises within fifty yards of any existing mains of a company was made compulsory. The Act also provided for the appointment of a gas examiner, and contained elaborate provisions in regard to the illuminating power and purity of the gas to be supplied, pressure and other matters. These last-mentioned enactments have been very extensively repealed by the private Acts of the large companies supplying gas in the metropolis, and an Act passed in 1905 on the promotion of the London County Council, and new enactments in their place have been substituted.

City of London Gas Act, 1868.

The City of London Gas Act, 1868 (31 & 32 Vict. c. cxxv.), by s. 2, enacts, that that Act should be read as one with the Act of 1860; and, by s. 3, enacted that "such parts of the Act of 1860 as are described in the first schedule to this Act, and any part of any special Act of any company inconsistent with this Act, so far only as they respectively relate to the companies" [meaning thereby the Gaslight and Coke Company, the City of London Gaslight and Coke Company, and the Great Central Gas Consumers Company, all by the said Act authorised to be amalgamated] "and the city, are hereby repealed as from the thirtieth day of September, 1868, and the Act of 1860 so amended shall, as to all the companies mentioned in the preamble of the said Act, be read throughout as if the Board of Trade had been inserted therein instead of her Majesty's principal Secretary of State for the Home Department." The following is the schedule of repealed clauses:

> "*Parts of Metropolis Gas Act,* 1860, *so far as they relate to the city, repealed.*
>
> "Section 2, as far as it incorporates the provisions of the Gasworks Clauses Act, 1847, with respect to the amount of profit to be received by the undertakers from the gasworks carried on for their benefit,

or imposes any restriction on a company in respect of the rate of dividend.

"Sections 7 to 12, both inclusive.

"Sections 25 to 34, both inclusive.

"Section 37.

"Sections 40 and 41."

The Act then proceeded to authorise the Board of Trade to appoint three gas referees (ss. 29—32); to enact elaborate provisions in regard to illuminating power, purity, testing, and price (ss. 33—70); quarterly reports by the chief gas examiner (s. 71), and pressure (ss. 84, 85). See, further, *post*, p. 301.

Imperial Gas Act, 1869.

In the following year the Imperial Gas Act, 1869 (32 & 33 Vict. c. cxxviii.), by s. 81, enacted that "such parts of the Act of 1860 as are described in the schedule to this Act, and any part of any special Act of the company inconsistent with this Act, so far only as they respectively relate to the company, are hereby repealed, and the Act of 1860 so amended shall, as to the company, be read throughout as if the Board of Trade had been inserted therein instead of her Majesty's principal Secretary of State for the Home Department." The sections thus repealed were 7 to 12 both inclusive, 25 to 34 both inclusive, s. 37, and ss. 40 and 41. In place of these the Act contained fresh provisions as to illuminating power, purity, pressure, testing, price, etc. This company afterwards became amalgamated with the Gaslight and Coke Company.

South Metropolitan Gas Act, 1869.

In 1869, also, the South Metropolitan Gaslight and Coke Company's Act, 1869 (32 & 33 Vict. c. cxxx.), by s. 4, enacted that "such parts of the Act of 1860 as are described in the first schedule to this Act, and any part of any special Act of the company inconsistent with this Act, so far only as they respectively relate to the company, are hereby repealed as from the thirtieth day of September, 1869, and the Act of 1860 so amended shall, as to the company, be read throughout as if the Board of Trade had been inserted therein instead of her Majesty's principal Secretary of State for the Home Department." The sections thus repealed, as regards the South Metropolitan Company, were s. 2 (so far as it incorporates the provisions of the Gasworks Clauses Act, 1847, with respect to the amount of profit to be received by the undertakers from the gasworks carried on for their benefit, or imposes any restriction on a company in respect of the rate of dividend), ss. 7 to 12 both inclusive, ss. 25 to 34 both inclusive, s. 37, and ss. 40 and 41. The Act follows on the lines of the City of London Gas Act, 1868, and makes provision for the appointment of gas referees, and contained fresh provisions as to illuminating power, purity, pressure, testing, price, etc., in place of those repealed. By s. 88, it is provided *inter alia* that nothing in the Act contained shall exempt the company or their gasworks from the provisions of the Metropolis Gas Act, 1860, "Excepting so far as those provisions are varied by this Act or 'the Act for regulating measures used in sale of gas,' as amended by subsequent Acts."

23 & 24 Vict. c. 146.

Gaslight and Coke Company's Act, 1873.

By the Gaslight and Coke Company's Act, 1873 (36 & 37 Vict. c. cxvi.), s. 4, it is provided that s. 110 of that company's Act of 1868 (which had provided that nothing in that Act contained should exempt the company or their gasworks from the provisions of the Metropolitan Gas Act, 1860, and certain other Acts), should be read and construed as if the Act of 1860 were omitted therefrom.

Commercial Gas Act, 1875.

In 1875, the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), by s. 3, provided that "the following parts of the Metropolis Gas Act, 1860, shall not apply to the Commercial Company (that is to say):

"Section 2, as far as it incorporates the provisions of the Gasworks Clauses Act, 1847, with respect to the amount of profit to be received by the undertakers from the gasworks carried on for their benefit, or imposes any restriction on the company in respect of the rate of dividend.

"So much of s. 4 as defines the meaning of the words 'common gas' and 'cannel gas.'

"Sections 7 to 12, both inclusive.

> "Sections 25 to 34, both inclusive.
>
> "Sections 37 and 38.
>
> "Sections 40 to 44, both inclusive.
>
> "And such provisions of the Metropolis Gas Act, 1860, as apply to the Commercial Company shall be read and have effect as if the Board of Trade were named therein instead of one of her Majesty's principal Secretaries of State, and the Gasworks Clauses Act, 1871, shall not extend or apply to the Commercial Company."

The Act established a sliding scale of price, and contained fresh enactments as to illuminating power, purity, pressure, and testing.

Gaslight and Coke Company's Act, 1876.

In 1876, the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), by s. 8, provided that the enactments of the Metropolis Gas Act, 1860, specified in Part II. of the same schedule, should, from and after the passing of that Act, cease to relate or apply to or affect the Independent Gaslight and Coke Company. Part II. of the schedule contained the following:—

> "Section 2, as far as it incorporates the provisions of the Gasworks Clauses Act, 1847, with respect to the amount of profit to be received by the undertakers from the gasworks carried on for their benefit, or imposes any restriction on a gas company in respect of the rate of dividend; so much of section 4 as defines the meaning of the words 'common gas' and 'cannel gas'; sections 7 to 12 both inclusive; sections 25 to 34 both inclusive; sections 37 and 38; sections 40 to 44 both inclusive."

This Act also established a sliding scale of price, and contained fresh enactments as to illuminating power, purity, pressure, and testing.

South Metropolitan Gas Company's Act, 1876.

In 1876, also, the South Metropolitan Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxix.), established a sliding scale of price, and contained fresh enactments as to illuminating power, purity, pressure, and testing. That company's Act of 1869 had already largely repealed the Act of 1860.

Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880.

In 1880, the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880 (43 & 44 Vict. c. clxxxi.), repealed (see *post*, p. 333) all the provisions of the Commercial Gas Company's Act, 1875, the Gaslight and Coke Company's Act, 1876, and the South Metropolitan Gaslight and Coke Company's Act, 1876, which made special provisions as to illuminating power, testing, etc., in place of those contained in the Metropolis Gas Act, 1860, and fresh enactments on all these subjects were made to replace those repealed.

In 1900, the South Metropolitan Gas Act, 1900 (63 & 64 Vict. c. clxii.), provided for the reduction of the illuminating power of the gas of that company, and for a reduction of the standard price (see *post*, p. 339).

See also the provisions of the Commercial Gas Act, 1902, *post*, p. 341; of the Gaslight and Coke Company's Act, 1903, *post*, p. 346; of the London Gas Act, 1905, *post*, p. 295; and of the Gaslight and Coke Company's Act, 1909, *post*, p. 350.

It appears, therefore, that the greater part of the Metropolis Gas Act, 1860, has been repealed as regards the whole of the metropolis, the thirteen companies enumerated in it having been amalgamated with one or other of the three great companies above mentioned. Of the enumerated companies, the following have been amalgamated with the Gaslight and Coke Company, viz.: the City of London Gaslight and Coke Company; the Equitable Gaslight Company; the Great Central Gas Consumers Company; the Independent Gaslight and Coke Company; the London Gaslight Company; the Western Gaslight Co., Limited; and the Imperial Gaslight and Coke Company. With the Commercial Gas Company has been amalgamated the Ratcliff Gaslight and Coke Company; and with the South Metropolitan Gaslight and Coke Company (now called the South Metropolitan Gas Company) have been amalgamated the Phœnix Gaslight and Coke Company, and the Surrey Consumers Gas Company. By the Crystal Palace District Gas Act, 1893 (56 & 57 Vict. c. clxviii.), s. 30, it is enacted that, notwithstanding the exception contained in s. 64 of the South Metropolitan Gas Act, 1876 (39 & 40 Vict. c. ccxxix.), that company and the South Metropolitan

Company may, subject to the provisions and restrictions in that section contained, amalgamate their undertakings. The section further provides that in the event of any scheme of amalgamation under that section being submitted to the Board of Trade, notice shall be given by that Board to every local authority within the limits of supply, and that Board shall receive and consider any objections and representations made by any such local authority. The name of the Crystal Palace Company was changed to the South Suburban Gas Company by the South Suburban Gas Act, 1904.

Accounts of metropolitan gas companies.

Amongst the sections of the Act of 1860, repealed as regards all the three great companies, is s. 41, in regard to the publication of annual accounts in a prescribed form. The special Acts of 1875 and 1876 contain similar provisions, and these accounts are each year laid before Parliament by the Board of Trade. See also s. 27 of the South Metropolitan Gas Act, 1900, *post*, p. 340.

Annual returns to Parliament.

In the return annually laid before Parliament relating to all authorised gas undertakings in the United Kingdom, the details of the capital, dividends, authorised and paid, and other information relating to the three great companies, will be found.

By the Gaslight and Coke Company's (Capital Consolidation) Act, 1898 (61 & 62 Vict. c. clxxii.), s. 21, it is provided that certain scheduled Acts shall, "save so far as the same may have been repealed, apply in regard to the company, throughout its district for the time being." Among these Acts is the Metropolis Gas Act, 1860.

On the subject of the foregoing notes, see further in the INTRODUCTION.

Short title.

1. This Act may for all purposes be cited as "Metropolis Gas Act, 1860."

10 & 11 Vict. c. 15, incorporated with this Act.

2. The Gasworks Clauses Act, 1847 (except so far as the provisions thereof are inconsistent with this Act), is incorporated with and forms part of this Act, and shall apply to the several companies before named or referred to as fully as if the gasworks of the several companies were authorised by this Act; and the expression "undertakers" in the recited Act shall be held to apply to every gas company affected by this Act; but it shall not be lawful for any gas company, by the application of any of their profits or funds, to make up to the prescribed rate, or the rate of ten pounds per centum per annum where no such rate shall be prescribed, any dividend which shall have been payable more than six years previously; provided, that the powers vested in the justices by the said Act shall be exercised by a magistrate.

The Acts of the South Metropolitan Gas Company, 1869 (32 & 33 Vict. c. cxxx.), the Commercial Gas Company, 1875 (38 & 39 Vict. c. cc.), and the Gaslight and Coke Company, 1876 (39 & 40 Vict. c. ccxxv.) (by which Acts a sliding scale of profits is introduced), repeal this section "so far as it incorporates the provisions of the Gasworks Clauses Act, 1847, with respect to the amount of profit to be received by the undertakers from the gasworks carried on for their benefit, or imposes any restriction on the company in respect of the rate of dividend." The City of London Gas Act, 1868, also contained a repeal of this section to the extent above stated. See s. 3, *post*, p. 302, and the Schedule, *post*, p. 308.

As to back dividends, see p. 209.

Companies and persons to whom Act applies.

3. This Act applies to the several gas companies, and to all persons already or hereafter supplying gas within the metropolis, except as hereinafter excepted.

Sect. 4.

Interpretation of terms.

4. In the construction of this Act the following words and expressions have the following meanings, unless excluded by the subject or context; (that is to say,)

The expression "gas company" or "gas companies" means and includes any and every company, and any person or persons supplying gas within the limits of this Act:

The expression "local authority" includes the Metropolitan Board of Works, vestries, and district boards appointed under an Act of the session of the eighteenth and nineteenth years of the reign of her present Majesty, chapter one hundred and twenty, for the local management of the metropolis:

The Act here referred to is the Metropolis Management Act, 1855.

The powers, duties, and liabilities of the Metropolitan Board of Works were transferred to the London County Council by the Local Government Act, 1888 (51 & 52 Vict. c. 41), s. 40 (8). Under the London Government Act, 1899 (62 & 63 Vict. c. 14), the borough councils become the local authority in the place of the vestries and district boards.

The word "inspector" or "inspectors" shall mean any metropolitan gas inspector or inspectors to be appointed under this Act:

The word "consumer" means a person receiving or entitled, in accordance with this Act, to receive a supply of gas from any gas company:

The word "the metropolis" has the same meaning as in the said Act of the eighteenth and nineteenth years of her present Majesty, chapter one hundred and twenty:

The word "district" means, with respect to every gas company supplying gas wholly or in part within the metropolis, the district, so far as it is within the metropolis, within which the gas company are from time to time authorised to supply gas, and means, with respect to any person or persons not being a gas company, but supplying gas wholly or in part within the metropolis, the district within the metropolis within which he or they shall from time to time as a trade or business supply gas:

The word "street" includes square, court, alley, highway, lane, road, thoroughfare, and public passage or place:

The word "premises" includes public and private messuages and other buildings, lands, and tenements whatsoever:

The word "the gasworks" means the works of the respective gas companies, and the works connected therewith:

The word "rate" includes all rents and other payments for a supply of gas:

The word "meter rent" includes all rents and other payments for the use of gas meters:

Sect. 4.

The word "magistrate" means any police or stipendiary magistrate acting in and for the district of the metropolis in which the matter referred to him arises, and in the city of London and the liberties thereof shall mean any justice of the peace for the city of London and the liberties thereof:

The words "common gas" shall mean gas of an illuminating power hereinafter defined of not less than twelve candles:

The words "cannel gas" shall mean gas of an illuminating power hereinafter defined of not less than twenty candles.

The Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), and the Gaslight and Coke Act, 1876 (39 & 40 Vict. c. ccxxv.), declare inapplicable to those companies respectively so much of this section as defines the meaning of the words "common gas" and "cannel gas."

Limits of Act.

5. The limits of this Act shall be the metropolis: Provided always, that this Act and the several clauses and provisions thereof shall not extend or apply or be construed to extend or apply to the several gas companies set forth and enumerated in the schedule annexed to this Act; provided also, that the districts severally specified and described in the Acts and instrument of incorporation respectively mentioned in the said schedule, or within which the said companies or any of them are now supplying gas (notwithstanding the said districts, or any portions thereof, are or may be within the limits of the metropolis as defined by this Act), shall not be included or deemed to be included in the expression "the metropolis," or any extension thereof which may hereafter be made under the provisions of the hereinbefore-mentioned Act of the eighteenth and nineteenth Victoria, chapter one hundred and twenty; provided also, that if the said companies or any of them shall supply gas in parts of the metropolis other than those within their respective districts as defined in the said schedule, then the provisions of this Act shall be held to apply to such companies respectively so far only as regards such extended limits as may be within the metropolis.

Sanctioning assignment of districts to gas companies to be subject to triennial revision.

6. The limits of each of the said companies shall be the respective districts supplied with gas by such companies as the same are defined upon four duplicate maps, signed by the Right Honourable Thomas Henry Sutton Sotheron Estcourt, and which maps have been severally deposited with the respective clerks of the peace for the counties of Middlesex, London, Surrey, and Kent; provided, that at the expiration of three years next after the passing of this Act, and of every three years thereafter, her Majesty's Principal Secretary of State for the Home Department for the time being may, either upon the application and with the consent of any two or more of the said gas companies whose districts adjoin one another, make any alteration in the boundaries of such districts, or, upon the application of any local authority, or upon the requisition of not less than twenty gas consumers within any district or districts proposed to be affected, and upon proof to his satisfaction being given that any of

Sect. 6 the said gas companies are not in a condition adequately to supply with gas their respective districts, or have substantially failed to fulfil the obligations imposed by this Act, may make such alterations in the boundaries of such districts, or admit any new company respectively, as he thinks proper ; and all such alterations shall be certified on one or more maps, to be signed by the said Secretary of State, and deposited with one or more of the said clerks of the peace ; and such last-mentioned map or maps shall be binding on all parties ; and the provisions of this Act shall be held to apply to the several districts when so altered, and to the several companies affected thereby, as fully and effectually as if no alteration in such districts had been made ; and no other company or person than the company to whom such limits are for the time being assigned or shall hereafter be assigned shall supply gas for sale within the said limits, unless authorised by Parliament so to do ; provided, that before proceeding to consider the necessity for altering any of the said districts the said Secretary of State shall cause at least one month's notice to be given of such application to all parties interested therein or affected thereby, and such notice shall state the day and hour when and the place where such application will be considered ; and notices to be given to any gas company shall be left with the secretary or some other principal officer of the company, and notices to be given to any local authority shall be left with the clerk or some other principal officer of the said local authority.

The Board of Trade has been substituted for the Secretary of State under this section. See note, *ante*, pp. 272, 273.

The effect of this section, as between the several companies enumerated in the Act, was to give to each company a monopoly in its own district. By s. 54 the rights of various parties are saved, including "any powers now exercised or possessed in respect of the manufacture or supply of gas within the metropolis by any railway company, or by any other person or persons making or supplying gas for his or their own use, and not making or supplying gas to the public as a trade or business." At the time the Act passed the Great Western Railway Company had a contract with the West London Junction Gas Company to supply the railway company with gas by meter at Wormwood Scrubbs, the company thence conveying the gas in their own pipes to Paddington. The railway company lighted with the gas not only their own line and station, but also the Great Western Hotel, of which they were the owners, and some carriages of the Metropolitan Railway, in which they had an interest. The places lighted were within the district allotted to the plaintiffs under s. 6. Vice-Chancellor STUART held that the railway company were not in the circumstances supplying "to the public," and were therefore protected by s. 54 (*Imperial Gaslight and Coke Co.* v. *West London Junction Gas Co.* (1867), 15 L. T. (N.S.) 66). On appeal to the Lords Justices, the plaintiffs' counsel gave up the case, except as to the question of the supply of gas to the hotel. The judgment of the Vice-Chancellor was affirmed (W. N. (1868) 1 ; 58 L. T. (N.S.) 900, n.). The decision of the Lords Justices in this case will be found elaborately commented on by Lord HALSBURY, L.C., in *Gaslight and Coke Co.* v. *South Metropolitan Gas Co.* (1890), 62 L. T. 126. In that case no question arose under s. 54. The London and South Western Railway Company's Nine Elms Station was partly within the district of the appellant company and partly within that of the respondent company. The respondents, on being required to do so by the railway company, provided a meter at a point within their own district, from which they supplied gas which was used for lighting the whole station, including the part within the district of the appellants, to which it was conducted through pipes laid on the premises of the railway company. The House of Lords held this to be an infringement of s. 6, reversing the judgment of the Court of Appeal, who had decided (58 L. T. (N.S.) 899) that the sale and delivery of the gas took place at the meter, and that therefore there was no infringement of s. 6. The Metropolitan Electric Supply Company, Limited, were by a special Act obtained in 1889 and by three subsequent provisional orders, authorised to supply electricity within four distinct areas of supply, with (in each case) the usual prohibition in regard to supplying beyond the area of supply. In 1898 the company obtained a special Act authorising them to acquire land in the parish of Willesden (which was beyond any of their authorised areas of supply) and to erect thereon a generating station for the purposes of their already authorised areas of supply. In the same year the Willesden Urban District Council obtained statutory powers to supply electricity within their district. In 1903 the company commenced to supply electricity to certain sidings of the London and North Western Railway Company, which were within the district of the council and which adjoined the Willesden generating station. On an application for an injunction by the Attorney-General on the relation of the District Council, the company contended that they were a limited company as well as a statutory company; that by their Memorandum of Association their powers were unlimited in the respects complained of, and that the prohibition contained in their Act and Orders was not general and did not prevent them from exercising their general powers. FARWELL, J., decided against this view and granted an injunction. This decision was affirmed by the C. A. (*Attorney-General* v. *Metropolitan Electric Supply Co., Ltd.*, [1905] 1 Ch. 757). *Cf. Attorney-General on relation of Wakefield Union* v. *Morley Corporation and G. N. Rail. Co.*, Jl. of G. L., March 6th, 1894, vol. 63, p. 441; *Halifax Corporation* v. *Morley Corporation*, *ib.*, and May 8th, 1894, vol. 63, p. 855; 10 T. L. R. 454, and *Seaton* v. *Linlithgow Commissioners* (1900), 2 F. 907. The decision in *Gaslight and Coke Co.* v. *South Metropolitan Gas Co.*, *supra*, was followed in *Attorney-General* v. *West Gloucester Water Co.*, cited *ante*, at p. 153.

7. *On complaint as to quantity or quality, Secretary of State may appoint a person as inspector to inquire and report.*

8. *Power of inspector so appointed.*

9. *Penalty on obstructing inspector.*

10. *Notice to company by Secretary of State, if complaint well founded.*

11. *Company to remove ground of complaint.*

12. *Gas companies to obey orders of Secretary of State.*

Sections 7 to 12 are repealed by the City of London Gas Act, 1868 (31 & 32 Vict. c. cxxv.), s. 3, so far as they relate to the city of London; by the South Metropolitan Gas Act, 1869 (32 & 33 Vict. c. cxxx.), s. 4; by the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), s. 3; and by the Gaslight and Coke Companies Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 8, so far as they relate to those companies respectively. Sections 7 to 12 have again been repealed by the London Gas Act, 1905, s. 20, see *post*, p. 300. As to the Act of 1868, see further the footnote at p. 301.

Costs of altering district.

13. All the costs, charges, and expenses of and incident to any inquiry and decision of the said Secretary of State under this Act shall from time to time be borne and paid by such parties as the said Secretary of State shall direct; and such decision may, upon an ex parte application, be made a rule of any of her Majesty's superior courts of law at Westminster.

The duties of the Secretary of State under this Act have been transferred to the Board of Trade. See note at pp. 272, 273.

Sect. 14.

Gas companies to provide pipes, and supply gas and meters at prescribed rents.

14. Every gas company from time to time supplying gas within any district shall, as to any premises or street within such district not already supplied with gas, and which shall lie within fifty yards of any existing mains, at their own expense, on being required by the owner or occupier of any premises within the district or in part within the district, who shall contract for not less than two years to pay gas rates in respect of such supply to an amount equal to twenty per cent. upon the outlay, provide and lay all proper and sufficient communication, service, and other pipes up to the premises of such owner or occupier, to communicate with the gas company's mains, and shall, if so required by the owner, occupier, or local authority, furnish him or them, at the rate prescribed by this Act, with a supply of gas for the purpose of being used in or on the premises, or for lighting the street, and, if so required by the owner or occupier, furnish him with one or more meters, for ascertaining the quantity of gas consumed ; provided that the gas company shall not be bound to supply more than one meter for each consumer occupying a separate dwelling or apartment, nor any meter exceeding a five-light meter ; provided also, that the meter rent which the said company shall be entitled to claim for such meter shall not exceed ten per cent. on the net cost of such meter ; . . .

See notes to ss. 11 and 39 of the Gasworks Clauses Act, 1871 (34 & 35 Vict. c. 41), *ante*, pp. 223 *et seq.*, and pp. 245 *et seq.*

A proviso to this section is repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66).

See a report by a Committee of the London County Council on the subject of meter rents charged by the London Gas Companies, Jl. of G. L., May 4th, 1895, p. 1028.

Security to be given to gas company if required.

15. Provided, that the owner or occupier, if so required in writing by the gas company or any of their officers, shall, before he is entitled to have the pipes provided and laid, or to have a supply of gas or of meters furnished, give to the gas company such security for the payment of the rate for the gas to be supplied to him, and of the meter rent for every meter to be supplied to him, as he and the gas company agree on.

Under s. 39 an incoming tenant is not liable for payment of arrears due from preceding tenant. *Cf.* ss. 11 and 16 of the Act of 1871, *ante*, pp. 223 and 229.

Section 77 of the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), provides that

> "Sections 15 and 16 of the Metropolis Gas Act, 1860, which require security to be given, shall apply to the supply of gas or of meters to any person who shall succeed a tenant in the occupation of a house or premises where at the time of such persons entering into possession gas was consumed and who shall desire to continue to use the gas of the Commercial Company as though the company had not theretofore supplied the said house and premises and the company in default of such person's compliance may discontinue the supply of gas to such person and remove the meter." Similar provisions are contained in the Gaslight and Coke Companies Act, 1870 (s. 13), and the South Metropolitan Gas Companies Act, 1869 (s. 72).

Differences as to security

16. Provided, that if the owner or occupier and the gas company cannot agree thereon, the security to be given shall be determined by a

Sect. 16.

to be determined by a magistrate.

magistrate; and any single magistrate shall, on the application of the owner or occupier and the gas company, or either of them, determine the nature and amount of the security to be given; and the security may, as the magistrate thinks fit, be the deposit with the gas company or with any person approved by the magistrate, or the prepayment to the gas company, of a sum of money or any other security which the magistrate thinks sufficient and reasonable; and the determination of the magistrate shall be binding on all parties, and final: Provided, that if the security be the deposit with the gas company of a sum of money, the gas company shall pay interest thereon to the consumer at such rate as the magistrate shall determine.

See notes to ss. 11 and 16 of the Gasworks Clauses Act, 1871 (34 & 35 Vict. c. 41), *ante*, pp. 223 *et seq.*, and p. 229.

Penalty on gas company failing to provide pipes or supply of gas or meters.

17. If the gas company, not being entitled to require or not having required any security, wilfully fail for seven days after being thereunto required in writing by the consumer, or, where the security agreed on or determined by the magistrate is given, shall wilfully fail for fourteen days thereafter to provide and lay all proper and sufficient communication, service, and other pipes, or to furnish a supply of gas, or to furnish any meter, pursuant to the provisions of this Act, then and in every such case the gas company shall, on a summary conviction before a magistrate, forfeit and pay to the consumer not exceeding forty shillings for every day after the expiration of seven or fourteen days respectively during which the failure continues.

Since the passing of the Gasworks Clauses Act, 1871 (34 & 35 Vict. c. 41), those of the metropolitan gas companies which are affected by it (as to which see the notes *ante*, p. 220) are no longer entitled to seven days notice; and are bound to afford a supply after reasonable notice in accordance with s. 11 of that Act (*South Metropolitan Gas Co.* v. *Noakes* (1889), 61 L. T. 556).

Gas to be consumed by meter if required by companies.

18. Provided, that every private consumer shall, if so required in writing by the gas company, consume the gas by meter; but any consumer may, if he thinks fit, provide his own meter.

Gas companies may contract for supply.

19. Subject to the provisions of this Act, every gas company, from time to time, may enter into any contract with any owner, occupier, or local authority for all or any of the following purposes; that is to say, for supplying him or them with gas, and with pipes, burners, meters, lamps, lamp posts, and other apparatus, and for the repair and cleansing and for the lighting and extinguishing thereof, in such manner and on such terms and conditions as the parties agree.

Contracts valid though not under seal.

20. Provided, that, notwithstanding its being required by any Act of Parliament or otherwise that the gas company's contracts shall be under seal, every contract of the gas company entered into in accordance with this Act shall without seal be binding on them, if the contract be signed by at least two of their directors, or by their secretary or other officer, by the authority of at least two of their directors.

See notes to s. 1 of the Gasworks Clauses Act, 1847 (10 & 11 Vict. c. 15), *ante*, pp. 147 *et seq.*

Sect. 21.

Restrictions on contracts with gas companies.

21. Provided, that no contract for any of those purposes shall contain any term or condition contrary to any of the provisions of this Act, or for giving in case of difference the sole arbitrament thereon to the gas company or any officer or person who is or has been employed by them, or who may have a pecuniary interest in such company, or for requiring any notice by a consumer discontinuing his supply of gas or meter which shall make him liable to pay more than one month's rate or meter rent after the time of the service of the notice, or which shall entitle the gas company, except for breach of any of the provisions of this Act, to discontinue any supply of gas by less than one month's notice in writing to the consumer, unless the rate due for gas shall be in arrear, in which case three days notice in writing to the consumer shall be sufficient.

See *Commercial Gaslight Co.* v. *Scott* (1875), L. R. 10 Q. B. 400, and other cases cited in notes to s. 3 of the Gasworks Clauses Act, 1871 (34 & 35 Vict. c. 41), *ante*, p. 220).

Gas companies to light streets when required by local authority.

22. The gas company shall well and effectually light all public lamps in all streets which they are required by the local authority to light, and shall, according to the terms of their contract, supply to the local authority so much gas as they require for their public lamps; provided, that the gas company shall not be compelled to light any street with lamps at a greater distance from each other than seventy-five yards.

Local authorities may provide lamp posts and lamps.

23. The local authority may provide and keep in repair their own public lamp posts and lamps, and apparatus connected therewith, and, in case of their electing to burn by meter, light and extinguish the lamps, and defray the expenses thereof.

As to penalty for damaging lamp posts in the metropolis, see Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), s. 206; and as to affixing bills, notices, etc., see Metropolis Management Amendment Act, 1862 (25 & 26 Vict. c. 102), s. 90.

Service pipes to be fully charged with gas.

24. Every gas company shall, unless prevented by necessary repairs or unavoidable accident, at all times keep all their branch or service pipes fully charged with gas, and the stopcocks so turned as not to prevent the branch or service pipes from being at all times filled with gas.

25. *Illuminating power and purity of gas.*

26. *Penalty for deficient illuminating power or impurity.*

27. *Appointment by local authority of examiner of gas.*

28. *Examination of gas, and report thereon.*

29. *Two or more local authorities may join in the appointment.*

30. *Complaint to a magistrate as to supply of gas.*

31. *Hearing on report.*

32. *Order on hearing.*

33. *Gas company to obey order.*

34. *Gas companies to afford facilities for examination under this Act.*

Sects. 25—34 are repealed by the City of London Gas Act, 1868 (31 & 32 Vict. c. cxxv.), s. 3; the South Metropolitan Gas Act, 1869 (32 & 33 Vict. c. cxxx.), s. 4; the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), s. 3; and the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 8.

The same sections have again been repealed by the London Gas Act, 1905, s. 20. See *post*, p. 300.

Limit of charge for gas and meters.

35. No gas company shall . . . demand or take for any gas or five-light meter supplied by them any sum of money exceeding the rate or meter rent by this Act authorised.

Certain words omitted from this section are repealed by the Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19).

36. *Determination of existing contracts.*

A proviso to this section was repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66), and the remainder of the section by the Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19).

37. *Limit of charge for gas supplied to public lamps.*

Repealed by the City of London Gas Act, 1868 (31 & 32 Vict. c. cxxv.); South Metropolitan Gas Act, 1869 (32 & 33 Vict. c. cxxx.); Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.); and the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.). In each of these Acts new provisions are substituted. See *post*. Section 37 has been again repealed by s. 20 of the London Gas Act, 1905. See *post*, p. 300.

38. If any difference arise between the local authority and the gas company with respect to any alteration in the test, or to the rate to be charged for gas supplied or for lighting any public lamp, the difference shall be referred to and be determined by arbitration in the manner prescribed by the Companies Clauses Consolidation Act, 1845, with respect to the settlement of disputes by arbitration.

This section has been repealed by the Commercial Gas Act, 1875, and by the Gaslight and Coke Company's Act, 1876. The South Metropolitan Gas Act, 1869 (32 & 33 Vict. c. cxxx.), s. 69, does not repeal it, but substitutes the Lands Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 18), for the Companies Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 16).

Incoming tenant not to pay arrears of outgoing tenant, unless by express agreement.

39. In case any consumer leave the premises where gas was supplied to him without paying to the gas company the rate or meter rent due from him, the gas company shall not require from the next tenant of the premises payment of the arrears so left unpaid, unless the incoming tenant agreed with the defaulting consumer to pay the arrears; but the gas company shall, notwithstanding any such arrears, in the absence of collusion between the outgoing and incoming tenant, supply gas to the incoming tenant, as required by this Act, on being required by him so to do.

The Gaslight and Coke Company's Act, 1872 (35 Vict. c. xxiv.) provides:

> "Section 18. In case any consumer leaves the premises where gas was supplied to him without paying to the Company the rate or meter rent due from him, the Company shall not require from the next tenant of the premises payment of the arrears so left unpaid unless the incoming tenant agreed with the defaulting consumer to pay the

Sect. 39.

NOTE.

> arrears, *or unless the incoming tenant shall continue the trade or business of the outgoing tenant, and shall have paid to the owner, lessee or mortgagee in possession, or to the outgoing tenant of such premises a consideration for so doing;* but the Company shall, notwithstanding any such arrears, in the absence of collusion between the outgoing and incoming tenant, supply gas to the incoming tenant as required by this Act on being required to do so."

The earlier and later portions of this section are substantially identical with the section in the text, but the middle portion put in italics does not there occur. In the case of *Gaslight and Coke Co.* v. *Mead* (1876), 45 L. J. M. C. 71, a question arose as to the effect of the words in italics. The respondent became tenant of a licensed house by assignment of the lease and purchase of the goodwill and business from the outgoing tenant M. When M. left the premises he was indebted to the gas company for one quarter's gas. The respondent, on refusing to pay this arrear, was summoned before the justices. On a case stated, the Queen's Bench Division held that the words in italics did not impose on the incoming tenant any personal liability to pay.

In a later case under the above section, the incoming tenant having installed electric light, did not "require" any supply of gas from the company. The company brought an action in the county court. The county court judge, and afterwards a Divisional Court, followed the decision in *Mead's Case, supra.* The Court of Appeal considered that *Mead's Case* had been wrongly decided, and that the gas company were entitled to recover the arrears. In the House of Lords this judgment was reversed and the decision of the Divisional Court restored. The effect of this decision is that if the new tenant does not "require" gas he cannot be made to pay his predecessor's arrears, but if he does "require," the gas company are entitled to refuse to supply unless he pays the arrears (*Cannon Brewery Co.* v. *Gaslight and Coke Co.*, [1904] A. C. 331).

40. *Appeal by consumers to Home Secretary on rise of price of gas.*

41. *Home Secretary may issue form of accounts to be filled up by gas companies.*

Sects. 40 and 41 have been repealed by the City of London Gas Act, 1868 (31 & 32 Vict. c. cxxv.); the South Metropolitan Gas Company's Act, 1869 (32 & 33 Vict. c. cxxx.), s. 4; the Commercial Gas Company's Act, 1875 (38 & 39 Vict. c. cc.), s. 3; and the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 8. These Acts transferred to the Board of Trade the duties of the Home Secretary under the Act of 1860. See note at pp. 272, 273.

Sects. 40 and 41 have been again repealed by the London Gas Act, 1905, s. 20. See *post*, p. 300.

Gas companies to cause maps of their districts to be made.

42. Every gas company shall within one year after the passing of this Act cause a map to be made of the district within which their mains or district mains then lie, on a scale not less than six inches to a mile, and shall cause to be marked thereon the line of all their then existing mains and district mains, and shall once in every year correct such map and make such additions thereto as will show the line of all their then mains and district mains as aforesaid.

This and the following two sections have been repealed as regards the Commercial Gas Company by the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), and as to the Independent Gaslight and Coke Company (amalgamated with the Gaslight and Coke Company) by the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.). As regards the former company, see s. 70 of their Act of 1875, *post*, p. 317. As regards the latter company, see s. 88 of the City of London Gas Act, 1868, *post*, p. 307. See also ss. 70, 71 of the South Metropolitan Gas Company's Act, 1869.

As to deposit and inspection of the maps.

43. Every map, or a copy thereof, so made by or for each company, with the date expressed thereon of the last time when it was so corrected, shall be deposited, certified by their secretary or clerk by writing under his hand to be a true copy thereof, with the respective clerks of the peace for the counties in which such mains lie, and who are hereby required to receive and keep in safe custody the same; and such maps so deposited shall at all reasonable times be open to the inspection of all local authorities and consumers, and their respective agents, and they respectively may take copies of or extracts from the same; and every gas company wilfully failing to comply with any of the requirements of this Act with respect to maps, and every person having charge of such maps who shall refuse to allow any person to inspect and take copies of or extracts from such maps, shall for every such offence forfeit a sum not exceeding ten pounds.

See note to the preceding section.

Charge of inspection of map.

44. Every clerk of the peace, with whom any map shall be deposited under the provisions of this Act, may charge and take the sum of one shilling for every inspection of such map, and the further sum of two shillings and sixpence for every extract from or copy taken of such map.

See note to s. 42.

Secretary of State may direct proceedings by the Attorney-General against gas companies.

45. If and whenever it appears to the Secretary of State that any of the provisions of this Act have been violated or not complied with on the part of any gas company, or that the gas company are acting in a manner unauthorised by law, and if it appear to him that it would be for the public advantage that the gas company should be restrained from so acting, or compelled to do any act for remedying the wrongful act done by them, the Secretary of State may certify the same in writing to her Majesty's Attorney-General; and thereupon he, if he be so advised, shall proceed by information, bill, or action, or other such proceeding, at law or in equity, as the case requires, to restrain the wrongful acting or to compel the doing of the acts for remedying the wrongful acts; provided always, that the Secretary of State shall not give the certificate at a period exceeding one year after the committing of the offence specified in the certificate.

The duties of the Secretary of State under this Act are transferred to the Board of Trade (see *ante*, pp. 272, 273).

As to the powers of the Attorney-General at common law in regard to the matters referred to in this section, see the notes to s. 1 of the Act of 1847, *ante*, pp. 147 *et seq.*

In *Attorney-General* v. *Gaslight and Coke Co.* (1877), 7 Ch. D. 217, it was held that the company were not justified in causing a nuisance, even though the gas could not be made of the required purity without so doing (see *ante*, p. 198).

Recovery and application of penalties.

46. Every penalty imposed by this Act, the recovery and application of which is not otherwise specially provided for by this Act, shall be recovered on summary conviction before a magistrate, and be enforced, accounted for, and paid to the receiver of the metropolitan police

Sect. 46.

district, and shall be apportioned in the same manner as penalties or fines, other than fines upon drunken persons, or upon constables for misconduct, or for assaults upon police constables, are by the Act of the third year of her present Majesty, for regulating police courts in the metropolis, directed to be recovered, enforced, accounted for, paid, and applied; and every order or conviction of any magistrate in respect of any such penalty shall be subject to the like appeal, and upon the same terms, as is by that Act provided in respect of any order or conviction of any magistrate; and every magistrate by whom any order of conviction is made under this Act shall have the same power of binding over the witnesses examined, and the witnesses shall be entitled to the same allowance of expenses as they would be entitled to in case the order, conviction, and appeal were made under that Act.

The Act referred to is the 2 & 3 Vict. c. 71. See the Metropolitan Police Guide, by Archibald, Greenhalgh and Roberts, in which all the Acts relating to the metropolitan police are collected.

See s. 20 of the Act of 1880, *post*, p. 337, whereby forfeitures under that Act are to be recovered as if they were penalties under the Act of 1860.

Jurisdiction of magistrates for purposes of Act.

47. Every magistrate shall, for the purposes of this Act, have full jurisdiction and full powers and authorities over the parties respectively, and with respect to making orders on the parties respectively, and otherwise, and as to costs, and may issue every such summons, warrant, and other process, and may take such other proceedings as he thinks requisite; and the service of any summons, notice, order, or other process in the matter on such person, or in such manner as a magistrate directs, shall be good service thereof; and every magistrate may proceed singly in the execution of this Act in such manner as he thinks proper.

For the protection of water companies.

48. Nothing in this Act contained shall extend or be construed to extend to authorise or empower any gas company to interfere with or abridge any of the rights or privileges of any company established for the supply of water to the inhabitants of any parish or place within the metropolis; and every gas company shall be answerable for any damage, spoil, injury, or mischief which shall be done to any of the pipes, works, or property of any such water company, or which shall or may be sustained by such water company by reason or in consequence of any act, matter, or thing to be done or executed by such gas company, or any of their servants, agents, or workmen.

For laying pipes to convey gas.

49. Whenever any gas company, or their servants, agents or workmen, shall dig or sink any trench for laying any new mains or pipes, other than service pipes, for the conveyance of gas, or other apparatus, near to which any pipe belonging to any water company for conveying water, or any branch or service pipe for the supply of water to any dwelling-house or buildings, shall be laid, such gas company, their servants, agents, or workmen, shall give four hours previous notice thereof in writing to the manager or chief clerk, or secretary or engineer, of such water company, such notice to be delivered at the

Sect. 49.

principal office of the company between the hours of ten in the morning and four in the afternoon, and shall, under the inspection of the manager or chief clerk, secretary or engineer for the time being of such water company, protect and secure every such water pipe from any injury, and shall also repair any damage that shall be done to such pipe; and in default of repairing such damage the gas company shall for each such default forfeit and pay to the secretary for the time being of such water company, for the use of the said water company, any sum not exceeding five pounds, and also the costs and expenses which shall have been incurred by the said water company in protecting and securing any such water pipe, or in repairing or making good any injury that may have been done thereto by the means aforesaid; such costs and expenses to be ascertained by any justice, and to be recovered in the same manner as any expenses or penalty under this Act may be recovered.

The Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), requires notice to be given by companies, etc., to the road authorities before taking up the pavement, surface or soil of any street (s. 109). Provision is also made for supervision and reinstatement under penalties (ss. 110, 111). The road authority may direct pavements injured by water or gas pipes to be repaired by the company under penalty (s. 112). Company opening the ground to repair a pipe discovered to belong to another company, may give notice to such company and be reimbursed expenses (s. 113). Power of road authority to reinstate (ss. 114, 115). Further as to reinstatement see the Metropolis Management Amendment Act, 1862 (25 & 26 Vict. c. 102), s. 84. Sect. 54, *infra*, p. 290, gives a power of appeal to the Board of Trade in case of refusal or delay in consenting to gas companies laying pipes, etc.

Subways.

The Metropolis Subways Act, 1868 (31 & 32 Vict. c. lxxx.), enabled the Metropolitan Board of Works to require gas and water pipes to be laid in certain subways constructed under certain scheduled Acts such as the the Embankment Acts and required the Board so far as space will admit and without favour or preference to allow pipes to be laid in a subway. By the London County Council (Subway) Act, 1893 (56 & 57 Vict. c. ccii.), further powers are conferred, especially with regard to removal of pipes into subways; the cesser of power to break up streets in which there are subways; the making of a charge for the use of subways; the making of byelaws; and the settlement by arbitration of disputes between the county council and any company. See Byelaws dated December 10th, 1895. In later Improvement Acts of the London County Council, this Act of 1893 is made to apply to subways authorised by those Acts, *e.g.*, the London County Council (General Powers) Act, 1899 (62 & 63 Vict. c. ccxxxvii.), s. 33. See also the City of London (Various Powers) Act, 1900 (63 & 64 Vict. c. ccxxviii.), which authorises subways. As to subways constructed prior to the passing of the City of London (Various Powers) Act, 1900, see Regulations adopted by Corporation of London dated July 10th, 1902, and for a list of their subways within the city, see the same document. As to subways constructed under the provisions of the City of London (Various Powers) Act, 1900, Part V., with respect to public service works authorised to be constructed under that Act, see byelaws made by the Corporation of London dated July 10th, 1902. The London Hydraulic Company are not a "water company" within the Act of 1893, so as to entitle them to the lower rate of charge (*London C. C.* v. *London Hydraulic Co.* (1898), 62 J. P. 229). See now the London County Council Improvements Act, 1899 (62 & 63 Vict. c. cclxvi.), s. 28, which provides that for the purposes of the application of the Act of 1893 to any subway to be constructed under the powers of that Act, the London Hydraulic Power Company shall be deemed to be a water company. By that Act the London County Council were empowered to construct subways under the new street authorised by that Act from Holborn to the Strand. By the London County Council (Subways and Tramways) Act,

Sect. 49.

NOTE.

1902 (2 Edw. 7, c. ccxviii.), the London County Council were authorised to extend the subway from Southampton Row, Bloomsbury, to the Victoria Embankment at the southern end of Savoy Street. As to the scale of fees to be paid for the use of the subways, see a Report of the Highways Committee of the London County Council, Jl. of G. L., March 25th, 1902, p. 782.

Mode of laying pipes.

50. All pipes hereafter to be laid by any gas company for the conveyance of gas shall be laid at the greatest practicable distance from the nearest part of any pipe then laid down by or by order of any water company for the conveyance of water, and wherever the width of the carriageway or footpath will allow thereof, shall be laid at the distance of four feet at least from the nearest part of any such water pipe, unless in cases where it shall be unavoidably necessary to lay the gas pipe across or nearer to any water pipe, in which case the said gas pipe shall, wherever practicable, be laid over and above the said water pipe at the greatest practicable distance therefrom, and shall form therewith a right angle, or as near thereto as the situation will admit; and in every such case the said gas pipe so crossing the said water pipe shall be at least nine feet in length, so that no joint of any gas pipe shall be nearer to any water pipe than four feet at the least, where the width of the road, street, square, market place, lane, alley, passage, court, or other place will admit; and every such gas pipe so crossing the water pipe shall, for the whole length thereof, be sufficiently bedded in with good sound clay or other fit materials of a proper consistence, and well worked and rammed into the trench all round the said gas pipe; and in laying down any such gas pipe the gas company shall use such joints as are for the time being of the most improved description for preventing the leakage of gas, and shall in no case join two or more gas pipes together previous to their being laid in the trench, but shall lay each pipe as near as may be in its place in the trench, and shall in such trench properly form the jointing with the other pipes to be added thereto with proper and sufficient materials, and shall also, wherever practicable, lay and well and sufficiently bed each joint of the main gas pipes and also the joints or screws of the branch or service gas pipes connecting with the main gas pipes, and also the joints of the service or branch pipes for conveying the gas from the main gas pipes to the houses and other buildings, and all other joints, inlets, apertures, or openings which are or shall or may be made in any of the main gas pipes belonging to the gas company, in such manner and of such material as shall, as far as reasonably practicable, prevent leakage.

To prevent further contamination of water by gas.

51. Whenever the water which shall be supplied by any water company shall be contaminated or affected in any way whatsoever by the gas of any gas company, such gas company shall, within twenty-four hours next after notice thereof in writing, signed by any one of the directors or by the secretary for the time being of such water company, or by any person using the water of such water company, and left at the office of such gas company, cause measures to be taken effectually to prevent such gas from contaminating or

Sect. 51.

affecting the water of such water company; and in case such gas company shall not within forty-eight hours next after any such notice so left as aforesaid use all reasonable means to effectually remove the cause of such complaint, and prevent all such contamination whereof notice shall be given as aforesaid, then and in every such case such gas company shall on each complaint whereof notice shall be given as aforesaid forfeit and pay to the secretary of such water company, for the use of such water company, the sum not exceeding ten pounds for each day during which the water supplied by such water company shall remain contaminated or affected by the gas of such gas company; and every such penalty or forfeiture may be recovered for the use of such water company in the same manner as any other penalty or forfeiture imposed by this Act may be levied and recovered.

See further the Public Health (London) Act, 1891 (54 & 55 Vict. c. 76), ss. 52, 53, imposing penalties for causing water to be fouled by gas washings, etc.

For ascertaining if the water is contaminated.

52. And whereas it may become a question upon such complaint as aforesaid whether or not the water supplied by any water company within the metropolis be contaminated or affected by the gas of the gas company: Be it enacted, that in every such case it shall be lawful for any such water company to dig to and about and to search and examine the mains, pipes, conduits, and apparatus of the gas company adjacent to the pipes of such water company for the purpose of ascertaining whether or not such contamination proceed or be occasioned by the gas of such gas company, giving twenty-four hours previous notice in writing, signed by one of the directors or by the secretary for the time being of such water company, and left at the head office of such gas company, of the intention of such water company so to dig, search, and examine as aforesaid, and of the time and place or places when and where such digging, search, and examination is intended to be made; and if it shall appear that the said water has been contaminated, and that there has been any escape of gas whereby such contamination has been produced, then and in every such case the costs and expenses of the said digging, search, and examination, and of the repair of the street, road, or place which shall be taken up or disturbed, shall be borne and paid by such gas company; which costs and expenses shall be ascertained and determined if necessary by any justice, and may be levied and recovered in the same manner as any penalty or forfeiture imposed by this Act may be levied and recovered: Provided always, that if upon such examination it shall appear that such contamination has not arisen from any escape of gas from any of the mains, pipes, or conduits of the gas company to which such notice shall have been given, then and in every such case the water company by whom or on whose behalf such examination and search shall have been made shall bear and pay all the costs, charges, and expenses of and incident to such examination and search, and shall also make good to such gas company any damage which may be occasioned to their mains, pipes, conduits, or apparatus by such

Sect. 52. search, and also any injury or damage which may be done in or about any of the streets, roads, or places which shall be broken up or disturbed in such search; the amount of such damage to be ascertained and determined if necessary by any justice, and to be levied and recovered in the same manner as any penalty or forfeiture under this Act may be levied and recovered.

See *Attorney-General* v. *Gaslight and Coke Co.*, cited *ante*, p. 198.

Appropriation of penalties in the city of London.

53. All penalties or sums of money ordered and adjudged within the city of London and the liberties thereof to be paid under this Act, and not otherwise appropriated, shall be payable to the chamberlain of the city of London, in aid of the expenses of the police of the said city.

See s. 20 of the Act of 1880, *post*, p. 337.

Saving rights of Metropolitan Board of Works, vestries and others.

54. Nothing in this Act contained shall avoid, prejudice, or impair any of the powers now exercised by or vested in the Metropolitan Board of Works, or in the commissioners of sewers of the city of London and the liberties thereof, or any powers now vested in any local authority within the metropolis, or any powers now exercised or possessed in respect of the manufacture or supply of gas within the metropolis by any railway company, or by any other person or persons making or supplying gas for his or their own use, and not making or supplying gas to the public as a trade or business: Provided, that if the said local authority shall refuse or delay their consent to any company to lay down mains or pipes in accordance with the provisions of this Act, it shall be lawful for the said secretary of state under his hand to authorise the same to be laid down without such consent; and after the date of the application by such company to the said secretary of state for such consent no penalty shall be incurred by any default of such company, so far as it is occasioned by such refusal only.

The effect of this section is to protect the rights of companies or persons who previously to the passing of the Act, manufactured and supplied gas to others than the "public" (*Imperial Gaslight and Coke Co.* v. *West London Junction Gas Co.* (1867), 15 L. T. (N.S.) 66; affirmed W. N. (1868), 1; 18 L. T. 900 n.).

See cases cited under s. 6, *ante*, p. 278. The powers, duties, and liabilities of the Metropolitan Board of Works are transferred to the London County Council by the Local Government Act, 1888 (51 & 52 Vict. c. 41), s. 40 (8). Vestries and District Boards have been superseded by Metropolitan Borough Councils (see London Government Act, 1899, s. 4); and the Commissioners of Sewers have been superseded by the Common Council (see City of London Sewers Act, 1897, s. 7).

The duties of the Secretary of State under this Act are now transferred to the Board of Trade. See *ante*, pp. 272, 273.

For the purposes of the enactment contained in the proviso to the section the Board of Trade have power to appoint someone to hold an inquiry under the Board of Trade Arbitrations, etc., Act, 1874 (37 & 38 Vict. c. 40).

Saving general jurisdiction of courts of law and equity.

55. Provided, that no special remedy or provision for giving relief to any person given by this Act shall prejudice or diminish the general jurisdiction of any of her Majesty's superior courts of law or equity over or with respect to the acts or defaults in respect of which the special remedies or provisions are so given.

56. [*Expenses of Act.*]

Sect. 56.

Repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66).

Expenditure of local authorities under this Act.

57. All the expenditure from time to time made or incurred by any local authority under the authority of this Act, may and shall be defrayed by the local authority out of any rate raised under the provisions of the Act of the session of the eighteenth and nineteenth years of her present Majesty, chapter one hundred and twenty, for the local management of the metropolis.

The Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), here referred to, has been amended by many later Acts. All of these Acts may now be referred to as the Metropolis Management Acts, 1855 to 1893 (Short Titles Act, 1896 (59 & 60 Vict. c. 14)).

SCHEDULE to which the Fifth Section of the foregoing Act refers.*

Name of Gas Company.	Special Act or Instrument of Incorporation.	District.
The Crystal Palace District Gas Company.	The Crystal Palace District Gas Company's Act, 1858.	The district defined by their said special Act.
The Woolwich, Plumstead, and Charlton Consumers Gas Company.	The Woolwich, Plumstead, and Charlton Consumers Gas Act, 1855.	The district defined by their said special Act.
The Woolwich Equitable Gaslight and Coke Company.	The Woolwich Equitable Gas Company's Act, 1855.	The district defined by their said special Act.
The Wandsworth and Putney Gaslight and Coke Company.	The Wandsworth and Putney Gas Act, 1856.	The district defined by their said special Act.
The Brentford Gas Company.	The Brentford Gas Act, 1858.	The district now actually supplied by the company.
The Victoria Docks Gas Company.	The Victoria Docks Gas Act, 1857.	The district defined by their said special Act.
The Eltham Gaslight and Coke Company, Limited.	Articles of Association under the Joint Stock Company's Act, 1856.	The parish of Eltham.
The West Ham Gas Company.	The West Ham Gas Company's Act, 1856.	The district defined by their said special Act.
Mitcham, Merton, and Tooting Gas Company.	Articles of Association under 7 & 8 Victoria, cap. 110.	The parishes and villages of and adjacent to Mitcham, Merton, and Tooting.

---

* The companies named in the schedule are by s. 5 exempted from the Act of 1860. Of these the two Woolwich companies have become amalgamated with the South Metropolitan Company, and the Victoria Docks Company with the Gaslight and Coke Company. By their Act of 1893, the Crystal Palace District Gas Company are authorised to amalgamate with the South Metropolitan Company. See *ante*, p. 274.

METROPOLIS GAS ACT, 1861.

(24 & 25 VICT. C. 79.)

An Act to amend the Metropolis Gas Act. [6th August, 1861.]

Preamble repealed by Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19). The short title, as above, is authorised by the Short Titles Act, 1896 (59 & 60 Vict. c. 14).

Powers conferred on justices of the peace by 22 & 23 Vict. c. 66, as amended by 23 & 24 Vict. c. 146, in so far as relates to the metropolis, transferred to the Metropolitan Board of Works.

1. All powers conferred on the justices of the peace of any county in general or quarter sessions assembled, by the Act passed in the twenty-second and twenty-third years of the reign of her present Majesty, chapter sixty-six, intituled "An Act for regulating measures used in sales of gas," as amended by an Act passed in the session of the twenty-third and twenty-fourth years of the reign of her present Majesty, chapter one hundred and forty-six, and intituled "An Act to amend the Act for regulating measures used in sales of gas," shall, in so far as relates to the metropolis, as defined by an Act passed in the session holden in the eighteenth and nineteenth years of her present Majesty, chapter one hundred and twenty, and intituled "An Act for the better local management of the metropolis," be transferred and vested in the Metropolitan Board of Works; and so many of the said powers as are conferred by section four of the said Act of the twenty-second and twenty-third years of the reign of her present Majesty shall be exercised by such board . . . from time to time . . . as in the said Act mentioned; and all expenses incurred by the said board in pursuance of this Act shall be defrayed by them out of rates leviable by them within their jurisdiction exclusive of the city of London.

Certain words omitted from this section are repealed by Statute Law Revision Act, 1892 (55 & 56 Vict. c. 19).

Powers of Metropolitan Board of Works transferred to the London County Council by the Local Government Act, 1888 (51 & 52 Vict. c. 41), s. 40 (8).

Section 4 of the Act of 22 & 23 Vict. c. 66 above referred to is set out at p. 260.

2. [*So much of s.* 1 *of Sale of Gas Act,* 1860 (23 *&* 24 *Vict. c.* 146), *as respects the metropolis repealed.*]

Repealed by the Statute Law Revision Act, 1875 (38 & 39 Vict. c. 66). See note to Sale of Gas Act, 1860, *ante*, p. 270.

METROPOLIS GAS (PREPAYMENT METER) ACT, 1900.*

(63 & 64 Vict. c. ccLXXII.)

An Act for regulating the Charges to be made by the Gas Light and Coke the South Metropolitan Gas and the Commercial Gas Companies in the Administrative County of London in respect of gas supplied by means of prepayment meters.

[6th August, 1900.]

Whereas the greater part of the administrative county of London is supplied with gas by the Gas Light and Coke Company the South Metropolitan Gas Company and the Commercial Gas Company in their respective districts:

And whereas the price which the said companies may charge for gas is regulated under the provisions of divers Acts of Parliament:

And whereas a system has been widely adopted by the said companies by which prepayment meters and other fittings are supplied by the companies to consumers and the consumers so supplied pay from time to time to the companies sums which include both the price of gas and a charge in respect of the supply of such meters and other fittings:

And whereas it is expedient that the charges to be made by the companies in respect of gas supplied by means of such meters and fittings should be regulated and the amount of such charges stated to the persons who pay them:

And whereas the objects of this Act cannot be attained without the authority of Parliament:

May it therefore please your Majesty that it may be enacted and be it enacted by the Queen's most excellent Majesty by and with the advice and consent of the Lords Spiritual and Temporal and Commons in this present Parliament assembled and by the authority of the same as follows:—

1. This Act may be cited for all purposes as the Metropolis Gas (Prepayment Meter) Act, 1900. Short title.

2. In this Act— Interpretation.

"The council" means the London County Council;

"The corporation" means the mayor and commonalty and citizens of the city of London;

The expression "the companies" means the Gas Light and Coke

---

* This Act is inserted in this place, rather than in its chronological order, so as to keep together all the Acts relating generally to metropolitan gas.

Sect. 2.

Company the Commercial Gas Company and the South Metropolitan Gas Company and the expression "the company" means each of the said companies ;

The word "fittings" means pipes, burners, stoves and other fittings used in connexion with the consumption of gas supplied by means of prepayment meters ;

The expression "prepayment meter" means any meter or appliance by which the quantity of gas supplied is regulated according to the amount of money prepaid therefor.

Charges for gas.

3. The companies respectively shall not charge for any gas supplied through a prepayment meter any greater charge rate or rent than the Companies are respectively entitled by law to charge for gas supplied to private consumers through any other kind of meter or by any other method of supply.

Charges for hire of prepayment meters.

4. The Companies shall not charge for the hire of any prepayment meter and fittings to be used therewith any sum other than a sum of money calculated according to the quantity of gas supplied through such prepayment meter and the maximum sum to be so charged shall be at the rate of tenpence per one thousand cubic feet supplied in manner aforesaid such sum to include the hire of one meter and the fittings used therewith.

The said charge shall include the providing letting fixing repairing and maintenance of the meter and fittings and the cost of collection inspection and any other cost incurred by the Company in connexion with the meter and fittings.

Revision of rate.

5. The rate fixed by the last preceding section shall be open to revision by the Board of Trade in manner following (that is to say) :—

If at any time after the expiration of seven years from the date of this Act or from the date of any inquiry under this section any of the Companies or the council or the corporation request the Board of Trade in writing to revise the said rate the Board of Trade shall appoint a competent and impartial arbitrator who shall hold an inquiry and fix a maximum rate to be substituted for the rate aforesaid : Provided that the Board of Trade may at any time if they think fit at such request put into operation the provisions of this section :

At least twenty-eight days before the holding any inquiry under this Act the Board of Trade shall give to each of the Companies to the council and to the corporation notice of such inquiry and of the time and place thereof and each of the Companies the council and the corporation shall be entitled to attend and to be heard at such inquiry.

Form of receipt.

6. The Company shall in collecting any money for gas supplied by means of prepayment meters give a receipt for the same in a form which shall show clearly the rate per one thousand cubic feet charged for gas and in addition the rate in respect of meters and fittings charged therewith under this Act.

Maximum charge for hire of meters without fittings.

7. The maximum charge for the hire of a prepayment meter without fittings shall be at the rate of ten per centum per annum on the cost of the meter to the Companies respectively and the Companies Acts respectively applicable to ordinary meters shall so far as applicable apply within the Companies respective districts to prepayment meters.

Costs of Act.

8. The costs charges and expenses preliminary to and of and incidental to the preparing applying for obtaining and passing of this Act shall be defrayed as payments for general county purposes within the meaning of the Local Government Act, 1888.

LONDON GAS ACT, 1905.*

(5 EDW. 7, C. CLV.)

An Act to amend the Acts relating to the Supply of Gas in London and to make further Provisions with reference thereto.

[4th August, 1905.]

WHEREAS the Gas Light and Coke Company the South Metropolitan Gas Company, and the Commercial Gas Company have been respectively authorised to supply gas within several districts within the administrative county of London, and various Acts of Parliament have from time to time been passed containing provisions with respect to such supply :

And whereas the mayor, aldermen, and commons of the city of London in relation to any place within the city of London and the liberties thereof and the Metropolitan Board of Works in relation to any other place within the limits of the metropolis as defined by the Metropolis Management Act 1855, are by the Gas Light and Coke and other Gas Companies Acts Amendment Act 1880 (in this Act referred to as "the Act of 1880") declared to be the controlling authorities within the meaning of the said Act and powers were thereby conferred upon the mayor aldermen and commons of the city of London and the Metropolitan Board of Works with respect to the enforcement of the provisions of the said Act and various Acts relating to the said companies :

And whereas by the Local Government Act 1888 the powers duties and liabilities of the Metropolitan Board of Works were transferred to the London County Council :

---

* This Act is inserted in this place, rather than in its chronological order, so as to keep together all the Acts relating generally to metropolitan gas. The Acts inserted after this Act are all special Acts.

And whereas it is expedient that certain provisions of the Act of 1880 and of other Acts relating to the said companies with respect to the testing for impurity of the gas supplied by the companies should be relaxed, and that the said Acts should be amended in other particulars as provided by this Act:

And whereas certain provisions of the Metropolis Gas Act 1860 have ceased to apply to any existing gas company and it is accordingly expedient that such provisions should be repealed:

And whereas the objects aforesaid cannot be effected without the authority of Parliament:

May it therefore please Your Majesty that it may be enacted, and be it enacted by the King's most Excellent Majesty by and with the advice and consent of the Lords Spiritual and Temporal and Commons in this present Parliament assembled and by the authority of the same as follows (that is to say):—

Short title and commencement of Act.

1. This Act may be cited for all purposes as the London Gas Act, 1905, and shall come into operation on the first day of January one thousand nine hundred and six.

Act of 1880 and this Act to be construed together.

2. The Act of 1880 as amended by this Act and this Act shall be read and construed together as one Act, and words and expressions to which meanings are assigned by the Act of 1880 have in this Act, unless the context otherwise requires, the same respective meanings.

As to burner for testing illuminating power.

3. The gas referees shall from time to time prescribe the burner for testing the illuminating power of the gas supplied by the company, and the chimney (if any) to be used with such burner. The burner so prescribed shall be of such a pattern (not being an incandescent or similar burner) as shall be practicable for use by the consumer and the burner and the chimney (if any) shall be the most suitable for obtaining and in making the test shall be so used as to obtain from the gas when consumed at the rate of five cubic feet an hour the greatest amount of light.

Illuminating power.

4.—(1) The gas supplied by the Gas Light and Coke Company shall with respect to its illuminating power be such as to produce when consumed at the rate of five cubic feet an hour in the burner prescribed as hereinbefore provided a light equal in intensity to sixteen sperm candles of six to the pound and each consuming one hundred and twenty grains an hour.

By s. 38 of the Gas Light and Coke Company's Act, 1909 (9 Edw. 7, c. lxxxvii.), the word "fourteen" was substituted for the word "sixteen" in this sub-section.

(2) The gas supplied by the South Metropolitan Gas Company and the Commercial Gas Company respectively shall with respect to its illuminating power be such as to produce when consumed at the rate of five cubic feet an hour in the burner prescribed as hereinbefore provided a light equal in intensity to the light produced by fourteen sperm

candles of six to the pound each consuming one hundred and twenty grains an hour.

(3) If on any one day the gas supplied by the company at any testing place is of less illuminating power to an extent not exceeding one candle than it ought to be, the average of all the testings made at such testing place on that day and on the preceding day and on the following day shall be deemed to represent the illuminating power of the gas on such one day at such testing place.

As to testing for calorific power, sulphur impurities, and illuminating power, with flat-flame burner.

5.—(1) Each gas examiner shall at such places and in such manner as may be from time to time prescribed by the gas referees make testings of the gas supplied by the company for the purpose of ascertaining—

(i.) The calorific power;

(ii.) The purity as regards sulphur other than sulphuretted hydrogen; and

(iii.) The illuminating power as ascertained by means of a flat flame burner to be prescribed from time to time by the gas referees which shall be of the best available pattern.

(2) Each gas examiner shall forthwith deliver to the controlling authority to the gas referees to the chief gas examiner and to the company a report of the result of each testing conducted by him under the provisions of this section.

(3) The company shall not be liable to forfeitures in respect of any testings made under the provisions of this section.

(4) The company shall provide and maintain at any testing place such apparatus and materials as the gas referees may from time to time prescribe and certify for use for the purposes of this section and shall give to any gas examiner access to any testing place and shall afford to him all facilities for the proper execution of his duty under this section.

(5) A gas examiner shall make in accordance with this section testings at any place prescribed as hereinbefore provided on such days (exclusive of Sundays) as the controlling authority shall direct.

As to sulphuretted hydrogen.

6. The gas supplied by the company shall not exhibit any trace of sulphuretted hydrogen when tested in a mode to be from time to time prescribed and certified by the gas referees for testing and recording the presence of sulphuretted hydrogen which mode shall not be more stringent than the mode prescribed in Schedule A. of the Gasworks Clauses Act 1871 and section 15 of the Act of 1880 shall apply accordingly.

No liability to forfeiture for sulphur impurities other than sulphuretted hydrogen.

7. After the commencement of this Act the company shall not be liable to any forfeiture by reason of the presence in the gas supplied by the company of sulphur impurities other than sulphuretted hydrogen and the gas referees shall not prescribe or certify the amount of sulphur impurities other than sulphuretted hydrogen with which the gas supplied by the company shall be allowed to be charged.

As to pipes connecting mains with testing places.

8. The company shall connect each testing place with such main or mains as may be prescribed by the gas referees by means of one service pipe only which shall proceed direct from the main into the testing place and there shall be no pipe branch or tap in any way connected with such service pipe outside the testing place except that the company may provide a tap on the service pipe at a point outside and as near as practicable to the testing place for use in case of emergency only and such tap shall be sealed by or on behalf of the controlling authority as occasion may require in such manner that the tap cannot be used or turned without breaking the seal. The company shall give the controlling authority and persons authorised by them access at all reasonable times to such tap and in the event of the same having been used or turned shall forthwith notify the fact to the gas referees and to the controlling authority.

Appeal by company to chief gas examiner against prescription or certification of gas referees.

9. If the company think themselves aggrieved by any prescription or certificate of the gas referees they may in the case of an appeal in respect of a burner or a chimney prescribed by the gas referees under the provisions of this Act within three months or in any other case within one month from the making of such prescription or certificate appeal against such prescription or certificate to the chief gas examiner who after hearing the company and the gas referees and any other body or person whom he shall think fit may confirm amend vary or annul such prescription or certificate and his decision shall be final and conclusive.

Any prescription or certificate as so confirmed amended or varied shall be deemed to be the prescription or certificate of the gas referees in the matter or matters to which it relates.

Sunday testing.

10. Notwithstanding anything in the Act of 1880 or in any other Act it shall not be obligatory on the controlling authority to make on Sunday any testings of the gas supplied by the company and in any case in which the controlling authority shall not make such testings on Sunday any provisions relating to the testing of the gas supplied by the company shall be read and construed as if Saturday were as the case may be the day preceding or immediately preceding or the previous day to Monday and Monday were the day following Saturday.

Amendment of s. 12 of Act of 1880.

11. Section 12 of the Act of 1880 is hereby repealed and in lieu thereof the following provisions shall have effect (that is to say) :—

If the company think themselves aggrieved by any report of a gas examiner they may within seven days after the day on which that report is delivered to the company appeal to the chief gas examiner who may confirm amend vary or annul such report and whose decision after hearing the parties shall be final and conclusive and the chief gas examiner shall forthwith report every such decision to the controlling authority and to the company :

If in any case the company do not appeal as aforesaid or if having appealed they withdraw the appeal the report of the gas examiner shall be final and conclusive :

In the event of the company appealing to the chief gas examiner or in the event of the company withdrawing the appeal the company shall forthwith give notice of such appeal or of such withdrawal as the case may be to the controlling authority.

Further powers to chief gas examiner as to forfeitures.

12. If the chief gas examiner in giving his decision upon any appeal made to him by the company against the report of a gas examiner shall certify that the default of the company is not substantial or not due to the careless conduct of the company or their servants proceedings shall not be taken before a petty sessional court for the determination of the amount of the forfeiture to be paid by the company in respect of such default but the chief gas examiner if requested so to do by the controlling authority at the time of hearing such appeal or giving his decision thereon or at any time within six months after the date of his decision may after hearing the Council and the company determine subject to the provisions of section 14 of the Act of 1880 the amount of forfeiture to be paid by the company in respect of such default.

The amount of any forfeiture fixed by the chief gas examiner under this section shall be recoverable summarily as a civil debt from the company and appropriated in the same manner as if the amount of such forfeiture had been fixed by a petty sessional court.

As to hearing in absence of parties.

13. The chief gas examiner may give his decision upon any matter referred to him under this Act without hearing any party who shall fail or neglect to attend before him after receiving not less than seven days' notice of the time and place fixed by the chief gas examiner for hearing such matter.

Amendment of s. 12 of Act of 1880.

14. Section 18 of the Act of 1880 is hereby repealed and in lieu thereof the following provisions shall have effect (that is to say) :—

The report of a gas examiner (in cases where there is no report of the chief gas examiner) showing a case of defective illuminating power excessive impurity in or insufficient pressure of the gas supplied by the company or in cases where there is a report of the chief gas examiner showing such a case as aforesaid such last-mentioned report shall be conclusive evidence of the liability of the company to a forfeiture in respect thereof.

Penalty for neglect to comply with prescriptions of gas referees.

15. If the company neglects or refuses to comply with any lawful prescription or certificate of the gas referees or to provide or maintain any testing place apparatus or materials or any other matter or thing prescribed or certified therein the company shall be liable on summary conviction to a penalty not exceeding fifty pounds for each day during which such refusal or neglect continues:

Provided that no proceedings under this section shall be taken unless the Board of Trade shall after giving the company an opportunity of being heard consent thereto and—

(*a*) Until after the expiration of the period within which the company may under the section of this Act of which the marginal note

Sect. 15.

is "Appeal by company to chief gas examiner against prescription or certification of gas referees" appeal against the prescription or certificate; or

(*b*) If the company shall have appealed as aforesaid unless or until either such appeal is withdrawn or the chief gas examiner has given a decision thereon.

The remedy provided by this section shall be in addition to and not in derogation of any existing remedy.

Proceedings in case of forfeitures.

16. Proceedings against the company in respect of any forfeiture incurred under the Act of 1880 or this Act may be commenced at any time within six months after the date of the report of the gas examiner or after the date of the report of the chief gas examiner on appeal or in the event of the company duly appealing to the chief gas examiner and withdrawing the appeal within six months from the date of the receipt of notice of such withdrawal.

Proof of report etc. of chief gas examiner.

17. Any report or certificate of the chief gas examiner purporting to have been signed by him shall for all purposes and to all intents be primâ facie evidence of the due making and signing thereof without proof of such signature.

As to service of notices.

18. Any notice required to be given under this Act may be served by post.

Repeal of Acts.

19. The Acts specified in the first column of the schedule to this Act shall be and the same are hereby repealed to the extent specified in the second column of that schedule.

Repeal of parts of Metropolis Gas Act 1860.

20. Sections 7 to 12 25 to 34 37 40 and 41 of the Metropolis Gas Act 1860 are hereby repealed.

Costs of Act.

21. The costs charges and expenses preliminary to and of and incidental to the preparing applying for obtaining and passing of this Act shall be defrayed by the London County Council as payments for general county purposes within the meaning of the Local Government Act 1888.

The SCHEDULE referred to in the foregoing Act.

Acts.	Extent of Repeal.

CITY OF LONDON GAS ACT, 1868.*

(31 & 32 VICT. C. CXXV.)

An Act to amend the Metropolis Gas Act, 1860, *and to make further Provision for regulating the Supply of Gas to the City of London; and for other purposes connected therewith.* [13th July, 1868.]

WHEREAS the city of London is now supplied with gas by the Gas Light and Coke Company, the City of London Gas Light and Coke Company, and the Great Central Gas Consumers Company, and it is expedient that the Metropolis Gas Act, 1860, be amended so far as it affects these companies, and that better provision be made respecting the supply of gas to that part of the metropolis situate within the city of London, and that for that purpose the Metropolis Gas Act, 1860 (in this Act referred to as the Act of 1860), so far as it relates to the city of London, be amended:

May it therefore please your Majesty that it may be enacted; and be it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

PRELIMINARY.

1. This Act may be cited as the City of London Gas Act, 1868. Short title.

2. In this Act— Interpretation of terms.

The term "the city" means the city of London and the liberties thereof;

The term "the Commissioners of Sewers" means the Commissioners of Sewers of the city.

The term "corporation" means the mayor and commonalty and citizens of the city of London, and any powers given to them may be exercised by the mayor, aldermen, and commons in common council assembled;

The terms "companies" and "company" mean the Gas Light and Coke Company, the City of London Gas Light and Coke Company, and the Great Central Gas Consumers Company. and each of them;

The term "undertaking" includes all property and rights;

The term "half year" means a half year reckoned from the first day of January and first day of July in each year;

---

* This Act of 1868 has been fully dealt with in the INTRODUCTION, *q.v.* The three companies mentioned in the preamble have long been amalgamated. This Act first provided for the appointment of gas referees. By the Gaslight and Coke Company Act, 1868 (31 & 32 Vict. c. cvi.), s. 109, this Act is made to apply to the whole district of that company.

Sect. 2.

The term "quarter" means a quarter of a year reckoned from the first day of January, first day of April, first day of July, and first day of October in each year;

The term "day" means (except in this section) twenty-four hours reckoned from nine o'clock in the forenoon of one day to nine o'clock in the forenoon of the next following day, so much of each day as is before nine o'clock in the forenoon being reckoned as part of the immediately preceding day of the month or week;

The term "candles" means such candles as are described in section 25 of the Act of 1860;

and this Act shall be read as one with the Act of 1860.

The Common Council has now superseded the Commissioners of Sewers. See City of London Sewers Act, 1897, s. 7.

Certain sections of 23 & 24 Vict. c. 125, as in schedules to this Act repealed.

3. Such parts of the Act of 1860 as are described in the first schedule to this Act, and any part of any special Act of any company inconsistent with this Act, so far only as they respectively relate to the companies and the city, are hereby repealed as from the thirtieth day of September one thousand eight hundred and sixty-eight, and the Act of 1860 so amended shall, as to all the companies mentioned in the preamble of the said Act, be read throughout as if the Board of Trade had been inserted therein instead of her Majesty's principal Secretary of State for the Home Department.

PURCHASE OF UNDERTAKINGS.*

Power to corporation to purchase undertakings of companies.

4. At any time within three years after the passing of this Act the corporation may purchase from any company, and any company may sell so far as they supply the city, the undertaking or any part of the undertaking of any company: Provided always, that no such purchase shall be valid unless with the consent of all the companies given under their common seals.

5. [Transfer to be by Deed.]

6. [Powers of Corporation as to Manufacture and Supply.]

7. [Consideration in Form of Rentcharge.]

8. [Raising of Money for Purchase by Corporation.]

9. [Corporation to be Primarily Liable for Company's Debts unpaid.]

10. [Pending Actions, etc., against Company.]

11. [Causes of Action, etc., against Company.]

12. [Receipt of Directors a Discharge.]

13. [Application of Purchase Money.]

14. [Company's Books evidence as to Shareholders.]

15. [Documents, etc., continued as Evidence.]

---

* See INTRODUCTION.

16. [Separate Accounts to be kept.]

17. [Application of Income.]

AMALGAMATION.*

Scheme by companies for amalgamation.

18. The companies may, as soon as may be after the expiration of six months from the passing of this Act, settle a scheme for the amalgamation of the companies or some of them, and shall submit the same to the Board of Trade, and such scheme shall be framed with a view to the reduction of the expenditure of the companies.

Examination of scheme by Board of Trade.

19. The Board of Trade shall give notice in the London Gazette, and by advertisement in two daily morning newspapers published in London or Middlesex, of the submission of such scheme, and shall cause copies of such notice and scheme to be delivered to the corporation, and shall receive any representations made to them by the corporation respecting the scheme, and shall consider the scheme and representations (if any), and may suggest any modifications of the scheme.

Confirmation of scheme.

20. If the companies assent to the modifications (if any) suggested by the Board of Trade, and the scheme, whether modified or not, is confirmed by order of her Majesty in council, the same shall have full effect and shall be as binding as if it had been enacted by Parliament.

Provisions for districts, compensation, etc.

21. Any scheme under this Act shall contain proper provisions respecting a re-arrangement of districts, and respecting the position of stations for the manufacture or storage of gas and other works, and respecting the mode of dealing with the capitals of the companies, and respecting a change of the name of the companies, and respecting the incorporation, name, and powers of the amalgamated company, and the vesting in them of any property and rights, and other proper provisions for the necessary incidents and consequences of amalgamation, and shall provide for proper compensation to any secretary, engineer, accountant, collector, or other salaried officer of any company, whose office or employment is abolished by or will become unnecessary under the scheme.

Provisions of scheme as to capital.

22. Provided that any scheme under this Act shall not contain any provisions that would authorise the application of share or loan capital, or any money arising from the sale of disused works or of superfluous lands, to any purposes other than those to which capital is properly applicable, or any provision for the reduction of any share capital already authorised by Parliament.

Meaning of company.

23. After any such amalgamation an amalgamated company shall be deemed to be a company within the meaning of the Act of 1860 and of this Act.

Sale of copies.

24. Each amalgamated company shall at all times keep at their principal office printed copies of the scheme relating to the company,

---

* As to the extension and operation of these provisions regarding amalgamation, see INTRODUCTION.

Sect. 24. with the confirming order in council, and shall sell copies to all persons desiring to buy the same, at a reasonable rate, not exceeding sixpence for each copy. If any company fail to comply with this provisions they shall be liable to a penalty not exceeding twenty pounds, and to a further penalty not exceeding five pounds for every day during which such failure continues after the first penalty is incurred.

DIVIDENDS.

25. [*Profits of Company limited.*]

26. [*If profits exceed the Amount limited, excess to be invested and form an Insurance Fund.*]

27. [*Application of excess of Profits after ten per cent.*]

28. [*Provision for lower Rate under special Act.*]

Sections 25—28 are repealed by the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 8, which Act introduces the sliding scale.

GAS REFEREES.*

Appointment of referees.

29. The Board of Trade shall as soon as may be after the passing of this Act appoint three competent and impartial persons, one at least of them having practical knowledge and experience in the manufacture and supply of gas, who shall be called the gas referees (and who are in this Act referred to as the gas referees), and in case of a vacancy happening among them by death, resignation, or otherwise shall appoint a competent and impartial person to fill the vacancy, one at least of the three being always qualified as aforesaid.

Continuance of referees.

30. Every person appointed to be one of the gas referees shall continue in office for one year only from the date of his appointment, but shall be capable of reappointment.

Quorum, etc. of referees.

31. Two of the gas referees shall be a quorum, and at least two of the referees shall concur in every act or determination of the referees.

Certificates of referees.

32. A copy of each certificate of the gas referees required by this Act shall be sent by them to the corporation, and to each of the companies.

TESTING FOR ILLUMINATING POWER AND PURITY.

33. [*Mode and Times of Testing Illuminating Power.*]

34. [*Examination of Gasworks by Gas Referees.*]

35. [*Access to Works.*]

36. [*Certificate of Maximum and Time.*]

37. [*Modes and Times of Testing Purity.*]

---

* Gas referees were afterwards authorised to be appointed in relation to the South Metropolitan Gas Company and the Commercial Gas Company by their Acts of 1869 and 1875 respectively. See more fully in INTRODUCTION.

Sects. 37—71.

38. [*Mode of Measuring Gas Public Lamps.*]

39. [*Freedom from Sulphuretted Hydrogen.*]

40. [*Provision of Testing Places and Apparatus.*]

41. [*Control, etc., of Testing Places.*]

42. [*Separate Testing Place for Company.*]

43. [*Description of Burner for Testing Illuminating Power.*]

44. [*Appointment of Gas Examiner.*]

45. [*Appointment of Chief Gas Examiner.*]

46. [*Daily Testing.*]

47. [*Testing for Illuminating Power.*]

48. [*Illuminating Power for Day.*]

49. [*Representation of the Company.*]

50. [*Daily Reports and Access to Books.*]

51. [*Appeal to Chief Gas Examiner.*]

52. [*Where no Appeal, Report of Examiner Final.*]

Illuminating Power and Price.

53. [*Illuminating Power (except for Cannel Gas).*]

54. [*Maximum Price (except for Cannel Gas).*]

55. [*Power for Reduction of Power and Price by Consent.*]

56. [*Price of Cannel Gas.*]

57. [*Application for Revision.*]

58. [*Commissioners may Inspect Books and Works of Company.*]

59. [*Evidence, etc.*]

60. [*Penalty for Disobedience, etc.*]

61. [*Penalty on Persons giving False Evidence.*]

62. [*Protection of Commissioners.*]

63. [*Inquiry of Commissioners.*]

64. [*Power to obtain Assistance, etc.*]

65. [*Majority to Bind.*]

66. [*Power and Price to be fixed for Year.*]

67. [*If no Application, Power and Price to Remain.*]

68. [*Rules for fixing Power and Price.*]

69. [*Costs of Revision.*]

70. [*Companies and Corporation may Agree as to Alteration of Price.*]

Reports of Chief Gas Examiner.

71. [*Quarterly Report of Chief Gas Examiner.*]

FORFEITURES.

72. [*Register of Gas made.*]

73. [*Forfeiture for Defect of Power.*]

74. [*Forfeiture for Excess of Impurity.*]

75. [*Saving for unavoidable Accident, etc.*]

76. [*Evidence of Liability to Forfeiture.*]

77. [*Forfeitures to be borne by Dividends.*]

ACCOUNTS.

78. [*Auditor of Accounts.*]

79. [*Ascertainment of Capital of Companies.*]

80. [*Form of Accounts.*]

81. [*Periodical Audit.*]

82. [*Facilities for Audit.*]

83. [*Arbitration between Auditor and Company.*]

MISCELLANEOUS AMENDMENTS.

84. [*Pressure of Gas.*]

The sections 33—84 are repealed by the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 8, by which Act other enactments are substituted. See further the Gaslight and Coke and other Gas Companies Acts, Amendment Act, 1880, *post*, p. 333, and the London Gas Act, 1905, *ante*, p. 295.

Governors for street lamps.

85. A company supplying gas to public lamps, or the Commissioners of Sewers, may at their own expense cause to be affixed to each lamp the instrument known as a street lamp governor, and the Commissioners of Sewers or the company (as the case requires) shall be entitled to have access thereto for the purpose of examining the same; and in case any dispute arises between the company and the Commissioners of Sewers with reference to the affixing, operation, or inspection of governors, the same shall be referred to the determination of the chief gas examiner, whose decision shall be final and conclusive.

Limit of charge for gas supplied to public lamps.

86. A Company shall not charge a higher price per one thousand cubic feet for gas supplied to the Commissioners of Sewers than the lowest price per one thousand cubic feet charged by them at the same time to any private customer, but if the company contend, as against the Commissioners of Sewers, that there are special circumstances justifying them in charging a lower price to any other customer, the question shall be determined by arbitration whether or not such lower price shall be taken as the standard for the price to be charged to the Commissioners of Sewers, and the price fixed by such arbitration shall continue for two years at least.

87. Section thirty-eight of the Act of 1860 shall be read as if the Lands Clauses Consolidation Act, 1845, were therein mentioned instead of the Companies Clauses Consolidation Act, 1845.

Settlement of differences by arbitration.

Company to make a map of mains and appliances beneath the public ways.

88. Each Company shall, within six months of the passing of this Act, make a map of the district within which their mains or pipes may be laid to a scale of not less than five feet to a mile, and shall show thereupon the lines, sizes, and depth beneath the surface of all their existing mains or pipes, excepting the service pipes to separate houses, and the positions of all valves, syphons, and other appliances, and shall once in every year, on or before the thirty-first day of December, correct such map and make such alterations in or additions thereto as may be necessary to show correctly, as near as may be, the lines, positions, sizes, and depths of the various pipes, and also their appliances, and shall keep such map in the principal office of the company, and the same shall be open to the inspection of the Commissioners of Sewers and their officers, and to the public generally, who may inspect or take copies of or extracts of the same; and the company may charge and take the sum of one shilling for each inspection of such map, and the further sum of two shillings and sixpence for each extract, tracing, or copy taken of such map.

See Metropolis Gas Act, 1860, ss. 42—44, *ante*, pp. 284, 285, and Commercial Gas Act, 1875, s. 70, *post*, p. 317. *Cf.* ss. 19—21, of the Waterworks Clauses Act, 1847, *post*, pp. 447, 448.

There is no corresponding section in the Gasworks Clauses Acts, 1847 and 1871.

Penalty on company for default.

89. If the company fail to comply with any requirements of this Act in respect of such map they shall for every such offence forfeit and pay any sum which two justices of the peace may adjudge, not exceeding the sum of fifty pounds.

Deposit in case of dispute.

90. Where a dispute arises between a company and one of their customers respecting any payment to be made to the company, if the customer deposits with the company, by way of security, the amount claimed by them, it shall not be lawful for the company to discontinue a supply of gas to the customer by reason of the dispute; but nothing herein shall authorise a company, where such deposit is not made, to discontinue a supply of gas to the customer in any case in which they would not have been authorised to do so if this Act had not been passed.

Expenses of Execution of Act.

91. [*Remuneration and Expenses of Gas Referees, etc.*]

Repealed by the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 8.

92. [*Remuneration and Expenses of Gas Examiners.*]

Repealed by the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 8. The remuneration and expenses of the chief gas examiner and auditor and gas examiners is now provided for by the City of London (Various Powers) Act, 1877 (40 Vict. c. vii.), ss. 15, 16, so far as the Gaslight and Coke Company is concerned.

Costs.

Expenses of Act.

93. All costs, charges, and expenses incidental to the preparing applying for, obtaining, and passing of this Act shall be paid by the corporation and the Companies in equal moieties as and to whom the Board of Trade direct; and the moiety of the Companies shall be paid in proportion to the amount of their paid-up share capital, but the paid-up capital of the Gas Light and Coke Company shall for this purpose be taken to be the capital apportioned to their district within the city under section seventy-nine of this Act.

The SCHEDULE to which the foregoing Act refers.

Parts of Metropolis Gas Act, 1860, *so far as they relate to the City, repealed.*

Section two, as far as it incorporates the provisions of the Gasworks Clauses Act, 1847, with respect to the amount of profit to be received by the Undertakers from the gasworks carried on for their benefit, or imposes any restrictions on a company in respect of the rate of dividend.

Sections seven to twelve, both inclusive.

Sections twenty-five to thirty-four, both inclusive.

Section thirty-seven.

Sections forty and forty-one.

COMMERCIAL GAS ACT, 1875.

(38 & 39 Vict. c. cc.)

An Act for conferring further powers on the Commercial Gas Company and for the Amalgamation with that Company of the Ratcliff Gaslight and Coke Company and for other purposes.

[11th August, 1875.]

10 & 11 Vict. c. liii.
15 & 16 Vict. c. clv.

Whereas the Commercial Gas Company (in this Act called the Commercial Company) are incorporated and empowered by the Commercial Gas Acts 1847 and 1852 or one of them for making and supplying and accordingly are making and supplying gas in a district in the County of Middlesex defined by or under the Metropolis Gas Act 1860:

And whereas the capital of the Commercial Company consists of the sum of four hundred and fifty thousand pounds stock being the total amount authorised to be raised by them by shares or stock and by conversion of loan into share capital and they have now no loan capital nor have they power to raise any loan capital:

And whereas it is expedient that further powers with respect to the purchase of land by agreement and the erection and improvement of works and the raising of share and loan capital be conferred on the Commercial Company:

And whereas the Ratcliff Gaslight and Coke Company (in this Act called the Ratcliff Company) are incorporated and empowered by an Act passed in the session of Parliament held in the year one thousand eight hundred and twenty-three chapter ninety-eight and by the Ratcliff Gas Act 1855 or one of them for making and supplying and accordingly are making and supplying gas in a district adjoining to the district of the Commercial Company also defined by or under the Metropolis Gas Act 1860:

4 Geo. 4 c. xcviii

And whereas the amalgamation of the Ratcliff Company with the Commercial Company would be of great public advantage and the same has been agreed on by the two companies and it is expedient that provision be made for giving full effect to the agreement and respecting the constitution and powers of the amalgamated company:

And whereas the objects aforesaid cannot be attained without the authority of Parliament:

May it therefore please your Majesty, that it may be enacted and be it enacted by the Queen's most Excellent Majesty by and with the advice and consent of the lords spiritual and temporal and commons in this present Parliament assembled and by the authority of the same as follows (that is to say):

1. [Short title.]

2. [Commencement of Act.]

Modification of Gas Act, 1860.

3. The following parts of the Metropolis Gas Act, 1860, shall not apply to the Commercial Company (that is to say),

Section two, as far as it incorporates the provisions of the Gasworks Clauses Act, 1847, with respect to the amount of profit to be received by the undertakers from the gasworks carried on for their benefit, or imposes any restriction on the company in respect of the rate of dividend;

So much of section four as defines the meaning of the words common gas and cannel gas;

Sections seven to twelve, both inclusive;

Sections twenty-five to thirty-four, both inclusive;

Sections thirty-seven and thirty-eight;

Sections forty to forty-four, both inclusive;

and such provisions of the Metropolis Gas Act, 1860, as apply to the Commercial Company shall be read and have effect as if the Board of Trade were named therein instead of one of her Majesty's principal Secretaries of State; and the Gasworks Clauses Act, 1871, shall not extend or apply to the Commercial Company.

4. [Repeal of parts of Commercial Act of 1852.]

Incorporation of general Acts.

5. The following enactments (as far as they are applicable for the purposes of, and are not varied by or inconsistent with this Act) are incorporated with and are part of this Act; (that is to say,)

Sect. 5.

The Lands Clauses Consolidation Acts, 1845, 1860, and 1869, as far as the same relate to the taking of lands by agreement, and for that purpose the term lands in those Acts shall include easements and other interests.

The Companies Clauses Consolidation Act, 1845, so as to apply to the additional capital by this Act authorised, and with respect to the several matters following; (that is to say) the distribution of the capital of the company into shares; the transfer or transmission of shares; the payment of subscriptions and the means of enforcing the payment of calls; the forfeiture of shares for nonpayment of calls; the remedies of creditors of the company against the shareholders; the borrowing of money by the company on mortgage or bond; the conversion of the borrowed money into capital; the consolidation of the shares into stock; general meetings and dividends; the giving of notices, and the provisions to be made for affording access to the special Act; Parts I., II., and III. of the Companies Clauses Act, 1863, relating respectively to cancellation and surrender of shares, to additional capital, and to debenture stock, as amended by the Companies Clauses Act, 1869.

Interpretation of terms.

6. In this Act:—

"Metropolitan board" means the Metropolitan Board of Works.*

"Local authority" means a vestry or district board acting under the Metropolis Management Act, 1855.†

"Share" and "shareholder" include stock and stockholder.

"Half year" means a half year reckoned from the first day of January and the first day of July (each inclusive) in each year.

"Quarter" means a quarter of a year reckoned from the first day of January first day of April first day of July and first day of October (each inclusive) in each year.

"Day" means (except in this section) twenty-four hours reckoned from nine o'clock in the forenoon of one day to nine o'clock in the forenoon of the next following day so much of each day as is before nine o'clock in the forenoon being reckoned as part of the immediately preceding day of the month or week.

"Candles" means sperm candles of six to the pound burning one hundred and twenty grains an hour each.

---

* The powers, duties, and liabilities of this board were transferred to the London County Council by the Local Government Act, 1888 (51 & 52 Vict. c. 41), s. 40 (8).

† Under the London Government Act, 1899 (62 & 63 Vict. c. 14), the borough councils become respectively the local authority in the place of the vestries and district boards.

7. [Power to take lands by agreement.]

8. [Power to make and maintain gasworks.]

9. [Power to make wharves, etc.]

10. [Power to stop up footpath.]

11. [Power for Lee Conservancy Board to sell parts of foreshore to Commercial Company.]

12. [Power to hold licences under letters patent.]

13. [Power to raise additional capital.]

14. [New shares or stock subject to same incidents as other shares or stock.]

15. [Shareholder not to vote where interested otherwise than as a shareholder.]

16. [Votes of shareholders.]

17. [Power to borrow.]

18. [Arrears may be enforced by appointment of a receiver.]

19. [Restrictions on issue of additional capital beyond £200,000.]

20. [Debenture stock.]

21. [Application of capital.]

Appointment of gas referees.

22. The Board of Trade shall as soon as may be after the passing of this Act appoint in relation to the Commercial Company three competent and impartial persons one at least of them having practical knowledge and experience in the manufacture and supply of gas who shall be called the gas referees (and who are in this Act referred to as the gas referees) and in case of a vacancy happening among them by death resignation or otherwise shall appoint a competent and impartial person to fill the vacancy one at least of the three being always qualified as aforesaid.

This section is in substance identical with s. 29 of the City of London Gas Act, 1868 (31 & 32 Vict. c. cxxv.). See further on this subject in the INTRODUCTION.

Continuance of referees.

23. Every person appointed to be one of the gas referees shall continue in office for one year only from the date of his appointment but shall be capable of reappointment.

Quorum, etc. of referees.

24. Two of the gas referees shall be a quorum and at least two of the gas referees shall concur in every act or determination of the gas referees.

Certificates of referees.

25. A copy of each certificate of the gas referees required by this Act shall be sent by them to the Metropolitan Board and to the Commercial Company.

The London County Council now take the place of the Metropolitan Board. See footnote, *ante*, p. 310.

Mode and times of testing illuminating power.

26. The gas referees shall subject to the provisions of this Act from time to time prescribe and certify the mode to be adopted for testing and recording the illuminating power and pressure of gas

Sect. 26. supplied by the Commercial Company and the number of the times of testing.

By the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880 (43 & 44 Vict. c. clxxxi.), s. 21 and schedule, so much of this section as relates to the pressure of the gas is repealed. See now the provisions of s. 6 of that Act as to pressure, *post*, p. 335, and the provisions of the London Gas Act, 1905, p. 297, *ante*, as to testing illuminating power.

Examination of gasworks by referees.

27. The gas referees shall with all practicable speed after their appointment and the gas referees for the time being may from time to time thereafter inspect the works of the Commercial Company and investigate the processes of manufacture carried on therein with the view of ascertaining the means adopted therein for purifying gas and for preventing nuisance and may from time to time apply all such tests as they think expedient at the works of the Commercial Company or elsewhere for ascertaining the amount of sulphur and ammonia and of compounds thereof or other impurity with which gas supplied by them is charged.

Access to works.

28. The Commercial Company shall give to the gas referees and each of them and to each of their clerks servants and workmen access to the works of the company and shall when required afford to them and each of them all facilities for the proper execution of their and his duty.

Purity of gas to be prescribed.

29. The gas referees shall from to time ascertain with what degree of purity the Commercial Company can reasonably be required to make and supply gas continuously without occasioning a nuisance to the neighbourhood in which the works are situate and shall thereupon prescribe and certify the maximum amount of impurity in each form with which gas supplied by the company should be allowed to be charged and the time from which the allowance thereof should be enforced as against the company regard being had to the necessity for any alteration of works by the company consequent on any such certificate.

Mode and times of testing purity.

30. The gas referees shall from time to time prescribe and certify the mode to be adopted for testing and recording the purity of gas supplied by the Commercial Company and the number of the times of testing such purity.

31. [*Freedom from sulphuretted hydrogen.*]

This section was repealed by s. 19 and schedule of the London Gas Act, 1905. See ss. 5—7 of that Act, *ante*, p. 297, for the substituted provisions.

Provision of testing places and apparatus.

32. The gas referees shall from time to time prescribe and certify the situation and number of the testing places and the apparatus and materials to be used therein for testing the illuminating power purity and pressure of the gas to be provided by the Commercial Company [*one such place being prescribed for every station from which gas is supplied in the district supplied from such station*] and the company shall provide and maintain such testing places and apparatus and materials accordingly.

By the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880 (43 & 44 Vict, c. clxxxi.), s. 21 and schedule, the words in italics, and so much of the section as relates to the pressure of the gas, are repealed. As to pressure, see now the provisions of ss. 6 and 16 of that Act, *post*, pp. 335, 337.

See the provisions of s. 8 of the London Gas Act, 1905, as to pipes connecting mains with testing places.

Control, etc. of testing places.

33. The prescribed testing places materials and apparatus provided by the Commercial Company shall be under the control and management of the Metropolitan Board, but the company may also have a separate testing place in the same building under their own control and management.

The London County Council now take the place of the Metropolitan Board of Works. See footnote, *ante*, p. 310.

34. [*Description of burner for testing illuminating power.*]

This section was repealed by s. 19 and schedule of the London Gas Act, 1905. See s. 3 of that Act, *ante*, p. 296, for the substituted provisions.

Appointment of gas examiner.

35. The Metropolitan Board shall as soon as may be after the commencement of this Act appoint and shall always keep appointed a competent and impartial person or persons to be a gas examiner or gas examiners for the several testing places.

See footnote, p. 310.

Appointment of chief gas examiner.

36. There shall be a chief gas examiner being a competent and impartial person from time to time appointed by and removable by the Board of Trade.

Where the chief gas examiner took evidence without notice to the company his determination and report was quashed by *certiorari* (*R.* v. *London C. C.*, *Ex parte Commercial Gas Co.* (1895), 11 T. L. R. 337). Both parties had previously concurred in this mode of acting, but the court held that that made no difference as "it was not a consensual arbitration" (*ib.*). See hereon the provisions of s. 13 of the London Gas Act, 1905, *ante*, p. 299.

37. [*Daily Testing.*]

38. [*What shall be deemed illuminating power and pressure for each day.*]

39. [*Average testings of purity.*]

40. [*Representation of company.*]

41. [*Daily reports and access to books.*]

42. [*Appeal to chief gas examiner.*]

43. [*Where no appeal, report final.*]

44. [*Quarterly report of chief gas examiner.*]

45. [*Register of gas made.*]

46. [*Forfeiture for defect of power.*]

47. [*Forfeiture for excess of impurity.*]

48. [*Forfeiture for insufficiency of pressure.*]

49. [*Saving for unavoidable accident, etc.*]

50. [*Evidence of liability to forfeiture.*]

51. [*Forfeiture to be borne by dividend.*]

Sect. 51.

NOTE.

These sections (37—51) are repealed by the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880 (43 & 44 Vict. c. clxxxi.), s. 21. Fresh enactments were substituted by that Act. See pp. 335—337, but see now the provisions of the London Gas Act, 1905, *ante*, p. 295.

52. [*Illuminating power.*]

The illuminating power was reduced to 14 candles by the Commercial Gas Act, 1902, and after a temporary modification of s. 52, *supra*, made by the Commercial Gas Act, 1903, the section was repealed by s. 19 and schedule of the London Gas Act, 1905. See the substituted provisions in s. 4 of that Act, *ante*, p. 296.

53. [*Fixing maximum price of gas with sliding scale as to dividend.*]

This section was repealed by s. 12 (3) of the Commercial Gas Act, 1902. See the substituted provisions of s. 12 (1), (2), of that Act, *post*, p. 344.

Auditor of accounts.

54. There shall be an auditor of the accounts of the Commercial Company being a competent and impartial person from time to time appointed by and removable by the Board of Trade (which auditor is in this Act referred to as the auditor).

Ascertainment of capital of company.

55. The auditor shall with all practicable speed after the commencement of this Act investigate the accounts of the Commercial Company and ascertain and certify the amount of their capital distinguishing share from loan capital and shall from time to time as new capital shall be expended in like manner ascertain and certify such new capital.

Form of accounts.

56. The auditor shall from time to time prescribe an uniform form of accounts to be kept by the Commercial Company.

Periodical audit.

57. The auditor shall during every half year as and when he thinks fit inspect the accounts of the company and audit the same and if he finds the same correct he shall certify the same but if he finds the accounts incorrect in principle or in detail he shall require the Commercial Company to correct the same in such manner as he thinks right and he may if he thinks fit grant a conditional certificate so as to authorise the payment of a dividend subject to correction if need be and except in the case of a conditional certificate a dividend shall not in any case be declared until the accounts are certified by the auditor. The accounts as and when certified shall be forthwith laid before both Houses of Parliament if Parliament be then sitting and if Parliament be not then sitting within seven days after the commencement of the then next session of Parliament.

Facilities for auditor.

58. The Commercial Company shall give to the auditor his clerks and assistants access to the books and documents of the company and shall when required furnish to him or them all vouchers and information requisite for the purposes of the audit and shall afford to him and them all facilities for the proper execution of his and their duty.

Power for Metropolitan

59. A copy of the accounts before the auditor shall certify the same shall be forwarded to the Metropolitan Board and the Metropolitan Board may in case they shall so desire appear before the auditor and before certifying the accounts the auditor shall if required hear the Metropolitan Board and the company with respect to any matter relating to such audit or accounts.

Board to appear before auditor.

See note to s. 60.

60. If the Metropolitan Board or the Commercial Company think themselves aggrieved by any act, determination or omission of the auditor the matter in difference shall be referred to the determination of an arbitrator to be agreed on between them and the auditor or in default of agreement to be appointed on the application of either party by the Lord Chief Justice of the Court of Common Pleas and the reference shall be subject and according to the provisions of the Common Law Procedure Act, 1854, and the costs of the arbitration shall be in the discretion of the arbitrator whose decision shall with respect to all such matters be final and conclusive and subject to this provision the directions and determination of the auditor shall be final and conclusive.

Arbitration between auditor and company.

For Metropolitan Board read now London County Council. See footnote, p. 310.

See Arbitration Act, 1889 (52 & 53 Vict. c. 49), ss. 5 and 24.

61. The remuneration of the gas referees and of the chief gas examiner and of the auditor shall be such as the Board of Trade from time to time direct and a proportionate part of the same and of all expenses properly incurred by them in or about the execution of their duties to be fixed from time to time by the Board of Trade having regard to the paid-up capital of the Commercial Company shall be paid by them on demand to such fund or account and in such manner as the Board of Trade from time to time direct and shall be a debt due from the Commercial Company to the Crown and shall be recoverable accordingly with costs.

Remuneration and expenses of gas referees, etc.

62. The profits of the Commercial Company to be divided among the shareholders in any year shall not except as in this Act is otherwise provided exceed the rate of ten pounds per centum per annum upon the capital paid up on the passing of this Act and the rate of seven pounds per centum per annum on shares or stock of the additional capital by this Act authorised to be raised (which rates are respectively in this Act referred to as the standard rates of dividend).

Profits of company limited.

See the provisions of s. 5 of the Commercial Gas Act, 1902, *post*, p. 341.

63. If the clear profits of the undertaking of the Commercial Company in any year amount to a larger sum than is sufficient to make up the rates of dividend by this Act authorised the excess beyond the sum necessary for such purpose shall from time to time to the extent of one pound per centum per annum upon the paid-up capital of the company be invested in government or other securities and the dividends and interest arising from such securities shall also be invested in the same or like securities in order that the same may accumulate at compound interest until the fund so formed amounts to a sum equal to one twentieth of the paid-up capital of the

If profits exceed the amount limited excess to be invested and form an insurance fund.

Sect. 63.

company which sum shall form an insurance fund to meet any extraordinary claim or demand which may at any time arise against the company from accident which in the opinion of the auditor due prudence and management could not have prevented and if such fund be at any time reduced it may thereafter be again made up to the said sum and so from time to time as often as such reduction shall happen provided that when and so often as the said fund shall reach one twentieth part of the paid-up capital the interest thereon shall be carried to the credit of the fund available for dividend. Provided also that resort may from time to time be had to the insurance fund to meet any extraordinary claim or demand as aforesaid although such fund may not at the time have reached or may have been reduced below the full amount of one twentieth as aforesaid.

Application of excess of profits over prescribed rate of dividend.

64. If the clear profits of the undertaking of the Commercial Company in any year amount to a larger sum than is sufficient to make up the rates of dividend by this Act respectively authorised and to form or make up the insurance fund by this Act authorised the excess shall (subject to the provisions of this Act respecting the reserve fund) be carried to the credit of the divisible profits of such undertaking for the next following year.

Power to create a reserve fund out of dividends in excess of the prescribed rate of dividends.

65. Where in any year the amount of the prescribed rates of dividend of the Commercial Company shall by reason of a diminution of the standard price charged by the company in such year be increased then out of the amount of the divisible profits of the company applicable to the payment of such increase the company may in such year set apart such sum as they shall think fit.

Application of reserve fund.

66. All sums (if any) so set apart by the Commercial Company and the reserve fund existing at the time of the commencement of this Act may be invested in Government or other securities and the dividends and interest arising from such securities may also be invested in the same or like securities in order that the same may accumulate at compound interest and the fund so formed shall be called the "reserve fund" and shall be applicable to the payment of dividend in any year in which the clear profits of the company shall be insufficient to enable the company in such year to pay the rates of dividend respectively authorised by this Act and save as in this Act otherwise provided no sum shall in any year be carried by the company to any reserve fund.

As to conversion of borrowed money into capital.

67. The Commercial Company shall not raise any moneys by this Act or by any other Act of the company authorised to be borrowed on mortgage or any part of such moneys by the creation of shares or stock instead of borrowing or convert into capital the amount borrowed under the provisions of this Act or of any other Act of the company unless in either case all dividends upon such shares or stock whether ordinary or preferential are limited to a rate not exceeding five pounds per centum per annum.

Note.

A similar section occurs in the Gaslight and Coke Company's Act, 1876 (39 & 40 Vict. c. ccxxv.), s. 24, and in the South Metropolitan Act, 1876 (39 & 40 Vict. c. ccxxix.), s. 25. See s. 56 of the Companies Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 16), and notes thereto, *post*.

Governors for street lamps.

68. The Commercial Company supplying gas to public lamps or the local authority may at their own expense cause to be affixed to each lamp the instrument known as a street lamp governor and the Commercial Company or the local authority as the case requires shall be entitled to have access thereto for the purpose of examining the same and in case any dispute arises between the company and the local authority with reference to the affixing operation or inspection of governors the same shall be referred to the determination of the chief gas examiner whose decision shall be final and conclusive.

Limit of charge for gas supplied to public lamps.

69. The Commercial Company shall not charge a higher price per one thousand cubic feet for gas supplied to a local authority than the lowest price per one thousand cubic feet charged by them at the same time to any private customer but if the Commercial Company contend as against the local authority that there are special circumstances justifying them in charging a lower price to any other customer the question whether or not such lower price shall be taken as the standard for the price to be charged to the local authority shall be determined by arbitration and the price fixed by such arbitration shall continue for two years at least.

Arbitration under this section shall be conducted in the manner prescribed by the Lands Clauses Consolidation Act, 1845, with respect to the settlement of disputes by arbitration.

Company to make a map.

70. The Commercial Company shall within six months after the commencement of this Act provide a map of the district within which their mains or pipes may be laid to a scale of not less than five feet to a mile and shall show thereupon the lines and sizes and depth beneath the surface of all their existing mains or pipes except service pipes to separate houses and the positions of all valves syphons and other appliances and shall once in every year on or before the thirty-first day of December correct such map and make such alterations in or additions thereto as may be necessary to show correctly as near as may be the lines position sizes and depths of the various pipes and also their appliances and shall keep such map in the principal office of the company and the same shall be open to the inspection of the local authorities and their officers and to the public generally during usual office hours who may inspect or take copies of or extracts from the same and the company may charge and take the sum of one shilling for each inspection of such map and the further sum of two shillings and sixpence for each extract tracing or copy taken of such map and if the company wilfully fail to comply with any of the requirements of this Act in respect of such map they shall for every such offence forfeit and pay any sum which two justices of the peace may adjudge not exceeding the sum of fifty pounds.

Sect. 71.

Pressure of gas.

71. All gas supplied by the Commercial Company to a private consumer shall (except in case of accident or repairs) be supplied at such pressure as to balance from midnight to sunset a column of water not less than six-tenths of an inch in height and to balance from sunset to midnight a column of water not less than one inch in height at the main as near as may be to the junction therewith of the service pipe supplying the customer's house building or lands.

Power to refuse supply to person in debt for other property.

72. If a person requiring a supply of gas from the Commercial Company has previously quitted premises at which gas was supplied to him by them without paying to them all gas and meter rent due from him in respect thereof they may refuse to furnish to him a supply of gas until he pays the same.

Deposit in case of dispute.

73. Where a dispute arises between the Commercial Company and one of their customers respecting any payment to be made to them if the customer deposits with them by way of security the amount claimed by them it shall not be lawful for them to discontinue a supply of gas to the customer by reason of the dispute but nothing herein shall authorise them where such deposit is not made to discontinue a supply of gas to him in any case in which they would not have been authorised to do so if this Act had not been passed.

Contract to be signed before gas consumed.

74. Every person being or desiring to become a customer of the Commercial Company shall if required by them sign a contract with them in the form given in the schedule to this Act or to the like effect with such variations and additions as circumstances require and if any person refuses to do so the company may refuse to give or may discontinue the supply of gas to him and may remove any meter belonging to them in his possession.

Fixing minimum rent for gas.

75. Notwithstanding anything contained in the Metropolis Gas Act, 1860, the Commercial Company shall not be compelled to lay on gas for any stable or other outbuilding where the company do not supply gas to the house to which such stable or outbuilding belongs unless the person requiring such gas shall agree that the consumption of gas in such stable or outbuilding be at the rate of at least ten shillings per annum or unless such person shall pay the expense of service pipe and meter.

Gas rents payable by occupiers who are servants may be recovered from their employers.

76. Where in any proceeding for the recovery of any gas rent due to the Commercial Company from the occupier of any premises it is proved to the satisfaction of the justices or court having cognizance of the case that such occupier occupied the said premises as the agent or servant of some other person such last mentioned person shall be liable to pay such gas rent to the company in the same manner and to the same extent as such occupier.

Incoming tenants to give security if required.

77. Sections fifteen and sixteen of the Metropolis Gas Act, 1860, which require security to be given shall apply to the supply of gas or of meters to any person who shall succeed a tenant in the occupation of a house or premises where at the time of such persons entering into possession gas was consumed and who shall desire to continue to use the gas of the Commercial Company as though the company had not theretofore supplied the said house and premises and the company in default of such person's compliance may discontinue the supply of gas to such person and remove the meter.

See the sections referred to *ante*, p. 280.

Notice to company of connecting or disconnecting meters.

78. Before any person connects or disconnects or allows any other person to connect or disconnect any meter by which any of the Commercial Company's gas is intended to be or has been registered he shall give not less than twenty-four hours notice in writing to the company of his intention so to do and if any person fail to give such notice he shall for every such offence forfeit not exceeding five pounds.

Repair of meters.

79. Every consumer of gas of the Commercial Company shall at all times and at his own expense keep every meter belonging to him whereby any gas of the company is registered in proper order and proper and sufficient in all respects for correctly registering the gas supplied to him and in default thereof the company may cease to supply gas through such meter and the company shall at all reasonable times have access to and be at liberty to take off remove test inspect replace and if necessary repair any meter belonging to a consumer and if the meter be found in proper order and proper and sufficient in all respects the taking off removing testing inspecting and replacing shall be done at the expense of the company but otherwise at the expense of the consumer together with the cost of repair and if any consumer refuses or prevents the access to and the removal of such meter for the purpose aforesaid it shall be lawful for the company to cut off the supply of gas without further notice.

Power to remove meters and fittings.

80. The Commercial Company after twenty-four hours notice in writing under the hand of the secretary or some other officer of the company to the occupier or if unoccupied then to the owner or lessee of any land house or building in which any pipe meter or fitting belonging to the company is laid or fixed and through or in which the supply of gas is from any cause other than the fault of the company discontinued may enter the premises within the hours of nine in the morning and four in the afternoon for the purpose of removing and may remove the pipes meters or fittings repairing all damages caused by the entry or removal and every such notice shall be served by being delivered to the person for whom it is intended or left at his usual or last known place of abode or if the person or his address be not known to the company after due inquiry then by being affixed on some conspicuous part of the said premises.

81. [Power to company to let meters.]

82. [Fraudulently injuring meters.]

83. [For preventing frauds and waste of gas.]

Sect. 84.

Mode of measuring gas for public lamps.

84. The gas for public lighting shall if required by either party be supplied by measurement and the referees shall if required by either party from time to time prescribe and certify the mode of ascertaining the quantity of gas consumed by the public lamps.

85. [Recovery of charges for gas.]

86. [Recovery of sums due to the company.]

87. [Register of meter to be primâ facie evidence of gas consumed.]

88. [Penalties on company not cumulative.]

89. [Amalgamation of Ratcliff with Commercial Company.]

90. [Meaning of terms relating to amalgamation.]

91. [Undertaking of dissolved company vested in amalgamated company.]

92. [Limits of amalgamated company.]

93. [Acts relating to dissolved company to apply to amalgamated company.]

94. [Saving debts and claims of dissolved company.]

95. [Saving conveyances contracts, etc.]

96. [Causes and rights of action reserved.]

97. [Actions not to abate.]

98. [Saving submissions and awards relating to dissolved company.]

99. [Unexecuted works of dissolved company may be completed.]

100. [Officers of dissolved company to be accountable for books, etc.]

101. [Officers, etc., of dissolved company.]

102. [Books, etc., to be evidence.]

103. [Resolutions of dissolved company to remain in force.]

104. [Payment of calls.]

105. [Registers books and certificates relating to dissolved company to subsist until replaced.]

106. [Byelaws to remain in force.]

107. [General saving of rights and claims.]

108. [Extension of provisions to amalgamated company.]

109. [Share capital of amalgamated company.]

110. [Saving for Commercial preferences.]

111. [Conversion of Ratcliff share capital into stock.]

112. [Company to issue certificates and may require old certificates to be exchanged.]

113. [Continuance of trusts of shares, etc.]

114. [Reserved fund of dissolved and amalgamated companies.]

115. [Mortgages and bonds to be a charge on united undertaking.] Sect. 115.

116. [Borrowing powers of amalgamated company.]

117. [Debts and credits on revenue account.]

118 [Expenses of amalgamation.]

119. [Directors of amalgamated company.]

120. [Auditors of amalgamated company.]

121. [Qualification of directors and auditors.]

122. [Remuneration of directors.]

123. [Differences between two companies.]

124. [Expenses of Act.]

The SCHEDULE to the foregoing Act.

THE COMMERCIAL GAS COMPANY.

I do hereby contract with the Commercial Gas Company for a supply of gas by meter on the following terms and conditions (namely) at per thousand cubic feet or such other rate as the company are for the time being entitled under Act of Parliament to charge and per quarter for the use of the company's light meter and if the meter from any cause ceases or omits to register accurately the quantity of gas used I hereby agree to pay in respect of the gas consumed a reasonable proportion of the above rate for and during the period of such non-registration. And I agree to pay the rent [quarterly] and hold myself liable for all gas consumed on the above premises whether by myself or others until notice in writing be given by me to the company.

I also agree that the meter shall be accessible at all reasonable times to the inspection of the company's inspectors or servants.

(Signed)
Consumer.
(Witness)
Inspector.

GASLIGHT AND COKE COMPANY ACT, 1876.

(39 & 40 VICT. C. CCXXV.).

An Act for granting further powers to the Gaslight and Coke Company; and for other purposes. [11th August 1876.]

WHEREAS by the Metropolis Gas Act, 1860, provision was made for regulating the supply of gas to the metropolis :

And whereas by the City of London Gas Act, 1868, the provisions of the Metropolis Gas Act, 1860, were amended, so far as it affected the Gaslight and Coke Company, the City of London Gaslight and Coke Company, and the Great Central Gas Consumers Company, 31 & 32 Vict. c. cxxv.

and such companies, together with the Victoria Docks Gas Company, the Equitable Gaslight Company, the Western Gaslight Company, Limited, the Imperial Gaslight and Coke Company, and the Independent Gaslight and Coke Company, have since been amalgamated under the name of the Gaslight and Coke Company:

And whereas it is expedient that the provisions of the recited Acts and other Acts relating to the Gaslight and Coke Company, be amended, and that further powers be conferred on that company with respect to the taking and using of lands, the raising of capital, and other matters, but the same cannot be effected without the authority of Parliament:

And whereas plans delineating lands intended to be authorised to be taken under this Act, and a book of reference thereto containing the names of the owners or reputed owners, and lessees or reputed lessees, and of the occupiers of those lands, and describing those lands, have been deposited with the respective clerks of the peace for the counties of Middlesex, Kent, and Essex (which are in this Act referred to as the deposited plans and books of reference):

May it therefore please your Majesty that it may be enacted; and be it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in this present Parliament assembled, and by the authority of the same, as follows; (that is to say,)

Short title.

1. This Act may be cited as "The Gaslight and Coke Company Act, 1876."

Provisions of certain general Acts incorporated.

2. The Lands Clauses Consolidation Acts, 1845, 1860, and 1869 (except so far as the provisions thereof are amended by or inconsistent with this Act), are incorporated with and form part of this Act.

3. [Interpretation of terms.]

4. [Commencement of Act.]

5. [Power for company to take lands and erect gasworks.]

6. [Powers for compulsory purchases limited.]

7. [Application of capital.]

Repeal of certain enactments.

8. The enactments specified in the first column of Part I. of the Schedule B. to this Act annexed, shall, to the extent specified in the second column of the same schedule, be and the same are hereby repealed, and the enactments of the Metropolis Gas Act, 1860, specified in Part II. of the same schedule, shall from and after the passing of this Act cease to relate or apply to or affect the Independent Gaslight and Coke Company.

See Schedule B. at p. 329.

9. [Capital of the company defined.]

10. [Profits of company defined.]

NOTE.

By the Gaslight and Coke Company's (Capital Consolidation) Act, 1898, (61 & 62 Vict. c. clxxii.), the company obtained power to convert their share capital and debenture capital, the ordinary stock being converted into a 4 per cent. stock. See now hereon s. 34 of the Gaslight and Coke Company's Act, 1909, *post*, p. 353.

11. [Power to raise additional capital.]

12. [New shares or stock subject to same incidents as other shares or stock.]

13. [New shares to be offered by auction or tender.]

14. [As to notice to be given as to sale, etc., of shares.]

15. [Shares not sold by auction or by tender to be offered to shareholders.]

16. [Application of premium arising on issue of shares or stock.]

17. [Power to borrow on mortgage.]

18. [Restrictions on raising additional capital beyond one million.]

PRICE OF GAS.

19. [*Fixing maximum price of common gas, with sliding scale as to dividend.*]

This section was amended by ss. 15 and 16 of the Gaslight and Coke Company's (Capital Consolidation) Act, 1898 (61 & 62 Vict. c. clxxii.), and the last-mentioned sections were amended by s. 8 of the Gaslight and Coke Company's Act, 1903, (3 Edw. 7, c. xli.), but all of these amending sections, and s. 19, *supra*, were repealed by s. 34 of the Gaslight and Coke Company's Act, 1909 (9 Edw. 7, c. lxxxvii.). See the substituted provisions in that section, *post*, p. 353.

Maximum price of cannel gas.

20. The maximum price to be from time to time charged by the company for cannel gas supplied by them shall, so long as the company charge the standard price for common gas, be four shillings and ninepence per one thousand cubic feet, and in case they shall increase or decrease such standard price, the maximum price for cannel gas shall be at such rate per one thousand cubic feet as for cannel gas of the illuminating power supplied by the company will be proportional to the price per one thousand cubic feet charged by the company for the time being for common gas.

If profits exceed the amount limited, excess to be invested and form an insurance fund.

21. If the clear profits of the undertaking of the company in any year amount to a larger sum than is sufficient to pay the standard rate of dividend, the excess beyond the sum necessary for that purpose may from time to time, to the extent of one per centum per annum upon the paid-up capital of the company, be invested in government or other securities, and the dividends and interest arising from such securities shall also be invested in the same or like securities, in order that the same may accumulate at compound interest until the fund so formed amounts to a sum equal to one-twentieth of the paid-up capital of the company, which sum shall form an insurance fund to meet any extraordinary claim, demand, or charge which may at any time arise against or fall upon the company from accident, strikes, or other circumstances, which in the

Sect. 21.

opinion of the auditor due care and management could not have prevented; and if such fund be at any time reduced it may thereafter be again made up to the said sum, and so from time to time as often as such reduction shall happen; provided that when and so often as the said fund shall reach one-twentieth part of the paid-up capital, the interest thereon shall be carried to the credit of the fund available for dividend: Provided also, that resort may from time to time be had to the insurance fund to meet any extraordinary claim or demand as aforesaid, although such fund may not at any time have reached or may have been reduced below the full amount of one-twentieth as aforesaid.

By s. 35 of the Gaslight and Coke Company's Act, 1909, *post*, p. 355, this and the next two sections are to be read and have effect as if the words "half year" were substituted therein for the word "year" wherever that word occurs in those sections.

It is also, in s. 35 of the Act of 1909, provided that s. 21, *supra*, and s. 22, *infra*, shall respectively be read and have effect, as if the expression "authorised rate of dividend" were substituted therein for the expression "standard rate of dividend."

Application of excess of profits over standard rate of dividend.

22. If the clear profits of the undertaking of the company in any year amount to a larger sum than is sufficient to pay the standard rate of dividend on the ordinary share capital or stock of the company, the excess, or such portion of it as is not carried to the insurance fund, shall be carried to the credit of the divisible profits of such undertaking for the next following year.

See note to s. 21.

Power to create a reserve fund out of dividends in excess of the standard rate of dividend, and application thereof.

23. Where in any year the amount of the standard rate of dividend of the company on the ordinary share capital or stock of the company shall by reason of a diminution of the standard price charged by the company in such year be increased, then out of the amount of the divisible profits of the company applicable to the payment of such increase, the company may in such year set apart such sum as they shall think fit, and all sums (if any) so set apart by the company, and the reserve fund existing at the time of commencement of this Act, may be invested in government or other securities, and the dividend and interest arising from such securities may also be invested in the same or the like securities in order that the same may accumulate at compound interest, and the fund so formed shall be called the "reserve fund," and shall be applicable to the payment of dividend in any year in which the clear profits of the company shall be insufficient to enable the company in such year to pay the standard rate of dividend on the ordinary share capital or stock of the company; and save as in this Act otherwise provided, no sum shall in any year be carried by the company to any reserve fund.

See the note under s. 21.

By s. 35 of the Gaslight and Coke Company's Act, 1909, (9 Edw. 7, c. lxxxvii.), it was provided that s. 23, *supra*, should be read and have effect as if the expression "authorised rate of dividend" were substituted for "standard rate of dividend" where that expression secondly occurs in the section.

NOTE.

By s. 11 of the Gaslight and Coke Company's Act, 1903, the use of the reserve fund under s. 23, *supra*, in distribution of dividend on ordinary stock in excess of 4 per cent. per annum is now prohibited.

See also the provisions of s. 9 of the Company's Act of 1903, *post*, p. 348, and s. 36 of their Act of 1909, *post*, p. 356.

As to conversion of borrowed money into capital.

24. The company shall not raise any moneys by this Act or by any other Act of the company authorised to be borrowed on mortgage, or any part of such moneys by the creation of shares or stock instead of borrowing, or convert into capital the amount borrowed under the provisions of this Act or of any other Act of the company, unless in either case all dividends upon such shares or stock, whether ordinary or preferential, are limited to a rate not exceeding five pounds per centum per annum.

A similar section occurs in the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), s. 67, and in the South Metropolitan Act, 1876 (39 & 40 Vict. c. ccxxix.), s. 25. See s. 56 of the Companies Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 16), and notes thereto, *post*.

ILLUMINATING POWER.

25. [*Illuminating power.*]

This section was repealed by s. 19, and schedule of the London Gas Act, 1905. See now the substituted provisions contained in s. 4 of that Act, *ante*, p. 296.

Pressure of gas.

26. All gas supplied by the company shall (except in case of accident or repairs) be supplied at such pressure as to balance from midnight to sunset a column of water not less than six-tenths of an inch in height, and to balance from sunset to midnight a column of water not less than one inch in height.

TESTING FOR ILLUMINATING POWER, PURITY, AND PRESSURE.

Mode and times of testing illuminating power and pressure.

27. The gas referees shall, subject to the provisions of this Act, from time to time prescribe and certify the mode to be adopted for testing and recording the illuminating power and pressure of gas supplied by the company, and the number of the times of testing.

So much of this section as relates to the pressure of the gas is repealed by the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880 (43 & 44 Vict. c. clxxxi.), s. 21, and schedule. See p. 338. For the provisions of that Act regarding pressure, see s. 6, *post*, p. 335.

See *London C. C.* v. *South Metropolitan Gas Co.*, [1904] 1 Ch. 76, referred to at p. 335, *post*. See the provisions as to testing, contained in the London Gas Act, 1905, *ante*, p. 297.

Examination of gasworks by referees.

28. The gas referees shall with all practicable speed after their appointment, and the gas referees for the time being may from time to time thereafter, inspect the works of the company and investigate the processes of manufacture carried on therein with the view of ascertaining the means adopted therein for purifying gas, and for preventing nuisance, and may from time to time apply all such tests as they think expedient at the works of the company or elsewhere for ascertaining the amount of sulphur and ammonia, and of compounds

Sect. 28.

thereof or other impurity with which gas supplied by them is charged.

See the provisions as to testing contained in the London Gas Act, 1905, *ante*, p. 297.

Access to works.

29. The company shall give to the gas referees, and each of them, and each of their clerks, servants, and workmen, access to their works; and shall, when required, afford to them, and each of them, all facilities for the proper execution of their and his duty.

Purity of gas to be prescribed.

30. The gas referees shall from time to time ascertain with what degree of purity the company can reasonably be required to make and supply gas continuously, without occasioning a nuisance to the neighbourhood in which the works are situate, and shall thereupon prescribe and certify the maximum amount of impurity in each form with which gas supplied by the company shall be allowed to be charged, and the time from which the allowance thereof shall be enforced as against the company, regard being had to the necessity for any alteration of works by the company consequent on any such certificate.

See the London Gas Act, 1905, *ante*, p. 295.

Mode and times of testing purity of gas.

31. The gas referees shall from time to time prescribe and certify the mode to be adopted for testing and recording the purity of gas supplied by the company, and the number of the times of testing such purity.

Mode of measuring gas for public lamps.

32. The gas supplied by the company for public lighting shall, if required by either the local authority consuming or the gas company supplying such gas, be supplied by measurement; and the referees shall, if required by either party, from time to time prescribe and certify the mode of ascertaining the quantity of gas consumed by the public lamps.

33. [*Freedom of gas from sulphuretted hydrogen.*]

This section was repealed by s. 19 and schedule of the London Gas Act, 1905. See the substituted provisions contained in ss. 5—7, of that Act, *ante*, p. 297.

Provision of testing places and apparatus.

34. The gas referees shall from time to time prescribe and certify the situation, and number of the testing places, and the apparatus and materials therein, for testing the illuminating power, purity, and pressure of the gas to be provided by the company, one such place at least being prescribed in the city of London, and one or more outside the limits of the said city, and the company shall provide and maintain such testing places, apparatus, and materials accordingly.

So much of this section as relates to the pressure of the gas is repealed by the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880 (43 & 44 Vict. c. clxxxi.), s. 21, and schedule. See p. 338. For the provisions of that Act regarding pressure, see s. 6, *post*, p. 335.

See the provisions of s. 8 of the London Gas Act, 1905, *ante*, p. 297, as to pipes connecting mains with testing places.

Control, etc., of testing places.

35. The prescribed testing places, materials, and apparatus provided by the company shall be under the control and management of the corporation or the Metropolitan Board, according as the same are situate within the city or elsewhere.

Separate testing place for company.

36. The company providing a prescribed testing place may also have a separate testing place in the same building under their own control and management.

37. [*Description of burner for testing illuminating power.*]

This section was repealed by s. 19, and schedule of the London Gas Act, 1905. See the substituted provisions contained in s. 3 of that Act, *ante*, p. 296.

Appointment of gas examiners.

38. The corporation within the city, and the Metropolitan Board elsewhere, shall as soon as may be after the passing of this Act respectively appoint, and shall always keep appointed, a competent and impartial person or persons to be a gas examiner or gas examiners for the several testing places within their respective jurisdictions.

See note to preceding section.

Appointment of chief gas examiner.

39. There shall be a chief gas examiner, being a competent and impartial person, from time to time appointed by and removable by the Board of Trade.

See *R.* v. *London C. C.*, cited *ante*, p. 313.

40. [*Daily testing.*]

41. [*What shall be deemed illuminating power for each day.*]

42. [*Pressure.*]

43. [*Average of testings of purity.*]

44. [*Representation of company.*]

45. [*Daily reports and access to books.*]

46. [*Appeal to chief gas examiner.*]

47. [*Where no appeal, report of examiner final.*]

48. [*Quarterly report of chief gas examiner.*]

49. [*Register of gas made.*]

50. [*Forfeiture for defect of power.*]

51. [*Forfeiture for excess of impurity.*]

52. [*Forfeiture for insufficiency of pressure.*]

53. [*Saving for unavoidable accident, etc.*]

54. [*Evidence of liability to forfeiture.*]

55. [*Forfeiture and losses from fraud, etc.*]

56. [*Recovery, application, and appropriation of forfeiture.*]

These sections (40—56) have been repealed by the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880 (43 & 44 Vict. c. clxxxi.), s. 21, and schedule. Other provisions for the like purposes take their places. See *post*, pp. 338 *et seq.* And see now the provisions of the London Gas Act, 1905, *ante*, p. 297.

ACCOUNTS.

57. [Auditor of Accounts.]

58. [Ascertainment of capital of company.]

59. [Form of accounts.]*

60. [Periodical audit.]

61. [Facilities for auditor, etc.]

62. [Arbitration between parties.]

These sections (57—62) are similar to those in the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.).

MISCELLANEOUS.

63. [Ordinary meetings.]

64. [Power to manufacture products, etc.]

65. [Penalties not to be cumulative.]

Restriction on works affecting post office telegraph system.

66. The company shall not by any work or thing interfere with any telegraph post, wire, apparatus, or work of her Majesty's Postmaster-General, or execute or do any work or thing causing or likely to cause any interruption of or impediment to postal telegraphic communication, unless and until the company have given to the Postmaster-General fourteen days previous notice in writing of their intention to execute or do any work or thing affecting the property of the Postmaster-General, specifying all necessary and proper particulars relating thereto, nor unless and until the Postmaster-General has approved of such proposed work or thing in writing delivered to the company, or has for fourteen days after service of the notice and particulars on him failed to so approve or to disapprove; provided always, that this section shall not be deemed to prevent the company executing any repairs or other works or things which shall be necessary to prevent accidents from the escape of gas or otherwise, and in any such case the company shall forthwith give notice to the Postmaster-General of any such interference, and the reason for the same.

Power for Postmaster-General to annex conditions.

67. Her Majesty's Postmaster-General may annex to his approval under this Act of any work or thing reasonable terms and conditions, and the company shall observe and perform the same; and if any dispute shall arise under this section the same shall be settled by a single arbitrator to be appointed under the provisions of the Railway Companies Arbitration Act, 1859, and in every such case her Majesty's Postmaster-General and the company shall be deemed to be railway companies within the meaning and for the purposes of the last-mentioned Act.

Compensation by company to Postmaster-General and penalty.

68. The company shall from time to time make full compensation to her Majesty's Postmaster-General for any expense, loss, or damage which he is put to or sustains by reason of this company, by any work or thing

---

* See *Leamington Priors Gas Co.* v. *Davis*, cited *ante*, p. 240, and *Marsden* v. *Gaslight and Coke Co.*, Jl. of G. L., December 3rd, 1889, vol. 54, p. 1067.

Sect. 68.

executed or done by them, interfering with any telegraph post, wire, apparatus, or work of the Postmaster-General; and if at any time any such work or thing causes an interruption of or impediment to postal telegraphic communication, the company shall, in addition to making compensation as aforesaid, be liable to forfeit a sum not exceeding twenty pounds for every twenty-four hours during which that interruption or impediment continues, and the amount of any such expense, loss, damage or forfeiture shall be a debt due from the company to the Crown, and be recoverable accordingly with costs, or the same may be recovered with costs on behalf of the Postmaster-General as a penalty is recoverable from the company.

69. [Works not to be commenced without consent of conservators.]

70. [Company not to interfere with bed of Thames except according to plan.]

71. [Not to take materials from river without consent of conservators.]

72. [Lights to be kept burning.]

73. [Board of Trade or conservators may remove abandoned works at expense of company.]

74. [Saving rights of conservators.]

75. [For protection of works of Havering, Dagenham, etc., Commissioners of Sewers.]

76. [Application of part of section 46 of Gaslight and Coke Company's Act, 1868, to lands to be acquired by the company.]

77. [Expenses of Act.]

SCHEDULES REFERRED TO IN THE FOREGOING ACT.

SCHEDULE A.

[*Lands to be used by the Company for Gasworks, etc.*]

SCHEDULE B.

PART I.

Title of Act.	Extent of Repeal.
The City of London Gas Act, 1868.	Sections 25 to 28, both inclusive. Sections 33 to 84, both inclusive. Sections 91 and 92.
The Gaslight and Coke Company's Act, 1868.	So much of section 109 as extends to the above specified sections of the City of London Gas Act, 1868, by this Act repealed, to places beyond the limits of the City of London and liberties thereof.
The Imperial Gas Act, 1869 ...	Sections 21 to 23, both inclusive. Sections 25 to 73, both inclusive.

SCHEDULE B.

PART II.

The Metropolis Gas Act, 1860 ...	Section 2, as far as it incorporates the provisions of "The Gasworks Clauses Act, 1847," with respect to the amount of profit to be received by the undertakers from the gasworks carried on for their benefit, or imposes any restriction on a gas company in respect of the rate of dividend. So much of section 4 as defines the meaning of the words "common gas" and "cannel gas." Sections 7 to 12, both inclusive. Sections 25 to 34, both inclusive. Sections 37 and 38. Sections 40 to 44, both inclusive.

SOUTH METROPOLITAN GASLIGHT AND COKE COMPANY'S ACT, 1876.

(39 & 40 VICT. C. CCXXIX.)

An Act to grant further powers to the South Metropolitan Gaslight and Coke Company. [11th August, 1876.]

This Act being on the same lines as the Acts of the Commercial Company and the Gaslight and Coke Company, it is unnecessary to reproduce the Act here at any length. A very few sections only will therefore be inserted.

Profits of company defined.

6. Except as in this Act provided the profits of the company to be divided among the shareholders in any year shall not exceed the rate of ten pounds per centum per annum (which rate is in this Act referred to as "the standard rate of dividend") on the ordinary share capital or stock of the company authorised by Parliament and paid up and expended on or in connection with the undertaking of the company.

See note to s. 21.

Repeal of certain parts of Act of 1869.

10. Sections 13 and 14, and sections 19 to 66 both inclusive, in the Act of 1869, are hereby repealed.

11 to **20.** These sections relate to additional capital, auction and tender, application of premium and borrowing powers.

Sections 13—16 are repealed by s. 5 of the South Metropolitan Gas Act, 1896 (59 & 60 Vict. c. ccxxvi.), which substitutes other provisions.

21. [*Fixing maximum price of gas, with sliding scale as to dividends.*]

This section fixed the standard price at 3*s.* 6*d.* with the usual sliding scale. By the South Metropolitan Gas Act, 1896 (59 & 60 Vict. c. ccxxvi.), the company obtained power to convert their ordinary stock into a 4 per cent. stock subject to the sliding scale. Section 16 of that Act was as follows:—

Standard price under sliding scale.

> 16. With respect to the decrease and increase of the dividend payable by the company according to increase or decrease in the standard price

NOTE.

of gas supplied by the company the following provision shall have effect in lieu of the provision in that behalf contained in section twenty-one of the Act of 1876 (that is to say):

The company may increase or reduce the price charged by them for gas above or below such standard price subject to a reduction or increase in the standard dividend payable by the company on the ordinary stock as follows:

In respect of any half-year during any part of which the price charged by the company shall have been one penny or part of a penny above the standard price the dividend payable by the company for that half-year shall in respect of each penny or part of a penny by which the standard price shall have been increased be reduced below the standard rate of dividend by one shilling on every hundred pounds of paid-up ordinary stock and so in proportion for any fraction of one hundred pounds;

And in respect of any half-year during the whole of which the price charged by the company shall have been one penny or more below the standard price the dividend payable by the company for that half-year may in respect of each penny by which the price shall have been so reduced below such standard price be increased above the standard rate by one shilling on every hunded pounds of paid-up ordinary stock and so in proportion for any fraction of one hundred pounds;

Provided that if in any half-year the dividend payable shall be a fractional amount less than one quarter per centum the company may defer the payment of such fractional amount until the payment of the next or some succeeding dividend and shall in the discretion of the company either add such fractional amount to and pay the same with such succeeding dividend accordingly or add the same to the reserve fund.

The above section has in its turn been repealed by the South Metropolitan Gas Act of 1900 as from the 1st day of July, 1901. This Act also repealed s. 21 of the Act of 1876, and varied the standard price. See further, *post*, p. 339.

If profits exceed the amount limited, excess may be invested and form an insurance fund.

22. If the clear profits of the undertaking of the company in any year amount to a larger sum than is sufficient to pay the standard rate of dividend, the excess beyond the sum necessary for that purpose may from time to time, to the extent of one per centum per annum upon the paid-up capital of the company, be invested in Government or other securities, and the dividends and interest arising from such securities shall also be invested in the same or like securities in order that the same may accumulate at compound interest until the fund so formed amounts to a sum equal to one-twentieth of the paid-up capital of the company, which sum shall form an insurance fund to meet any extraordinary claim, demand or charge which may at any time arise against or fall upon the company from accident, strikes or other circumstances which, in the opinion of the auditor, due care and management could not have prevented, and if such fund be at any time reduced it may thereafter be again made up to the said sum, and so from time to time as often as such reduction shall happen: Provided that when and so often as the said fund shall reach one-twentieth part of the paid-up capital, the interest thereon shall be carried to the credit of the fund available for dividend: Provided also, that resort may from time to time be had to the insurance fund to meet any extraordinary claim or demand as afore-

Sect. 22.

said, although such fund may not at the time have reached or may have been reduced below the full amount of one-twentieth as aforesaid.

Application of excess of profits over standard rate of dividend.

23. If the clear profits of the undertaking of the company in any year amount to a larger sum than is sufficient to pay the standard rate of dividend on the ordinary share capital or stock of the company, the excess, or such portion of it as is not carried to the insurance fund, shall be carried to the credit of the divisible profits of such undertaking for the next following year.

Power to create a reserve fund out of dividends in excess of the standard rate of dividend, and application thereof.

24. Where in any year the amount of the standard rate of dividend of the company on the ordinary share capital or stock of the company shall by reason of a diminution of the standard price charged by the company in such year be increased, then, out of the amount of the divisible profits of the company applicable to the payment of such increase, the company may in such year set apart such sum as they shall think fit, and all sums (if any) so set apart by the company and the reserve fund existing at the time of commencement of this Act may be invested in Government or other securities, and the dividends and interest arising from such securities may also be invested in the same or the like securities, in order that the same may accumulate at compound interest, and the fund so formed shall be called "the reserve fund," and shall be applicable to the payment of dividend in any year in which the clear profits of the company shall be insufficient to enable the company in such year to pay the standard rate of dividend on the ordinary share capital or stock of the company, and save as in this Act otherwise provided no sum shall in any year be carried by the company to any reserve fund.

As to conversion of borrowed money into capital.

25. The company shall not raise any moneys by this Act or by any other Act of the company authorised to be borrowed on mortgage, or any part of such moneys, by the creation of shares or stock instead of borrowing, or convert into capital the amount borrowed under the provisions of this Act or of any other Act of the company, unless in either case all dividends upon such shares or stock, whether ordinary or preferential, are limited to a rate not exceeding five pounds per centum per annum.

As to the above section, see note to s. 67 of the Commercial Gas Act, 1875 (38 & 39 Vict. c. cc.), *ante*, p. 316.

26. [*Illuminating power.*]

This section was repealed by s. 19 of the London Gas Act, 1905. See the substituted provisions in s. 4 of that Act, *ante*, p. 296.

Sections 27—33 (relating to pressure, mode and times of testing for illuminating power, and of testing purity of gas, testing places, and other matters) are substantially the same as ss. 26—32 in the Gaslight and Coke Company Act, 1876 (39 & 40 Vict. c. ccxxv.). Section 34 (freedom of gas from sulphuretted hydrogen) was repealed by s. 19 of the London Gas Act, 1905, and the provisions of s. 6 of that Act were substituted therefor. Section 35 corresponds to s. 34 of the Gaslight and Coke Company's Act of 1876. See that section, *ante*, p. 326, and s. 8 of the London Gas Act, 1905, referred to thereunder. Sections 36 and 37 correspond to ss. 35 and 36 of the Gaslight and Coke Company's Act, 1876, *ante*, p. 327. Section 38 was repealed by s. 19

NOTE.

of the London Gas Act, 1905, s. 3 whereof contains substituted provisions. Sections 39 and 40 correspond to ss. 38 and 39 of the Gaslight and Coke Company's Act, 1876, *ante*, p. 327. So much of ss. 28 and 35 as relates to the pressure of the gas is repealed by the Act of 1880, s. 21. See pp. 338 *et seq.*

Sections 41 to 56, repealed by the Act of 1880, are similar to those repealed by that Act in the Acts of the other two companies.

See the South Metropolitan Gas Act, 1900, *post*, p. 339.

GASLIGHT AND COKE AND OTHER GAS COMPANIES ACTS AMENDMENT ACT, 1880.

(43 & 44 VICT. C. CLXXXI.)

An Act to make further Provision for regulating the Supply of Gas by the Gaslight and Coke Company, the Commercial Gas Company, and the South Metropolitan Gas Company, and to amend the Acts relating to the said Companies. [26th August, 1880.]

WHEREAS by the Gaslight and Coke Company Act, 1876, the Commercial Gas Act, 1875, and the South Metropolitan Gaslight and Coke Company's Act, 1876, further provisions were made for regulating the supply of gas within the limits within which the said companies were respectively authorised to supply gas, and the said companies were respectively made liable in certain cases to the forfeitures fixed by the said Acts respectively:

39 & 40 Vict. c. ccxxv.
38 & 39 Vict c. cc.
39 & 40 Vict. c. ccxxix.

And whereas it is expedient to amend the provisions of the said Acts respectively with respect to the testing of the gas supplied by the said companies respectively, and with respect to such forfeitures as aforesaid, and in other respects as by this Act provided:

And whereas the objects aforesaid cannot be effected without the authority of Parliament:

May it therefore please your Majesty that it may be enacted, and be it enacted by the Queen's most excellent Majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in this present Parliament assembled, and by the authority of the same, as follows; (that is to say,)

Short title.

1. This Act may be cited for all purposes as the Gaslight and Coke and other Gas Companies Acts Amendment Act, 1880.

This Act, as amended by the London Gas Act, 1905, and the last-mentioned Act are to be read and construed together as one Act (see s. 2 of the London Gas Act, 1905, *ante*, p. 296).

Sect. 2.

Interpretation of expressions.

2. In this Act—

The expression "the city" means the city of London and the liberties thereof:

The expression "the corporation" means the mayor, aldermen and commons of the city of London in common council assembled:

The expression "the Metropolitan Board" means the Metropolitan Board of Works*:

The expression "the special Act," in relation to any of the companies to which this Act applies, means and includes any and every Act of Parliament relating exclusively to such company, and so much of any and every other Act of Parliament as affects such company:

The expression "the district" in relation to any of the companies to which this Act applies, means the area within the limits of this Act in which such company is for the time being authorised to supply gas:

The expression "testing place" shall mean a testing place prescribed and certified by the gas referees:

The expression "the controlling authority," in relation to any place in the city, means the corporation, and in relation to any other place within the limits of this Act means the Metropolitan Board.

Limit of Act. 18 & 19 Vict. c. 120.

3. This Act shall not be in force in any place beyond the limits of the metropolis as such limits are defined by the Metropolis Management Act, 1855.

Application of Act.

4. This Act shall extend and apply to the companies following; (that is to say,)

The Gaslight and Coke Company;

The Commercial Gas Company; and

The South Metropolitan Gas Company;

and throughout the districts of the said companies, and for the purposes of its application throughout any one of such districts the expression "the company" shall be construed to mean such one of the said companies as is for the time being authorised to supply gas in such district, and the expression "the gas referees," "the chief gas examiner," and "gas examiner" shall respectively have the meanings assigned to the same expressions in the special Act of such company, and the special Act of such company, as amended by this Act, and this Act, shall be construed together as one Act.

---

* The duties, etc., of this board are now transferred to the London County Council. See footnote at p. 310.

Power to gas referees to visit testing places.

5. The gas referees shall from time to time, after giving notice to the controlling authority, visit the testing places and examine the apparatus for the purposes of ascertaining that it is kept in good and proper repair and working order.

Mode and times of testing pressure of gas.

6. The gas referees shall from time to time prescribe and certify the mode to be adopted for testing and recording the pressure at which gas is supplied by the company, and a gas examiner shall, in the mode so prescribed, test the pressure at which gas is supplied at such hour and in such street or part of a street as the controlling authority may from time to time by an order in writing appoint, and within three days of the receipt of such order.

Daily testing for illuminating power and purity.

7. A gas examiner shall at each testing place make daily such number of tests as the gas referees may prescribe for ascertaining whether, during the whole of each day, the illuminating power and purity of the gas supplied at such testing place by the company are such as are respectively prescribed under the special Act: Provided that the test for illuminating power shall be taken at intervals of not less than one hour.

And in the event of the gas being ascertained to be defective in any such particular, such examiner shall forthwith give notice thereof to the company.

"Daily" includes Sundays (*London C. C.* v. *South Metropolitan Gas Co.*, [1904] 1 Ch. 76), but see now as to testings the provisions of ss. 5 and 10 of the London Gas Act, 1905, *ante*, pp. 297, 298.

What shall be deemed illuminating power for each day.

8. The average of all the testings at any testing place on each day of the illuminating power of the gas supplied by the company at such testing place shall be deemed to represent the illuminating power of such gas on that day at such testing place.

See now hereon the provisions of s. 4 (3) of the London Gas Act, 1905, *ante*, p. 297.

Average of testings of purity.

9. The average of all the testings at any testing place on any day of the purity of the gas supplied by the company at such testing place shall be deemed to represent the purity of such gas on that day at such testing place.

Provided always, that if on any one day the gas supplied by the company at such testing place is of less purity than it ought to be under the special Act, the average of all the testings made at such testing place on that day and on the preceding and on the following day shall be deemed to represent the purity of such gas on such one day at such testing place.

Company may be represented at testings.

10. The company may, if they think fit, on each occasion of the testing at any testing place of the illuminating power, purity, and pressure of the gas supplied by them, be represented by some officer, but such officer shall not interfere in the testing, and the controlling authority shall state at what times it is proposed to make such testings on any particular day upon receiving a request in writing from the company in the forenoon of the previous day.

Daily reports and access to books.

11. Each gas examiner shall on each day make and deliver a report of the result of the testings of the gas supplied by the company conducted by him on the immediately preceding day to the controlling authority, to the gas referees, to the chief gas examiner, and to the company, and the books kept by a gas examiner for recording the results of the testing of such gas by him shall be open at all reasonable times to the inspection of the company without payment.

12. [*Appeal to chief gas examiner.*]

The above section was repealed by s. 11 of the London Gas Act, 1905. See now ss. 9, 11, 12, 13, 17, and 18 of that Act, *ante*, pp. 298—300.

It was under the repealed section held that the chief gas examiner had a discretion as to whether he would or would not hear counsel upon an appeal to him, and a *mandamus* to compel him to hear counsel was refused (*R.* v. *Williamson* (1890), 59 L. J. Q. B. 493).

It was also held that the section required the chief gas examiner to hear both sides before deciding. Where the chief gas examiner took evidence without notice to the company, his determination and report were quashed by *certiorari*, though both parties had previously concurred in this mode of acting (*R.* v. *London C. C.*, *Ex parte Commercial Gas Co.* (1895), 11 T. L. R. 337).

See now hereon the provisions of s. 13 of the London Gas Act, 1905, *ante*, p. 299.

Quarterly report of chief gas examiner.

13. Within one week after the end of each quarter of a year the chief gas examiner shall make a report to the controlling authority and to the company on the results of the daily testings made in that quarter, and shall state therein with respect to gas supplied by the company in that quarter—

(1.) The illuminating power on each day at each testing place.

(2.) The amount of impurity in each form on each day at each testing place.

(3.) The results of each testing of pressure.

Forfeiture for defect of power.

14. If on any day the gas supplied by the company at any testing place is of less illuminating power than it ought to be under the special Act, the company shall be liable to the following forfeitures:

For the first half of a candle of defective power, forty shillings; and

For the first and every subsequent candle of defective power, a sum not less than twenty-five pounds, and not exceeding one hundred pounds, having regard to the relative quantities of gas manufactured by the respective companies.

Provided always, that the controlling authority of any testing place, having recovered one forfeiture in respect of defective illuminating power in the gas supplied by the company at one testing place on any day, shall not be entitled to any further forfeiture in respect of defective illuminating power in the gas supplied by the company at any other testing place of such controlling authority on the same day.

See now the provisions of s. 12 of the London Gas Act, 1905, *ante*, p. 299.

Forfeiture for excess of impurity.

15. If on any day the gas supplied by the company at any testing place is of less purity than it ought to be, the company shall forfeit a sum not exceeding fifty pounds for each occasion on which they are so in default.

Provided always, that the controlling authority of any testing place, having recovered one forfeiture in respect of excess of impurity in the gas supplied by the company at one testing place on any day, shall not be entitled to any further forfeiture in respect of excess of impurity in the gas supplied by the company at any other testing place of such controlling authority on the same day; and provided also, that the average of the testings made at such testing place on that day and on the preceding and on the following day shall be deemed to represent the purity of such gas on such one day at such testing place.

See now the provisions of ss. 6 and 7 of the London Gas Act, 1905, *ante*, p. 297.

Forfeiture for insufficiency of pressure.

16. If at any time during any period between midnight and sunset, or during any period between sunset and midnight, the gas supplied by the company is supplied at a pressure less than it ought to be under the special Act, the company shall in each case forfeit a sum not exceeding ten pounds.

Provided always, that the controlling authority, having recovered one forfeiture in respect of insufficiency of pressure in the gas supplied by the company during any period of twenty-four hours, shall not be entitled to any further forfeiture in respect of insufficiency of pressure in the gas supplied by the company during the same period.

See now the provisions of ss. 7 and 15 of the London Gas Act, 1905, *ante*, pp. 297, 299.

Saving for unavoidable accident.

17. No forfeiture shall be incurred in any case with respect to which it is certified by the chief gas examiner that the defect of illuminating power, excess of impurity, or insufficiency of pressure was occasioned by an unavoidable cause or accident.

See now the provisions of ss. 7 and 15 of the London Gas Act, 1905, *ante*, pp. 297, 299.

18. *Evidence of liability to forfeiture.*

This section was repealed by s. 14 of the London Gas Act, 1905. See now the provisions of ss. 14 and 16 of that Act, *ante*, pp. 299, 300.

Forfeiture and losses from fraud, etc.

19. Every such forfeiture, and any loss arising from fraud of the servants of the company, which the auditor (appointed as in the special Act provided) shall certify has arisen from want of due diligence on the part of the directors, shall be borne and paid to the satisfaction of such auditor exclusively by and out of the divisible profits of the company, and by way of reduction of dividend.

Recovery of forfeitures, etc.
23 & 24 Vict. c. 125.

20. Every forfeiture imposed by this Act shall be recovered, applied, and appropriated in the manner provided by sections forty-six and fifty-three of the Metropolis Gas Act, 1860, and the said sections shall be read and construed as applying to forfeitures and the recovery thereof,

Sect. 20. and otherwise in relation thereto under this Act, as if such forfeitures were penalties under the Metropolis Gas Act, 1860.

See the sections here referred to, *ante*, pp. 285, 290.

Repeal of Acts to the extent specified in schedule.

21. From and after the passing of this Act, the Acts specified in the first column of the schedule to this Act annexed shall, within the limits of this Act, be, and the same are hereby, repealed to the extent specified in the second column of that schedule. Provided that this repeal shall not affect—

(a) The past operation of any enactment hereby repealed, nor anything done or suffered under any enactment hereby repealed;

(b) Any right, privilege, obligation, or liability acquired, accrued, or incurred under any enactment hereby repealed;

(c) Any penalty, forfeiture, or punishment incurred in respect of any offence or default committed against any enactment hereby repealed; nor

(d) Any investigation, legal proceeding, or remedy in respect of any such right, privilege, obligation, liability, penalty, forfeiture, or punishment as aforesaid, and any such investigation, legal proceeding, and remedy may be carried on as if this Act had not passed.

Expenses of Act.

22. All costs, charges, and expenses preliminary to and of and incidental to the preparing of, obtaining, and passing of this Act shall be paid by the corporation out of their corporate funds, and by the Metropolitan Board as expenses incurred by them in the execution of the Metropolis Management Act, 1855, in such proportions as the Board of Trade may by writing, signed by a secretary or an assistant secretary of the said Board, order and direct.

For Metropolitan Board read now the London County Council. See footnote at p. 310.

SCHEDULE SETTING FORTH THE ENACTMENTS REPEALED BY THE FOREGOING ACT.

Acts.	Extent of Repeal.
The Gaslight and Coke Company Act, 1876.	So much of sections 27 and 34 as relates to the pressure of gas; and Sections 40 to 56, both inclusive.
The Commercial Gas Act, 1875.	In section 32, the following words "one such place being prescribed for every station from which gas is supplied in the district supplied from such station," and so much of the said section and of section 26 as relates to the pressure of the gas; and Sections 37 to 51, both inclusive.
The South Metropolitan Gaslight and Coke Company's Act, 1876.	So much of sections 28 and 35 as relates to the pressure of the gas; and Sections 41 to 56, both inclusive.

SOUTH METROPOLITAN GAS ACT, 1900.

(63 & 64 VICT. C. CLXII.)

*　　*　　*　　*　　*

PART II.

ILLUMINATING POWER AND SLIDING SCALE.

Varying standard price.

5.—(1.) On and after the first day of July one thousand nine hundred and one the prescribed illuminating power of the gas supplied by the Company shall be fifteen candles and the standard price of such gas shall be three shillings and two pence. And on and after the first day of July one thousand nine hundred and five the prescribed illuminating power of the gas supplied by the Company shall be fourteen candles and the standard price of such gas shall be three shillings and one penny. Provided nevertheless that if the Company shall desire to accelerate the reduction of the illuminating power of the said gas hereby authorised from fifteen candles to fourteen candles they shall be at liberty to do so from any first day of January or first day of July giving three months previous notice in writing of their intention to the London County Council and to the town clerks of the several metropolitan borough councils in the district of supply of the Company and by advertisement in one London daily newspaper and in one newspaper circulating in the said district and in that case the reduction of such illuminating power and standard price shall take place on and from the first day of January or the first day of July named in such notice.

See s. 4 of the London Gas Act, 1905, *ante*, p. 296.

(2.) With respect to the decrease and increase of the dividend payable by the Company according to increase or decrease in the price of gas supplied by the Company the following provision shall have effect in lieu of the provision in that behalf contained in section sixteen of the Act of 1896 (that is to say):

The price charged by the Company for gas of any illuminating power in this section mentioned may be increased above or reduced below the standard price chargeable for gas of the same illuminating power subject to a reduction or increase in the standard dividend payable by the Company on the ordinary stock as follows:

In respect of any half-year during any part of which the price charged by the Company shall have been one penny or part of a penny above such standard price the dividend payable by the Company for that half-year shall in respect of each penny or part of a penny by which such standard price shall have

Sect. 5.

been increased be reduced below the standard rate of dividend by one shilling and four pence on every hundred pounds of paid-up ordinary stock and so in proportion for any fraction of one hundred pounds;

And in respect of any half-year during the whole of which the price charged by the Company shall have been one penny or more below such standard price the dividend payable by the Company for that half-year may in respect of each penny by which the price shall have been so reduced below such standard price be increased above the standard rate by one shilling and four pence on every hundred pounds of paid-up ordinary stock and so in proportion for any fraction of one hundred pounds:

Provided that in any half-year the dividend payable shall be a fractional amount less than one quarter per centum the Company may defer the payment of such fractional amount until the payment of the next or some succeeding dividend and shall in the discretion of the Company either add such fractional amount to and pay the same with such succeeding dividend accordingly or add the same to the reserve fund.

(3.) Section twenty-one (fixing maximum price of gas with sliding scale as to dividend) of the Act of 1876 and section sixteen (standard price under sliding scale) of the Act of 1896 shall be repealed as from the first day of July one thousand nine hundred and one.

6. [*Description of burner for testing illuminating power.*]

This section was repealed by s. 19 and schedule of the London Gas Act, 1905. See the substituted provisions contained in s. 3 of that Act, *ante*, p. 296.

Company to supply suitable burners gratis in lieu of those in use.

7. The Company shall at any time within two years after the first day of July one thousand nine hundred and one if and when required by the consumers of the gas supplied by the Company other than consumers by slot meters supply to them and fix free of charge a sufficient number of burners suitable in all respects for the consumption of gas of the illuminating power prescribed by this Act. The Company shall also as soon as reasonably practicable after the said first day of July one thousand nine hundred and one and at the latest within the period of twelve months thereafter exchange the burners used by consumers of gas supplied by the Company by means of slot meters for burners similarly suitable for the consumption of gas of the illuminating power prescribed by this Act.

Notice of the provisions of this section shall be given on each demand note of the Company sent out during the said period.

* * * * *

PART IV.

MISCELLANEOUS.

Form of accounts of company.

27. The accounts of the Company shall show the amount of the capital of the Company including both ordinary and debenture stock

Sect. 72.

and the premiums thereon from time to time in cash actually raised and expended and the nominal amount of ordinary capital and debenture stock for the time being on which dividend and interest respectively are payable by the Company. The difference between the total amount of money actually raised and the total nominal amount of share and loan capital shall represent the nominal amount added by conversion in accordance with the form set forth in the schedule to this Act.

* * * * *

COMMERCIAL GAS ACT, 1902.

(2 EDW. 7, c. CXXXIV.)

An Act to convert the capital stocks and debenture stock of the Commercial Gas Company into stocks of other nominal amounts but yielding equivalent amounts of dividend or interest and to empower that Company to raise additional capital to amend the Acts relating to the Company and for other purposes. [22nd July, 1902.]

1. This Act may be cited as the Commercial Gas Act 1902. *Short title.*

2. The provisions of the Companies Clauses Consolidation Act 1845 with respect to the consolidation of the shares into stock Part III. (relating to debenture stock) of the Companies Clauses Act 1863 as amended by subsequent Acts and the Lands Clauses Acts except the provisions of the Lands Clauses Consolidation Act 1845 with respect to the purchase and taking of lands otherwise than by agreement are (except where varied by this Act) incorporated with and form part of this Act. *Incorporation of Acts.*

3. In this Act the several words and expressions to which meanings are assigned by the Acts wholly or partially incorporated herewith have the same respective meanings unless there be something in the subject or context repugnant to such construction. *Interpretation.*

4. [Recovery of demands under fifty pounds.]

5.—(1) As on and from the first day of January one thousand nine hundred and three the Company's ten per centum stock amounting to five hundred and fifty thousand pounds shall be by this Act and is hereby converted into one stock to be called "four per centum capital stock" of the nominal amount of one million three hundred and seventy-five thousand pounds and such four per centum capital stock shall belong to and be divided among the persons who are immediately before the said first day of January one thousand nine hundred and three entitled to be the holders of the ten per centum stock in the proportion of two hundred and fifty pounds of four per centum capital stock for every one hundred pounds of ten per centum stock and so in proportion for any greater or lesser amount of ten per centum stock. *Conversion of capital stocks.*

Sect. 5.

(2) The four per centum capital stock shall as from the said first day of January one thousand nine hundred and three be entitled to a uniform dividend of four per centum per annum subject to decrease or increase as by this Act provided.

(3) As on and from the said first day of January one thousand nine hundred and three the Company's seven per centum stock issued before the passing of this Act and amounting to two hundred and fifty-one thousand eight hundred and seventy-five pounds shall be by this Act and is hereby converted into one stock to be called "three and a half per centum capital stock" of the nominal amount of five hundred and three thousand seven hundred and fifty pounds and such three and a half per centum capital stock shall belong to and be divided among the persons who are immediately before the said first day of January one thousand nine hundred and three entitled to be holders of the seven per centum stock in the proportion of two hundred pounds of three and a half per centum capital stock for every one hundred pounds of seven per centum stock and so in proportion for every greater or lesser amount of seven per centum stock.

(4) The Company's existing and unexercised power to create and issue seven per centum stock to the amount of twenty-eight thousand one hundred and twenty-five pounds shall as from the passing of this Act be deemed to be a power to create and issue and the Company may create and issue accordingly three and a half per centum capital stock to the amount of fifty-six thousand two hundred and fifty pounds which when issued shall in all respects and for all purposes whatsoever form one stock with the three and a half per centum capital stock into which the seven per centum stock is by this Act converted as aforesaid. Except to the extent of the increase in this subsection provided for nothing in this Act shall be construed as authorising any increase of nominal share capital of the company.

(5) The company shall rateably with and after the issue of any part of the said fifty-six thousand two hundred and fifty pounds three and a half per centum capital stock and before issuing any further amount of the last-mentioned stock issue such an amount of the three per centum debenture stock hereinafter referred to for the time being remaining unissued that the nominal amount of three per centum debenture stock issued after the passing of this Act shall be equal to four fifths of the nominal amount of three and a half per centum capital stock theretofore issued after the passing of this Act and the Company shall not at any time after the first issue of such last-mentioned stock after the passing of this Act issue any further amount of the same stock until they have obtained from a justice of the peace a certificate that they have after the passing of this Act issued an amount of three per centum debenture stock equal to four fifths of the nominal amount of three and a half per centum capital stock issued after the passing of this Act and on production to such justice of the books of the company and of such other (if any) evidence as may be necessary to prove compliance with the tenor of such certificate

such justice is hereby authorised and required to give such certificate under his hand.

Sect. 5.

(6) The three and a half per centum capital stock shall as from the said first day of January one thousand nine hundred and three be entitled to a uniform dividend of three and a half per centum per annum subject to decrease or increase as by this Act provided.

(7) For the purposes of the provisions of the Companies Clauses Consolidation Act 1845 incorporated herewith the four per centum capital stock and the three and a half per centum capital stock shall respectively be deemed to have been formed by the consolidation of shares into stock.

(8) Nothing in this Act shall be deemed to authorise the Company to alter the amount of the insurance fund they are immediately before the passing of this Act authorised to form.

(9) Nothing in this Act shall take away abridge or prejudicially affect any preferential right of the holders of stock of the Company representing the preferential shares in the capital of that Company mentioned in section 55 of the Act of 1852.

Conversion of debenture stock.

6.—(1) As on and from the first day of January one thousand nine hundred and three the Company's existing debenture stock issued before the passing of this Act and amounting to two hundred and seventy-one thousand eight hundred and seventy-five pounds shall be by this Act and is hereby converted into one stock to be called "three per centum debenture stock" of the nominal amount of four hundred and seven thousand eight hundred and twelve pounds ten shillings and such three per centum debenture stock shall belong to and be divided among the persons who are immediately before the said first day of January one thousand nine hundred and three entitled to be the holders of the existing four and a half per centum debenture stock in the proportion of one hundred and fifty pounds of three per centum debenture stock for every one hundred pounds of four and a half per centum debenture stock and so in proportion for any greater or lesser amount of four and a half per centum debenture stock.

(2) The three per centum debenture stock shall as from the said first day of January one thousand nine hundred and three be entitled to and bear interest at the uniform rate of three pounds per centum per annum.

(3) The Company's existing and unexercised power to create and issue debenture stock to the amount of twenty-eight thousand one hundred and twenty-five pounds shall as from the passing of this Act be deemed to be a power to create and issue and the Company may create and issue accordingly three pounds per centum debenture stock to the amount of forty-two thousand one hundred and eighty-seven pounds ten shillings which when issued shall in all respects and for all purposes whatsoever form one debenture stock with the three per centum debenture stock into which the Company's existing debenture stock heretofore issued is by

Sect. 6. this Act converted as aforesaid Provided that the Company shall issue the said forty-two thousand one hundred and eighty-seven pounds ten shillings three per centum debenture stock rateably with but after the three and a half per centum capital stock of the nominal amount of fifty-six thousand two hundred and fifty pounds hereinbefore referred to and so that the Company shall from time to time before issuing any part or further part as the case may be of the last-mentioned debenture stock have issued an amount or a further amount as the case may be of the last-mentioned capital stock bearing to such part or further part of the said three pounds per centum debenture stock the proportion of four to three and the Company before issuing any part or further part of the said three per centum debenture stock shall obtain from a justice of the peace a certificate that the amount of the said capital stock has been issued after the passing of this Act which entitles the Company to issue a specified amount or further amount (as the case may be) of the said three per centum debenture stock and on production to such justice of the books of the Company and of such further evidence (if any) as may be necessary to prove the Company to be entitled to a certificate of the tenor aforesaid such justice is hereby authorised and required to give such certificate as aforesaid under his hand.

7. [Company to register new capital and debenture stocks in lieu of existing stocks in names of persons entitled.]

8. [Stocks appropriated by Act to be held on trusts affecting stocks for which same substituted.]

9. [Holders of new stocks to have subject to this Act same rights and liabilities as regards new stocks as they have in regard to old stocks.]

10. [Stocks to be transferable only in amounts of five pounds and multiples thereof.]

11. [How company may deal with fractional parts of five pounds of stock.]

Varying illuminating power, standard price and dividend.

12.—(1) On and after the first day of January one thousand nine hundred and three the prescribed illuminating power of the gas supplied by the Company shall be fourteen candles and the standard price of such gas shall be three shillings and threepence.

Temporary provision was made by the Commercial Gas Act, 1903, as to the burner for testing the illuminating power; but see now the London Gas Act, 1905, *ante*, p. 295, which repealed the Commercial Gas Act, 1903.

(2) With respect to the decrease and increase of the dividend payable by the Company according to increase or decrease in the price of gas supplied by the Company the following provision shall have effect in lieu of the provision in that behalf contained in section 53 of the Act of 1875 (that is to say):

The price charged by the Company for gas of the illuminating power in this section mentioned may be increased above or reduced below the standard price chargeable for such gas subject to a reduction or increase in the standard dividend payable by the Company on the capital stock as follows :—

In respect of any half year during any part of which the price charged by the Company shall have been one penny or part of a penny above such standard price the dividend payable by the Company for that half year shall in respect of each penny or part of a penny by which such standard price shall have been increased be reduced below the standard rate of dividend by one shilling and fourpence on every one hundred pounds four per centum capital stock and so in proportion for any fraction of one hundred pounds of that stock and by one shilling and eightpence on every one hundred pounds of three and a half per centum capital stock and so in proportion for any fraction of one hundred pounds of the last-mentioned stock ;

And in respect of any half year during the whole of which the price charged by the Company shall have been one penny or more below such standard price the dividend payable by the Company for that half year may in respect of each penny by which the price shall have been so reduced below such standard price be increased above the standard rate by one shilling and fourpence on every one hundred pounds of four per centum capital stock and so in proportion for any fraction of one hundred pounds of that stock and by one shilling and eightpence on every one hundred pounds of three and a half per centum capital stock and so in proportion for every fraction of one hundred pounds of the last-mentioned stock :

Provided that if in any half year the dividend payable shall be a fractional amount less than one quarter per centum the Company may defer the payment of such fractional amount until the payment of the next or some succeeding dividend and shall in the discretion of the Company either add such fractional amount to and pay the same with such succeeding dividend accordingly or add the same to the reserve fund.

(3) Section 53 (Fixing maximum price of gas with sliding scale as to dividend) of the Act of 1875 shall be repealed as from the first day of January one thousand nine hundred and three.

Company to supply suitable burners gratis in lieu of those in use.

13. The Company shall at any time within two years after the first day of July one thousand nine hundred and three if and when required by the consumers of the gas supplied by the Company other than consumers by slot meters supply to them and fix free of charge a sufficient number of burners suitable in all respects for the consumption of gas of the illuminating power prescribed by this Act. The Company shall also as soon as reasonably practicable after the said first day of July one thousand nine hundred and three and at the latest within the period of twelve months thereafter exchange the burners used by consumers of

Sect. 13. gas supplied by the Company by means of slot meters for burners similarly suitable for the consumption of gas of the illuminating power prescribed by this Act.

Notice of the provisions of this section shall be given on each demand note of the Company sent out during the said period.

14. [Power to apply and raise additional capital.]

15. [Sale of unissued stock.]

16. [Purchase money of capital sold to be paid within three months.]

17. [Notice to be given as to sale of stock.]

18. [Stock not sold by auction or by tender to be offered to holders of capital stock.]

19. [Application of premium arising on issue of stock.]

20. [Power to borrow.]

21. [Priority of money raised by debenture stock over debts.]

22. [Application of moneys.]

23. [Persons in employ of Company may nominate others to transfer stock etc. held by such persons.]

24. [Agreements for acquisition by employees of an interest in profits of Company.]

25. [Power to purchase lands by agreement. Gas not to be manufactured on lands so purchased.]

26. [Restriction on taking houses of labouring class.]

27. [Power to sell or lease lands.]

28. [As to meetings of Company closing transfer books and voting.]

29. [Increasing qualification of directors and auditors.]

30. [Expenses of Act.]

GAS LIGHT AND COKE COMPANY'S ACT, 1903.

(3 EDW. 7, c. XLI.)

An Act to enable the Gas Light and Coke Company to raise additional moneys and to purchase take and hold lands and for altering the standard price of gas and redeeming capital and for other purposes.

[30th June, 1903.]

1. This Act may be cited as the Gas Light and Coke Company's Act 1903.

2. There shall be incorporated with and form part of this Act— Sect. 2.

(A) The Lands Clauses Acts except the provisions thereof with respect to the purchase and taking of lands otherwise than by agreement :

(B) The Companies Clauses Act 1863 Part III. (except sections 32 34 and 35 thereof) :

(C) The Companies Clauses Act 1869 (except sections 5 6 7 and 8 thereof).

The said incorporated provisions of the last-named two Acts shall be applicable and apply as though this Act authorised the money which the Company is by this Act empowered to raise by the creation and issue of debenture stock to be raised on mortgage or bond.

3. Words defined in the Acts incorporated with this Act shall have the same meaning in this Act and words defined in the Gas Light and Coke Company's (Capital Consolidation) Act 1898 shall have the same meaning in this Act.

4. The Company is hereby authorised to create and issue debenture stock not exceeding the nominal amount of seven hundred and fifty thousand pounds.

5.—(A) Whenever any debenture stock is to be issued under this Act and before the same is issued the Company shall offer the same for sale by public auction or tender in such manner at such times and subject to such conditions and terms of sale as the Company shall from time to time determine.

(B) The Company shall at any such sale put such a reserved price upon the stock offered for sale as in the judgment of the Company ought to be the least price which the stock should realise at such sale and at which the Company is willing to sell the same and notice of the amount of such reserved price shall be sent by the Company in a sealed letter to the Board of Trade not less than twenty-four hours before the day of auction or the last day for the reception of tenders (as the case may be) and such letter may be opened after such day of auction or last day for the reception of tenders and not sooner.

(C) The intention to sell any such stock by auction or by tender shall be communicated in writing to the town clerk of the city of London to the clerk of the London County Council and to the Secretary of the Committee of the London Stock Exchange at least ten days before the day of auction or the last day for the reception of tenders (as the case may be) and notice of such intention shall be publicly advertised three times during the same period in two or more London daily newspapers having a good circulation of which the Times shall be one.

(D) Any sum of money which shall arise from the sale and issue of the said stock by way of premium after deduction therefrom of the expenses of and incident to such sale and issue shall not be considered as profits of the Company.

Sect. 5.

(E) No stock shall be sold or issued otherwise than to a purchaser at such a sale by auction or by tender as aforesaid but the Company may sell any stock unsold at any one such sale by auction or tender at any subsequent sale or sales by auction or tender conducted under the conditions aforesaid and at a price either equal to or above the reserved price fixed in the manner aforesaid for such subsequent sale.

(F) Holders of the Company's capital or debenture stock shall not as such be entitled to any preference or priority as regards tendering for or purchasing any stock by this Act authorised.

6. All moneys to arise from the sale and issue of debenture stock authorised by this Act shall be applied by the Company for the purposes of its undertaking to which capital is properly applicable.

7.—(1) The debenture stock authorised by this Act to be created and issued shall be known as the second three per centum debenture stock and shall bear interest at the rate of three per centum per annum and shall rank next after the Company's three per centum consolidated debenture stock both as regards capital and as regards interest.

(2) All debenture stock created or authorised by or issued under this Act or any Act hereafter made and passed and the interest on such debenture stock shall (subject to the provisions of any Act hereafter made and passed) rank pari passu (without any regard to the dates of the securities for the same or of the Acts of Parliament or resolutions by which such stock is authorised) and have priority over all principal moneys and the interest thereon secured by mortgage bond or debenture hereafter made entered into or authorised.

8. [*Alteration of standard price and sliding scale as to dividend.*]

This section was repealed by s. 34 of the Gas Light and Coke Company's Act, 1909 (9 Edw. 7, c. lxxxvii.); see that section, *post*, p. 353.

9.—(1) Before the Company shall be entitled to or shall in respect of any calendar year after the calendar year one thousand nine hundred and three distribute—

(A) An increased dividend in excess of the standard dividend the Company shall out of the divisible profits in excess of the amount needed to provide the standard dividend for the year and before distributing any increased dividend set aside a sum up to and not exceeding ten thousand pounds and after setting aside the said sum of ten thousand pounds may distribute by way of addition to the standard dividend an increased dividend up to six shillings and eightpence per centum; or

(B) An increased dividend in excess of four pounds six shillings and eightpence per centum the Company shall out of the divisible profits aforesaid and before distributing any dividend in excess of the last-named sum per centum set aside a sum up to and not exceeding twenty thousand pounds and after setting aside the said sum of twenty thousand pounds may distribute by way of addition to the standard dividend an increased dividend up to thirteen shillings and fourpence per centum ; or

(c) An increased dividend in excees of four pounds thirteen shillings and fourpence per centum the Company shall out of the divisible profits aforesaid and before distributing any dividend in excess of the last-named sum per centum set aside a sum up to and not exceeding thirty thousand pounds and after setting aside the said sum of thirty thousand pounds may distribute by way of addition to the standard dividend an increased dividend up to one pound per centum ; or

(d) An increased dividend in excess of five pounds per centum the Company shall out of the divisible profits aforesaid and before distributing any dividend in excess of the last-named sum per centum set aside a sum up to and not exceeding forty thousand pounds :

And the several sums so from time to time set aside as aforesaid shall be and form a redemption fund :

Provided always that nothing in this section shall authorise the company at any time to distribute any dividend in excess of the authorised dividend and that for the purpose only of calculating the amount distributed in accordance with this proviso the amount set aside as redemption fund shall be assumed to have been distributed by way of dividend.

(2) "Divisible profits" in this section mean the whole amount of the Company's clear profits (inclusive of profits carried to the credit of divisible profits from any preceding year) available for distribution in dividends to the Company's capital stockholders in respect of any calendar year.

(3) The Company shall not in respect of any one calendar year distribute to the holders of ordinary stock of the Company dividends to an amount exceeding four pounds per centum upon the total nominal amount of such ordinary stock for the time being continuing to subsist without making such provision for the redemption of ordinary stock as is by this Act provided for.

(4) Subject as aforesaid the Company may apply the divisible profits in any manner in which but for this Act they can for the time being apply the same.

(5) The Company shall apply the said redemption fund during the year following that in respect of which it is set aside in purchasing in the open market ordinary stock of the Company which stock is upon the completion of every purchase thereof to be cancelled and shall thenceforth be and be taken to be extinguished.

(6) This section shall not come into operation before the year one thousand nine hundred and four nor in regard to the dividends distributed in respect of the year one thousand nine hundred and three.

Sect. 9.

(7) In order that the price of the Company's gas may be kept down as much as the profits admit of it shall not be obligatory on the Company to set aside during the continuance of this section out of revenue any sums for the purpose of or with regard to the extinction redemption or writing off of obsolete capital.

(8) This section shall cease to operate when the company have by means of the redemption fund aforesaid purchased and extinguished ordinary stock of the Company to the nominal amount of one million pounds and a certificate under the hand of the President of the Board of Trade for the time being shall be conclusive evidence of the total amount of the Company's ordinary stock from time to time purchased and extinguished by means of the said redemption fund.

By s. 36 of the Company's Act of 1909, *post*, p. 356, it was provided that for the purposes of s. 9, *supra*, the average of the two half-yearly dividends which the Company shall in any calendar year in accordance with the provisions of the Act of 1909 be entitled to or shall distribute shall be deemed to be the dividend which they shall be entitled to or shall in respect of that calendar year distribute.

10. [Payment of certain costs by London Connty Council.]

11. The reserve fund of the Company shall not be used for the purpose of distributing in any year to the Company's ordinary stockholders a dividend upon their stock in excess of four per centum.

12. [Power to Company to hold lands.]

13. [Powers as to construction and maintenance of gasworks user of lands, etc.]

14. [Additional lands by agreement.]

15. [Restriction on taking houses of labouring class.]

16. [Costs of Act.]

GAS LIGHT AND COKE COMPANY'S ACT, 1909.

(9 EDW. 9, 7, c. LXXXVII.).

An Act to authorise the acquisition by the Gas Light and Coke Company of the undertaking of the West Ham Gas Company to confer further powers on the Gas Light and Coke Company and for other purposes.
[16th August, 1909.]

1. This Act may be cited as the Gas Light and Coke Company's Act, 1909.

Sect. 2.

2. The following parts of Acts (so far as they are applicable for the purposes of and are not inconsistent with the provisions of this Act) are hereby incorporated with this Act (that is to say) :—

The provisions of the Companies Clauses Consolidation Act 1845 with respect to the following matters (that is to say) :—

The distribution of the capital of the company into shares ;

The transfer or transmission of shares ;

The remedies of creditors of the company against the shareholders ;

The general meetings of the company and the exercise of the right of voting by the shareholders ;

The making of dividends ;

The giving of notices ; and

The provision to be made for affording access to the special Act by all parties interested :

And Part III. (relating to debenture stock) of the Companies Clauses Act 1863 as amended by subsequent Acts.

3. In this Act the several words and expressions to which meanings are assigned by the Acts partially incorporated herewith shall have the same respective meanings unless there be something in the subject or context repugnant to such construction And in this Act—

The expression "the Gas Light Company" means the Gas Light and Coke Company ;

The expression "the West Ham Company" means the West Ham Gas Company ;

The expression "the Gas Light district" means the limits of supply of the Gas Light Company as existing immediately before the date of transfer and such limits shall be deemed to include all areas within which the Gas Light Company are at the passing of this Act supplying gas ;

The expression "the West Ham district" means the several areas specified in the First Schedule to this Act ;

The expression "officer" where used in relation to the West Ham Company means any person who on the sixteenth day of December one thousand nine hundred and eight was or who since that date but before the passing of this Act has with the consent of the Gas Light Company as herein-after provided been appointed a secretary engineer accountant collector or other salaried officer of that Company but does not include any auditor of the said Company ;

"The undertaking of the West Ham Company" includes subject to the provisions of this Act all rights of making distributing and supplying gas and all other the rights powers authorities and privileges whatsoever of the West Ham Company and all property whatsoever and wheresoever and whether real or personal including cash balances reserve and insurance funds investments and all other interests and rights in to and out of the property whether real or personal and obligations and things in action of or belonging to that company immediately before the date of transfer and all books accounts deeds writings and documents relating thereto but (except as by this Act expressly provided) subject to all debts liabilities and obligations of the West Ham Company;

The expression "the controlling authority" means—

(*a*) In relation to any testing place in the city of London or the liberties thereof the mayor aldermen and commons of the said city in common council assembled;

(*b*) In relation to any testing place elsewhere within the administrative county of London the London County Council;

(*c*) In relation to any testing place within the West Ham district the several local authorities of the districts wholly or partly comprised in that district;

The expressions "the Act of 1880" and "the Act of 1905" mean respectively the Gaslight and Coke and other Gas Companies Acts Amendment Act 1880 and the London Gas Act 1905.

4. [Transfer to Gas Light Company of undertaking of West Ham Company and dissolution of that company.]

5. [West Ham Company to continue incorporated for specified purpose.]

6. [Gas Light Company to issue or allocate ordinary and preference stock in substitution for ordinary and preference stock of West Ham Company.]

7. [Gas Light Company to issue debenture stock in substitution for debenture stock of West Ham Company.]

8. [Creation and purchase of ordinary stock preference stock and debenture stock of Gas Light Company for purposes of Act.]

9. [As to fractional parts of five pounds.]

10. [Stock and debenture stock of Gas Light Company credited under Act to form part of existing stocks.]

11. [Stock and debenture stock of Gas Light Company to be equivalent for all purposes to stock and debenture stock of West Ham Company.]

12. [Exchange of certificates.]

13. [Transfers of stock or debenture stock of West Ham Company to operate as transfers of stock or debenture stock of Gas Light Company.]

14. [As to dividend on stock of West Ham Company to 31st December, 1909.]

Sect. 15.

15. [Repeal of unexercised powers of West Ham Company of raising capital and borrowing.]

16. Subject to the provisions contained in this Act the Acts relating to or affecting the Gas Light Company and their undertaking at the date of transfer shall apply to the whole undertaking of the Gas Light Company and that Company may exercise within the Gas Light district and within the West Ham district all or any of the powers rights privileges and authorities conferred by the said Acts in relation to the Gas Light district or any part thereof.

17. [As to testing place at Canning Town.]

18. [As to testing of gas in West Ham District.]

19. [Certain testing places to be deemed for certain purposes within West Ham District.]

20. [Pending actions etc.]

21. [Contracts to be binding.]

22. [Collection of outstanding debts.]

23. [West Ham Company's books to be evidence as to holders of stock and debenture stock.]

24. [Books etc. to remain evidence.]

25. [Officers of West Ham Company to be accountable for books etc.]

26. [As to directors.]

27. [Compensation to directors and auditors of West Ham Company.]

28. [As to officers of West Ham Company.]

29. [West Ham Company to carry on undertaking until date of transfer.]

30. [West Ham Company not to increase staff or salaries.]

31. [Gas Light Company to continue to pay pensions.]

32. [For protection of Corporation of West Ham.]

33. [Confirming scheduled agreement with Chigwell Loughton and Woodford Gas Company.]

34. As from the date of transfer section 19 (Fixing maximum price of common gas with sliding scale as to dividend) of the Gas Light and Coke Company Act 1876 section 15 (Sliding scale as to dividend on ordinary stock) and section 16 (Application of net profits after providing for dividends on preference stocks) of the Gas Light and Coke Company's (Capital Consolidation) Act 1898 and section 8 (Alteration of standard price and sliding scale as to dividend) of the Gas Light and Coke Company's Act 1903 shall be and the same are hereby repealed and the following provisions shall have effect in lieu thereof (that is to say):—

(1) The standard rate of dividend on the ordinary stock of the Gas Light Company shall be four pounds per centum per annum

Sect. 34.

subject to increase or reduction in accordance with the scale herein-after set forth.

(2) The standard price to be charged by the Gas Light Company for Gas supplied by them shall be three shillings and two pence per thousand cubic feet Provided that the Gas Light Company may increase or reduce the price charged by them for gas above or below the standard price subject to a reduction or increase in the dividend payable by the Gas Light Company on their ordinary stock as follows :

In respect of any half year ending on the thirtieth day of of June or thirty-first day of December during any part of which the price charged by the Gas Light Company shall have been one penny or part of a penny above the standard price the dividend payable by the Gas Light Company shall in respect of each penny or part of a penny by which the standard price shall have been increased be reduced below the standard rate of dividend by one shilling and fourpence on every one hundred pounds of ordinary paid-up capital and so in proportion for any fraction of one hundred pounds ;

And in respect of any such half year as aforesaid during the whole of which the price charged by the Gas Light Company shall have been one penny or more below the standard price the dividend payable by the Gas Light Company may in respect of each penny by which the standard price shall have been reduced be increased above the standard rate by one shilling and fourpence on every one hundred pounds of ordinary paid-up capital and so in proportion for any fraction of one hundred pounds ;

Provided that if the dividend payable in respect of any half year shall include a fractional amount less than one quarter per centum the Gas Light Company may defer the payment of such fractional amount until the payment of the next or some succeeding dividend and shall in the discretion of the Gas Light Company either add such fractional amount to and pay the same with such succeeding dividend accordingly or add the same to the reserve fund ;

The maximum price charged by the Gas Light Company to private consumers during any half year is in this section called the "authorised price of gas" and the dividend on the ordinary stock of the Gas Light Company for the time being distributable in respect of any half year in accordance with the foregoing scale is in this Act called the "authorised rate of dividend" :

(3) The net profits of the Gas Light Company which remain after providing for the dividends on the several preference stocks of that company shall be applicable in the first place in paying rateably and without preference or priority a dividend up to

Sect. 34.

three pounds ten shillings per centum per annum on the three and a half per centum maximum stock of the Gas Light Company and up to two pounds sixteen shillings per centum per annum on the ordinary stock of that company The three and a half per centum maximum stock shall not in any half year be entitled to any dividend in excess of the rate of three pounds ten shillings per centum per annum but any surplus profits available after the payment of the said dividends at the rate of three pounds ten shillings and two pounds sixteen shillings per centum per annum on the three and a half per centum maximum stock and the ordinary stock respectively shall be applicable in payment of further dividends on the ordinary stock up to the amount permitted by law :

In any half year in which the authorised price of gas does not exceed three shillings and eleven pence per thousand cubic feet and the authorised rate of dividend on the ordinary stock does not fall below the rate of two pounds sixteen shillings per centum per annum the rate of dividend distributable on the three and a half per centum maximum stock shall continue to be three pounds ten shillings per centum per annum but if in any half year the authorised price of gas exceeds three shillings and eleven pence per thousand cubic feet or the authorised rate of dividend on the ordinary stock falls below the rate of two pounds sixteen shillings per centum per annum then for every increase in such half year of one penny in the authorised price of gas above three shillings and eleven pence per thousand cubic feet or fall in that half year of one shilling and fourpence in the authorised rate of dividend on the ordinary stock the rate of dividend on the three and a half per centum maximum stock shall be reduced by one shilling and eight pence.

Subject to the provisions of this section the making of dividends on the three and a half per centum maximum stock and on the ordinary stock shall be subject to the provisions of the Companies Clauses Consolidation Act 1845 with respect to the making of dividends.

35.—(1) Section 21 (If profits exceed the amount limited excess to be invested and form an insurance fund) section 22 (Application of excess of profits over standard rate of dividend) and section 23 (Power to create a reserve fund out of dividends in excess of the standard rate of dividend and application thereof) of the Gas Light and Coke Company Act 1876 shall respectively be read and have effect as if the words "half year" were substituted therein for the word "year" wherever that word occurs in those sections.

(2) The said sections 21 and 22 shall respectively be read and have effect as if the expression "authorised rate of dividend" were substituted therein for the expression "standard rate of dividend."

Sect. 35.

(3) The said section 23 shall be read and have effect as if the expression "authorised rate of dividend" were substituted therein for the expression "standard rate of dividend" where that expression secondly occurs in the said section.

36. For the purposes of section 9 (Redemption fund) of the Gas Light and Coke Company's Act 1903 the average of the two half-yearly dividends which the Company shall in any calendar year in accordance with the provisions of this Act be entitled to or shall distribute shall be deemed to be the dividend which they shall be entitled to or shall in respect of that calendar year distribute.

37. The insurance fund and the reserve fund of the West Ham Company shall respectively be added to and form part of the insurance fund and the reserve fund of the Gas Light Company.

38. As from the passing of this Act sub-section (1) of section 4 (Illuminating power) of the London Gas Act 1905 shall be read and have effect as if the word "fourteen" were substituted therein for the word "sixteen."

39.—(1) As from the 1st day of January one thousand nine hundred and ten the standard calorific power of the gas supplied by the Gas Light Company within the Gas Light district and the West Ham district shall be one hundred and twenty-five calories net per cubic foot (the expression "calories" being used in this Act as meaning calories net per cubic foot) but the Gas Light Company shall not incur any liability in the event of their supplying gas of a calorific power of not less than one hundred and twelve and one-half calories.

(2) One testing only for calorific power shall be made at each testing place daily but in the event of the calorific power being on any testing ascertained to be below one hundred and twelve and one-half calories the gas examiner shall forthwith give notice thereof to the Gas Light Company and a second testing shall be made at an interval of not less than one hour from the time of making the first testing at that testing place and the average of the two testings shall be deemed to be the calorific power of the gas at such testing place on that day.

40. The following provisions shall apply with respect to the testing for calorific power of the gas supplied by the Gas Light Company within the administrative county of London and to forfeitures in respect of deficient calorific power of such gas:—

(1) If on any one day the gas supplied by the Gas Light Company at any testing place is of less calorific power to an extent not exceeding six calories than one hundred and twelve and one-half calories the average of the testings for calorific power made at such testing place on that day and on the preceding day and on the following day shall be deemed to represent the calorific power of the gas on such one day at such testing place:

Sect. 40.

(2) The Gas Light Company shall not be liable to any forfeiture for defective calorific power where the calorific power on any day of the gas supplied by them is not less than one hundred and twelve and one-half calories but where the calorific power on any day of such gas is less than such last-mentioned quantity the Gas Light Company shall be liable to the following forfeitures in respect of such deficiency (that is to say) :—

Where the deficiency does not exceed three calories five pounds ;

Where the deficiency exceeds three calories but does not amount to six calories a sum not exceeding ten pounds ;

For each complex six calories of defective power a sum not less than twenty-five pounds and not exceeding one hundred pounds ;

Provided always that the controlling authority of any testing place having recovered one forfeiture in respect of defective calorific power in the gas supplied by the Gast Light Company at one testing place on any day shall not be entitled to any further forfeiture in respect of defective calorific power in the gas supplied by the Gas Light Company at any other testing place of such controlling authority on the same day Provided also that no forfeiture shall be incurred in any case with respect to which it is certified by the chief gas examiner that the defect of calorific power was occasioned by an unavoidable cause or accident :

(3) Section 10 (Company may be represented at testings) of the Act of 1880 shall with respect to the Gas Light Company be read and have effect as if calorific power were therein referred to in addition to illuminating power purity and pressure :

(4) Section 11 (Daily reports and access to books) of the Act of 1880 shall in relation to the Gas Light Company extend and apply with respect to the testings for the purposes of this section.

(5) Section 13 (Quarterly report of chief gas examiner) of the Act of 1880 shall in relation to the Gas Light Company be read and have effect as if there were added at the end thereof " (4) The calorific power on each day at each testing place of the controlling authority " :

(6) The provisions of section 19 (Forfeitures and losses from fraud etc.) and section 20 (Recovery of forfeitures etc. 23 & 24 Vict. c. 125) of the Act of 1880 shall extend and apply to forfeitures under this section and to the recovery thereof :

(7) The following provisions of the Act of 1905 shall extend and apply to and for the purposes of the testing for calorific power of

Sect. 40.

the gas supplied by the Gas Light Company within the administrative county of London (that is to say) :—

Sub-sections (1) and (4) of section 5 (As to testing for calorific power sulphur impurities and illuminating power with flat-flame burner) so far as such sub-sections relate to testings for calorific power ;

Section 9 (Appeal by company to chief gas examiner against prescription or certification of gas referees) ;

Section 10 (Sunday testing) ;

Section 11 (Amendment of section 12 of Act of 1880) ;

Section 12 (Further powers to chief gas examiner as to forfeitures) ;

Section 13 (As to hearing in absence of parties) ;

Section 15 (Penalty for neglect to comply with prescriptions of gas referees) ;

Section 16 (Proceedings in case of forfeiture) ;

Section 17 (Proof of report etc. of chief gas examiner) ;

Section 18 (As to service of notices) ;

but subsections (2) (3) and (5) of the said section 5 shall not apply for the said purposes:

(8) Section 14 (Amendment of section 18 of Act of 1880) of the Act of 1905 shall extend and apply to and for the purposes of this section as if the words "defective calorific power" had been inserted therein after the words "defective illuminating power."

41. The following provisions shall apply with respect to the testing for calorific power of the gas supplied by the Gas Light Company within the West Ham district and to forfeitures in respect of deficient calorific power of such gas :—

(1) The Gas Light Company shall within six months from the date of transfer or from the date of the provision of the testing place (whichever shall be the later) cause to be provided at each of the prescribed testing places within the West Ham district apparatus for testing the calorific power of the gas supplied by the Gas Light Company at such testing place and the said apparatus and the mode of making the tests shall be the same as shall from time to time be prescribed by the gas referees appointed under the City of London Gas Act 1868 for testing the gas supplied by the Gas Light Company within the Metropolis :

(2) The gas examiner of the controlling authority may at any testing place of that authority test at any hour of the day or night the calorific power of the gas supplied by the Gas Light Company at such testing place :

(3) If on any one day the gas supplied by the Gas Light Company at any such testing place is of less calorific power to an extent not exceeding six calories than one hundred and twelve and one-half calories the gas examiner of the controlling authority shall (if the controlling authority contemplate proceeding for a forfeiture) make at such testing place a testing of the calorific power of such gas on each of the two following days and the average of the three testings so made shall be deemed to represent the calorific power of the gas on such one day at such testing place :

(4) The Gas Light Company shall not be liable to any forfeiture for defective calorific power where the calorific power on any day of the gas supplied by them at any such testing place is not less than one hundred and twelve and one-half calories but where the calorific power on any day of such gas is less than such last-mentioned quantity the Gas Light Company shall be liable to the following forfeitures in respect of such deficiency (that is to say) :—

Where the deficiency does not exceed three calories five pounds ;

Where the deficiency exceeds three calories but does not amount to six calories a sum not exceeding ten pounds ;

For each complete six calories of defective power a sum not exceeding twenty pounds :

(5) The provisions of section 31 of the Gasworks Clauses Act 1871 shall apply to any testing made under this section :

(6) For the purposes of this section section 33 of the Gasworks Clauses Act 1871 shall be construed as if calorific power were therein referred to in addition to illuminating power and purity.

42. If within one month after the expiration of a period of three years from the first day of January one thousand nine hundred and ten or after the expiration of any subsequent period of three years either the Gas Light Company or the London County Council or the mayor aldermen and commons of the City of London in common council assembled shall desire that the standard calorific power prescribed by the section of this Act of which the marginal note is "Calorific power of gas supplied shall be reduced or increased and shall give to the other parties and to the Board of Trade notice in writing of such desire it shall be lawful for the Board of Trade after hearing the parties and considering any representations made to them by any of the said parties by order to reduce or increase the amount of the said standard calorific power and of the deficiency below such standard within which the Gas Light Company are not to be liable to forfeitures or either of such amounts to such extent as to the said Board may seem fit and the said Board may by such order make all such modifications of this

Sect. 42. Act as may be necessary in consequence of any such reduction or increase as aforesaid and may also direct the manner in which the costs charges and expenses of the said parties and of the said Board of and incidental to any such application and any inquiry held by or under the direction of the said Board in connexion therewith shall be borne.

43. The Gas Light Company shall at any time within two years after the first day of January one thousand nine hundred and ten if and when required by any consumer of gas supplied by the Gas Light Company (other than a consumer by prepayment meter) supply to him and fix free of charge a sufficient number of burners suitable in all respects for the consumption of gas of the illuminating power prescribed by this Act in substitution for the burners in use before the said first day of January The Gas Light Company shall also as soon as reasonably practicable after the said first day of January one thousand nine hundred and ten and at the latest within a period of twelve months thereafter exchange the burners used by consumers of gas supplied by the Gas Light Company by means of prepayment meters for burners similarly suitable for the consumption of gas of the illuminating power prescribed by this Act.

Notice of the provisions of this section shall be given on each demand note of the Gas Light Company sent out during the first-mentioned period of two years.

44. Section 39 of the scheme for the amalgamation of the London Gas Light Company with the Gas Light and Coke Company confirmed by Order in Council dated the twenty-second day of May one thousand eight hundred and eighty-three shall be read and have effect as if the words "fourteen candle gas" were therein inserted in lieu of the words "sixteen candle gas."

See as to this scheme the INTRODUCTION at p. 66.

45. [Remuneration of directors.]

46. In the event of any meter used by a consumer of gas being tested in manner provided by the Sale of Gas Act 1859 and being proved to register erroneously within the meaning of the said Act such erroneous registration shall be deemed to have first arisen during the then last preceding quarter of the year unless it be proved to have first arisen during the then current quarter. The amount of the allowance to be made to or of the surcharge to be made upon the consumer by the Gas Light Company shall be paid by or to that Company to or by the consumer as the case may be and shall be recoverable in the like manner as gas charges are recoverable by the said Company.

47. [Repeal of Acts.] (These Acts related to the West Ham Company.)

48. [Persons in employ of Gas Light Company may nominate others to transfer stock etc. held by such persons.]

49. [Costs of Act.]

METROPOLIS GAS.

NOTIFICATION OF THE GAS REFEREES.

In former editions of this work the current Notification of the Gas Referees was set out here *in extenso*. Seeing, however, that it can be obtained from the King's Printers for 1*s*. 6*d*., it was felt that it might be omitted.

MODEL GAS BILL.*

Incorporation of Acts.

1. The following Acts and parts of Acts are hereby incorporated with this Act (namely):

The Companies Clauses Consolidation Act, 1845 (except the provisions relating to the conversion of borrowed money into capital), Part I. (relating to cancellation and surrender of shares), and Part III. (relating to debenture stock) of the Companies Clauses Act 1863, as amended by subsequent Acts; and

The Gasworks Clauses Acts 1847 and 1871: Provided that s. 13 of the former Act shall be read as if the words "or any premises" were inserted after the words "private building" and as if the words "Provided also that every such contract entered into by the company shall be alike in terms and amount under like circumstances to all consumers" were added at the end of that section.

Interpretation.

2. In this Act the several words and expressions to which meanings are assigned by the Acts wholly or partially incorporated herewith shall have the same respective meanings, unless there be something in the subject or context repugnant to such construction.

The expression "the Company" shall mean the Company incorporated by this Act:

The expression "the works" the "gasworks" and "the undertaking" shall respectively mean and include the gasworks and works connected therewith by this Act vested in or authorised to be made or maintained by the company, and any improvement thereof which they may construct under the powers of this Act and the lands buildings estate right title property privileges and effects and the undertaking of the company and every part thereof respectively.

Limits of Act.

3. The limits of this Act shall be

Incorporation of company.

4. [*Incorporation of Company.*]

General purposes of company.

5. The company shall be established for the purpose of manufacturing and supplying gas for lighting heating motive power and other purposes within the limits of this Act, and may provide produce sell dispose of and deal in gas coke tar and all other residual products resulting from the manufacture of gas and generally may carry on the business usually carried on by a gas company.

CAPITAL.

[*Here insert clauses as to capital, issue of shares and calls.*]

Power to company to raise additional capital.

6.† The Company may from time to time raise additional capital, not exceeding in the whole pounds, by the creation and issue of new ordinary shares or stock, or new preference shares or stock, or wholly or partially by one or more of those modes respectively, but the Company shall not issue any share of less nominal value than ten pounds: Provided that it shall not be lawful for the Company to create and issue under the powers

---

* Clauses 4 to 17 and 22 of this Part are not applicable to bills of local authorities; clauses 1 to 3, 18 to 21, 23 to 37 may be applied with the necessary modifications.

† Applicable only to existing companies.

Clause 6.

of this Act any greater nominal amount of capital than shall be sufficient to produce including any premium which may be obtained on the sale thereof the sum of pounds: *Provided also that the Company shall not create and issue within the year following the passing of this Act any greater nominal amount of capital than shall be sufficient to produce in manner aforesaid pounds, or within any subsequent year pounds: Provided also that the Company shall not raise by the issue of preference shares or stock a greater amount of such additional capital than pounds.*

Prior to 1908 a provision was inserted in this clause to the effect that shares or stock should not vest until the full price should have been paid.

If authorised capital for any year not raised, amount may be made up in subsequent years.

7. *If in any year or years the Company have not created and issued capital to the full amount hereinbefore prescribed in relation to such year or years, they may in any subsequent year create and issue, in addition to the amount prescribed for such year such a nominal amount of capital as shall be sufficient together with the amount then raised to produce in manner aforesaid pounds in respect of the year following the passing of this Act, and pounds in respect of every subsequent year then expired.*

Power to borrow.

8. The Company may, subject to the provisions of this Act, borrow on mortgage of the undertaking any sum or sums not exceeding in the whole *one-third* part of the amount of the [additional] capital which at the time of borrowing had been raised under the powers of this Act. But no sum shall be borrowed in respect of any capital so raised until the Company have proved to a justice of the peace, before he gives his certificate under the fortieth section of the Companies Clauses Consolidation Act, 1845, that the whole of the stock or shares at the time issued, together with the premium (if any) realised on the sale thereof, have been fully paid up.

In the Model Bill for 1908 the words in this clause after the word "[additional]" were as follows:—"Capital by this Act authorised to be raised, and at the time actually issued by shares or stock but no part thereof shall be borrowed until the whole of the shares or stock at the time issued together with the premium (if any) realised on the sale thereof shall have been fully paid up, and the Company have proved to the justice who is to certify under the fortieth section of the Companies Clauses Consolidation Act 1845, before he so certifies, that such shares and stock and premium (if any) have been issued and fully paid up, and upon production to such justice of the books of the Company and of such other evidence as he shall think sufficient he shall grant a certificate that the proof aforesaid has been given, which certificate shall be sufficient evidence thereof.

Application of money.

9. All moneys raised under this Act *including premiums* shall be applied only to purposes to which capital is properly applicable, and any sum of money which may arise by way of premium from the issue of shares *or stock* under the provisions of this Act shall not be considered as part of the capital of the undertakers entitled to dividend.

The above clause was in 1908 re-introduced (in part) from some former editions of the Model Bill.

[*Then insert the clauses—Priority of money already borrowed on mortgage debenture stock clauses, and clauses as to general meetings, and directors.*]

LIMITATION OF PROFITS.

Profits of the company limited. (Standard rates of dividend.)

10. Except as by this Act provided the profits of the Company to be divided among the shareholders in any year shall not exceed the following rates (which are in this Act referred to as the standard rates of dividend), that is to say, on the original capital the rate of ten pounds in respect of every one hundred pounds of such capital, and on the additional capital to be raised under the powers of this Act the rate of seven pounds in respect of every one hundred pounds actually paid up of such capital as shall be issued as ordinary capital, and the rate of *five* pounds in respect of every one hundred pounds actually paid up of such capital as shall be issued as preference capital.

Clause 11.

Dividends on different classes of stock or shares to be paid proportionately.

11. In case in any half year the funds of the Company applicable to dividend shall be insufficient to pay the full amount of dividend at the prescribed maximum rate on each class of ordinary stock or shares in the capital of the Company a proportionate reduction shall be made in the dividend of each class.

Power to create a special purposes fund.*

12.—(1) The Directors of the Company may if they think fit in any year appropriate out of the revenue of the Company as part of the expenditure on revenue account any sum not exceeding an amount equal to one per cent. of the paid-up capital of the Company, including premiums to a fund to be called the "Special Purposes Fund."

(2) The Special Purposes Fund shall be applicable only to meet such charges as a chartered accountant or incorporated accountant, being the auditor of the company or appointed for the purpose by the Board of Trade shall approve as being—

(*a*) expenses incurred by reason of accidents strikes or circumstances which due care and management could not have prevented, or

(*b*) expenses incurred in the replacement or removal of plant or works other than expenses requisite for maintenance and renewal of plant and works.

(3) The maximum amount standing to the credit of the Special Purposes Fund shall not at any time exceed an amount equal to one-tenth part of the paid-up capital of the Company including premiums.

(4) The moneys forming the Special Purposes Fund or any portion thereof may be invested in securities in which trustees are authorised by law to invest or may be applied for the general purposes of the Company to which capital is properly applicable, or may be used partly in the one way or partly in the other.

(5) Resort may from time to time be had to the Special Purposes Fund notwithstanding that the sum standing to the credit of the fund is for the time being less than the maximum allowed by this section.

(6) [†The money or securities standing to the credit of the Insurance Fund of the Company at the passing of this Act shall be credited to the Special Purposes Fund, and section of the Act of is hereby repealed.

This clause was in 1908 substituted for previous clauses relating to insurance and renewal funds.

If profits exceed the amount limited, excess may be invested and form an insurance fund.

13. If the clear profits of the undertaking of the Company in any year amount to a larger sum than is sufficient to pay [the dividend on the preference capital and] the dividend at the authorised *rate* on the ordinary capital of the Company, the excess shall be carried to the credit of the divisible profits of such undertaking for the next following year.

Provided that the sum standing to the credit of such divisible profits shall not at any time exceed the amount required to pay one year's *dividend* at the authorised *rate.*

This clause was amended in 1908, and is again amended as regards the proviso which in 1908 ran as follows: "Provided that the sum so carried forward shall not in any case exceed the amount required to pay one year's dividend at the authorised rate."

Power to create a reserve fund.

14. Where in any year the dividend of the Company on the ordinary capital of the Company shall exceed the standard rate by reason of the price charged by the Company for gas in such year being below the standard price,

---

* This clause is not applicable except where there is a sliding scale.

† Insert where an insurance fund already exists and repeal section authorising creation of that fund.

Clause 14.

then out of the amount of the divisible profits of the Company applicable to the payment of such excess of dividend the Company may in such year set apart such sum as they shall think fit, and all sums (if any) so set apart by the Company, and any reserve or other fund of the Company existing at the passing of this Act, may be invested in Government or other securities, and the dividends and interest arising from such securities may also be invested in the same or the like securities, in order that the same may accumulate at compound interest; and the fund so formed shall be called "the Reserve Fund," and shall be applicable to the payment of dividend in any year in which the clear profits of the Company shall be insufficient to enable the Company in such year to pay the dividend at the authorised rate on the ordinary capital of the Company, and save as in this Act provided no sum shall in any year be carried by the Company to any reserve fund.

AUCTION CLAUSE.*

New shares or stock to be sold by auction or tender.

15.—(1) All shares or stock created under the powers of this Act shall be issued in accordance with the provisions of this section.

(2) All shares or stock so to be issued shall be offered for sale by public auction or tender in such manner, at such times, and subject to such conditions of sale as the company shall from time to time determine. Provided as follows:

(*a*) Notice of the intended sale shall be given in writing to the town clerk of   and to the secretary of the London Stock Exchange at least twenty-eight days before the day of auction, or the last day for the reception of tenders as the case may be, and shall also be duly advertised once in each of two consecutive weeks in one or more local newspapers circulating within the said *borough*:

(*b*) A reserve price shall be fixed, and notice thereof shall be sent by the Company in a sealed letter to be received by the Board of Trade not less than twenty-four hours before, but not to be opened till after, the day of auction or last day for the receipt of tenders as the case may be:

(*c*) No lot offered for sale shall comprise shares or stock of greater nominal value than one hundred pounds:

(*d*) In the case of a sale by tender no preference shall be given to one of two or more persons tendering the same sum; in the case of a sale by auction a bid shall not be recognised unless it is in advance of the last preceding bid:

(*e*) It shall be one of the conditions of sale that the total sum payable by the purchaser shall be paid to the company within three months after the date of the auction or of the acceptance of the tender as the case may be.

(3) Any shares or stock which have been so offered for sale and are not sold may be offered at the reserve price to the holders of ordinary [*and preference] shares or stock of the Company in accordance with the provisions of sections 18, 19, and 20 of the Companies Clauses Act, 1863, and to the employees of the Company, and to the consumers of gas supplied by the Company, in such proportions as the Company may think fit or to one or more of these classes of persons only: provided, in the case of an offer to holders of shares or stock, that if the aggregate amount of shares or stock applied for shall exceed the aggregate amount so offered as aforesaid the same shall be allotted to and distributed amongst the applicants as nearly as may be in proportion to the amounts applied for by them respectively.

(4) Any shares or stock which have been offered for sale in accordance with subsection (2) or with subsections (2) and (3) and are not sold, shall be again offered for sale by public auction or by tender in accordance with

---

* This clause is also applicable to Bills of water companies.

Clause 15.

the provisions of this section, and any such shares or stock then remaining unsold may be otherwise disposed of at such price and in such manner as the directors may determine for the purpose of realising the best price obtainable.

(5) As soon as possible after the conclusion of the sale or sales, the company shall send a report thereof to the Board of Trade, stating the total amount of the [*respective] shares or stock sold, the total amount obtained as premium (if any), and the highest and lowest prices obtained for the [*respective] shares or stock.

This is the form of auction clause which was adopted in Bills of 1908.

CONSTRUCTION OF WORKS.

Powers as to construction and maintenance of gasworks, etc.

16. Subject to the provisions of this Act, the *Company* may upon the lands described in the Schedule to this Act erect maintain alter improve enlarge extend and renew or discontinue gasworks retorts gasometers receivers mains pipes stop-cocks machinery and other works and apparatus and conveniences, and may do all such acts as may be proper for making and storing gas and for supplying gas within the limits of this Act, and may make store and supply gas accordingly, and may manufacture sell provide supply and deal in coke tar and all other residual products or refuse of any materials employed in or resulting from the manufacture of gas.

[*Clause—Power to lay pipes in streets not dedicated to public use* (see *Water Clauses, cl.* 23) *is applicable also to gas.*]

LANDS.

Power to purchase lands by agreement.

17. The *Company* may for the purposes of their undertaking purchase take and hold (by agreement but not otherwise) in addition to the lands described in the Schedule to this Act any lands and hereditaments not exceeding in the whole   acres which the *Company* may require for the purposes of their works and undertaking; but the *Company* shall not create or permit a nuisance on any such lands, and no lands shall be used by the Company for the purpose of manufacturing gas or residual products except the lands described in the Schedule to this Act.

Prescribed period for sale of lands.

18. *The prescribed period for the sale of superfluous lands within the meaning of section* 127 *of the Lands Clauses Consolidation Act,* 1845, *shall be   years from the passing of this Act.*

SUPPLY OF GAS.

Limit of price.

19. The price to be charged by the *Company* for gas supplied by them to persons who shall burn the same by meter shall not not at any time exceed   per thousand cubic feet.

Alternative (in Companies' Bills)—Sliding Scale.

Dividend dependent on price charged.

20. The standard price to be charged by the Company for gas supplied by them shall be   per thousand cubic feet:

Provided that the Company may increase or reduce the price charged by them for gas above or below the standard price, subject to a reduction or increase in the dividend payable by the Company on the ordinary share capital or stock as follows:—

In respect of any year during any part of which the price charged by the Company shall have been one penny or part of a penny above the standard price the dividend payable by the Company shall in respect of each penny or part of a penny by which the standard price shall have been increased be reduced below the standard rate of dividend by five shillings on every one hundred pounds of ordinary paid-up capital *with a ten per centum standard rate of dividend, and by three*

---

* Omit words in brackets where there are no preference shares or stock.

shillings and sixpence on every one hundred pounds of such capital with a seven per centum standard rate of dividend, and so in proportion for any fraction of one hundred pounds; **Clause 20.**

And in respect of any year during the whole of which the price charged by the Company shall have been one penny or more below the standard price, the dividend payable by the company may in respect of each penny by which the standard price shall have been reduced, be increased above the standard rate by five shillings on every hundred pounds of ordinary paid-up capital *with a ten per centum standard rate of dividend, and by three shillings and sixpence on every one hundred pounds of such capital with a seven per centum standard rate of dividend*, and so in proportion for any fraction of one hundred pounds.

21. *The *Company* may if they think fit allow discounts or rebates to consumers of gas in consideration of prompt payment of gas charges not exceeding in any case ten per centum, and in addition thereto or irrespective thereof they may if they think fit allow discounts or rebates to large consumers not exceeding in any case fifteen per centum: Provided that all discounts or rebates shall be of equal amount under like circumstances to all consumers: Provided also that notice of the effect of this enactment shall be endorsed on every demand note for gas charges. Discounts.

22.—(1) The *Company* may demand for any gas supplied through a prepayment meter a not greater charge than for gas supplied to private consumers within their limits of supply through any other kind of meter or by any other method of supply. Charge for gas supplied by means of prepayment meters.

(2) The *Company* shall not charge for the hire of any prepayment meter and fittings to be used therewith any sum other than a sum of money calculated according to the quantity of gas supplied through such prepayment meter, and the maximum sum to be so charged shall be at the rate of tenpence per one thousand cubic feet supplied in manner aforesaid, such sum to include the hire of meter and the fittings used therewith, or at the rate of one shilling per one thousand cubic feet, if such fittings include a cooking stove.

The said charge shall include the providing letting fixing repairing and maintenance of the meters and fittings and the cost of collection and other costs incurred by the *Company* in connection with the meter and fittings.

(3) The maximum charge for the hire of a prepayment meter without fittings shall be at the rate of ten per centum per annum on the cost of the meter.

(4) For the purpose of this section the expression "prepayment meter" means any meter or appliance by which the quantity of gas supplied is regulated according to the amount of money prepaid therefor.

23. The prescribed number of candles shall be not less than *fourteen*. Quality of gas.

24. For the purposes of the Gasworks Clauses Act, 1871, the prescribed testing place shall be a testing place which shall be provided by the *Company* on the lands described in the schedule to this Act [*or otherwise described position*] before supplying or within three months after beginning to supply gas under the authority of this Act. Testing place.

25.—(1) The quality of the gas supplied by the *Company* shall with respect to its illuminating power be such as to produce, at the testing place when burned at the rate of five cubic feet per hour, a light equal in intensity to the light produced by *fourteen* sperm candles of six to the pound, each consuming 120 grains of sperm per hour, and shall be in all respects in accordance with the provisions of the Gasworks Clauses Act, 1871. Testing quality.

(2) For testing the illuminating power of the gas the burner to be used shall be that known as the Metropolitan Argand No. 2, the photometer shall Burner.

---

* This clause is not required where s. 13 of the Gasworks Clauses Act, 1847, is amended, as appears in clause 1, p. 262.

Clause 25. be the Bar Photometer (*or the Table Photometer*), the standard light shall be that supplied by Harcourt's Ten-candle Pentane lamp, and in making the test the burner shall be so used as to obtain from the gas when burned at the rate aforesaid the greatest amount of light: provided that the Board of Trade may on the application of the *Company* or the local authority (**the Council or any five consumers*) approve the use of any other burner, photometer, or standard light which may appear to the Board to be equally or more suitable for the testing.

(3) The *Company* shall before supplying or within three months after beginning to supply gas under this Act provide all the apparatus required by this Act for the testing of gas and shall at all times keep the same in proper order and repair.

Pressure.

26.—(1) All gas supplied by the *Company* to any consumer of gas shall be supplied at such pressure as to balance a column of water not less than eight-tenths of one inch in height at the main or as near as may be to the junction therewith of the service pipe supplying the consumer.

(2) Any gas examiner appointed under the Gasworks Clauses Act, 1871, may, for the purposes of this Act, subject to the terms of his appointment, at the testing place or at any public lamp†, as and when he thinks fit, test the pressure at which the gas is supplied. The *Company* shall afford to the examiner all reasonable facilities for making the test.

Saving as to penalties.

27. No penalty shall be incurred by the *Company* for insufficiency of pressure, defect of illuminating power, or excess of impurity in the gas supplied by them in any case in respect of which it is proved that such insufficiency, defect, or excess was produced by any circumstance beyond the control of the *Company*. Provided that the want of sufficient funds shall not be held to be a circumstance beyond the control of the *Company*.

As to construction and placing of pipes, etc., between mains and meters.

28. In order to enable the *Company* to ensure a satisfactory supply of gas to their consumers the following provisions shall have effect:—

(1) The *Company* may specify the size and material of the pipes with the fittings thereof which are to be laid by the consumer, either in the first instance or on the occasion of any renewal, between the *Company's* mains and the meter and (so far as the same are intended to be covered over) on the consumer's premises:

(2) The *Company* may if they think fit make different specifications for different classes of premises having regard to the probable maximum consumption of gas thereon at any one time:

(3) The specifications shall be published twice in some newspaper (once in each of two newspapers) circulating within the limits of supply, and a copy thereof shall be kept exhibited in the office of the *Company*:

(4) Every meter to be used in a new building, or a building not previously supplied with gas, or in connection with a new or substituted pipe laid by the consumer between the main and the consumer's meter, shall be placed as near as reasonably practicable to the *Company's* main but within the outside wall of the building:

(5) When any such pipe or meter as aforesaid has been laid or placed, notice thereof shall be given to the *Company* and the pipe shall not be covered over until after the expiration of twenty-four hours from the service of such notice on the *Company*; Any officer of the *Company* duly appointed may between nine o'clock in the morning and five o'clock in the afternoon attend and inspect such pipes (with their fittings) and meter, and if the officer is not permitted to make

---

* Substitute these words in local authorities' Bills.

† In cases where there are no public lamps, provision may be made for testing elsewhere than at the testing place.

Clause 28.

the inspection, or if the pipes or fittings are not according to the *Company's* specification, or if the meter is not placed as required by this section, the *Company* may refuse to supply gas to the premises until the provisions of this section have been complied with :

(6) Any person to whom the *Company* refuses a supply of gas under the provisions of this section may appeal to a petty sessional court against such refusal, and the court may after hearing the parties and considering any questions as to the reasonableness of the *Company's* specifications make such order as seems to them proper in the circumstances, and may order by which of the parties the costs of and incident to the appeal shall be paid.

Company to pay interest on money deposited as security for gas meter, etc.

29. If any person is required by the *Company* to give to them security for any supply of gas or for the payment of the price or rent of a meter, and such security is made by way of deposit, the *Company* shall pay interest after the rate of *four* pounds per centum per annum on every sum of ten shillings deposited by way of such security for every six months during which the same remains in their hands.

Power to supply gas fittings, etc.

30.—(1) The *Company* may sell let for hire fix repair and remove but shall not manufacture engines stoves ranges pipes and other fittings for lighting for motive power for the warming and ventilating of houses and buildings for the cooking of food and for all other purposes for which gas can or may be used, and may provide all materials and work necessary or proper in that behalf, and with respect thereto may demand and take such remuneration or rents and charges, and make such terms and conditions, as may be agreed upon.

(2) Any fittings let for hire under the provisions of this section shall not be subject to distress or to the landlord's remedy for rent or be liable to be taken in execution under process of any court or proceedings in bankruptcy against the person in whose possession the same may be : Provided that such fittings are marked or impressed with a sufficient mark or brand indicating the *Company* as the actual owners thereof.

(3) *Provided as follows :—

(*a*) It shall not be lawful for the *Corporation* to expend money (except through a contractor) upon the provision of such fittings or of labour and materials required for the fixing repairing or removal thereof upon or from the premises of their consumers or prospective consumers:

(*b*) The *Corporation* shall so adjust the charges to be made by them for any such fittings, or for the fixing repairing or removal thereof as to meet any expenditure by them under the powers of this section in connexion therewith (including interest upon moneys borrowed for those purposes and all sums applied to sinking fund for repayment of moneys so borrowed) :

(*c*) Every sum charged by the *Corporation* in respect of the provision of such fittings or the fixing repairing or removal thereof shall be separately stated on every demand note delivered by the Corporation to the consumer :

(*d*) The total sums expended and received by the *Corporation* in connexion with the purposes in this section mentioned in each year (including interest and sinking fund) shall be separately shown in the published accounts of the gas undertaking of the *Corporation* for that year.

Gas consumers to give notice to company before removing.

31. At least twenty-four hours' notice in writing shall be given to the *Company* by every gas consumer before he shall quit any premises supplied with gas by meter by the *Company*, and in default of such notice the consumer so quitting shall be liable to pay to the *Company* the money accruing

---

* This proviso is for insertion in Bills of local authorities.

Clause 31. due in respect of such supply up to the next usual period for ascertaining the register on the meter on such premises, or the date from which any subsequent occupier of such premises, shall require the *Company* to supply gas to such premises whichever shall first occur. Notice of the effect of this enactment shall be endorsed upon every demand note for gas charges payable to the *Company*.

Power to refuse supply to persons in debt for other premises.

32. If a person requiring a supply of gas from the *Company* has previously quitted premises at which gas was supplied to him by the *Company* without paying to them all gas charges and meter rent due from him to the *Company*, they may refuse to furnish to him a supply of gas until he pays the same.

Notice to discontinue supply of gas.

33. A notice to the *Company* from a consumer for the discontinuance of a supply of gas shall not be of any effect unless it be in writing signed by or on behalf of the consumer and be left at or sent by post to the office of the *Company*.

Period of error in defective meters.

34. In the event of any meter used by a consumer of gas being tested in manner provided by the Sale of Gas Act 1859 and being proved to register erroneously within the meaning of the said Act, such erroneous registration shall be deemed to have first arisen during the then last preceding quarter of the year unless it be proved to have first arisen during the then current quarter. The amount of the allowance to be made to or of the surcharge to be made upon the consumer by the *Company* shall be paid by or to the *Company* to or by the consumer as the case may be, and shall be recoverable in the like manner as gas charges are recoverable by the *Company*.

SUPPLY OUTSIDE LIMITS.

Company may contract with local authority, etc., for supply in bulk.

35. The *Company* may contract with any local authority company or persons authorised to supply gas under Parliamentary powers in any district adjacent to the *Company's* limits of supply for the supply to them respectively of gas in bulk upon such terms and conditions and for such periods not exceeding in any case seven years from the making of the contract as may be agreed upon, but nothing in this section shall authorise the *Company* to lay any mains or interfere with any street beyond their limits of supply.

SCHEDULE REFERRED TO IN THE FOREGOING ACT.

[*Insert description and extent of all lands on which gas and residual products may be manufactured by the Company.*]

MODEL CLAUSE RELATING TO SALE OF PLANT OUTSIDE DISTRICT (WATER AND GAS),

(*Taken from Model Bill* (*No.* 9 *of the Miscellaneous Clauses*) *as amended*, 1910.)

If at any time after the passing of this Act any local authority whose district is beyond the district of the *Council*, but as to the whole or any part thereof within their limits for the supply of water [gas], shall give not less than six months' notice in writing to the *Council* of their desire to purchase such portion of the waterworks [gasworks] and plant of the *Council* as is contained within the district of any such local authority, and shall obtain the consent of the Local Government Board to such purchase, and shall apply to Parliament or the Local Government Board for power to purchase such portion of the waterworks [gasworks] and plant of the *Council* (except the reservoirs mains and pipes or other apparatus which shall be necessary for supplying with water [gas] any other part of the limits of the *Council* for the supply of water [gas]) and to supply water [gas] within such district, then it shall not be lawful for the *Council* to oppose such application (except as to the details thereof), and if such powers of purchase and supply be granted, the *Council* shall sell and such local authority shall purchase the portion of the waterworks [gasworks] and plant of the *Council* (except as

Clause 35.

aforesaid) within the district of such local authority at such price being a sum in gross and upon such terms and conditions as shall be fixed in default of agreement by arbitration under the provisions of the Lands Clauses Acts. Any such purchase shall be deemed to be a purpose of the Public Health Act 1875 except so far as the same may be otherwise provided for by Parliament. *The Council shall apply the proceeds of any sale under this section in the same manner as they are required to apply money received from sales of land under this Act.* Provided that after the completion of such purchase all obligations on the part of the *Council* to supply water [gas] within the district of the purchasing authority shall cease and determine.

MODEL CLAUSE RELATING TO COSTS OF ARBITRATION UNDER LANDS CLAUSES ACTS.

(*Taken from Model Bill* (*No.* 27 *of the Miscellaneous Clauses*) *as amended,* 1910.)

The tribunal to whom any question of disputed purchase money or compensation under the Act is referred shall if so required by the *Corporation* award and declare whether a statement in writing of the amount of compensation claimed has been delivered to the *Corporation* by the claimant giving sufficient particulars and in sufficient time to enable the *Corporation* to make a proper offer and if the tribunal shall be of opinion that no such statement giving sufficient particulars and in sufficient time shall have been delivered and that the *Corporation* has been prejudiced thereby the tribunal shall have power to decide whether the claimant's costs or any part thereof shall be borne by the claimant:

Provided that it shall be lawful for any judge of the High Court to permit any claimant after seven days' notice to the *Corporation* to amend the statement in writing of the claim delivered by him to the *Corporation* in case of discovery of any error or mistake therein or for any other reasonable cause such error mistake or cause to be established to the satisfaction of the judge after hearing the *Corporation* if they object to the amendment and such amendment shall be subject to such terms enabling the *Corporation* to investigate the amended claim and to make an offer de novo as to postponing the hearing of the claim and as to costs of the inquiry and otherwise as to such judge may seem just and proper under all the circumstances of the case:

Provided also that this section shall be applicable only in cases where the notice to treat under the Lands Clauses Consolidation Act 1845 either contained or was endorsed with a notice of the effect of this section.

ABSTRACTS

OF THE

WATERWORKS CLAUSES ACTS, 1847 AND 1863.

WATERWORKS CLAUSES ACT, 1847.

(10 & 11 VICT. C. 17.)

SECTION PAGE
1.—Act to extend to companies whose special Act incorporates it 378
2, 3.—Interpretation clauses 379

CITING THE ACT.

4.—Short title, the Waterworks Clauses Act, 1847 381
5.—Form in which portions of the Act may be incorporated with any Act hereafter to be passed 381

CONSTRUCTION OF WATERWORKS.

6 —Taking and using lands or streams under powers of special Act shall be subject to provisions of Lands Clauses Consolidation Act, 1845, and the Lands Clauses Consolidation (Scotland) Act, 1845, and undertakers shall make full compensation to the owners and occupiers of, and other parties interested in, any lands or streams taken or used 382
7.—Errors and omissions in plans, etc., may be corrected by justices, etc., who shall certify the same. And the certificate, etc., shall be deposited with the clerk of the peace, etc.... 431
8.—Works not to be proceeded with until plans of all alterations authorised by Parliament shall have been deposited with the clerk of the peace, etc. 432
9.—Clerks of the peace, etc., to receive such plans of alterations, etc., and allow all persons interested to inspect and make copies or extracts... 432
10.—Copies of the plans and books of reference or of alterations, etc., certified by clerk of the peace, etc., to be evidence 433
11.—Undertakers not to deviate from the line of the works laid down upon the plans more than the prescribed number of yards, and where no number of yards is prescribed not more than ten yards, nor in any case to any greater extent than the line of lateral deviation described on plans; nor take lands of persons not mentioned in books of reference without previous consent in writing, unless omitted by mistake 433
12.—Power to execute works, enter upon lands, dig and break up soil, remove earth, etc., sink wells, make, maintain, etc., reservoirs, waterworks, etc., divert and impound water from streams, etc. Undertakers to make full compensation for damage 434

SECTION PAGE

13.—Penalty not exceeding £5 for wilfully obstructing construction of works 440

14.—Penalty not exceeding £5 on persons who shall illegally divert or take the waters supplying or flowing into streams taken. Penalty to be in addition to damages 441

15.—Reservation of existing rights of owners and occupiers of lands through or by which streams flow 441

ACCOMMODATION WORKS.

16.—Differences as to the construction of accommodation works to be settled by justices 441

17.—If undertakers fail to execute such works, persons aggrieved may perform the same and charge the expense to the undertakers 442

MINES.

18.—Undertakers not entitled to mines of coal, ironstone, slate, or other minerals, except parts thereof necessary to be dug or used in construction of works, unless expressly purchased and conveyed 442

19.—Map and plan of underground works of undertakers to be made and kept in office of undertakers, open to the inspection of all persons interested 447

20.—Copies of such map or plan to be deposited with clerk of the peace, etc. 448

21.—Clerks of the peace, etc., to receive and keep copies of such map or plan, and allow all persons interested to inspect and take copies ... 448

22.—Mines lying near the works not to be worked until owners give notice to undertakers of their intentions. Upon receipt of notice undertakers may take the mines, making compensation to the owners ... 448

23.—If undertakers unwilling to treat for payment of compensation, owner may work the mines, making good damage occasioned by working the mines in an unusual manner... 450

24.—Mining communications. If working prevented by undertakers, owners, etc., of mines may make airways, headways, gateways, or water levels through same to enable them to ventilate, drain, and work mines or minerals on each or either side thereof 451

25.—Undertakers to make compensation to owners, lessees, or occupier of mines for expenses incurred by reason of mines being worked. Disputes to be settled by arbitration 451

26.—Power to undertakers to enter and inspect the working of mines after giving notice of the same 453

27.—Nothing in this or special Act to prevent undertakers from being liable to actions for injury done to mines by means or in consequence of waterworks 454

LAYING OF PIPES.

28.—Power to break up streets, etc., under superintendence (see s. 31), and to open sewers, drains, or tunnels under streets and bridges, and lay pipes, conduits, etc., and from time to time to repair, alter, or remove same 454

29.—Undertakers not to place pipes or other works on land not dedicated to public use without consent of owners and occupiers 463

30.—Notice to be served on persons having control of streets, sewers, etc., before breaking up streets or opening drains, etc. 463

SECTION PAGE

31.—Streets, sewers, drains, etc., not to be opened or broken up except under the superintendence of the persons having the control or management thereof or of their officer, and according to approved plan. If persons having control, etc., fail to superintend, after notice, undertakers may perform the work without them 464

32.—Streets, sewers, drains, etc., broken up to be reinstated without delay ... 465

33.—Penalty not exceeding £5 for delay in reinstating streets, etc. Additional penalty of £5 per day after notice 465

34.—In case of delay the persons having the control, etc., may reinstate and recover the expenses from undertakers 466

SUPPLY OF WATER.

35.—A constant supply of pure and wholesome water to be kept in the pipes for the domestic use of all the inhabitants entitled to demand supply, laid on at such a pressure as will make the water reach the top story of the highest houses unless otherwise provided by special Act. Undertakers to lay pipes in every part of district if required by owners or occupiers, the aggregate amount of whose annual water rate is not less than one-tenth part of expense of laying pipes. Such owners or occupiers to execute agreement binding themselves to take supply for three years at least 466

36.—If for twenty-eight days after demand in writing and tender of agreement, signed by necessary number of owners and occupiers, undertakers neglect to lay pipes and provide supply, they shall forfeit to each owner and occupier the rate which he would be liable to pay under such agreement, and further penalty of 40*s*. for every day during neglect. Frost, unusual drought, etc., will excuse 477

37.—Supply of water to be kept for cleansing sewers, drains, etc., watering streets, supplying public pumps, baths, or washhouses, etc. 477

FIRE-PLUGS.

38.—Undertakers, at the request of the town commissioners, to fix proper fire-plugs in the main, and other pipes at convenient distances not more than 100 yards from each other 479

39.—They must renew and keep such fire-plugs in effective order and deposit keys at engine-houses, etc., and put up public notice in each street of situation 487

40.—Expenses of fire plugs, etc., to be defrayed by the town commissioners... 487

41.—Fire-plugs to be placed near manufactories at request and expense of owners or occupiers 487

42.—All pipes to which fire-plugs are fixed shall at all times be charged with water for extinguishing fires without charge 488

43.—Penalty of £10 for refusal, etc., to fix, etc., fire plugs or furnish water for the public purposes aforesaid, etc. Further penalty of 40*s*. for each day after notice 489

PIPES TO BE LAID BY THE UNDERTAKERS.

44.—On request of the owner of dwelling-house, the annual value of which shall not exceed £10, in any street in which undertakers have laid pipes, or upon request of occupier with consent of owner, undertakers to lay down communication pipes and other necessary works for the supply of such house... 492

45.—Penalty of £5 on undertakers for refusal to lay communication pipes. Further daily penalty of 40*s*. 493

SECTION PAGE

46.—Undertakers to be at liberty to remove such communication pipes if occupier refuse to pay for a supply of water, or house unoccupied for twelve months, and recover expenses from owner or occupier. No greater sum to be recovered from occupiers than amount of rent due: 493

47.—The owner of any house where any such communication pipes shall have been laid may purchase such pipes 494

PIPES TO BE LAID BY THE INHABITANTS.

48.—Any owner or occupier of any dwelling-house or part of a dwelling-house may lay service pipes, giving undertakers fourteen days notice 494

49.—Communication with the pipes of the undertakers to be made under the superintendence of their surveyor. Disputes as to the manner of communication to be settled by justices, etc. 494

50.—The bore of service pipes not to exceed half an inch, except with consent of undertakers 494

51.—Service pipes may be removed after giving notice of the same to the undertakers. Penalty of £5 on removing such pipes without notice: 496

52.—Power to inhabitants to break up pavements, etc., to lay such service pipes, giving notice 496

53.—Owner and occupier upon laying down communication pipes entitled to demand a supply of water for domestic purposes... 497

PROTECTION OF WATER.

54.—Where undertakers by special Act need not have water constantly laid on under pressure, persons supplied to provide and keep in repair a proper cistern with a ball and stop-cock. For neglect, undertakers may cut off pipe or turn off water from the premises 498

55.—Penalty not exceeding £5 for suffering cistern, pipe, ball or stop-cock to be out of repair 499

56.—Undertakers may repair cistern, pipe, ball or stop-cock, and recover the expenses 499

57.—Power to surveyor employed by undertakers to enter houses to examine if there be any waste or misuse of water. If admittance refused, undertakers may turn off the water 499

58.—Penalty not exceeding £5 on persons supplied with water allowing other persons (unless in cases specified) to use the undertakers' water 499

59.—Penalty not exceeding £10 for taking the undertakers' water without agreement 499

60.—Penalty not exceeding £5 for wilfully or carelessly breaking, injuring or opening any lock, cock, valve, pipe, etc. 500

FOULING THE WATER.

61.—Penalty not exceeding £5 for causing water of the undertakers to be fouled. Further penalty of 20*s*. for each day 500

62.—Penalty not exceeding £200 for permitting substances produced in making gas to flow into the undertakers' works, etc.—to be sued for within six months 504

63.—Daily penalty of £20 for each day during continuance of the offence ... 504

64.—Penalty not exceeding £20 for fouling water by the gas of any person making or supplying gas. Further penalty not exceeding £10 for each day during continuance of offence 504

65.—Power to examine gas pipes to ascertain cause of water being fouled upon giving twenty-four hours' notice 505

SECTION PAGE
66.—The expenses of the digging, examination, etc., to abide the result of the examination 505
67.—The amount of such expenses to be ascertained and recovered in the same manner as damages for the ascertaining and recovery whereof no special provision is made (see s. 85) 505

WATER RATES.

68.—Water rates to be payable by the persons requiring, receiving or using the supply of water, and according to the annual value of the tenement supplied 505
69.—Where several houses supplied by one pipe the several owners or occupiers each to pay 513
70.—Rates to be paid quarterly in advance 513
71.—Parties giving notice to discontinue use of water, or removing, to pay to the next quarter day 514
72.—Owners of houses not exceeding £10 rent shall be liable to the payment of the rates instead of the occupiers thereof 514
73.—But tenants under existing leases to repay the owner 515
74.—On neglect to pay water rates, undertakers may cut off supply and recover rates if less than £20, with expenses of cutting off the water and costs, in the same manner as damages for the recovery of which no special provision is made (see s. 85); or if £20 or upwards, by action 515

PROFITS OF THE UNDERTAKING.

75.—Not to exceed the prescribed rate, or, where no rate is prescribed, £10 per cent. by the year on the paid-up capital, unless a larger dividend be at any time necessary to make up the deficiency of any previous dividend which shall have fallen short of the said yearly rate 518
76.—If profits exceed the amount limited, excess to be invested and form a reserve fund 531
77.—Reserved fund not to be resorted to unless to meet an extraordinary claim 531
78.—When such fund amounts to prescribed sum, or one-tenth part of the nominal capital, interest to be applied to general purposes of the undertaking 532
79.—If profits are less than the prescribed rate a sum may be taken from reserve fund to supply deficiency 532
80.—Court of quarter sessions (in Scotland the sheriff) may on petition of two water ratepayers appoint person to ascertain state of undertaking, and if profits are more than the prescribed amount a rateable reduction to be made in the price of water 532
81.—Court may order the petitioner to pay the costs of groundless petition ... 532
82.—Penalty of £100 on undertakers refusing to produce books, vouchers, etc. to such person (s. 80). Further daily penalty of £10 533
83.—Annual account to be made up by undertakers and sent to the clerk of the peace in England or Ireland, or to the sheriff clerk in Scotland, and to be open to inspection 533
84.—*Repealed* 533

RECOVERY OF DAMAGES AND PENALTIES.

85.—The clauses of the Railways Clauses Consolidation Act, 1845 (in Scotland, the Railways Clauses Consolidation (Scotland) Act, 1845), with respect to the recovery of damages not specially provided for, and of penalties, etc., to be incorporated with this and the special Act 533

SECTION PAGE
86.—*Repealed* 534
87.—All things required to be done by two justices in England and Ireland may, in certain cases, be done by one, and in Scotland by the sheriff, etc. 534
88.—Penalties, etc., imposed in respect of offences committed within the metropolitan police district to be paid to the receiver, and applied under 2 & 3 Vict. c. 71 534
89.—Persons giving false evidence liable to penalties of perjury 534

ACCESS TO SPECIAL ACT.

90.—Copies of special Act to be kept by undertakers in their office, and deposited with the clerks of the peace, etc., and be open to inspection 535
91.—Penalty of £20 on undertakers failing to keep or deposit such copies. Further penalty of £5 daily during continuance of offence 535
92.—Undertakers not exempt from the provisions of 57 Geo. 3, c. 29, or from the laws regulating sewers 535
93.—Undertakers not exempt from provisions of any future general Act ... 535
94.—*Repealed* 536

WATERWORKS CLAUSES ACT, 1863.

(26 & 27 VICT. c. 93.)

1.—Short title, the Waterworks Clauses Act, 1863. This and Act of 1847 may be cited together as the Waterworks Clauses Acts, 1847 and 1863 536
2.—To apply to any waterworks whose special Act incorporates this Act. Interpretation of terms 536

SECURITY OF RESERVOIRS.

3.—When any person interested complains to justices that any reservoir is in a dangerous state, inquiry may be made: or two justices may proceed without complaint 536
4.—If satisfied reservoir is in a dangerous state, and danger imminent, justices shall order some person to enter on property of undertakers and lower the water in the reservoir, and execute and do works and things requisite for removing cause of complaint 537
5.—If danger not imminent, summons to issue to undertakers to answer, and upon hearing, the justices may order the undertakers to lower water in reservoir, and execute and do works and things requisite for removing cause of complaint. If undertakers fail to execute and do such works, justices may order persons to do so, or may impose penalty not exceeding £10 per day on undertakers during such failure 538
6.—Form of order by justices 538
7.—Any person acting under such order not to be deemed trespasser. Penalty not exceeding £50 for wilfully obstructing such person ... 538
8.—Justices may order costs of and incident to order, and all or part of the expenses of the works and things executed and done in pursuance of such order, to be paid by the undertakers. Complainant may be ordered to pay undertakers' costs, if complaint groundless 538
9.—Appeal by undertakers from order of justices to court of general or quarter sessions 538
10.—The undertakers not to be responsible for consequence of order... ... 539

SECTION PAGE

11.—Provisions as to Scotland. Sheriff shall be deemed to be empowered as well as two justices. Provision for appeal from justices and from sheriff-substitute 539

SUPPLY OF WATER.

12.—Supply of water for domestic use shall not include water for cattle, or for horses, or for washing carriages, where such horses or carriages are kept for sale or hire or by a common carrier, or a supply for any trade, etc. 539

13.—Want of supply for other than domestic purposes excused if caused by frost, unusual drought, or other unavoidable cause or accident.. ... 539

14.—Power to let meters for hire 540

15.—Power for ascertaining quantity consumed by meter, and for removing meters, etc. 540

PROTECTION OF WATER.

16.—Power to cut off water in cases where anything is done in contravention of provisions for prevention of waste, misuse, undue consumption, or contamination, etc. 541

17.—Penalty not exceeding £5 for wilfully suffering any pipe, valve, cock, cistern, etc., to be out of repair, or to be so used as that water is, or is likely to be wasted, misused, etc.... 541

18.—Penalty not exceeding 40*s*. for application of water contrary to agreement 542

19.—Penalty not exceeding £5 for extension or alteration of pipes without consent of the undertakers 542

20.—Penalty not exceeding £5 for use of water without agreement 543

RECOVERY OF RATES.

21.—Rates may be recovered by action 544

SCHEDULE 544

WATERWORKS CLAUSES ACT, 1847.

(10 & 11 VICT. c. 17.)

An Act for consolidating in one Act certain Provisions usually contained in Acts authorising the making of Waterworks for supplying Towns with Water. [23rd April, 1847.]

Preamble repealed by Statute Law Revision Act, 1891 (54 & 55 Vict. c. 67).

Extent of Act.

[1.] This Act shall extend only to such waterworks as shall be authorised by any Act of Parliament hereafter to be passed which shall declare that this Act shall be incorporated therewith; and all the clauses of this Act, save so far as they shall be expressly varied or excepted by any such Act, shall apply to the undertaking authorised thereby, so far as the same shall be applicable to such undertaking, and shall, with the clauses of every other Act which shall be incorporated therewith, form part of such Act, and be construed therewith as forming one Act.

Sect. 1.

Special Acts, in incorporating this general Act, usually contain a saving similar to that above expressed.

A difficult point of construction arose in *Metropolitan Water Board* v. *New River Co.* (1904), 20 T. L. R. 687, in consequence of an inartistic incorporation of this Act in the New River Company's Act, 1852 (see p. 519), and the speeches of the learned Law Lords as to the meaning which should be given to expressions used in the special Act and in this Act should be carefully considered.

Interpretation in this Act:

And with respect to the construction of this Act, and any Act incorporated therewith, be it enacted as follows:—

"Special Act:" "Prescribed:" "The lands and streams:" "The undertaking:" "The undertakers:"

2. The expression "the special Act" used in this Act shall be construed to mean any Act which shall be hereafter passed authorising the construction of waterworks, and with which this Act shall be incorporated; and the word "prescribed" used in this Act in reference to any matter herein stated shall be construed to refer to such matter as the same shall be prescribed or provided for in the special Act, and the sentence in which such word occurs shall be construed as if instead of the word "prescribed" the expression "prescribed for that purpose in the special Act" had been used; and the expression "the lands and streams" shall mean the lands and streams of water which shall by the special Act be authorised to be taken or used for the purposes thereof; and the expression "the undertaking" shall mean the waterworks, and the works connected therewith, by the special Act authorised to be constructed; and the expression "the undertakers" shall mean the persons by the special Act authorised to construct the waterworks.

See definition of "lands" and of "streams" in the next section.

Interpretations in this and the special Act.

3. The following words and expressions in both this and the special Act, and any Act incorporated therewith, shall have the meanings hereby assigned to them, unless there be something in the subject or context repugnant to such construction; (that is to say,)

Number:

Words importing the singular number shall include the plural number, and words importing the plural number only shall include also the singular number:

The Scarborough Public Market Company obtained a special Act whereby they were authorised to "erect a market-house." The Act having incorporated the Markets and Fairs Clauses Act, 1847 (10 & 11 Vict. c. 14), which contains a similar interpretation clause, the Lords Justices of Appeal decided that the company might lawfully construct two distinct buildings or market-houses (*Richards* v. *Scarborough Public Market Co.* (1853), 23 L. J. Ch. 110). See now the Interpretation Act, 1889 (52 & 53 Vict. c. 63), which (repealing and superseding the 13 & 14 Vict. c. 21) enacts that words in the singular shall include the plural, and words in the plural shall include the singular.

Gender:

Words importing the masculine gender shall include females:

"Person:"

The word "person" shall include a corporation, whether aggregate or sole:

Sect. 3.

"Lands :" The word "lands" shall include messuages, lands, tenements, and hereditaments, or heritages of any tenure :

"Streams :" The word "streams" shall include springs, brooks, rivers, and other running waters :

"Street :" The word "street" shall include any square, court, or alley, highway, lane, road, thoroughfare, or public passage or place, within the limits of the special Act :

See *Maddock* v. *Wallasey Local Board*, cited under the same definition in the Gasworks Clauses Act, 1847, at p. 159, *ante.*

As to whether dock quays come within this definition, see *Bristol Waterworks Co.* v. *Mayor, etc. of Bristol* (1889), 5 T. L. R. 203, 551 (C. A.).

Where a local authority supply water to their district under the provisions of the Public Health Act, 1875, they have the same powers in regard to water mains as they have with regard to sewers, and the definition of "street" under that Act is wide enough to include a private road (*Hill* v. *Wallasey Local Board*, [1894] 1 Ch. 133).

"The waterworks :" The expression "the waterworks" shall mean the waterworks, and the works connected therewith, by the special Act authorised to be constructed :

"Water rate :" The expression "water rate" shall include any rent, reward, or payment to be made to the undertakers for a supply of water :

"Month :" The word "month" shall mean calendar month :

"Superior courts :" The expression "superior courts," where the matter submitted to, the cognisance of the court arises in England or Ireland, shall mean Her Majesty's superior courts of record at Westminster or Dublin, as the case may require, . . . and where such matter arises in Scotland, it shall mean the Court of Session :

Certain words omitted were repealed by the Statute Law Revision Act, 1891 (54 & 55 Vict. c. 67).

"Oath :" The word "oath" shall include affirmation in the case of Quakers and any declaration lawfully substituted for an oath in the case of any other person allowed by law to make a declaration instead of taking an oath :

See Oaths Act, 1888 (51 & 52 Vict. c. 46).

"County :" The word "county" shall include riding or other division of a county having a separate commission of the peace ; and in Scotland . . . any . . . division of a county . . . having a separate sheriff ; and it shall also include county of a city or county of a town :

Certain words omitted were repealed by the Statute Law Revision Acts, 1891 and 1893 (54 & 55 Vict. c. 67, and 56 & 57 Vict. c. 14), respectively.

"Justice :" The word "justice" shall mean justice of the peace acting for the place where the matter requiring the cognizance of any such justice arises ; and if such matter arise in respect of lands or streams situated not wholly in one jurisdiction shall mean a justice acting for the county or place where any part of such lands or streams shall be situated; and where any matter is authorised or required to be done by two justices, the expression "two justices" shall be understood to mean two or more justices met and acting together:

"Two justices:"

See the notes to s. 3 of the Gasworks Clauses Act, 1847 (10 & 11 Vict. c. 15), p. 159.

The word "sheriff" shall mean the sheriff depute of the county . . . in Scotland in which the matter submitted to the cognizance of the sheriff arises, and shall include the substitutes of such sheriff depute:

"Sheriff:"

Certain words omitted were repealed by the Statute Law Revision Acts, 1891 and 1893 (54 & 55 Vict. c. 67, and 56 & 57 Vict. c. 14), respectively.

The expression "quarter sessions" shall mean quarter sessions as defined in the special Act; and if such expression be not there defined it shall mean the court of general or quarter sessions of the peace which shall be held at the place nearest to the waterworks, or the principal office thereof, for the county or place in which the waterworks, or the principal office thereof, is situate, or for some division of such county having a separate commission of the peace:

"Quarter sessions:"

The expression "the town commissioners" shall mean the parties defined under that title in the special Act, and where no such parties shall be there defined shall mean the commissioners, trustees, or other parties having the control or management of the streets under any Act for paving or improving the town or district to be supplied with water under the special Act:

"The town commissioners:"

The word "inspector" shall mean an officer appointed under any local Act relating to the town or district supplied with water under the special Act for the purpose of inspecting or superintending works connected with the paving, drainage, or supply of water of such town or district, or an officer appointed under any general Act for executing the like duties with respect to such town or district together with other towns or districts:

"Inspector:"

As to this clause generally, see the Interpretation Act, 1889 (52 & 53 Vict. c. 63), and notes, *ante*, p. 161.

And with respect to citing this Act, or any part thereof, be it enacted as follows:

Citing the Act.

4. In citing this Act in other Acts of Parliament, and in legal instruments, it shall be enough to use the expression "the Waterworks Clauses Act, 1847."

Short title of this Act.

The Act of 1863, s. 1, provides that that and this Act may be cited together as the Waterworks Clauses Acts, 1847 and 1863.

5. For the purpose of incorporating part only of this Act with any Act hereafter to be passed, it shall be enough to describe the clauses

Form in which portions of this

Sect. 5.

Act may be incorporated in other Acts.

of this Act with respect to any matter in the words introductory to the enactment with respect to such matter, and to enact that the clauses so described, or that this Act, with the exception of the clauses so described, shall be incorporated with such Act; and thereupon all the clauses of this Act so incorporated shall, save so far as they are expressly varied or excepted by such Act, form part of such Act, and such Act shall be construed as if such clauses were set forth therein with reference to the matter to which such Act relates.

Construction of Waterworks.

And with respect to the construction of the waterworks, be it enacted as follows:

Construction of waterworks to be subject to the provisions of this Act and the Lands Clauses Consolidation Act, 1845.

6. Where by the special Act the undertakers shall be empowered, for the purpose of constructing or supplying waterworks, to take or use any lands or streams otherwise than with the consent of the owners and occupiers thereof, they shall, in exercising the power so given to them, be subject to the provisions and restrictions contained in this Act, and, if the waterworks be situated in England or Ireland, to the provisions and restrictions contained in the Lands Clauses Consolidation Act, 1845, and, if the waterworks be situated in Scotland, the provisions and restrictions contained in the Lands Clauses Consolidation, Scotland, Act, 1845; and shall make to the owners and occupiers of and all other parties interested in any lands or streams taken or used for the purposes of the special Act, or injuriously affected by the construction or maintenance of the works thereby authorised, or otherwise by the execution of the powers thereby conferred, full compensation for the value of the lands and streams so taken or used, and for all damage sustained by such owners, occupiers, and other persons, by reason of the exercise, as to such lands and streams, of the powers vested in the undertakers by this or the special Act, or any Act incorporated therewith; and, except where otherwise provided by this or the special Act, the amount of such compensation shall be determined in the manner provided by the said Lands Clauses Consolidation Acts respectively for determining questions of compensation with regard to lands purchased or taken under the provisions thereof; and all the provisions of the said last-mentioned Acts respectively shall be applicable to determine the amount of any such compensation, and to enforce payment or other satisfaction thereof.

See s. 3 for definition of "lands" and "streams."

The "provisions and restrictions" of the Lands Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 18), above referred to, are contained in ss. 16 *et seq.* of the Act, which is printed *in extenso, post.* The corresponding Act for Scotland is the 8 & 9 Vict. c. 19.

Compensation.

While the section in the text provides for "full compensation" to "the owners and occupiers of, and *all other parties interested* in any lands or streams taken or used" or "*injuriously affected* by the construction or maintenance of the works, or otherwise by the execution of the powers thereby conferred," such compensation being not only for the value of the lands and streams so taken or used, but also *for all damage sustained* by such owners, etc., by reason of the exercise, as to such lands and streams, of the powers of the undertakers, —the 12th section further enacts that the undertakers "shall make full compensation *to all parties interested* for all damage sustained by them through the exercise of such powers."

The section in the text places the taking of streams upon the same footing as the taking of lands under the Lands Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 18). When the whole of a stream is taken under this Act it is a taking of land within the meaning of the Lands Clauses Act, and therefore a notice to treat must be given, and those from whom the water is taken are not left to the remedy of compensation for damage sustained. Where, however, the water of a stream is only partly taken, then compensation for damage sustained is the proper remedy. A waterworks company was restrained from diverting a stream belonging to the plaintiff without first paying compensation for the same, or making deposit and giving a bond in accordance with the provisions of that Act (*Ferrand* v. *Mayor of Bradford* (1856), 21 Beav. 412). The Master of the Rolls considered, in this case, that s. 6 distinguishes between "taking and using" and "injuriously affecting," and that the diversion of a stream is a "taking and using" within the meaning of the Lands Clauses Act; and, therefore, that before such diversion can be effected the value of the stream must be ascertained and secured to the owners of the land through which it passes. And in *Stone* v. *Corporation of Yeovil* (1876), 2 C. P. D. 99, where a corporation, having power to purchase and divert the whole of a stream, had given notice of their intention to do so, but afterwards sought to limit their liability to compensation for damage sustained, the Court of Appeal decided that they were bound and empowered to make compensation at once for the whole value of the interest of the owners of the mill on the stream, and not merely to compensate them from time to time for injuriously affecting the property. In *Bush* v. *Trowbridge Waterworks Co.* (1875), L. R. 10 Ch. 459, the company diverted part only of a stream, and the plaintiff sought an injunction to restrain them until they gave a notice to treat and paid compensation. The lords justices held that he was not entitled to be treated with under s. 6 for the purchase of his interest (as in the two preceding cases), but only to compensation under s. 12 for the damage sustained. *Cf. Bradford Corporation* v. *Pickles*, [1895] A. C. 587. In *Page* v. *Kettering Waterworks Co.* (1892), 8 T. L. R. 228, the company, under their Act of 1889, took a certain amount of water from two brooks which fell into another stream, which fell into the Ise. The great bulk of the water thus taken, after being used for drainage purposes in Kettering, again fell into the Ise above the mills of the plaintiff. The plaintiff claimed compensation on the footing of a "taking" of so much water without crediting what was returned into the stream. The court held that the taking could not be considered a purchase under the Lands Clauses Act of so much water, but that the plaintiff was entitled to compensation to the extent to which he was injuriously affected; and thus the water returned had to be taken into account.

The Belfast Water Commissioners were empowered by their Act of 1865 to purchase or take on lease certain streams and waters referred to in deposited plans, including the W., D., and F. streams, by which last-mentioned streams the mill of G. and S., mill-owners, was worked. The Act limited seven years from its date for the execution by the commissioners of their statutory powers, and it contained provisions analogous to those of the Lands Clauses Act for the ascertainment of purchase-money, and of compensation payable to riparian proprietors, and for the sale by the commissioners of superfluous lands, waters, or other property. G. and S. claimed compensation for the W., D., and F. streams, and traversed the award of the arbitrator as insufficient. An agreement was then entered into to take a verdict by consent, at a certain sum agreed upon for the interests of G. and S., "in the waters required for the purposes of the Act, their property, for compensation for injury to other premises held by the traversers, and for all rights, easements, and powers affecting the property of the traversers, acquired for the purposes of the Act, and for all consequential damage." The sum agreed on was paid to G. and S., who subsequently conveyed and assigned their mill and premises to the plaintiffs. The commissioners did not within the period limited by the Act of 1865 divert or take any portion of the D. stream;

Sect. 6.
NOTE.

but in 1874 they obtained a further Act authorising additional works to be executed according to plans, varying from those referred to in the Act of 1865, and, in carrying out the powers of the Act of 1874, the commissioners found it necessary to divert the whole of the D. stream:—*Held*, that the commissioners had, under the Act of 1865, absolutely purchased all the water rights of G. and S., that the property so acquired remained in them, notwithstanding the expiration of the period of seven years from the Act of 1865, and that the commissioners were entitled, without any further compensation to the plaintiffs as assignees of G. and S., to appropriate and divert the water of the D. and F. streams for the purposes of the works contemplated by the Act of 1874 (*Girdwood* v. *Belfast Water Commissioners* (1877), 1 L. R. Ir. 28).

Where by a company's special Act all rights of proprietors not specially provided for by the Act are reserved, the remedy of a riparian proprietor injured by the fouling of a stream by the company's works, is under the general law, and not under this Act (*Clowes* v. *Staffordshire Potteries Waterworks Co.* (1872), L. R. 8 Ch. 125).

The right to compensation given by the above section and s. 12, *post*, p. 435, is not, by reason of the heading of the group of sections to which these sections belong, limited to compensation for damage caused during the construction of the waterworks, but extends to damage caused by the taking of water for the purposes of the waterworks after completion. The defendant corporation were empowered by a special Act, which incorporated the Waterworks Clauses Act, 1847, to construct waterworks for the purpose of supplying water in a certain district. By pumping water from a well for the purpose of supplying the district, the corporation abstracted wet running silt from under the plaintiff's land, with the result that his house and land were damaged by subsidence. It was held that the plaintiff was entitled to recover compensation under ss. 6 and 12 of the Act (*Fletcher* v. *Birkenhead Corporation*, [1907] 1 K. B. 205).

Injuriously affecting lands, etc.

The following are some instances of "injuriously affecting" within the meaning of the Lands Clauses Consolidation Act:—*Mortimer* v. *South Wales Rail. Co.* (1859), 1 E. & E. 375, where the defendants partially diverted water which flowed into the plaintiff's tan yard; *Ware* v. *Regent's Canal Co.* (1858), 3 De G. & J. 212, where occasional flooding of the plaintiff's lands was caused by works of the defendants properly executed; *Little* v. *Dublin and Drogheda Rail. Co.* (1857), 7 L. R. Ir. 82, where the defendants diverted a stream which a farmer used for irrigation and watering his cattle; *R* v. *Nottingham Old Waterworks Co.* (1837), 6 A. & E. 355, where the removal of a weir by the defendants impeded the plaintiff's mill, and lessened its value; *R.* v. *North Midland Rail. Co.* (1840), 2 Rail. Cas. 1, where the defendants raised the level of a brook into which the sough of a coal mine had been wont to empty itself, and thereby caused the water of the brook to flow into the sough, and inundate and stop the coal works; *R.* v. *Commissioners of the Navigation of the Thames and Isis* (1836), 5 A. & E. 804, where the defendants made a cut in the river, by which barges were enabled to avoid a part of the river on which was an ancient towing path, and so to deprive the owner of the tolls, etc. In *R.* v. *Bristol Dock Co.* (1810), 12 East, 429, it was decided that the owners of a brewery were not entitled to compensation for loss arising to them in their business from the deterioration of the water of the public river Avon, from which the brewery had been before supplied by means of pipes laid under low-water mark, the use of the water being common to all the King's subjects, and not claimed as an easement to the particular tenement.

By s. 43 of the Kirkcaldy and Dysart Waterworks Act, 1867 (30 & 31 Vict. c. cxxxix.), it was provided that the commissioners under the Act "should be bound to make good to the Countess of Rothes and her heirs, etc., all damages which may be occasioned to her or them, by reason of, or in consequence of, any bursting, or flow or escape of water from any reservoir, or aqueduct or pipe, or other work connected therewith," which may be constructed by the commissioners. The countess was proprietrix of lands situated below the site of one of the reservoirs, and during an extraordinary rainfall a great quantity of water was continuously discharged from the reservoir through a waste weir into the watercourse of a burn, and did much damage to her lands. She claimed compensation. There was no failure or insufficiency of the works, and no negligence :—*Held*, reversing the decision of the court below (Lord BLACKBURN dissenting), that on the construction of the above clause, the countess was entitled to compensation for damage by flood waters from the reservoir, no matter how caused. *Per* Lord WATSON : Statutory provisions, such as here, in a local and personal Act must be regarded as a contract between the parties, whether made by their mutual agreement, or forced on them by the legislature (*Countess of Rothes* v. *Kirkcaldy and Dysart Waterworks Commissioners* (1882), 7 App. Cas. 694). See the comment of STIRLING, J., on this case in *In re Manchester and Milford Rail. Co.*, [1897] 1 Ch. 276.

Mines.

Mines are lands within the meaning of the section in the text. In claims in respect of the non-working of mines adjoining the railway or works, ss. 6 and 78 of the Railway Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20) (corresponding to ss. 6 and 22 of the Waterworks Clauses Act, 1847), must be construed together. Section 6 gives a general right to compensation to "owners and occupiers of and all other parties interested in lands taken or injuriously affected by the construction" of the railway. In s. 78 the person entitled to give notice to the company of his intention within thirty days to work a mine is the "owner, lessee, or occupier," who has the right and the power to work it. The company are entitled to have an inspection of the mine, and to offer compensation to him for not working, which compensation may be settled as therein mentioned. The compensation thus settled is that to which he is individually entitled, according to the extent of his interest. If the lessee is the person thus giving notice and receiving compensation, the owner, if he can show a right of his own beyond that of his lessee who has been compensated, is also entitled to compensation under s. 6. See *Smith* v. *G. W. Rail. Co.* (1877), 3 App. Cas. 165 ; and *Holliday* v. *Mayor, etc. of Wakefield*, [1891] A. C. 81.

Compensation in particular cases.

The appellant granted to D. certain mills on a stream forming the outlet of two lochs nearly surrounded by his property, with his "whole rights of water and water power connected with the said mills" ; "reserving" all his "rights in the lochs" and stream, "except the rights therein connected with the mills." The storage capacity of the lochs had been increased by embankments made within the appellant's ground. The respondents, who were waterworks commissioners under a special Act, acquired by agreements the rights of D. in the water, and under their compulsory powers took from the appellant a small piece of ground and a wayleave for a pipe, which they inserted in the stream, and diverted the waters of the lochs to supply a town. Section 9 of the special Act provided that a certain quantity of water sent down the stream daily should be held to be a sufficient compensation to the mill-owners and others. Section 10 reserved, *inter alia*, any rights the appellant had in Loch Humphrey. In a claim for compensation the arbitrator found the appellant entitled (1) to £50 for the land and wayleave ; and (2) "in the event of it being determined that the appellant had retained any right or interest in the waters of the lochs and the streams or any of them, and that he is now entitled to compensation in respect of such right or interest, I find £3,000 to be the amount to be paid" in respect of the right or interest to be acquired from the appellant "in the foresaid waters and the embankments" at the lochs, "including in the said sum of £3,000 the sum of £1,650 as the estimated price or value of the embankments" :—*Held*, reversing the decision of the Court of Session (13 Ct. Sess. Cas., 4th ser., 636), that the award was valid, inasmuch as the arbitrator had valued only one thing, the enhanced value of the water in the lochs, and had not valued, as a separate subject, the embankments, but had properly included in the £3,000, as a factor of value, the incidental right obtained by the respondents to have the embankments left standing (*Lord Blantyre* v. *Babtie* (1888), 13 App. Cas. 631). Where certain streams of water had been abstracted from the appellant's property by a water company acting under the Barbados Water Supply Act, 1886, it was held by the Privy Council that the compensation due to the appellant included the value of his proprietary interest therein, and was not limited to the

Sect. 6.

NOTE.

amount of pecuniary benefits obtained by past user thereof in disregard of possible benefits in the future (*Trent-Stoughton* v. *Barbados Water Supply Co.*, [1893] A. C. 502).

Compensation water.

It is provided by Standing Order 185 of the House of Commons that "In the case of every Bill whereby it is proposed to impound the whole or any part of the water of any river or stream, and to give a flow of water in compensation for the water so impounded, the committee on the bill shall inquire into the expediency of making provision, so far as may be practicable, that the whole or a minimum amount of such compensation water shall be given in a continuous flow throughout the twenty-four hours of every day, and shall report to the House accordingly." The House of Lords Standing Order 110A is in the same terms except that the last seven words are omitted. See s. 5 of the Model Water Bill, *post*, and the INTRODUCTION.

See as to the liability to riparian owners for damage caused by the pollution of compensation water from accidental causes, *Edinburgh Water Trustees* v. *Sommerville and Son* (1906), 95 L. T. 217. See also as to the recovery of penalties for breach of statutory duty to supply compensation water the cases of *Beaumont and others* v. *Huddersfield Corporation* and *Meltham Spinning Co.* v. *Huddersfield Corporation*, cited in the INTRODUCTION at pp. 80, 81.

Easement of carrying pipes through lands.

A water company cannot (unless specially authorised by their Act) compel a landowner to sell them the mere easement of laying pipes in and through his land; the landowner is entitled to insist on their taking the whole land *ab infero usque ad cœlum.* A sanitary authority under the Public Health Act, 1875 (Support of Sewers) Amendment Act, 1883 (46 & 47 Vict. c. 37), may purchase the easement and right of support and nothing more. See *post.* Companies purposing merely to tunnel underneath land may be compelled to take the surface as well. See *Ramsden* v. *Manchester, etc. Rail. Co.* (1848), 1 Ex. 723; *Sparrow* v. *Oxford, etc. Rail. Co.* (1852), 2 De G. M. & G., at p. 108; *Macgregor* v. *Metropolitan Rail. Co.* (1866), 14 L. T. (N. S.) 354. But see *Simpson* v. *South Staffordshire Waterworks Co.* (1865), 34 L. J. Ch. 380. Nevertheless, when owners of private land—"land not dedicated to public use," see s. 29—are willing to allow pipes through their land, the parties generally bargain for the easement or wayleave merely. As regards public streets, roads, etc., they are governed by s. 28, which gives the right to lay pipes on certain conditions being observed. Special waterworks Acts generally contain a clause enabling limited owners to grant an easement merely. The following is the usual form:

Power to take easements, etc., by agreement.

> "Persons empowered by the Land Clauses Acts to sell and convey or release lands may, if they think fit, subject to the provisions of those Acts or of this Act, grant to the company any easement, right, or privilege (not being an easement, right, or privilege of water, in which persons other than the grantors have an interest) required for the purposes of this Act in, over, or affecting any such lands, and the provisions of the said Acts with respect to land and rentcharges, so far as the same are applicable in this behalf, shall extend and apply to such grants and to such easements, rights, and privileges as aforesaid respectively."

Manchester Act, 1879.

In exceptional cases, such as those of Manchester, Liverpool, and Birmingham, exceptional provisions were specially conferred to enable easements merely to be taken compulsorily under the Lands Clauses Acts unless the owner insisted on the whole of his interest being acquired. The following section occurs in the Manchester Corporation Waterworks Act, 1879 (42 Vict. c. xxxvi.), which authorised the Thirlmere scheme:

Corporation may acquire easement only in certain lands.

> "69. The corporation may, in lieu of acquiring any lands in the counties of Westmoreland and Lancaster, or either of them (other than the lands required for the new reservoir by this Act authorised to be constructed in the township of Prestwich, in the county of Lancaster), acquire such easements and rights in such lands as they may require for the purpose of constructing, placing, laying, inspecting, maintaining,

Sect. 6.

NOTE.

> cleansing, repairing, conducting, or managing the waterworks by this Act authorised, and may give notice to treat in respect of such easements and rights, and may in such notice describe the nature thereof, and the several provisions of the Lands Clauses Consolidation Act, 1845, inclusive of those with regard to arbitration and the summoning of a jury, shall apply to such easements and rights as fully as if the same were lands within the meaning of such Act. Provided always, that nothing herein contained shall authorise the corporation to acquire by compulsion any such easement in any case in which the owner in his particulars of claim shall require the corporation to acquire the lands in respect of which they have given notice to treat for the acquisition of an easement only, and every notice to treat for the acquisition of an easement shall be endorsed with notice of this proviso."

This proviso is omitted from s. 17 of the Manchester Corporation General Powers Act, 1904, which authorises the acquisition of easements only in connection with their further waterworks authorised by that Act.

Liverpool Act, 1880.

The following section occurs in the Liverpool Corporation Waterworks Act, 1880 (43 & 44 Vict. c. cxliii.), which authorised the Vyrnwy scheme:

Corporation may acquire easements only in certain lands.

> "7. The corporation may, in lieu of acquiring any lands for the purpose of any aqueducts, conduits, or pipes by this Act authorised, acquire such easements and rights in such lands as they may require for the purpose of constructing, placing, laying, inspecting, maintaining, cleansing, repairing, conducting, or managing the same, and may give notice to treat in respect of such easements and rights, and may in such notice describe the nature thereof, and the several provisions of the Lands Clauses Consolidation Acts, 1845, 1860, and 1869, inclusive of those with regard to arbitration and the summoning of a jury, shall apply to such easements and rights as fully as if the same were lands within the meaning of such Act. Provided always, that nothing herein contained shall authorise the corporation to acquire by compulsion any such easement in any case in which the owner in his particulars of claim shall require the corporation to acquire the lands in respect of which they have given notice to treat for the acquisition of an easement only, and every notice to treat for the acquisition of an easement shall be indorsed with notice of this proviso. Provided also, that as regards any lands taken or used by the corporation for the purpose of laying aqueducts, conduits, or pipes therein, where such aqueducts, conduits, or pipes are laid underground, the corporation shall not (unless they give notice to treat for such lands, and not merely for easements therein) be required or entitled to fence off or sever such lands from the adjoining lands, but the owners or occupiers for the time being shall at all times, after the completion of the works, have the same rights of passing over such lands for all purposes of or connected with the use or enjoyment of the adjoining lands as if such lands had not been taken or used by the corporation."

Birmingham Act, 1892.

See also s. 7 of the Birmingham Corporation Water Act, 1892 (55 & 56 Vict. c. clxxiii.), which authorised the obtaining of a supply of water from the rivers Elan and Claerwen, and their tributaries in the counties of Cardigan, Radnor, Brecknock, and Montgomery.

Later instances.

In later Water Acts Parliament has followed these precedents, and has allowed the insertion of a clause enabling the undertakers to acquire easements compulsorily under the machinery of the Lands Clauses Act (8 & 9 Vict. c. 18), "unless the owner in his particulars of claim shall require the undertakers to acquire the lands in respect of which they have given notice to treat for the acquisition of an easement only. See *e.g.*, Bury Corporation Water Act, 1899 (62 & 63 Vict. c. lxxxi.), s. 14; Burley-in-Wharfedale Urban District Council Act, 1899 (62 & 63 Vict. c. xx.), s. 15; Crowborough District Water Act, 1899 (62 & 63 Vict. c. xlvi.), s. 12; Derwent Valley Water Act, 1899 (62 & 63 Vict. c. cclxix.), s. 35; Bath Corporation Water Act, 1903) 3 Edw. 7, c. ccvii.) s. 8; Merthyr Tydfil Urban District Council Act, 1903 (3 Edw. 7, c. cxiv.), s. 27; Scunthorpe Urban District Council

Sect. 6.

Act, 1903 (3 Edw. 7, c. xciii.), s. 10; Torquay Corporation Water Act, 1903 (3 Edw. 7, c. cvi.), s. 11; Bexhill Water and Gas Act, 1904 (4 Edw. 7, c. lxx.), s. 31; Preston Corporation Water Act, 1904, s. 9; Leeds Corporation (Waterworks) Railway Act, 1904, s. 11; Skipton Water and Improvement Act, 1904, s. 35; Thurles Urban District Council Act, 1904, s. 13; Doncaster Corporation Act, 1904, s. 25; Selby Urban District Council Act, 1904, s. 57; Oakengates and Dawley Joint Water Board Act, 1904, s. 30 (*Cf.* Manchester Corporation (General Powers) Act, 1904, s. 17); Littlestone-on-Sea and District Water Act, 1904, s. 31; Shipley Urban District Council Act, 1904, s. 14; Harrogate Waterworks Tramroad Act, 1904, s. 16; Holderness Water Act, 1908 (8 Edw. 7, c. xcix.), s. 49. And see clause 10 of the Model Water Bill.

Rights incident to easements.

The easement of laying pipes through any land not dedicated to public use may be acquired by agreement (see s. 29, *post*, p. 463). When so acquired, the company tacitly acquire also the right to enter upon those lands from time to time as occasion may reasonably require, in order to renew or repair their pipes. Whoever grants a thing is supposed also tacitly to grant that without which the grant itself would be of no effect (11 Rep. 52). See also the express terms of s. 29, *post*, on this subject. In *Pomfret* v. *Ricroft* (1680), 1 Wms. Saund. 321, TWYSDEN, J., observed, "If a man gives me a licence to lay pipes of lead in his land to convey water to my cistern, I may afterwards enter and dig the land to mend the pipes, though the soil belongs to another and not to me." On the same ground, it has been decided in America that the grant of a right to build a dam carries with it a right to enter and repair the dam and cleanse the pond (*Fraily* v. *Waters* (1847), 7 Barr. (Pennsylvania) 221; Angell on Watercourses, s. 158). The same principle would necessarily apply in the case of the grant of a right to construct a reservoir. On this subject see also *per* Lord ELLENBOROUGH, C.J. in *Hodgson* v. *Field* (1806), 7 East, at p. 622; *Hinchliffe* v. *Earl of Kinnoul* (1838), 5 Bing. N. C. 1; *Hall* v. *Lund* (1863), 1 H. & C. 676. "Where," says Angell (Watercourses, s. 363), "an easement—as a right to lay aqueduct logs through land—is granted in general terms, without giving definite location and description to it, so that part of the land over which the right is to be exercised cannot be definitely ascertained, the grantee does not thereby acquire a right to use the servient estate without limitation as to the place or mode in which the easement is to be enjoyed. When the right granted has been once exercised in a fixed and definite course, with the full acquiescence and consent of both parties, it cannot be changed at the pleasure of the grantee. If it be admitted that he has the right originally to select the place on which the easement is to be enjoyed, he cannot afterwards alter it. This rule rests on the principle that where the terms of a grant are general or indefinite, so that its construction is uncertain and ambiguous, the acts of the parties, contemporaneous with the grant, giving a practical construction to it, shall be deemed to be a just exposition of the intent of the parties." Where the owner of land on the bank of a river, for the purpose of bringing water from the river to a mill which he erected, made a watercourse with a shuttle at the head of it to control the flow of the water from the river into the watercourse, and afterwards conveyed away a portion of his land adjoining, and his successor in title subsequently granted to the owner of the adjoining land so conveyed a right to use the water for the purposes of a mill belonging to him:—*Held*, that the existence of that right did not affect the obligation of the owner of the watercourse towards the owner of the adjoining land to keep the shuttle in repair so as to prevent flood water from the river getting into the watercourse and overflowing on to his land; *Pomfret* v. *Ricroft*, *supra*, discussed; (*R. H. Buckley & Sons, Ltd.* v. *N. Buckley & Sons*, [1898] 2 Q. B. 608).

Jurisdiction of conservators under Salmon Fishery Acts.

The Salmon Fishery Act, 1865 (28 & 29 Vict. c. 121), provides that the limits of a river shall be defined, and a fishery district shall be formed for the purpose of the Salmon Fishery Acts by the certificate of a secretary of state, and by s. 3 "river" is defined to include "such portion of any stream with its tributaries" as may be declared in the certificate. In *Harbottle* v. *Terry* (1882), 10 Q. B. D. 131, it was held that the reservoirs of the Newcastle and Gateshead Waterworks Company were not "tributaries" of the Tyne, and therefore not subject to the jurisdiction of the board of conservators for the district. In *George* v. *Carpenter*, [1893] 1 Q. B. 505, a similar decision was come to in regard to the Vyrnwy reservoir, which was held not to be within the jurisdiction of the conservators of the Severn fishery district. A similar decision was given in *Stead* v. *Nicholas*, [1901] 2 K. B. 163. *Cf. Moses* v. *Iggo*, [1906] 1 K. B. 516. A water bailiff appointed under the Salmon Fishery Acts is bound, before attempting to exercise his power of searching boats, etc., used in fishing, to produce the instrument of his appointment (*Barnacott* v. *Passmore* (1887), 19 Q. B. D. 75). As to the byelaws of such conservators, see *Pidler* v. *Berry* (1888), 59 L. T. 230).

General rule as to water company's liability for damage.

The general rule as to the liability of waterworks companies and other bodies having parliamentary powers, in respect of damage caused by their operations, is thus summarised: "Where water is diverted or regulated for public purposes under Act of Parliament, as by conservators of a river, a waterworks or canal company, the authorities managing the water are not liable to an action for its escape, though caused by them, unless they exceed their powers, or are negligent in the execution of them; though the party injured may be entitled to compensation if the Act so provides" (Gale on Easements, 6th ed., p. 415). Accordingly, in the case of *Cracknell* v. *Mayor and Corporation of Thetford* (1869), L. R. 4 C. P. 629, the defendants having been empowered by a private Act of Parliament to render navigable the river Brandon, and to take tolls for the purpose of repaying the necessary expense and having, in the exercise of their powers under the Act, erected staunches in the river, and the result of these, combined with the natural growth of the weeds in the river and the accumulation of silt against the staunches, being that the river overflowed its banks and damaged the plaintiff's land; it was held, that there was no obligation on the defendants to cut the weeds or dredge the silt, unless it was necessary to do so for the benefit of the navigation; and that the plaintiff's remedy, if any, was not by action against them for not doing so, but by applying for compensation under the Act. See also *Parrett Navigation Co.* v. *Robins* (1842), 10 M. & W. 593. These cases are to be distinguished from that class of cases of which *Bagnall* v. *L. & N. W. Rail. Co.* (1862), 1 H. & C. 544, may be cited as an instance. In that case Willes, J., in delivering the judgment of the Court, said: "In this case the conjoint effect of the making of the defendant's cutting and of their neglect to keep their drains in proper order has been that large quantities of water which but for the cutting would not have come near the plaintiff's mine, and but for the defective state of the drains would have passed away and been carried off without injury to the mine, poured down into and damaged the mine." For the damage so done the plaintiff was held entitled to recover, and it was also held that such damage was not the subject of compensation under the compensation clauses of the Railways and Lands Clauses Acts, 1845 (8 & 9 Vict. c. 20; 8 & 9 Vict. c. 18). The authorities will be found fully discussed in *Geddis* v. *Proprietors of Bann Reservoir* (1878), 3 App. Cas. 430, which case establishes the further principle, that "if by a reasonable exercise of the powers either given by statutes to the promoters, or which they have at common law, the damage could be prevented, it is, within this rule, 'negligence' not to make such reasonable exercise of their powers": *per* Lord Blackburn, at p. 456. In that case a company was authorised by its special Act to construct a reservoir, to divert into it the water of the river Muddock, and of other streams, and from the reservoir to supply through the channel of the Muddock sufficient water to enable the mills on the river Bann to be worked at all seasons of the year; and these works they executed without negligence and in due exercise of their parliamentary powers. In consequence of these works, the channel of the Muddock near the plaintiff's land become choked, and, for want of cleansing, incapable of discharging the increased volume of water so sent through it, and the plaintiff's land was thereby flooded and injured. The Act contained a clause enabling the company to scour, cleanse, etc. The House of Lords (reversing 11 Ir. R. C. L. 160—Exch. Ch.) held that the company were liable for the injury done. In a later case, Lindley, M.R., thus put the principle decided in the above case: "The defendants flooded the plaintiffs' land, and said, in effect, that they could not help it. The answer was that they could help it if they kept a stream, into which they poured water, free from obstruction

Sect. 6.

NOTE.

by mud, which they could do if they chose" (*Southwark and Vauxhall Water Co.* v. *Wandsworth District B. of W.*, [1898] 2 Ch. at p. 608). "It has been determined over and over again that if a person or a body of persons having statutory authority for the construction of works (whether those works were for the benefit of the public or for the benefit of the undertakers and partly for the good of the public) exceeded or abused the powers conferred by the legislature, the remedy of a person injured in consequence, was by action or suit and not by a proceeding for compensation under the statute which had been so trangressed. Powers of that sort were to be exercised with ordinary care and skill and with some regard to the property and rights of others. They were granted on the condition sometimes expressed and sometimes understood—expressed in the Act of 1890, but if not expressed always understood—that the undertakers shall do as little damage as possible in the exercise of their statutory powers." *Baroda, Gaekwar of* v. *Gandhi Kachrabhai Kasturchand*, [1903] L. R. 30, Ind. App. 60, *per* Lord MACNAGHTEN. (See also *Managers of Metropolitan Asylum District* v. *Hill* (1881), 6 App. Cas. 193; and *Dixon* v. *Metropolitan B. of W.* (1881), 7 Q. B. D. 418, cited *infra*; *National Telephone Co.* v. *Baker*, [1893] 2 Ch. 186; and *L. B. & S. C. Rail. Co.* v. *Truman* (1885), 11 App. Cas. 45; *East Fremantle Corporation* v. *Annois*, [1902] A. C. 213; *Benning* v. *Ilford Gas Co.*, Jl. of G. L., August 9th, 1904, p. 401. *Cf. Canadian Pacific Rail. Co.* v. *Parke*, [1899] A. C. 535).

By a local Act of 1859, s. 7, the Corporation of York was authorised to abandon the navigation of the river Foss, which they had previously purchased; to alter the channel, and to remove locks or works connected with the navigation; but, before removing any locks, the corporation was to make due provision for the escape or disposal of the water held up by such locks, or theretofore accustomed to flow along or into the channel of the navigation, so as to prevent the same from overflowing or otherwise damaging the adjacent lands. By s. 19, the corporation, at their own expense, was to make, and for the period of five years maintain, such arches, drains, and passages as should in consequence of any alteration of the navigation be necessary and sufficient to convey the water from the lands adjoining the navigation into the river. The corporation abandoned the navigation, and made alterations, the effect of which was that if the channel remained in the state it then was, due provision was made for the escape of the water. They, however, took no measures to prevent the navigation from becoming silted up and choked with weeds, and, in consequence, the land adjoining the river, about a mile above the alterations, was flooded during an extraordinary rainfall, and the grass was damaged. It was held that the corporation was not responsible for this damage (*Hodgson* v. *York* (*Mayor, etc.*) (1873), 28 L. T. 836). See, however, the provisions of s. 14 of the Land Drainage Act, 1847, and *Finch* v. *Bannister*, [1908] 2 K. B. 441, decided thereunder, as to the liability to scour streams of occupiers of lands through which they pass or on which they abut.

In *Dunn* v. *Company of Proprietors of Birmingham Canal Navigation* (1872), L. R. 8 Q. B. 42, it appeared that the defendants duly constructed a canal under parliamentary powers. The owners of underlying minerals gave notice of their intention to work and the defendants declined to purchase. Plaintiff proceeded to work the mines without regard to the surface, and without attempting to support it, and knowing that the effect would be to let down the surface and probably disturb the strata, and that there was danger of the water escaping from the canal; but, except as above, plaintiff did not work his mine in any negligent or unskilful or improper manner, but got the coal in the manner in which that vein of coal is ordinarily got; and without doing so he could not have obtained the full benefit of his coal. The result of the working was that the strata became dislocated, and the water of the canal escaped through the cracks and flooded the workings, and plaintiff was obliged to abandon his coal. It was held (affirming the judgment of the Queen's Bench), that an action of tort could not be maintained. *Semble*, by KELLY, C.B., and PIGOTT, B., that the plaintiff was entitled to compensation under the Act.

A main belonging to a waterworks company burst, and the water flooded the plaintiff's premises, causing considerable damage:—*Held* (distinguishing this case from *Rylands* v. *Fletcher* (1868), L. R. 3 H. L. 330), that the company being authorised by Act of Parliament to lay the main, and having been guilty of no negligence, were not liable in damages to the plaintiffs (*Green* v. *Chelsea Waterworks Co.* (1894), 70 L. T. 547). See a decision to the same effect by HUDDLESTON, B., in *Snook* v. *Grand Junction Waterworks Co.* (1886), 2 T. L. R. 308; and see *Dixon* v. *Metropolitan B. of W.* (1881), 7 Q. B. D. 418, cited *infra* and *post*, p. 397.

A waterworks company obtained statutory powers to take water from a stream and to form a reservoir for impounding the same out of which reservoir they were by the special Act required to send down a certain quantity of compensation water for the benefit of the millowners and others lower down, nothing being provided as to the purity of this compensation water. The reservoir was duly constructed. The successors in title of the water company allowed the water in the reservoir to be drawn off to such a low level that silt which had collected on the bottom rendered the water unfit for the purposes of certain of the millowners, who were papermakers. In an action at the instance of these papermakers it was held by the Court of Session in Scotland that the undertakers were bound to send the compensation water down, free from such pollution as was preventable under a reasonable system of management (*William Sommerville & Son, Ltd.* v. *Edinburgh and District Water Trustees* (1905), 7 F. 1060). On appeal to the House of Lords it was held (*per* the Lord CHANCELLOR and Lords MACNAGHTEN, DAVEY and ATKINSON, Lords JAMES OF HEREFORD and ROBERTSON dissenting), that it was for the millowners to show affirmatively that the powers of the water trustees had not been exercised with reasonable precaution, and that they had failed to do this. Lord JAMES OF HEREFORD and Lord ROBERTSON held that the water trustees had a duty to the millowners in managing the compensation ponds, and that they had failed to discharge it (*Edinburgh and District Water Trustees* v. *William Sommerville & Son, Ltd.* (1906), 95 L. T. 217).

Where negligence the gist of action.

Where a work of a public character (as a canal) has been constructed under the authority of an Act of Parliament, a right of action for an injury not occasioned wilfully, nor by any act necessarily causing it, but arising from the user of the work (as, for instance, through the overflow of the water of the canal), must be founded on negligence, and negligence is the essence of the action; and although the jury has given a verdict for the plaintiff, and it has been proved that the proximate cause of the injury was an act of the company's servants (as raising a flood-gate), yet if it is doubtful whether that act necessarily must have caused the injury, and the jury also finds that there was no negligence, the verdict will be entered for the company (*Whitehouse* v. *Birmingham Canal Co.* (1857), 27 L. J. Ex. 25). See *Blyth* v. *Birmingham Waterworks Co.* (1856), 11 Ex. 781. Where a public body, acting in discharge of a duty cast upon them by Parliament, injure an individual, such injury being the inevitable result of what Parliament has authorised them to do, they are not liable (*Dixon* v. *Metropolitan B. of W.* (1881), 7 Q. B. D. 418). Where the terms of a statute are not imperative, but permissive, the inference is that the legislature intended that the discretion as to the use of the general powers thereby conferred should be exercised in strict conformity with private rights, and therefore no nuisance may be created (*Managers of Metropolitan Asylum District* v. *Hill* (1881), 6 App. Cas. 193). *Cf. Attorney-General* v. *Nottingham Corporation*, [1904] 1 Ch. 673 and *Attorney-General* v. *Rathmines and Pembroke Hospital Board*, [1904] 1 Ir. R. 161. See also *Canadian Pacific Rail. Co.* v. *Parke*, [1899] A. C. 535; *Bendelow* v. *Wortley Union* (1888), 57 L. J. Ch. 762, and compare *L. B. & S. C. Rail. Co.* v. *Truman* (1885), 11 App. Cas. 45. The Tramways Act, 1870 (33 & 34 Vict. c. 78), regulating tramway companies, authorised by statute to use tramcars in the public streets, enacts by s. 55 that "The promoters or lessees, as the case may be, shall be answerable for all accident, damages, and injuries happening through their act or default, or through the act or default of any person in their employment by reason or in consequence of any of their works or

Sect. 6.

NOTE.

carriages. . . . ":—*Held*, that s. 55 applies only to a wrongful act or default, and does not make the promoters or lessees answerable for mere accident caused without negligence by their use of tramcars (*Brocklehurst* v. *Manchester, Bury, etc. Steam Tramways Co.* (1886), 17 Q. B. D. 118). A man who creates on his land an electric current for his own purposes, and discharges it into the earth beyond his control, is, on the principle of *Fletcher* v. *Rylands* (1868), L. R. 3 H. L. 330, as responsible for damage caused by that current as he would have been if, instead, he had discharged a stream of water. Where the act is done in pursuance of a provisional order of the Board of Trade, it is protected to the same extent as other nuisances under statutory authority. A tramway company, acting under a provisional order and using the best known system of electrical traction, caused electrical disturbance in the wires of a telephone company acting under licence from the Postmaster-General:—*Held*, that the tramway company were protected from liability for nuisance (*National Telephone Co.* v. *Baker*, [1893] 2 Ch. 186). See also *Eastern and South African Telegraph Co., Ltd.* v. *Cape Town Tramways Co., Ltd.*, [1902] A. C. 381.

Unreasonable use of statutory powers.

A railway company was carrying on work by night as well as by day on the site of a proposed tube station, and the plaintiff alleged that his house was thereby rendered uninhabitable; he claimed damages and an injunction on the ground that the mode of working was a vexatious and unreasonable abuse by the defendants of their statutory powers—negligence was not alleged. On the trial of a preliminary point of law whether an action would lie for mere unreasonableness in the exercise of a statutory power, it was held that, assuming it to be unreasonable to work at night, there was a good cause of action (*Roberts* v. *Charing Cross, etc. Rail. Co.* (1903), 87 L. T. 732, applying *Coats* v. *Clarence Rail. Co.* (1830), 1 Russ. & My. 181).

Negligent construction of works.

If works made lawful by an Act of Parliament be constructed negligently or unskilfully, and damage result, the wrongdoers are liable in damages, notwithstanding the protection of the Act of Parliament under which they acted. "The distinction is now clearly established between damage from works authorised by statutes where the party is generally to have compensation, and the authority is a bar to an action, and damage by reason of the works being negligently done as to which the owner's remedy by way of action remains": *per* CROMPTON, J., in *Brine* v. *G. W. Rail. Co.* (1862), 2 B. & S. 402). And see *Clothier* v. *Webster* (1862), 12 C. B. (N.S.) 790; *Lawrence* v. *G. N. Rail. Co.* (1851), 16 Q. B. 643; and *Mersey Docks Trustees* v. *Gibbs* (1866), L. R. 1 H. L. 93.

Fire-plugs.

As to damage caused by non-maintenance of fire-plugs, etc., in the public streets, see *post*, pp. 480 *et seq.*

Leakage from reservoir.

In an action for injury caused by the leaking of water from a reservoir belonging to a canal, it was pleaded that the damage was caused by the leaking of water through the banks of the reservoir, and not in any manner whatsoever by reason of the execution of the powers of the Act, but by the default of the plaintiffs themselves in sinking shafts and pits in their own land and so causing large quantities of water, which naturally lay in the underground soil in which the pits and shafts were sunk, and which formed the banks and support of the reservoir, to leak out and flow into the shafts and pits; the Court of Common Pleas determined that the plea was bad; ERLE, C.J., remarking, "I think that is a bad plea. The defendants are authorised to collect a large body of water from various springs and sources. Naturally, no such body of water would be collected at this spot, but the defendants are authorised to make such embankments as will be necessary to retain it there. And I think that the duty of the defendants to make compensation for any injury which may arise from the collection of this large body of water is absolute, and that they are responsible for all oozing and leaking that may take place. I think there is no distinction between that part of the reservoir which may have been formed by taking advantage of the natural inclinations of the soil, and that which may have been specially constructed for the purpose. The defendants are equally liable for any oozing or leaking which may take place" (*Barber* v. *Nottingham and*

NOTE.

Grantham Rail. Co. (1864), 15 C. B. (N.S.) 726). *Cf. Rhodes* v. *Airedale Drainage Commissioners* (1876), 1 C. P. D. 380. As to the liability attaching to the storage of water in ancient tanks in India, see *Madras Rail. Co.* v. *Carvetinagarum* (*Zemindar*) (1874), 30 L. T. 770).

In an action against a waterworks company (with whose Act was incorporated the Lands Clauses Act) claiming damages for taking so little care of a reservoir that the water oozed out over plaintiff's land causing offensive smells and vapours and rendering his buildings damp and unwholesome and permanently injuring their value, and for obstructing a drain and thereby penning back the sewage of his house so that it could not flow away by means of the drain as it ought; and further, that by reason of making the reservoir and works authorised to be made by the Act, a drain whereby his adjoining house and lands were drained was interrupted and rendered useless, and the company neglected to substitute another drain according to their duty, whereby his house and lands were insufficiently drained; and also for cutting a channel across, and thereby, and also by means of the reservoir and works, depriving him of the use of an agricultural road forming a communication between his lands, and for not substituting another road in lieu of it; and also by the reservoir and works obstructing a public footpath, and depriving him of the use of it and thereby causing him particular damage and inconvenience: it was held that the action was maintainable, the damages claimed not being those directed by Act of Parliament to be settled by arbitration (*Blagrave* v. *Bristol Waterworks Co.* (1856), 1 H. & N. 369).

Security of reservoirs.

See provisions regarding the security of reservoirs, in the Waterworks Clauses Act, 1863 (26 & 27 Vict. c. 93), ss. 3 *et seq.*, *post*, and notes thereon.

Liability at common law for damage caused by water collected in reservoirs, etc.

Apart from statutory powers, the general rule of law is well established that if a person brings on to his own land any matter which, if it escapes, may prove injurious to his neighbour's property, such as a large body of water, he is liable to make compensation for any injury that may accrue from its escape out of his land; and it is no defence, if it escapes and causes damage to his neighbour, that the injury was caused without any default or negligence on his part (*Fletcher* v. *Rylands* (1866), L. R. 1 Ex. 265—Ex. Ch. Affirmed in the House of Lords *sub nom. Rylands* v. *Fletcher* (1868), L. R. 3 H. L. 330). A. was the lessee of mines. B. was the owner of a mill standing on land adjoining that under which the mines were worked. B. desired to construct a reservoir, and employed competent persons, an engineer and a contractor, to construct it. A. had worked his mines up to a spot where there were certain old passages of disused mines; these passages were connected with vertical shafts which communicated with the land above, and which had also been out of use for years, and were apparently filled with marl and the earth of the surrounding land. No care was taken by the engineer or contractor to block up these shafts, and shortly after water had been introduced into the reservoir it broke through some of the shafts, flowed through the old passages, and flooded A.'s mine:—*Held*, that he was entitled to recover damages from B. in respect of this injury (*ibid.*). See *Brocklehurst* v. *Manchester, Bury, etc. Steam Tramways Co.* (1886), 17 Q. B. D. 118, and *National Telephone Co.* v. *Baker*, [1893] 2 Ch. 186, both cited *supra*.

Where mineral workings have caused a subsidence of the surface and consequent flow of rainfall into an adjacent lower coal-field, the injuries, being entirely from gravitation and percolation, are not a valid ground for any claim of damages (*Wilson* v. *Waddell* (1876), 2 App. Cas. 95). A mine-owner will not be liable to the owner of an adjacent mine for injury occasioned to such adjacent mine where such injury proceeds from natural causes, in themselves beyond his control, though his own acts may have conduced to produce the injury, if his acts have only been those of the proper and ordinary working of his own mine without default or negligence. But where, for his own convenience, he does something, *e.g.*, the diverting of a stream, he must take care that the new course provided for it shall be sufficient to prevent mischief from an overflow, so that, even if that overflow

Sect. 6.

NOTE.

shall be directly and mainly occasioned by an act of nature, his own conduct in not so forming the new and diverted course for the stream, of form and of sufficient capacity to carry off an accidental overflow of water, even of an exceptional kind, will be matter for consideration in determining the question of his liability (*Fletcher v. Smith* (1877), 2 App. Cas. 781; and see *Attorney-General* v. *Tomline* (1880), 14 Ch. D. 58, and *Hurdman* v. *N. E. Rail. Co.* (1878), 3 C. P. D. 168). By reason of an unprecedented rainfall a quantity of water was accumulated against one of the sides of the defendant's railway embankment, to such an extent as to endanger the embankment, when, in order to protect their embankment, the defendants cut trenches in it by which the water flowed through, and went ultimately on to the land of the plaintiff, which was on the opposite side of the embankment and at a lower level, and flooded and injured it to a greater extent than it would have done had the trenches not been cut. In an action for damages for such injury, the jury found that the cutting of the trenches was reasonably necessary for the protection of the defendants' property and that it was not done negligently :—*Held*, that though the defendants had not brought the water on their land, they had no right to protect their property by transferring the mischief from their own land to that of the plaintiff, and that they were therefore liable (*Whalley* v. *L. & Y. Rail. Co.* (1884), 13 Q. B. D. 131; *cf. Nield* v. *L. & N. W. Rail. Co.* (1874), L. R. 10 Ex. 4, *infra*). The defendants, the owners of a mining property sunk a shaft by which they tapped the water which had formerly found its way into certain old workings on their own ground, and had thence percolated into the plaintiffs' mines. The defendants then made a borehole at the bottom of the shaft. It was admitted that the making of it was not in due course of mining, but only for the purpose of getting rid of the water. The effect of the borehole was to let off the water into the above-mentioned old workings on the defendants' ground, whence it percolated into the plaintiffs' works in the same way in which it would have done if neither shaft nor borehole had ever been made :—*Held* (reversing the decision of FRY, J.), that the defendants had not by making the shaft so appropriated the water as to lay themselves under an obligation to keep it from coming upon the plaintiffs' land, and that, as the effect of the defendants' operations was not to throw upon the plaintiffs' land any burden which it had not borne before, the plaintiffs' case failed (*West Cumberland Iron and Steel Co.* v. *Kenyon* (1879), 11 Ch. D. 782). The respondents were riparian proprietors on one side of a stream, called the Doups Burn. They and their predecessors had for sixty years used the waters of the burn for the purpose of distillation, when the appellants, without any prescriptive rights so to do, poured into the stream a large body of water which they pumped up from their mines, which water, if it were left to the law of gravitation, would never reach the stream. The respondents did not complain of the increased volume of the stream, but that the foreign water was of a character and quality different from that of the natural stream, and that it prejudicially affected the water of the stream for distillery purposes :—*Held*, that the respondents were entitled to have the appellants interdicted from discharging the mine water into the stream (*John Young & Co.* v. *Bankier Distillery Co.*, [1893] A. C. 691). See also *Buccleuch* (*Duke of*) v. *Gilmerton Gas Co.*, [1894] 31 S. L. R. 528. On the bank of a canal, constructed under an old Act of Parliament, a mill had been built. In consequence of the working of a coal mine, the canal and mill had subsided, and water leaked from the canal into the mill. The mill-owner brought an action against the canal company for an injunction, and for damages :—*Held*, that though a company authorised by Act of Parliament were not under the same liabilities as a private person they were liable for damages if they were guilty of negligence, and that the canal company had been guilty of negligence, inasmuch as they might have prevented the damage, and that they were bound to compensate the mill-owner. But that, under the special provisions of their Act, compensation must be recovered as directed by the Act, and not by action :—*Held*, that such being the case, an injunction would not be granted, and that, apart from this, inasmuch as the time and extent of any further subsidence could not be foreseen, there ought not to be an injunction :—*Held*, that the damage having been caused by the wrongdoing of the mine-owner did not affect the case (*Evans* v. *M. S. & L. Rail. Co.* (1887), 36 Ch. D. 626).

In *Box* v. *Jubb* (1879), 4 Ex. D. 76, it appeared that the defendants possessed a reservoir, with sluices connected with a main drain or watercourse, from which the reservoir was supplied, and with sluices by which the surplus water was returned into the drain at a lower level. The combined effect of the emptying of a reservoir belonging to a third person above the defendants' premises and of an obstruction in the drain below them was to force water through the sluices into the defendants' reservoir, and so cause an overflow thence on to the plaintiffs' land. In an action for damage caused thereby it was shown that the defendants had no control over the main drain or the other reservoir, or knowledge of the circumstances which caused the overflow, and that the sluices were maintained so as to prevent overflow under ordinary circumstances:—*Held*, that the defendants were not liable.

A company was by statute authorised to make a canal and required to maintain it in good order for navigation by the public. Preparatory to making some necessary repairs and improvements, they turned off the water into a drain (designed for that purpose), from whence it ought to flow, as on a previous occasion it actually did, into a public sewer, which was under the exclusive care and control of the Corporation of Dublin; but owing to an unforeseen obstruction in the sewer the water was stopped and flooded the plaintiff's premises; and although the company became aware of the flooding—though not of the immediately efficient cause—it did not appear that they had taken or could have taken any steps to prevent or stop the discharge of water from the canal into the drain:—*Held*, that the company, while acting in exercise of their statutory powers, could not in the absence of negligence on their part be made responsible for the injury done (*Boughton* v. *Midland Great Western Railway of Ireland Co.* (1872), 7 Ir. C. L. R. 169). The jury having found that the flooding of the plaintiff's premises was caused by the obstruction in the corporation sewer, it was further held that there was no evidence of negligence by the company which ought to have been submitted to the jury (*ibid.*).

Vis major.

One who stores water on his own land, and uses all reasonable care to keep it safely there, is not liable for damage effected by the escape of the water, if the escape be caused by the act of God, or *vis major, e.g.*, by an extraordinary rainfall which could not reasonably have been anticipated, although if it had been anticipated the effect might have been prevented. On the defendant's land were ornamental pools containing large quantities of water. These pools had been formed by damming-up with artificial banks a natural stream which rose above the defendant's land, and flowed through it, and which was allowed to escape from the pools successively by weirs into its original course. An extraordinary rainfall caused the stream and the water in the pools to swell so that the artificial banks were carried away by the pressure, and the water in the pools being thus suddenly loosed, rushed down the course of the stream and injured the plaintiff's adjoining property. The plaintiff having brought an action against the defendant for damages, the jury found that there was no negligence in the construction or maintenance of the pools, and that the flood was so great that it could not reasonably have been anticipated, though, if it had been anticipated, the effect might have been prevented:—*Held* by the Court of Appeal (distinguishing the case of *Fletcher* v. *Rylands*, *supra*), that this was in substance a finding that the escape of the water was caused by the act of God, or *vis major*, and that the defendant was not liable for the damage (*Nichols* v. *Marsland* (1876), 2 Ex. D. 1). See also *Nitro-Phosphate and Odam's Chemical Manure Co.* v. *London and St. Katherine Dock Co.* (1878), 9 Ch. D. 503, which was an action to recover damages caused to the plaintiff's premises and stock-in-trade by an overflow of water from the Victoria Dock on November 15th, 1875. The statute which empowered the defendants to construct the dock required them to maintain the bank surrounding it at a height of four feet above Trinity high-water mark. The bank was in in fact for some distance six to eight inches lower than this. The tide rose on November 15th, 1875, four feet three

Sect. 6.

NOTE.

inches above Trinity high-water mark. It had never been known to rise so high before; but it had, in March, 1874, risen to four feet. Between March, 1874, and November, 1875, there had never been a tide so high as four feet. Mr. Justice FRY, in deciding for the plaintiff, and granting an injunction to restrain the defendants from allowing their bank to remain at a height of less than four feet above Trinity high-water mark, observed that, under the circumstances, he should have had great difficulty in holding that the defendants would have been liable at common law for negligence, but relied on the statutory liability of the defendants to maintain the bank of a height of four feet. See *Fletcher* v. *Smith*, *supra*, and *Madras Rail. Co.* v. *Carvetinagarum* (*Zemindar*) (1874), 30 L. T. 770, which is a decision relating to water stored in ancient tanks in India.

In *Carstairs* v. *Taylor* (1871), L. R. 6 Ex. 217, the plaintiff hired of the defendant the ground floor of a warehouse, the upper part of which was occupied by the defendant himself. The water from the roof was collected by gutters into a box, from which it was discharged by a pipe into the drains. A hole was made in the box by a rat, through which the water entered the warehouse and wetted the plaintiff's goods. The defendant had used reasonable care in examining and seeing to the security of the gutters and the box. In an action by the plaintiff against the defendant for the damage so caused:—*Held*, that the defendant was not liable, either on the ground of an implied contract, or on the ground that he had brought the water to the place from which it entered the warehouse.

In *Ross* v. *Fedden* (1872), L. R. 7 Q. B. 661, the plaintiff occupied for business purposes the ground floor, and the defendants the second floor, of the same house, respectively, as tenants from year to year. There was a watercloset on the defendants' premises, to and of which they alone had access and use. After their respective premises had been closed on a Saturday evening, water percolated from the watercloset through the first floor to the plaintiff's premises, and caused damage to his stock-in-trade. The overflow of the water was owing to the valve of the supply-pipe to the pan having got out of order and failed to close, and the waste-pipe being choked with paper. The defects could not be detected without examination, and the defendants did not know of them, and were guilty of no negligence:— *Held*, that there was no obligation on the defendants to keep in the water at their peril, and that they were not liable to the plaintiff for the damage. See also *Blake* v. *Land and House Property Corporation* (1887), 3 T. L. R. 667.

The ground floor of a house was demised to the plaintiff by the defendant under a lease containing a covenant that the lessee might "peaceably hold and enjoy the said demised premises during the said term without any interruption by the lessor or any person lawfully claiming through or in trust for him." The remainder of the house was let out in floors to different tenants. Before and during the demise to the plaintiff the water supply was effected by means of a main service pipe connected with a cistern placed at the top of the house, branch pipes being inserted into the main pipe for the supply of water to each floor. The tenants paid a proportion of the water rate for the supply to their respective premises. The branch pipe on the first floor suddenly burst, and the water therefrom poured down into the plaintiff's premises and injured his goods. In an action for damages the jury found that the branch pipe when fixed (which was before the demise) was a reasonably fit and proper one for the purpose for which it was fixed and intended, and that there was no negligence or want of skill in the fixing and maintaining the pipe where and as it was. It was held, that the plaintiff had no cause of action founded upon the covenant for quiet enjoyment, because the covenant was prospective, and there had been no act of omission or commission during the demise to the plaintiff causing an interruption to his enjoyment. And it was also held, that the apparatus for the water supply being for the common benefit of the plaintiff and the other tenants the plaintiff had no cause of action founded upon the principle laid down in *Fletcher* v. *Rylands* (*Anderson* v. *Oppenheimer* (1880), 5 Q. B. D. 602).

Where the rain water from the plaintiff's and defendant's adjoining roofs drained on to the roof of the defendant's area and so down a pipe into the defendant's drain, this arrangement being with the assent and for the benefit of both parties, it was held that the defendant was not liable in the absence of negligence on his part, for damage arising to the plaintiff's premises from an accumulation of water on the area roof owing to an obstruction in the pipe (*Gill* v. *Edouin* (1895), 72 L. T. 579). As to whether fall pipes and drains, which receive rain water from more than one house, thereby become sewers, reference may be made to *Silles* v. *Fulham Borough Council*, [1903] 1 K. B. 829, and the observations of Channell, J., on this case in *Heaver* v. *Fulham Borough Council*, [1904] 2 K. B. 383.

The defendant was the owner of premises to which water was laid on, and he had a cistern on the fourth floor. The plaintiff became tenant of the ground-floor, and took his supply of water from the defendant. A leakage from the cistern having been noticed by the plaintiff, he informed the defendant, who instructed a competent plumber to remedy it. In consequence of the negligence of the plumber, an overflow occurred, which damaged the plaintiff's goods :—*Held*, that the defendant was not liable, since the plaintiff had assented to the water being on the premises, and therefore, the defendant, by instructing a competent plumber to remedy the leakage, had discharged his duty to the plaintiff (*Blake* v. *Woolf*, [1898] 2 Q. B. 426).

Under the powers of the Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), the Metropolitan Board of Works constructed, and properly constructed, a sewer, having its outfall at Deptford Creek, a little above the plaintiff's coal wharf, with watergates, which it was the duty of the person in charge of them to open when the water within them became eight feet deep, a depth which was reached only in heavy rainfalls. On August 29th, 1879, there was an exceptionally heavy rainfall, and it became necessary to open the watergates to prevent a large district from being flooded. This having been done, and the rain increasing in violence, the rush of water from the sewer carried away a portion of the plaintiff's wharf with a barge moored thereto, and a quantity of coals deposited therein and thereon. It was held, that the injury complained of was occasioned by the opening of the watergates and not by the act of God, and therefore the defendants were *primâ facie* liable for the damage done within the principle of *Fletcher* v. *Rylands*, but that as they were a public body acting in the discharge of a public duty, and as that which happened was only the inevitable result of what Parliament had authorised them to do, they were not liable (*Dixon* v. *Metropolitan B. of W.* (1881), 7 Q. B. D. 418).

Where the defendant allowed water to collect in his cellar, and to percolate into the plaintiff's cellar, it was held that this was a wrong within the decision in *Fletcher* v. *Rylands*, and that the plaintiff was entitled to damages (*Snow* v. *Whitehead* (1884), 27 Ch. D. 588). In 1855, a municipal corporation made a sewer under a road within their district. Many years afterwards the owners of premises abutting on the road erected a brewery, and, in pursuance of s. 21 of the Public Health Act, 1875 (38 & 39 Vict. c. 55), or the corresponding section of the Sanitary Act, 1866 (29 & 30 Vict. c. 90), connected the drainage of the brewery cellars with the sewers. In 1891, 1892, and 1893, the cellars were damaged by floodings. The floodings arose from the fact that by reason of the large increase in recent years in the number of buildings draining into the sewer, when very heavy falls of rain occurred the sewer was too small to carry off the influx of water, and the pressure forced the contents of the sewer through the connections into the cellars. The system of drainage originally adopted reasonably provided for the district, and for the then probable increase of buildings which would have to drain into it. There had been no negligence in constructing or maintaining the sewer, or in not providing a new sewer or sewage system :—*Held*, (1) that the corporation were not liable as strangers and apart from any statutory duty; (2) that, in the absence of negligence, the corporation were not liable under s. 19 of the Public Health Act, 1875 (*Stretton's Derby Brewery Co.* v. *Mayor of Derby*, [1894] 1 Ch. 431).

Owing to an escape of sewage from a sewer vested in an urban district council, the supply of drinking water used by an adjacent hydropathic

Sect. 6.

NOTE.

establishment became polluted, and an outbreak of typhoid fever occurred in the establishment. In an action by the proprietor against the council for damages for the pollution of the water supply, it appeared that the plaintiff had been taking water which belonged to the defendant council without any right or permission to do so, and without the council's knowledge; and further that the pollution took place on the council's land where the water was collected. The jury found that the pollution was due to negligence on the part of the defendant council, and that there was no contributory negligence on the part of the plaintiff, and awarded damages to the plaintiff. It was held that the plaintiff had not established any breach of a duty on the part of the defendants, and that his action failed (*Fergusson* v. *Malvern U. D. C.* (1909), 73 J. P. 361).

Wrongful diversion of water into reservoir.

The defendants, a corporation, were empowered, by a local Act of Parliament, to construct a reservoir for public purposes, and to divert to it the waters of certain rivers and streams, and were required (under penalties) to discharge from the reservoir a certain specified quantity of water per second for the use of the mills on the river E. The Act provided that the defendants should not divert any of the waters of the river E. until the reservoir should be completed and filled, and water discharged therefrom in the quantity provided, and that, except as provided for, the rights of mill-owners should not be prejudiced. The defendants diverted a part of the waters of the river E., but, from engineering difficulties, the reservoir was not completed so as to be capable of being filled with water:—*Held*, that the mill-owners on the river E. could not maintain an action for the non-supply of the statutable amount of water from the reservoir, but were confined to an action for damages occasioned by the wrongful diversion of the natural supply before the completion of the reservoir (*Waller* v. *Mayor of Manchester* (1861), 6 H. & N. 667).

Wrongful taking of water by company.

The Bristol Waterworks Act, 1846 (9 & 10 Vict. c. ccii.), enabled the company to take the water of the river Chew, subject to certain conditions and on paying compensation for it. In 1849 their works were completed, and they used the water of the river. In 1853 a subsequent Act provided, that "nothing in that Act, or in the Bristol Waterworks Act, 1846, shall extend to authorise the company to purchase, take, use or interfere with any land, soil, or water, or any rights in respect thereof belonging to the Duke of Cornwall, without the consent" of the duke under his privy seal. After the passing of that Act, the company continued to take the water of the river as they had done before, since the completion of their works, and thereby diverted a stream which ought to have irrigated certain land belonging to the duke. It was held that the proviso in the Act of 1853 had a retrospective operation, and prevented the company from taking as before the water of the duke without his consent (*Attorney-General* (*P.W.*) v. *Bristol Waterworks Co.* (1855), 10 Ex. 884).

Banks of channel giving way.

A company undertaking for their own profit to maintain a channel for carrying off water, and neglecting to do so effectually, are responsible for damage done to the adjoining land by reason of the banks giving way after an unusual rainfall, although other persons, who were bound to keep the outlet of the channel of certain dimensions, had failed to perform that duty, and had thereby occasioned an increase of water in the channel without which its banks would not have given way (*Harrison* v. *G. N. Rail. Co.* (1864), 3 H. & C. 231). Lord Chief Baron POLLOCK, in giving judgment, said: "The sufficiency of a cut depends upon its depth, width, fall, and outlet, as compared with the water likely to be in it. Now in this case the cut was not sufficient to hold the water likely to be in it, owing to the condition of its outlet. If no one was under any obligation in relation to that outlet, it is clear that the cut was insufficient and that the defendants would be responsible. Are they less so, because there is an obligation on others as to the outlet which is not performed? We think not."

The following cases were decided upon special Acts relating to the maintenance of the banks of a river:—*Vyner* v. *N. E. Rail. Co.* (1898), 14 T. L. R. 554; *Vyner* v. *N. E. Rail. Co.* (1904), 20 T. L. R. 192.

By an award, made by commissioners under an inclosure Act, drains were set out, and it was directed that the owners or occupiers of the land over which such drains passed should make and cleanse and keep the same of sufficient width and depth to carry off the water intended to run down the same:—*Held*, that this did not authorise the plaintiff to make a sough or under-drain on his land, so as to cause an increased quantity of water to pass into one of the awarded drains (*Sharpe* v. *Hancock* (1844), 7 M. & G. 354).

As to the principles governing the measure of damages for injury caused by flooding to a building estate partly built over, see *Rust* v. *Victoria Graving Dock Co.* (1887), 36 Ch. D. 113.

Damage to canal by flood water of river.

In *Nield* v. *L. & N. W. Rail. Co.* (1874), L. R. 10 Ex. 4, the defendants, owners of a canal, being threatened by an overflow of flood water from a neighbouring river, and fearing damage to their premises situated on the banks of the canal, placed across it, at a point above their premises, planks reaching from the bottom of the canal to the coping stone, which was some inches higher than the surface of the canal water. The flood water afterwards broke into the canal at a point above the barricade of planks, and opposite to the plaintiff's premises, which were also situated on the banks of the canal above the premises of the defendants, and, being penned back by the planks, the water rose in the canal until it flooded the plaintiff's premises. In an action brought to recover damages for the injury so caused:—*Held*, that the defendants were not liable, on the ground that the water which did the mischief was not brought there by them, and that there is no duty on the owners of a canal analogous to that on the owners of a natural watercourse not to impede the flow of water down it (*cf. Whalley* v. *L. & Y Rail. Co.* (1884), 13 Q. B. D. 131, *ante*, p. 394).

By parol licence from L. and from the defendant, the plaintiffs constructed and used a watercourse for the purpose of discharging the water from their own mines across the land of L., and thence across the land of defendant. The defendant having revoked his licence, and the plaintiffs having refused to discontinue using the watercourse, the defendant entered upon the land of L. at a spot near the boundary between it and the land of the plaintiffs, and obstructed the watercourse. The defendant, by stopping the watercourse on his own land would have done less damage to the plaintiffs than was actually done, but more damage to L. and possibly some damage to the public:—*Held*, (affirming the judgment of the court below), that the watercourse was obstructed in a reasonable manner, inasmuch as the convenience of the plaintiffs, who, after revocation of the licence, were wrongdoers, was subordinate to the convenience of innocent third persons and of the public (*Roberts* v. *Rose* (1865), L. R. 1 Ex. 82). By a special case it was found, that on the occasion of an extraordinary rainfall, the defendants opened a sluice and discharged from their canal into a brook more water than the latter was able to carry off, and in consequence the brook overflowed into the plaintiff's mines. It was found, further, that if the sluice had not been so opened the canal bank would have burst; that the adjacent country and the plaintiff's mines would have been inundated; and that the course of the defendants was the prudent and only effectual one in the emergency; that the plaintiff's mines were only flooded a few hours sooner than they otherwise would have been and no additional damage was caused to the plaintiff thereby:—*Held*, that upon these findings, even assuming the defendant's act to have been a wrongful one, it was *injuria sine damno*, and, therefore, not a ground of action. *Held*, secondly, that the compensation clauses of the Acts of Parliament did not apply to such a case (*Thomas* v. *Birmingham Canal Co.* (1880), 49 L. J. Q. B. 851).

Prior to 1866 a stream was conveyed by a canal company under and across its canal through two wooden tunnels, for which in 1866 the company substituted metal tunnels of less capacity; in consequence of which, after heavy rains, the stream in 1873 flooded the plaintiff's lands adjacent to the canal:—*Held*, that the substitution of the smaller for the larger tunnels was in its inception an innocent act without either *injuria* or *damnum*, and only became tortious upon the subsequent flooding, and that the Statute of Limitations

Sect. 6.

NOTE.

began to run from the time of the flooding in 1873 (*Devery* v. *Grand Canal Co.* (1875), 9 Ir. C. L. R. 194). See also as to the running of the Statute of Limitations, *West Leigh Colliery Co.* v. *Tunnicliffe and Hampson, Ltd.*, [1908] A. C. 27.

Riparian rights in flowing waters.

The right to the enjoyment of a natural stream of water on the surface belongs *naturali jure* to the proprietor of the adjoining land as a natural incident to the right to the soil itself. He has the right to have it come to him in its natural state, in flow, quantity and quality, and to go from him without obstruction, upon the same principle that he is entitled to the support of his neighbour's soil for his own in its natural state. And such a right depends in no way upon prescription or the presumed grant of his neighbour, nor from the presumed acquiescence of the proprietors above and below (*Chasemore* v. *Richards* (1859), 7 H. L. Cas. 349).

Flowing water is *publici juris* in this sense only, that all may reasonably use it who have a right of access to it, and that none can have any property in the water itself, except in the particular portion which he may choose to abstract from the stream and take into his possession, and that during the time of his possession only (*Embrey* v. *Owen* (1851), 6 Ex. 353). The right to have a stream of water flow in its natural state, without diminution or alteration, is an incident to the property in the land through which it passes; but this is not an absolute and exclusive right to the flow of all the water, but only subject to the right of the other riparian proprietors to the reasonable enjoyment of it; and consequently it is only for an unreasonable and unauthorised use of this common benefit that any action will lie (*ibid.*).

The right of using flowing water does not necessarily depend upon the ownership of the soil covered by such water (*Lord* v. *Sydney Commissioners* (1859), 12 Moo. P. C. C. 473).

A riparian proprietor, notwithstanding that a river is navigable, can acquire an interest in its water-power as derived from a reservoir artificially formed by a dam across its channel, and sell the same along with and as appurtenant to his land. Even if such sale should not be effectual against the public, the vendor cannot himself impeach it on that ground:—*Held*, in this case, that as the vendor of a specified amount of water-power had not reserved to himself a right to a supply either *pari passu* with or preferably to the purchaser, the latter was entitled to damages in respect of any loss incurred by the vendor's user of the water in diminution of the amount sold (*Hamelin* v. *Bannerman*, [1895] A. C. 237).

The corporation of Godmanchester, as owners of certain lands, had for more than 200 years opened, as of right, the gates of certain sluices or locks belonging to the appellant upon the river Ouse, in time of flood or likelihood of flood, in order to prevent damage to those lands:—*Held*, that the easement was good, and was none the worse because the exercise of it also benefited lands belonging to other persons; and that the corporation could maintain their right either by s. 2 of the Prescription Act, 1832 (2 & 3 Will. 4, c. 71), or by the fiction of a lost grant (*Simpson* v. *Godmanchester Corporation*, [1897] A. C. 696).

Under letters patent in the seventeenth century the owner of land adjoining the river Ouse between St. Neots and St. Ives, which was there a public river navigable only in sections, made in his own land cuts from the river and locks in the cuts, and took tolls from the vessels passing through the locks. In 1720, by 6 Geo. 1, c. 29, the then landowner was empowered to rebuild a stanch in the river below St. Ives, and to repair and maintain it, and to take tolls on vessels passing through it. Tolls were collected at the locks for more than 200 years and at the stanch for a long period by the predecessors in the title of the appellant:—*Held*, by Lords MACNAGHTEN, JAMES and ROBERTSON (Lords DAVEY and LINDLEY dissenting upon the question of a highway through the locks) that there was no evidence that the locks had ever been dedicated to the public as a highway, and that the appellant was not bound to maintain or repair or allow the public to pass through the locks or the stanch (*Simpson* v. *Attorney-General*, [1904] A. C. 476).

"All streams are *publici juris*, and all the water flowing down any stream is for the common use of mankind who live on the banks of the stream, and, therefore, any person living on the banks of the stream has an undoubted right to the use of the water for himself, his family, and his cattle, and for all ordinary domestic purposes, such as brewing, washing, and so on": *per* JAMES, L.J., in *Wilts and Berks Canal Navigation Co.* v. *Swindon Waterworks Co.* (1874), L. R. 9 Ch., at p. 457. See same case in House of Lords, L. R. 7 H. L. 697.

As to the rights of railway companies who are riparian owners, see *Attorney-General* v. *G. E. Rail. Co.; Earl of Sandwich* v. *G. N. Rail. Co.;* and *McCartney* v. *Londonderry, etc., Rail. Co.*, cited at p. 408, *post.*

As to surface water which does not flow in any defined channel, and which squanders itself over the surface, see *Broadbent* v. *Rambotham*, *post*, p. 418.

In a case where the plaintiffs, in common with other inhabitants of a particular district, enjoyed a customary right at all times to have water from a certain spout in a highway in the district for domestic purposes, the defendant, a riparian owner of the stream whereby the spout was supplied with water on various occasions prevented such large quantities of water from reaching the spout as to render what remained insufficient for the needs of the inhabitants. The plaintiffs had not themselves ever suffered any actual personal damage or inconvenience:—*Held*, that an action for diverting the water was maintainable without proof of any actual personal damage, inasmuch as the act of the defendant might, if repeated often enough without interruption, furnish evidence in derogation of the plaintiffs' legal rights (*Harrop* v. *Hirst* (1868), L. R. 4 Ex. 43).

In the year 1860, the owner of properties A. and B. made a drain from a tank on property B. to a lower tank on the same property, and laid pipes from the lower tank to cattle sheds on property A., for the purpose of supplying them with water, and they were so supplied till 1863, when the owner sold property A. to the plaintiff, with all waters, watercourses, etc., to the same hereditaments and premises belonging or appertaining, or with the same or any part thereof held, used, enjoyed, or reputed as part thereof, or as appurtenant thereto. The plaintiff had the use of the water after his conveyance until the defendant, a subsequent purchaser of property B., stopped it:—*Held*, that the watercourse was a continuous easement necessary for the use of property A., and would have passed by implication; that the plaintiff was entitled to the use of the water on the conveyance of the property, without any words of grant; and that, supposing it only convenient and not necessary, the general words were sufficient to pass it. *Held*, further, that the right was to have the accustomed flow of water through the pipes, without regard to the purpose for which the plaintiff used it; and that right, therefore, was not lost by his erecting cottages instead of cattle sheds (*Watts* v. *Kelson* (1870), L. R. 6 Ch. 166; and see *Roe* v. *Siddons* (1888), 22 Q. B. D. 224).

A dwelling house was demised for the residue of a term, together with "all waters, watercourses, . . . easements and appurtenances." The house had, for 18 years, obtained a supply of water from a reservoir held by the lessors as yearly tenants. Five years afterwards a water undertaking was sanctioned by Parliament in the hands of the defendants, and the successor in title of the lessors transferred to the undertakers his interest in the reservoir:—*Held*, that the owners of the house were entitled to the water supply as long as the defendants remained yearly tenants of the reservoir (*Key* v. *Neath R. D. C.* (1905, 1906), 69 J. P. 356; 71 J. P. 57). *Cf. Burrows* v. *Lang*, [1901] 2 Ch. 509; *Birmingham, Dudley and District Banking Co.* v. *Ross* (1888), 38 Ch. D. 295; and *Whitmores (Edenbridge), Ltd.* v. *Stanford*, [1909] 1 Ch. 427.

A purchaser of a piece of land, with a well or spring upon it, covenanted with the vendor—who retained land adjoining intended to be disposed of for building sites—to erect a pump and reservoir, and to supply water from the well to all houses built on the vendor's land:—*Held*, (1) that both the benefit

Sect. 6.

NOTE.

and the burden of the covenant ran with the land, and that the case was not within the second resolution in *Spencer's Case* (1583), 5 Rep. 16 a; but if not, a sub-purchaser, with notice of the covenant, was bound by it. *Held*, (2) that though the covenant was not one of which the court would decree specific performance directly, as being for the construction of works which the court could not superintend, it could be enforced indirectly by an injunction restraining the defendant from allowing the work to remain unperformed (*Cooke* v. *Chilcott* (1876), 3 Ch. D. 694).

A water company who were authorised in 1869 to make "an impounding reservoir or basin with a dam or weir across the Nantyffrith Brook," and to collect into that reservoir "the waters of the brook or stream called Nantyffrith, and of all brooks and streams flowing into the same above the dam or weir" aforesaid, and so became owners of the reservoir, through the site of which the stream originally flowed, have the right to stop any person from diverting the water which at that time came down, or but for a stoppage would come down, as part of that stream or its tributaries above the dam, and as to which the person diverting could have been restrained from continuing his diversion at the suit of a lower riparian owner, but not to stop any person using water above who had a right to do so at the time their Act was passed. A person who makes an artificial cutting, and so brings water to a stream which did not go there before, can *primâ facie* cut it off if he chooses. The fact that an embankment is occasionally out of repair during a term of years or too low when the water is high (*e.g.*, in flood), and so allows water to overflow into other land, gives the owner of that other land no prescriptive right to the overflow (*Brymbo Water Co.* v. *Lesters Lime Co.* (1894), 8 R. 329). *Cf. Biscoe* v. *Drought* (1860), 11 Ir. C. L. R. 250.

A landowner granted to a company all the watercourses, dams, and reservoirs upon certain lands of his, which watercourses, dams, and reservoirs were laid down upon the annexed plan which was to be taken as part of the deed, and were thereon coloured blue, and also the several streams and springs of water flowing into or feeding the said watercourses, dams, and reservoirs, with right for the company solely to take and use the water from the said springs or streams of water, watercourses, dams, and reservoirs, with powers to cleanse and repair, and with all such other powers as should be requisite for enabling the company to enjoy the premises thereby granted. The grantor was to be at liberty to use the waste or overflow water from the dams or reservoirs of the company, but was not to exercise this power if the company resolved that its exercise would be injurious to them. The property coloured blue on the plan consisted of an *artificial* watercourse, partly covered and partly open, the dimensions of various parts of which were specified on the plan, and in some cases it was noted on the plan that they might be enlarged to a certain extent. Several springs and streams feeding the watercourse were marked on the plan. The watercourse, it appeared, was large enough to carry on all the water which flowed into it, except after heavy rain, but at one point of its course underground there was a contraction of the channel which after heavy rain backed up the water, and caused a considerable overflow over a weir, of which overflow the grantor for many years had the benefit. The grantees, having occasion for more water, proceeded to remove the above obstruction, so as to allow the whole of the water which came into the watercourse during heavy rains to run down into their reservoir:—*Held* (affirming the decision of the Vice-Chancellor of the Lancaster Court), that the grant was a grant of the artificial channel, of the definite springs and streams on the land, and of such other water as should find its way into and run down the channel as it stood, and not a grant of all the water on the land, and that the grantees had no right to alter the levels of or enlarge the channel so as to enable it to carry off all the water that ran into it in times of heavy rain (*Taylor* v. *St. Helen's Corporation* (1877), 6 Ch. D. 264).

Where a Canal Act gave to the proprietors of the navigation a power of making a canal, and of using the waters of a river for supplying it, but provided, at the same time, for securing to the owners of certain works the use of the surplus waters of that river, the making of the canal ascertained and fixed the rights of the parties, and the canal proprietors had no right afterwards to enlarge the canal and draw a much larger quantity of water from the river, so as injuriously to affect the works in question. A clause in a second Act of Parliament relating to the same canal, declared that the works thereby authorised should be completed within two years from the time of its passing, and that the money to be raised by it should not be applied to defray the expenses of any of the works not made within that time:—*Held*, that this clause not only limited the application of the money to works completed within that time, but that no works should be carried on adversely to the interests of individuals after the expiration of two years (*Glamorgan Canal Navigation Co.* v. *Blakemore* (1832), 1 Cl. & F. 262).

In a lease of certain premises with appurtenances, the lessor reserved out of the demise "the free running of water and soil coming from any other buildings and lands contiguous to the premises hereby demised in and through the sewers and watercourses made or to be made within, through, or under the said premises":—*Held*, first, that the reservation extended to water and soil coming from contiguous lands and buildings, whether that water and soil in the first instance actually arose on or from such contiguous lands or buildings or not; and secondly, that it did not extend beyond water in its natural condition, and such matters as are the product of the ordinary use of land for habitation, and that therefore it did not give to the occupier of certain tan-pits, who claimed under the lessor, a right of passage for the refuse of those pits (*Chadwick* v. *Marsden* (1867), L. R. 2 Ex. 285). The right to the water of a river flowing in a natural channel through a man's land and the right to water flowing to it through an artificial watercourse constructed on his neighbour's land, do not rest on the same principle. In the former case each successive riparian proprietor is *primâ facie* entitled to the unimpeded flow of water in its natural course, and to its reasonable enjoyment as it passes through his land, as a natural incident to his ownership of it. In the latter any right to the flow of the water must rest on some grant or arrangement, either proved or presumed, from or with the owners of the lands from which the water is artificially brought or on some other legal origin (*Rameshur Pershad Narain Sing* v. *Koonj Behari Pattak* (1878), 4 App. Cas. 121). See hereon a judgment of BIGHAM, J., in *Barratt* v. *Lovell*, *Times*, February 23rd, 1903.

Artificial watercourses and channels.

A watercourse, though artificial, may have been originally made under such circumstances and have been so used as to give all the rights that the riparian proprietors would have had if it had been a natural stream; and therefore, in an action by one riparian proprietor against another for the pollution and diversion of a watercourse, it was held a misdirection to tell the jury that, if the stream were artificial and made by the hand of man, the plaintiff could have no cause of action (*Sutcliffe* v. *Booth* (1863), 32 L. J. Q. B. 136). See this case considered and approved in *Roberts* v. *Richards* (1881), 50 L. J. Ch. 297. See *Ennor* v. *Barwell* (1860), 1 De G. F. & J. 529; *Blackburne* v. *Somers* (1879), 5 L. R. Ir. 1; *Hanna* v. *Pollock*, [1900] 2 Ir. R. 664; *McEvoy* v. *Great Northern Rail. Co.*, [1900] 2 Ir. R. 325, 340. In the case of an artificial watercourse, the origin of which is unknown, the proper inference from the user of the water and from other circumstances may be that the channel was originally constructed upon the condition that all the riparian proprietors should have the same rights (including a right to use the water for manufacturing purposes) as they would have had if the stream had been a natural one (*Baily & Co.* v. *Clark, Son & Morland*, [1902] 1 Ch. 649. As to the rights of the owners of lands on either side of an ancient but artificial watercourse, see *Burrows* v. *Lang*, [1901] 2 Ch. 502; and *Whitmores* (*Edenbridge*), *Ltd.*, v. *Stanford*, [1909] 1 Ch. 427; and see further as to artificial watercourses *Arkwright* v. *Gell* (1839), 5 M. & W. 231, and cases cited on pp. 413 *et seq.*, *post*. The plaintiff and defendant occupied contiguous portions of land. For more than forty years and as far back as living memory went the occupiers of plaintiff's land had been in the habit of passing over defendant's land to a brook which lay on the other side of that land, and of damming up the brook when necessary so as to force the water into an old artificial watercourse which ran across defendant's land to

Sect. 6.
——
NOTE.

plaintiff's land. They did this for the purpose of supplying their cattle with water whenever they wanted the water, except when the owners of defendant's land used the water, as they did at certain seasons of the year, for irrigation. It was held, that upon this evidence the jury were warranted in inferring an user as of right, by the occupiers of plaintiff's land, of the easement on defendant's land; and that for the interruption of such easement the plaintiff might maintain an action against the defendant (*Beeston* v. *Weate* (1856), 5 E. & B. 986). See also *Roberts* v. *Fellowes* (1906), 94 L. T. 279; *Heggie* v. *Nairn* (1882), 9 Ct. of Sess. Cas., 4th ser., 704.

The defendant being the owner of a canal, of which the plaintiffs were large customers, a mutual understanding was come to between the parties, that so long as the plaintiffs remained good customers of the canal, they should be allowed to use the superfluous water of the canal for the purposes of copperworks, of which they were occupiers under an agreement for lease with the defendant. It was shown that the use of the water of the canal, though convenient and economical, was not absolutely essential to the plaintiffs' works:—*Held*, that such an understanding did not form the foundation of an equitable right. *Secus*, if the plaintiffs with the knowledge of the defendants had incurred expense in establishing a manufacture for which the use of the water was absolutely necessary (*Bankart* v. *Tennant* (1870), L. R. 10 Eq. 141). *Cf. Rochdale Canal Co.* v. *King* (1849), 14 Q. B. 122; *Rochdale Canal Co.* v. *Radcliffe* (1852), 18 Q. B. 287; *Rochdale Canal Co.* v. *King* (1851) 2 Sim. (N.S.) 78.

When a prescriptive right to discharge surface water across adjacent property by a specific channel has been acquired, the obstruction of the channel on the servient tenement by the tenant of the latter is an invasion of a legal right for which an action is maintainable without proof of actual perceptible damage (*Claxton* v. *Claxton* (1873), 7 Ir. R. C. L. 23).

Water, as it issues from a well or a spring, is not to be considered as produce of the soil, so as to make the right to take it *in alieno solo* for domestic purposes a *profit à prendre*. Such right is an easement only, and may be claimed by custom (*Race* v. *Ward* (1855), 4 E. & B. 702).

It was held in *Greatrex* v. *Hayward* (1853), 8 Ex. 291, that the flow of water from a drain, for the purpose of agricultural improvements, for twenty years, could not give a right to a neighbour, so as to preclude the proprietor from altering the level of his drain for the improvement of his land.

An owner of land has an unqualified right to drain it for agricultural purposes in order to get rid of mere surface water, the supply of the water being casual and its flow following no regular or definite course; and a neighbouring proprietor cannot complain that he is thereby deprived of such water which otherwise would have come to his land. Therefore, where the defendant's land was a wet, springy spot, at which, at most seasons of the year, some water rose to the surface and flowed down the slope of the land: in wet seasons a great body of water flowed down, and after a long drought there was scarcely any, and sometimes none. There was no regularly-formed ditch or channel for the water, the place where it flowed being constantly trodden in by cattle. The water which was not absorbed (and all was not absorbed except in times of drought) ran into an old watercourse of the plaintiff. The water had so flowed for more than twenty years. The defendant, for the purpose of supplying some of his property with water and draining his land, diverted the water in question from the plaintiff's reservoir. At a certain other spot on the defendant's land there had always been, as far back as anyone could recollect, water rising to the surface; there had generally been a regular drinking place for cattle, formed with stones, and the overflow of the water went down a ditch and thence into a watercourse to the plaintiff's reservoir. The defendant carried a drain under the spot in question, and conveyed away the water to another portion of his property, so that the water ceased to rise to the surface and flow into the plaintiff's reservoir:—*Held*, that in neither case was the plaintiff entitled to the benefit of the flow of the water, and that the defendant was not liable for the diversion (*Rawstron* v. *Taylor* (1855), 11 Ex. 369).

A man who places an artificial mound upon his property, and thereby causes rain water percolating naturally to come on to the property of his neighbour, is liable to the latter in respect of damage so caused (*Hurdman* v. *N. E. Rail. Co.* (1878), 3 C. P. D. 168; see *Whalley* v. *L. & Y. Rail. Co.* (1884), 13 Q. B. D. 131).

Power given to a canal company by their Act of incorporation to supply the canal with water from all brooks, streams, and watercourses within 1,000 yards of the canal, does not so far comprise rain and other surface water which, being collected on the road, runs along an open gutter into the canal, as to preclude a local authority from allowing it to fall through gratings into a sewer made under the road for the drainage of the district (*M. S. & L. Rail. Co.* v. *Worksop L. B.* (1856), 23 Beav. 198).

As to the construction of a grant of the artificial channel of certain defined springs and streams, see *Taylor* v. *St. Helen's Corporation* (1877), 6 Ch. D. 264).

Riparian and other neighbouring proprietors.

"When the boundary of two properties passes along or over a stream or piece of water, it is taken *primâ facie* to coincide with the *medium filum* of the stream, or the diameter of the pool; although, of course, it may be proved expressly to have some other direction. If a river be divided into two courses by an island in its middle, the *medium filum* for boundary purposes is that which bisects the island; but if the island be nearer one side than the other no account is taken of the smaller branch; the other alone represents the whole river, and its *medium filum* constitutes the *primâ facie* line of proprietary division." Phear on Rights of Water, p. 1. This may be rebutted; but, generally speaking, "an imaginary line running through the middle of the stream is the boundary, just as, if a road separates two properties, the ownership of the road belongs half-way to one and half-way to the other. It may be rebutted; but if not rebutted that is the legal presumption": *per* Lord Cranworth, L.C., in *Wishart* v. *Wyllie* (1853), 1 Macq. H. L. Cas. 389; see *Duke of Devonshire* v. *Pattinson* (1887), 20 Q. B. D. 263; *Tilbury* v. *Silva* (1890), 45 Ch. D. 98; and *Ecroyd* v. *Coulthard* (1898), 2 Ch. 358.

The rule that when a stream flows between two properties, in the absence of any evidence to the contrary, the boundary is taken to be the *medium filum* of the stream, applies, where the stream is divided by an island, only to the *medium filum aquæ* of each branch (*Great Torrington Common Conservators* v. *Moore Stevens*, [1904] 1 Ch. 347).

Though the presumption that a grant of land described as bounded by an inland river passes the adjoining half of the bed of the river may be rebutted by circumstances which show that the parties must have intended it not to pass, it will not be rebutted because subsequent circumstances, not contemplated at the time of the grant, show it to have been very disadvantageous to the grantor to have parted with the half bed, and if contemplated would probably have induced him to reserve it; nor is the presumption excluded by the fact that the grantor was owner of both banks of the river. M., being entitled to lands on both sides of a river, sold and conveyed to L. a piece of land, the dimensions of which were minutely given in the conveyance, and which were therein stated to contain 7,752 square yards, and to be bounded on the north by the river, and to be delineated on the plan drawn on the deed, and thereon coloured pink. The dimensions and colouring extended only up to the southern edge of the river, and if half the bed had been included, the area would have been 10,031 square yards instead of 7,752. The deed contained various reservations for the benefit of M., but contained nothing express to show whether the half of the bed was intended to pass or not. M. was at the time owner of a private bridge close by, from which he received tolls. Thirty years afterwards a bridge was projected to cross the river from L.'s land. The plaintiffs, who had succeeded to all M.'s property in the neighbourhood, brought their action to restrain the making the new bridge. If the grant to L. passed half the bed, no part of the new bridge would be over land of the plaintiff's:—*Held*, that the presumption that the grant included half the bed was not rebutted, and that an injunction could not be granted on the ground

Sect. 6.

NOTE.

that the erection of the bridge would be a trespass. *Held* also, that a stipulation in the grant that nothing therein contained should prejudice or affect M.'s right to take tolls over his bridge did not preclude L.'s taking away custom from that bridge by the erection of a new bridge. The conveyance reserved to M., his heirs, etc., the right of entering upon the land or any part thereof for the purpose of repairing M.'s bridge. *Held*, that this did not preclude L. from erecting any structures upon the land, provided he left reasonable access for the purpose of repairing the bridge (*Micklethwait* v. *Newlay Bridge Co.* (1886), 33 Ch. D. 133). "The owner of the banks of a non-navigable river may, without any illegality, build a mill-dam across the stream within his own property, and divert the water into a mill-lade without asking the leave of the proprietors above him, provided he does not obstruct the water from flowing as freely as it was wont, and without asking the leave of those proprietors below him if he takes care to restore the water to its natural course before it enters their land": *per* Lord BLACKBURN, in *Orr-Ewing* v. *Colquhoun* (1877), 2 App. Cas. 839. In *Bourke* v. *Davis* (1889), 44 Ch. D. 110, the defendant sought to establish that a certain part of the river Mole was navigable, and was a highway, and much evidence was adduced on the subject. The principle was laid down that the claim of the defendant must be treated as if it were a claim to establish a right of highway on dry land, and that so treated the evidence did not establish the claim. It was further laid down that a right of recreation (*e.g.*, by boating) by custom upon the land of another cannot exist as a right in the public generally, but must be confined to the inhabitants of a particular district.

Cases relating to the Clyde.

Parties holding barony titles to lands situated on both sides of the Clyde, a navigable tidal river, claimed, as against the Crown and the Clyde Navigation Trustees, that the foreshores *ex adverso* their lands belonged in property to them, subject to such rights of navigation or other rights which the public and the Clyde Trustees might have over the same. The barony titles contained no express grant of foreshore, nor did they contain any specific boundaries which could be held to include the foreshore. The parties rested their claim on the grounds (1) that the barony titles alone gave them the property; (2) that coupled with their titles they had exercised from time immemorial acts of possession over the foreshore:—*Held*, affirming the decision of the court below, that the acts of possession for the prescriptive period having been proved, and following on barony title to lands so situated, they constituted a right of property in the foreshore. *Held*, also, that in this case it was not necessary to decide the question whether a barony title to lands so situated, which does not specify the exact boundary of the lands, or contain any express grant of foreshore, could alone give a right of property in the foreshore. See Lord BLACKBURN'S opinion (p. 791) as to the weight of each act of possession as evidence (*Lord Advocate* v. *Lord Blantyre* (1879), 4 App. Cas. 770). The Clyde Navigation Trustees, being empowered by ss. 76, 84 of 21 & 22 Vict. c. cxlix., to dredge the bed of the river Clyde to a depth of seventeen feet, cannot be interdicted from dredging ground which has been declared the property of the riparian proprietor, subject to any right which the public may have over it, and subject also to any rights conferred on the trustees by their Acts of Parliament—so held by the House of Lords, but without prejudice to the question of the liability of the trustees to subsequent compensation for damage (*Lord Blantyre* v. *Clyde Navigation Trustees* (1881), 6 App. Cas. 273).

By the Glasgow Police Act, 1866 (29 & 30 Vict. c. cclxxiii.), s. 384, the master of works may by notice "require any proprietor or occupier of a land or heritage" within the city, "to fence the same, or repair any chimney-stalk or flue, or chimney-head or can, or any rhone, signboard, or other thing connected with or appertaining to any building thereon, which appears to be dangerous:—*Held* (affirming the decision of the court below) that the statute gave no power to the master of works in Glasgow to compel a riparian proprietor to fence his land off from a tidal and navigable river, although a right of way gained by the public along the river bank, and fenced on the land side, was alleged to be insecure and dangerous, on account of the proximity of the river (*Lang* v. *Kerr* (1878), 3 App. Cas. 529). As to the liability of the Clyde trustees to repair damage done to the banks by executing operations in the bed of the river, see *Clyde Navigation Trustees* v. *Blantyre* (*Lord*) (1883), 10 R. 910; and as to the liability of the trustees to repair the piers of an ancient ferry on the river, see *Clyde Navigation Trustees* v. *Lord Blantyre*, [1893] A. C. 703. As to what is included in the word "river" in s. 98 of the Clyde Act, 1858, see *Clyde Navigation Trustees* v. *Laird & Son* (1883), 8 A. C. 658.

Riparian and other neighbouring proprietors—*continued.*

As to navigable tidal rivers and the rights of the public to fish, see *Reece* v. *Miller* (1882), 8 Q. B. D. 626; *Goodman* v. *Mayor, etc. of Saltash* (1882), 7 App. Cas. 633; *Neill* v. *Duke of Devonshire* (1882), 8 App. Cas. 135; *Hargreaves* v. *Diddams* (1875), L. R. 10 Q. B. 582; *Lord Leconfield* v. *Lord Lonsdale* (1870), L. R. 5 C. P. 657; *Rolle* v. *Whyte* (1868), L. R. 3 Q. B. 286; *Carlisle Corporation* v. *Graham* (1869), L. R. 4 Ex. 361; *Thakurain Ritray Koer* v. *Thakurain Sarfaray Koer* (1905), 21 T. L. R. 637; *Blower* v. *Ellis* (1886), 50 J. P. 326. There can be no public right of fishing in non-tidal waters, even where they are to some extent "navigable" rivers (*Pearce* v. *Scotcher* (1882), 9 Q. B. D. 162; *Smith* v. *Andrews*, [1891] 2 Ch. 678). As to inland non-tidal lakes, see *Bristow* v. *Cormican* (1878), 3 App. Cas. 641. Further, as to navigable rivers, see *Rex* v. *Montague* (1825), 4 B. & C. 598; and *Miles* v. *Rose* (1814), 5 Taunt. 705. For a case in which owners of salmon fishings objected to abstraction of water from a river by millowners, see *Kintore* (*Earl of*) v. *Alexander Pirie & Sons*, [1906] A. C. 478.

The maxim *Sic utere tuo ut alienum non lædas* applies as between riparian owners; and, therefore, no proprietor has a right to use the water to the prejudice of another. Nor may he use it for any purpose inconsistent with similar enjoyment in the owners above and below (*Mason* v. *Hill* (1833), 5 B. & Ad. 1). And see also *Wright* v. *Howard* (1823), 1 Sim. & Stu. 190; *Wood* v. *Waud* (1849), 3 Ex. 748; *Sampson* v. *Hoddinott* (1856), 1 C. B. (N.S.) 590; *Sharp* v. *Wilson, Rotheray & Co.* (1905), 93 L. T. 155.

"It is wholly immaterial whether the party be a proprietor above or below in the course of the river, the right being common to all the proprietors on the river; no one has a right to diminish the quantity which will, according to the natural current, flow to a proprietor below, or to throw it back upon a proprietor above. This is the necessary result of the perfect equality of right among all the proprietors of that which is common to all": *per* Mr. Justice STORY, in *Tyler* v. *Wilkinson* (1827), 4 Mason U. S. R. 397. And see *Frechette* v. *La Compagnie Manufacturière de St. Hyacinthe* (1883), 9 App. Cas. 170. It is not a good defence to show that water from a foreign source is being substituted for the water abstracted (*Stevenson* v. *Hogganfield Bleaching Co.* (1892), 30 S. L. R. 86). See also *Sharp* v. *Wilson, Rotheray & Co.*, *supra.*

Lord KINGSDOWN, in *Miner* v. *Gilmour* (1858), 12 Moo. P. C. C. 131, 156, in the course of his judgment, observed: "By the general law applicable to running streams, every riparian proprietor has a right to what may be called the ordinary use of the water flowing past his land; for instance, the reasonable use of the water for his domestic purposes and for his cattle, and this without regard to the effect which such use may have in case of deficiency upon proprietors lower down the stream. But, further, he has a right to the use of it for any purpose, or what may be deemed the extraordinary use of it, provided that he does not thereby interfere with the rights of other proprietors either above or below him. Subject to this condition, he may dam up for the purpose of a mill, or divert the water for the purpose of irrigation; but he has no right to interrupt the regular flow of the stream, if he thereby interferes with the lawful use of the water by other proprietors, and inflicts upon them a sensible injury." This statement of the law is thus referred to by MARTIN, B., in *Nuttall* v. *Bracewell* (1866), L. R. 2 Ex., at p. 9: "The law has been supposed to be well settled, and, in my opinion, is nowhere more clearly stated than by Lord KINGSDOWN in *Miner* v. *Gilmour*." In that case the plaintiff was the lessee of a mill situated on riparian land. A., through whom he derived title, had, in 1840, under a written agreement with the adjoining higher riparian owner, and subject to an annual payment, constructed a goit on the higher owner's land, intercepting the water of the stream at a weir in that land, and bringing it thence to his mill. The flow of the water through this goit had ever since been enjoyed by the millowner, and used for the purpose of working the mill; and the annual acknowledgment had been paid. The defendant, a riparian owner above the weir, and also a millowner, intercepted the water of the stream for the purpose of his mill, and the plaintiff sued for damages. The Court of Exchequer held that the plaintiff was entitled to recover. See further *Baily & Co.* v. *Clark, Son & Morland,* [1902] 1 Ch. 649.

The principles laid down in the case of *Miner* v. *Gilmour* were adopted in the House of Lords by Lord HALSBURY, L.C., in *John White & Sons* v. *J. and M. White,* [1906] A. C. 72, where it was further laid down that the ownership of an artificial dam, although it may give a right to maintain the dam, does not turn the running stream into a pond so as to give the owner of the dam an exclusive right to use the whole of the running water. See also *Portsmouth Waterworks Co.* v. *London, Brighton and South Coast Rail. Co., Times,* December 16th, 1909.

A company which purchases the land of a riparian owner stands in the same situation as he did with respect to the water rights connected with that land. A canal company was established by Act of Parliament, and had parliamentary power to take water from streams within the distance of 2,000 yards, for the purpose of making and maintaining their canal. They purchased a mill on a stream from which they had the right to take water. They thus became riparian owners, and as such they were entitled to the flow of water from brooks and streams running into that stream, subject only to the rights which other riparian owners at the upper part of the stream might lawfully exercise. The directors of a waterworks company purchased a mill on the upper part of the same stream, and so became riparian owners as the owner of that mill had been. They not only used the water for the purposes and in the manner allowed by law to every riparian owner, but collected it into a permanent reservoir for the supply of an adjacent town, and claimed such user of it as their legal right. It was held, however, that this use of the water by the directors of the waterworks company was not a reasonable use of the stream such as could justifiably be made by an upper riparian owner, and that the canal proprietors, who were also riparian owners, whose flow of water was thereby affected, were entitled to obtain an injunction to restrain such use of the water. The rights of riparian owners on the upper and lower portions respectively of a stream will be found discussed and explained in this case (*Swindon Waterworks Co.* v. *Wilts and Berks Canal Co.* (1875), L. R. 7 H. L. 697). See *Ormerod* v. *Todmorden Joint Stock Mill Co.* (1883), 11 Q. B. D. 155; and also *Blantyre* (*Lord*) v. *Dumbarton Waterworks Co.* (1888), 15 R. 56. In *Attorney-General* v. *Great Eastern Rail. Co.* (1870), 23 L. T. (N.S.) 344, Lord ROMILLY expressed the opinion that a railway company having a line adjoining a stream had no right to take water from it for supplying their locomotives. On appeal the case was decided on the ground that the obstruction of the water seriously impeded the navigation of the stream (see (1871) L. R. 6 Ch. 572). In 1878, it was decided by BACON, V.-C., that a railway company whose line crossed a stream in the immediate neighbourhood of one of their stations was entitled to take a reasonable quantity of water from the stream for supplying their locomotive engines as well as for the general purposes of the station (*Sandwich* (*Earl*) v. *Great Northern Rail. Co.* (1878), 10 Ch. D. 707). This case was overruled by the House of Lords in *McCartney* v. *Londonderry and Lough Swilly Rail. Co.,* [1904] A. C. 301. In this case the facts were as follows:—A natural stream was crossed by a railway, and flowed down to a mill. The railway company claimed the right to insert a pipe into the stream at the point of crossing (which was the only place where their land adjoined the stream), and to divert water (by carrying the pipe along the strip of railway line) into a tank upon land belonging to the company about half a mile away. This land did not abut upon the stream. From the tank the respondents supplied their locomotive engines with water. The appellant, who was a millowner lower down the stream, used the water for working a corn mill. The appellant stopped up the pipe. The House of Lords decided that the

NOTE.

purposes for which the company were using the water were not purposes connected with the land where the railway crossed the stream, and that the millowner was justified in stopping up the pipe. See observations on the *Sandwich Case* at pp. 305 and 314 of the last mentioned report.

For a case of alleged damage to millowners below from the construction of a reservoir higher up the stream, see *Tatton* v. *Staffordshire Potteries Waterworks Co.* (1880), 44 J. P. 106. As to construction of a covenant for quiet enjoyment on sale of a well with the right of drawing water therefrom, see *Brain* v. *Marfell* (1880), 44 J. P. 56. Mere possession of rights corporeal or incorporeal is sufficient to maintain an action for disturbance of them against a wrongdoer (*Pullan* v. *Roughfort Bleaching Co.* (1888), 21 L. R Ir. 73).

There is no distinction between the position of a riparian owner of land abutting on a tidal and that of an owner of land abutting on a non-tidal stream, as far as regards right of access from the stream to his own land and *vice versâ*. Such right of access is a private right distinct from the right of navigating the stream, which is common to the riparian owner and the rest of the public. Such right is not to be interfered with by a licence to embank under s. 53 of the Thames Conservancy Act, 1857 (20 & 21 Vict. c. cxlvii.), but is protected by s. 179 of that Act (*Lyon* v. *Fishmongers' Co.* (1876), 1 App. Cas. 662). See now Thames Conservancy Act, 1894 (57 & 58 Vict. c. clxxxvii.). In the case of navigable or tidal rivers there must be no interference with the public right of navigation, and in order to give rise to riparian rights the land must be in actual daily contact with the stream, laterally or vertically (*North Shore Rail. Co.* v. *Pion* (1889), 14 App. Cas. 612). See *Parkdale Corporation* v. *West* (1887), 12 App. Cas. 602; *Booth* v. *Ratté* (1890) 15 App. Cas. 188; and *Earl of Ilchester* v. *Rashleigh* (1899), 61 L. T. 477. See also *Bell* v. *Quebec Corporation* (1879), 5 App. Cas. 84; and *cf. Gann* v. *Free Fishers of Whitstable* (1864), 11 H. L. Cas. 192; and as to Norfolk Broads, see *Micklethwait* v. *Vincent* (1893), 69 L. T. 57. As to the solum of sea lochs *inter fauces terræ*, see *Lord Advocate* v. *Clyde Navigation Trustees* (1891), 19 Ct. of Sess. Cas., 4th ser., 174.

A., having a prescriptive right to a flow of water led by means of a gutter laid in a millstream at a point where an ancient weir was erected, lengthened the gutter for the purpose of irrigating more land. The flow of water down C.'s millstream was diminished, and he, in consequence, pulled down the ancient weir, which prevented the water from flowing down A.'s gutter:—*Held*, that no suspension of his right to the enjoyment of the flow of water as it had formerly existed was caused by his having become a wrongdoer, and C. was not justified in stopping the excessive user by means which altogether prevented A.'s enjoyment of the water, but only in stopping it by the least injurious means in his power (*Hill* v. *Cock* (1872), 26 L. T. (N.S.) 185).

Where a non-tidal river gradually changes its bed, and thereby adds land to or takes it away from one side, the rule that the riparian owner on that side enjoys the gain or has to bear the loss applies not only where two different persons own the opposite banks, but also where the river bed belongs to a separate owner, and not to the riparian owners. The question whether any particular land is part of the bed of a non-tidal river at any particular spot or time is one of fact, to be determined not by any hard and fast rule, but having regard to all material circumstances, including past and present fluctuations of the river, and the nature, growth, and user of the land (*Hindson* v. *Ashby*, [1896] 2 Ch. 1).

In a case from South Africa, where a mining company had agreed for a specified term to "obtain and purchase all the water required by them for their mining purposes" from a water company and from no other person or persons, with a proviso excepting any water obtained by them from their own mines, it was held by the Privy Council, that on the true construction of this agreement the proviso was not limited to such mines as the mining company possessed at the date of the agreement, and that, on the other hand, they could not deprive the water company of their monopoly of supply by obtaining it gratis elsewhere (*Kimberley Waterworks Co., Ltd.* v. *De Beers Consolidated Mines, Ltd.*, [1897] A. C. 515).

Sect. 6.

NOTE.

In another case from South Africa (*Remfrey* v. *Natal Surveyor-General*, [1896] A. C. 558), it was held, that where in a grant of land a right is reserved to make watercourses over it for the public use and benefit by order of Government, such reservation may include, and in the circumstances of that case did include, a right to divert water from streams in the land, and to use the water so diverted.

Operations *in alveo.*

Where one riparian proprietor had erected a permanent building in the channel of a stream, the House of Lords held that the opposite riparian proprietor might maintain an action against him without proving actual damage (*Bickett* v. *Morris* (1866), L. R. 1 H. L. Sc. 47). Lord CRANBROOK in that case remarked, that "by the law of Scotland, as by the law of England, where the lands of two conterminous proprietors are separated from each other by a running stream of water, each proprietor is *primâ facie* owner of the soil of the *alveus* or bed of the river, *ad medium filum aquæ*. The soil of the *alveus* is not the common property of the two proprietors, but the share of each belongs to him in severalty, so that, if from any cause the course of the stream should be permanently diverted, the proprietors or either side of the old channel would have a right to use the soil of the *alveus*, each of them up to what was *medium filum aquæ*, in the same way as they were entitled to the adjoining land. The appellant contended that, as a consequence, every riparian proprietor is at liberty at his pleasure to erect buildings on his share of the *alveus*, so long as the other proprietor cannot show that damage is thereby occasioned or likely to be occasioned to him. I do not think that this is a true definition of the law." See further, *Palmer* v. *Persse* (1877), Ir. R. 11 Eq. 616, in which the principle of that case was applied, and in which it was further decided that that principle was not confined to the case of opposite riparian proprietors. As to where the *medium filum* should be drawn, see *Menzies* v. *Marquis of Breadalbane* (1901), 39 S. L. R. 35. See also *Ross* v. *Powrie and Pitcaithley* (1891), Ct. of Sess. Cas., 19 Rettie, 314; *Edleston* v. *Crossley & Sons, Ltd.* (1868), 18 L. T. (N.S.) 15, and *Ambler & Sons, Ltd.* v. *Bradford Corporation*, [1902] 2 Ch. 585.

The defendants were owners of the soil of a stream which supplied water to two print works. A., whilst occupier of both works, erected a weir across the stream, and thereby diverted the water from one of the works. The plaintiff, becoming lessee of the last-mentioned work, and entitled to the water of the stream, removed the weir. A. afterwards, and without any authority from the defendants, and against their will, replaced the weir:—*Held*, that the defendants were not responsible for the act of A., or for the continuance of the nuisance (*Saxby* v. *M. S. & L. Rail. Co.* (1869), L. R. 4 C. P. 198). A wharf-owner drove piles into the bed of a river, extending the wharf so as to occupy three feet out of a breadth of about sixty feet available for navigation:—*Held*, that this was such an obstruction as would be restrained at the suit of a municipal corporation empowered by Act of Parliament to remove obstructions. Decree of the Master of the Rolls affirmed:—*Held* (*per* Master of the Rolls), that an owner of land at the side of a public navigable river has no right to erect on the bed of the river, for the benefit of his own trade, any structure, whether any actual obstruction to the navigation of the river will or will not be thereby occasioned; and any benefit to his own trade is too remote to be held to be for the advantage of the public generally, and so to justify the erection (*Attorney-General* v. *Terry* (1874), L. R. 9 Ch. 423). An information and bill was filed by the plaintiff, a riparian proprietor on a tidal navigable river, to restrain the defendant, an opposite riparian proprietor, from constructing a jetty in the *alveus* of the river, so as to injure the plaintiff's property and interfere with the navigation:—*Held*, that a riparian proprietor had no greater right to use the *alveus* of a tidal than a non-tidal river, and that although the plaintiff had proved no serious injury to his property, he was entitled to an injunction:—*Held*, also, that the suit being by information and bill, was properly framed in respect of the private and public wrong complained of (*Attorney-General* v. *Earl of Lonsdale* (1868), L. R. 7 Eq. 377). See a later stage of the case (1870), L. R. 6 Ch. 141. See further the following Court of Session (Scotland) cases as to operations *in alveo*: *Duke of Roxburghe* v. *Waldie's Trustees* (1879), 6 Rettie, 663 (erection of a cauld);

Robertson v. *Foote* (1879), *ibid.*, 1290 (removing massive boulders); *Murdoch* v. *Wallace* (1881), 8 Rettie, 855 (embankment); *Lyell's Trustees* v. *Forfarshire Road Trustees* (1882), 9 Rettie, 792 (taking stones from banks and bed of river to repair roads); and see further, *Jamieson* v. *Police Commissioners of Dundee* (1884), 12 Rettie, 300; *Filshill* v. *Campbell* (1887), 14 Rettie, 592, and *McIntyre* v. *McGavin*, [1893] A. C. 268. Where the defendants, who were riparian proprietors, with the object of forming a water company, and selling the water of a slender stream, first to other riparian proprietors, and then, if any remained over, to anyone who chose to buy it, erected a weir *in alveo*, which had a sensibly injurious effect upon the flow to and past the plaintiff's premises, and could not be used for the purpose for which it was erected without a continuance of such injury:—*Held*, that the erection of the weir was illegal, and that the plaintiffs were entitled to a perpetual injunction restraining the defendants, their servants, etc., from continuing the erection of the structure complained of, and from obstructing the rights of the plaintiffs to the flow of the water, according to its usual course and volume, to and past their lands (*Belfast Ropeworks Co.* v. *Boyd* (1887), 21 L. R. Ir. 560). An erection *in alveo fluminis* in not *per se* illegal, because the defendant erecting it cannot prove the impossibility, as well as the absence, of injury to the plaintiffs. The reasonable uses which a riparian proprietor may lawfully make of the water passing his land, include turning its natural gravitation into water power, by weirs or other like contrivances erected *in alveo fluminis*, although their effect, if not carefully and reasonably used, might be to cause sensible injury to lower proprietors. In an action for wrongfully obstructing the flow of a river by increasing the height of a weir, whereby the plaintiff's land abutting on the river was flooded, it was held that if the effect of the acts complained of was to raise the water of the river as it flowed past the plaintiff's land above the height at which it ought of right to have flowed, such raising would be an actionable wrong, and would entitle the plaintiff to a finding in his favour with nominal damages, actual damage not being essential in order to maintain the action (*McGlone* v. *Smith* (1888), 22 L. R. Ir. 559). As to weirs across a navigable river, see *Williams* v. *Wilcox* (1838), 8 A. & E. 314. If property (*e.g.*, oysters) be placed in the channel of a public navigable river so as to create a public nuisance, a person navigating is not justified in damaging such property by running his vessel against it, if he has room to pass without so doing; for an individual cannot abate a nuisance if he is not otherwise injured by it than as one of the public. And, therefore, the fact that such property was a nuisance was no excuse for running upon it negligently (*Colchester Corporation* v. *Brooke* (1846), 7 Q. B. 339). The bed of all tidal navigable rivers and of all arms of the sea is in the Crown, but is so for the benefit of the subjects. The right of navigation belongs, by law, to all the subjects of the realm, and the right to anchor is a necessary part of the right to navigate (*Gann* v. *Free Fishers of Whitstable* (1864), 11 H. L. Cas. 192).

Sic utere tuo

The accustomed course of a natural stream which a riparian owner is entitled to have preserved is the natural and apparently permanent course existing when the right is asserted or called in question. Where, by long-continued natural accretion of gravel, the bed of a river, and consequently the flow of water, have become permanently altered, it is not within the rights of a riparian owner, by removing the accretion, to restore the flow of water to its former state as to velocity and direction (*Withers* v. *Purchase* (1889), 60 L. T. 819). A riparian owner has the right to raise the banks of the river from time to time, as it becomes necessary, so as to confine the flood-water within the banks and prevent it from overflowing his lands, so long as he does not contravene the maxim *Sic utere tuo ut alienum non lædas* (*Ridge* v. *Midland Rail. Co.* (1889), 53 J. P. 55).

A. was possessor and occupier of an ancient mill and lands adjoining, and carried on therein the business of a manufacturer of paper, which had from time immemorial been carried on in them. The mill and lands were situate in a valley at the foot of a range of hills, sloping towards and terminating in a tall precipitous rock abutting upon them. Inside this rock, and at the

Sect. 6.

NOTE.

elevation of a few feet above the lands, was, from time immemorial, a natural cavern, and the water produced by the rainfall on a portion of the hills ran by underground passages into it, and, after traversing the floor of the cavern in a defined stream, flowed by an underground passage out of the cavern into an open natural basin in the lands of A., and thence in an open and defined stream to the mill in a pure and unpolluted state. In 1857 B. became possessor and occupier of land and premises on the summit of the hills, at a higher elevation than the cavern, and worked on them machinery for extracting from the soil minute particles of lead intermixed with it. In working this he constructed eight buddles, or circular pits, in the surface of the ground, into which water was brought through artificial cuts. From these buddles polluted water was discharged into drains communicating with two swallets or natural rents existing from time immemorial in the limestone rock of the hills, and having an underground passage for water communicating with an outlet, at which the water escaped in an open stream at their foot. The water passages from these two swallets communicated with the cavern through which the polluted water flowed, and thence mingled with the stream flowing through the cavern into the basin, and thence to A.'s lands and mill, whereby the water was fouled:—*Held*, that an action for fouling the stream was maintainable by A. against B. (*Hodgkinson* v. *Ennor* (1863), 4 B. & S. 229). In giving judgment, BLACKBURN, J., observed: "The defendant has a right to use the water which was to be found upon his own land for the purpose of washing his lead, but then, as was laid down in *Tenant* v. *Goldwin* (1704), 2 Ld. Raym. 1089, he must use it so as not to injure his neighbour's property; or, as it is concisely and quaintly stated in the report, 1 Salk. 360, 'he whose dirt it is must keep it that it may not trespass.' So here, the defendant ought to take care that the water does not come to the mill in such a way as to injure his neighbour. He has not kept it so as not to be a trespass to the plaintiff, who had a right to have the water in a clean state, and has instead thereof got it in a polluted and filthy state. There is, therefore, *damnum* and also *injuria*, and a cause of action against the defendant. In *Humphries* v. *Cousins* (1877), 2 C. P. D. 239, it appeared that the plaintiff and the defendant were occupiers of adjoining houses. An old drain which commenced on the defendant's premises and then passed under and received the sewage of several other houses, turned back under the defendant's house and thence under the cellar of the plaintiff's house and ultimately into a public sewer. The part of the return drain which passed through the defendant's premises being decayed, the sewage escaped, and, flowing into the plaintiff's cellar, did damage. The defendant was unaware of the existence of this return drain, and consequently of its want of repair. It was held, following *Tenant* v. *Goldwin*, *supra*, however, that the defendant was liable for the damage done to the plaintiff; for that defendant's duty was to keep the sewage which he himself was bound to receive from passing from his own premises to the plaintiff's premises, otherwise than along the old accustomed channel, and that this duty was independent of negligence on his part, and independent of his knowledge or ignorance of the existence of the drain. Where the plaintiff by permission of a canal company made a communication from the canal to his own premises by which he obtained water to feed the boilers of his engine, and the defendant, without any right and without any permission from the canal company, fouled the water in the canal whereby the water as it came to the plaintiff's premises was foul, and by the use of it the plaintiff's boilers were injured, the Court of Exchequer held that an action was maintainable, but the Court of Exchequer Chamber reversed this decision after considerable difference of opinion (*Laing* v. *Whaley* (1858), 3 H. & N. 675, 901. For the exact form in which the judgment was ultimately entered, see 3 H. & N. 901). The plaintiff's land adjoined a brook on the other side of which was a rubble drain from which, by means of a syphon under the brook, the plaintiff, with the consent of the landowner derived a supply of water for domestic purposes. The defendants, with the consent of the same landowner, opened the drain and kept it open for ten weeks, whereby the water coming to the plaintiff became fouled. The plaintiff brought an action for damages in a county court, and in order to give jurisdiction waived any question of easement or right. A judgment for the defendants was upheld on appeal by a Divisional Court (*Dickinson* v. *Shepley, etc., Sewerage Board* (1904), 68 J. P. 363).

The proprietors of a mill on the river Kelvin under a Crown grant conferring on them the mill, mill-dams, aqueducts, and all the privileges and pertinents thereof, drew from the dam for more than forty years 1,200 cubic feet per minute of water for the use of their mill. Thereafter, they extended the mill and increased its supply to 6,000 cubic feet per minute. The proprietors of another mill, situated on the opposite bank, and drawing its water from the same dam, under a title containing no express grant of water rights, had for more than forty years drawn 2,077 cubic feet per minute from the dam, but only after the right of the first-mentioned mill to the first water was satisfied. It was held by the second division of the Court of Session that the owners of the first-mentioned mill were entitled to a declarator that they were entitled to the first water from the dam for the use of their mill to the extent of 6,000 cubic feet per minute (*J. and M. White* v. *John White & Sons* (1905), 42 S. L. R. 330). On appeal, the House of Lords reversed this decision, holding that the owners had no right to abstract the water except to the extent to which they had had prescriptive use (*John White & Sons* v. *J. and M. White*, [1906] A. C. 72).

A party acquires by twenty years' enjoyment a right to the use of water flowing through his land in a defined artificial channel, which was originally made for the benefit of all the persons by or through whose land the water was, by means of such channel caused to flow (*Powell* v. *Butler* (1871), 5 Ir. R. C. L. 309). See *Rameshur Pershad Narain Singh* v. *Koonj Behari Pattuk*, and other cases cited, *ante*, p. 403. The defendants in 1834 demised to the plaintiffs the coal under the C. estate for fifty years, with powers to sink pits, make soughs, etc., erect engines and make drains, etc., for supplying such engines with water, and also to do certain other acts on the surface for the better draining and working the demised mines and any other mines of which the plaintiffs might become lessees under the lands of any other persons. In 1836 the plaintiffs took a lease for thirty-five years of the O. Colliery from a neighbouring landowner. In 1846 the plaintiffs made a drain about a mile long, chiefly on the C. estate, by which they diverted a small natural stream on the C. estate, and brought it down to the O. Colliery, where they made reservoirs for the water at considerable expense. They did not ask leave to make the drain, but the defendants' agent saw the work going on, and encouraged it. In 1872 the plaintiffs became owners in fee of the O. Colliery. In 1884, when the lease from the defendants expired, the defendants stopped the drain and diverted the water. The plaintiffs, claiming a right by prescription to the water, commenced this action to restrain them from doing so. The vice-chancellor of the county palatine held that the watercourse was made under the powers of the lease, and that the right to the water expired at the end of the lease, and he dismissed the action :—*Held*, on appeal, that this dismissal was right, for that if the making of the drain was not authorised by the lease (as to which the court gave no opinion), it was made and enjoyed either under the belief of both parties that it was authorised by the lease, or under a comity between landlord and tenant, and that there was no enjoyment as of right so as to give the tenant a right to the water after the lease had expired (*Chamber Colliery Co.* v. *Hopwood* (1886), 32 Ch. D. 549). By deed in 1791 A. obtained a demise from B. of an underground goit or drain to be then constructed in B.'s land for the purpose of conducting water from A.'s mill so long as an annual rent of £2 2*s.* should be paid by A. to B. In 1836 the demise of 1791 was put an end to, and liberty was given to A., who was at that time yearly tenant from B. of the land through which the goit ran, to change the goit or drain of 1791, and to substitute a new cut for conducting pure and clean water at the like rent of £2 2*s.* The new cut was made and used for pure water, and the old goit (as the plaintiff alleged) continued to be used for foul water. In 1866 the land through which the goits ran was sold to C., and in 1867 A.'s yearly tenancy of the land was determined. In an action by A. in 1879 to restrain C. from interfering with his use of the old goit, to which he claimed title by prescription from alleged open and uninterrupted use and enjoyment thereof

Sect. 6.

NOTE.

from 1836:—*Held*, that until 1867 A. could not acquire an easement in the land of which he was yearly tenant, distinct from the use and enjoyment of such land, as against B., his landlord, and accordingly that, assuming the open and uninterrupted user from 1836 to have been proved, he had failed to establish any title by prescription as against C. (*Outram* v. *Maude* (1881), 17 Ch. D. 391).

Further questions as to riparian rights.

A navigable river is a public highway, navigable by all subjects of the realm in a reasonable manner and for a reasonable purpose. Accordingly, a riparian owner has a right to moor a vessel of ordinary size alongside his wharf for the purpose of loading or unloading, at reasonable times and for a reasonable time; and the court will restrain by injunction the owner of adjoining premises from interfering with the access of such vessel, even though the vessel may overlap his own premises, though such vessel would not be allowed to interfere with the proper right of access to the neighbouring premises if used as a wharf, nor to the free entrance to or exit from such premises, if used as a dock, by other vessels (*Original Hartlepool Collieries Co.* v. *Gibb* (1877), 5 Ch. D. 713). This case was followed in *Land Securities Co., Ltd.* v. *Commercial Gas Co.* (1902), 18 T. L. R. 405. See cases as to rights of fishing, *ante*, p. 407.

Where the defendants, who were justices of the peace for the county, and also on the committee of visitors of the county gaol, took, by means of pipes and machinery, water from a navigable river, over which the plaintiffs had the control, under 17 Car. 2, c. xi., and 13 Geo. 2, c. 26, for the purposes of the gaol without the permission of the plaintiffs:—*Held*, that upon the true construction of the 13 Geo. 2, c. 26, s. 2, the plaintiffs had not such a limited right in the river as a private grant of the river might have conveyed, but that it created a property and interest in the water which was interfered with by the abstraction of it for the purposes to which it was applied by the defendants, which purposes were more extensive than those for which a riparian proprietor could insist on appropriating a stream as it passed his land, and that it was not necessary that there should be an actual damage to the navigation, because the legislature intended to give the company such an interest in all the water of the river for the purposes of navigation as was interfered with by the abstraction of any part thereof (*The Proprietors of the Medway Navigation* v. *The Earl of Romney* (1861), 9 C. B. (N.S.) 575.) See *per* Lord KINGSDOWN in *Miner* v. *Gilmour*, cited *supra*, p. 407.

If the owner of land adjoining a stream has once appropriated the water to a beneficial purpose, he may maintain an action against any person diverting it from its usual course, though such diversion be the continuation of an act done previous to that beneficial appropriation on his part, provided such diversion has not continued for a sufficient length of time to confer an easement (*Mason* v. *Hill* (1833), 5 B. & Ad. 1).

Where a man has exclusive right to the water of a stream, and by diverting it to a mill increases its usefulness, any person obstructing the flow of water is liable for the full damage sustained, although such damage is increased by the use to which the water has been so put; and although the person putting it to that use has obtained no prescriptive right so to use it (*Holker* v. *Porritt* (1875), L. R. 10 Ex. 59).

A riparian proprietor cannot keep the land abutting on a river, the possession of which gives him his water rights, and at the same time, by granting a part of that land which does not abut on the river, transfer those rights, or any of them, and thus create a right in gross, by assigning a portion of his rights appurtenant. The rights which a riparian proprietor has with respect to the water are entirely derived from possession of land abutting on the river. If he grants away any portion of his land so abutting, the grantee becomes a riparian proprietor and has similar rights; but if he gives away a portion of his estate not abutting on the river, then the grantee of the land would have no water rights by virtue merely of his occupation, nor can he have them by express grant, except as against the grantor, so as to sue other persons in his own name for an infringement of them. BRAMWELL, B., *dissentiente*

(*Stockport Waterworks* v. *Potter* (1861), 3 H. & C. 300). This case was particularly considered in *Nuttall* v. *Bracewell* (1866), L. R. 2 Ex. 1, cited *supra*, p. 407; and was followed in *Ormerod* v. *Todmorden Mill Co.* (1883), 11 Q. B. D. 155. But where the owner of land not abutting on a river, with the licence of a riparian owner, took water from a river, and, after using it for cooling certain apparatus, returned it to the river undiminished and unpolluted, it was held that a lower riparian owner could not obtain an injunction against the landowner so taking the water or against the riparian owner through whose land it was taken (*Kensit* v. *G. E. Rail. Co.* (1884), 27 Ch. D. 122). See remarks on the foregoing case in the judgments of the House of Lords in *McCartney* v. *Londonderry and Lough Swilly Rail. Co.*, [1904] A. C. 301. The defendant diverted a stream as it passed through his premises, but restored it undiminished, as to the quantity of water, to its former channel before it reached the premises of the plaintiff; the defendant also employed the stream, while on his premises, in a way which rendered the water unfit for ordinary use, but he alleged that the water by the time it reached the plaintiff's land was freed to the utmost possible extent from any noxious ingredients with which it had become impregnated. And it did not appear that any actual damage was sustained by the plaintiff. In these circumstances Lord COTTENHAM, L.C., dissolved an injunction which had been granted (*Elmhirst* v. *Spencer* (1849), 2 Mac. & G. 45). *Cf. Northam* v. *Hurley* (1853), 1 E. & B. 665; *Sampson* v. *Hoddinott* (1856), 1 C. B. (N.S.) 590; *Bonthrone* v. *Downie* (1878), Ct. of Sess. Cas., 6 Rettie, 324; and *Sharp* v. *Wilson* (1905), 93 L. T. 155.

Before 1800, a canal company, under powers of an Act of Parliament, diverted, for the purposes of the canal, a considerable part of the water from a brook which flowed through the plaintiff's land, at a point above the plaintiff's land, the rest of the water continuing to flow in its natural channel. In 1847, the Act was passed authorising the defendants, a railway company, to purchase the canal, to discontinue the use of it, and to fill it up, and sell such parts as were not used for the railway. Under these powers, the use of the canal was discontinued in 1853, and in 1864 the defendants made a cut by which they restored to the brook, at a point above the plaintiff's land, the water which had been diverted from it. In 1865 the defendants conveyed the part of the canal on which they had made the cut to a purchaser in fee. The bed of the stream, owing to the diminished scour of the water from 1800 to 1853, had been silted up, so as to be insufficient to carry off the water coming down in extraordinary floods. In 1866 such a flood occurred—the water overflowed the plaintiff's land and damaged his crops, upon which he brought an action against the defendants:—*Held*, that there being no obligation imposed upon the canal company to continue the diversion, the plaintiff had no right of action:—By BLACKBURN and HANNEN, JJ.: On the ground that, though the claim to have the water, which would otherwise have come down to the plaintiff's land, diverted over other land, was a claim to a watercourse within the Prescription Act, 1832 (2 & 3 Will. 4, c. 71), s. 2, yet the enjoyment was not as of right; and therefore, though for more than forty years, conferred no right on the plaintiff. By COCKBURN, C.J.: On the ground that the plaintiff, the owner of the servient tenement, could acquire, by the mere existence of the easement, no right as against the owner of the dominant tenement to the continuance of the diversion. *Quœre*, by BLACKBURN and HANNEN, JJ., whether such a right could be acquired under the Prescription Act, against a canal company; *semble*, by the same judges, on the authority of *Roswell* v. *Prior* (1701), 12 Mod. 635, that the fact of the defendants having parted with the property would not have affected their liability (*Mason* v. *Shrewsbury and Hereford Rail. Co.* (1871), L. R. 6 Q. B. 578).

In a case in which one canal company laid claim to waste water escaping from the lock of another company and relied on prescription, it was held that, on the construction of the Acts of Parliament, any grant of such wastes would have been *ultra vires*; no prescriptive right by user could be set up; and it was also held that the doctrines as to the use of water in natural or artificial streams does not apply to water passing through locks in a canal,

Sect. 6.

NOTE.

such water being accumulated under the authority of the legislature, to be used in a particular manner for the benefit of the public (*Staffordshire and Worcestershire Canal Navigation Co.* v. *Birmingham Canal Navigation Co.* (1866), L. R. 1 H. L. 254). See further hereon *Attorney-General* v. *G. N. Rail. Co.* (1908), 73 J. P. 41, and other cases there cited; and *cf. Ayr Harbour Trustees* v. *Oswald* (1883), 8 App. Cas. 634, and *Preston Corporation* v. *Fulwood L. B.*, *ante*, p. 168, and see cases cited, p. 403. See also *Creyke* v. *Hatfield Chase Level Corporation* (1896), 12 T. L. R. 383, in which case the plaintiff claimed the "right of warping his adjoint lands by the water of the 'Dutch' or New River, through the New Clough free from any control by the defendants."

A mine had from before the time of living memory been worked by tin-bounders, according to the custom of Cornwall, which enables any person to mark out a piece of waste ground, the owner of which does not choose to work the mines under it, and work them without the consent of the owner, yielding to the owner a share of the proceeds. The bounders had from before the time of living memory used for the purpose of their works the water of an artificial watercourse arising in the land of another person. The bounders abandoned the mine in 1856, since which the owners had been in possession. A bill by the owners to restrain the diversion of the watercourse by the owner of the land in which it rose was dismissed by KINDERSLEY, V.-C., on the ground that there was no privity of estate between the owners and the bounders, and that the owner, therefore, could not claim an easement by prescription on the ground of their enjoyment of it:—*Held*, on appeal, that an injunction ought to be granted, for that it ought to be presumed that a right to use the waters had been acquired by arrangement with the owner of the mine as well as with the bounders (*Ivimey* v. *Stocker* (1865), L. R. 1 Ch. 396).

A riparian proprietor has a right, by means of water-wheels and machinery erected by him for that purpose, to pump up water from a natural stream flowing past his land to a reservoir, and to convey it thence by pipes to his dwelling-house upon another estate at a distance from the stream, and he may there apply such water to his domestic and other necessary purposes of utility; provided he take only a reasonable quantity, with reference to the size of the stream, and the rights of his neighbour; but he has no right to take more water, by means of the wheels and machinery, than he would have a right to take otherwise (*Earl of Norbury* v. *Kitchen* (1863), 7 L. T. (N.S.) 685).

Where a public body is under an Act of Parliament entrusted with powers and duties for a public purpose, the court will give credit to them as being the best judges of what they want for that purpose. Accordingly a railway company was restrained from taking a large quantity of water for the use of their station from a river under the control of conservators, credit being given to the evidence, on the part of the conservators, that taking such water would impede the navigation, against the evidence on the part of the railway company, that taking such water would produce no appreciable effect (*Attorney-General* v. *G. E. Rail. Co.* (1871), L. R. 6 Ch. 572).

B. washed a van of his on the part of the street opposite to his coach-house, and the water so used ran along the gutters by the side of the street for about seventy feet down to the corner of another street, where, meeting an obstruction, it accumulated and extended over part of the roadway, instead of going, as usual, into the sewer, and there being a sharp frost at the time, it shortly became frozen over. The cleaning a van in the street was an offence under the Metropolitan Police Act, 1839 (2 & 3 Vict. c. 47), s. 54 (1); but B. was not shown to have known of the obstruction at the corner, and if he had cleaned the van in the coach-house, the water would also have gone into the same gutter in the street. It was held, that B. was not liable for damage caused to a horse by slipping whilst passing over the frozen water at the corner, as such damage was too remote, and was not the immediate and proximate cause of his act (*Sharp* v. *Powell* (1872), L. R. 7 C. P. 253; and see *Clark* v. *Chambers* (1878), 3 Q. B. D. 327).

Sect. 6.

NOTE.

Embanking rivers, etc.

No one is at common law entitled to embank a river or stream in such a way as to cause the water to flow with greater violence against and injure the lands of adjoining proprietors. The case is different, however, in regard to embankments against the sea, which it has been said is a "common enemy." Therefore, in the case of *The King* v. *The Commissioners of Sewers for the Levels of Pagham* (1828), 8 B. & C. 355, where commissioners of sewers, acting *bonâ fide* for the benefit of the levels for which they were appointed, directed certain defences against the inroads of the sea, which caused it to flow with greater violence against and injure the adjoining land not within the levels; it was held, that they could not be compelled to make compensation to the owner of it, or to erect new works for its protection. "I am of opinion," said Lord TENTERDEN, "that the only safe rule to lay down is this, that each landowner, for himself, or the commissioners acting for several landowners, may erect such defences for the land under their care as the necessity of the case requires, leaving it to others, in like manner, to protect themselves against the common enemy." See also *The King* v. *Bognor Commissioners* (1828), 6 L. J. K. B. 338. But if a stream floods the adjoining lands in an unusual manner, the landowner may, it seems, fence against it within the period of prescription. He may raise the banks to keep the stream within its ancient bed if he can do so without injury to others (*Trafford* v. *Rex* (1832), 8 Bing. 204; and see *Ridge* v. *Midland Rail. Co.* (1889), 53 J. P. 55). And in the case of subterranean water, as he on whose land it comes is entitled to intercept or withdraw it, so it may be let loose into the *substrata* of adjacent land; and the owner of such adjacent land, if desirous of preventing its influx on his land, may defend himself against it as against a common enemy (*Smith* v. *Kenrick* (1849), 7 C. B. 515). In the case of the *Attorney-General* v. *Earl of Lonsdale* (1868), L. R. 7 Eq. 377, where the plaintiff and the defendant were opposite riparian proprietors on the banks of a navigable tidal river, it was held, that the defendant could not, for the protection of his own soil or otherwise, construct a jetty projecting into the bed of the river, whereby the tidal water was thrown with greater violence upon the plaintiff's shore, and the public navigation of the river was or might be impeded; and that a suit by information and bill to restrain the erection of such a jetty was properly constituted. In this case the contention of the defendant was, that tidal waters ought to be considered in the same position as the sea in the *Pagham Case*, and that he was therefore entitled to protect himself against their encroachments. See also *Neild* v. *L. & N. W. Rail. Co.*, cited *ante*, p. 399; and *Hudson* v. *Tabor* (1877), 2 Q. B. D. 290.

Seawall.

As to the liability of frontagers to keep a seawall in repair, see *Hudson* v. *Tabor* (1877), 2 Q. B. D. 290; and see further as to seawalls, *Attorney-General* v. *Tomline* (1880), 14 Ch. D. 58; *Bramlett* v. *Tees Conservancy Commissioners* (1885), 49 J. P. 214; *Hesketh* v. *Bray* (1888), 21 Q. B. D. 444; *L. & N. W. Rail. Co.* v. *Fobbing Levels Commissioners* (1897), 75 L. T. 629; and *Sandgate U. D. C.* v. *Kent C. C.* (1898), 79 L. T. 425.

Underground water.

The law with regard to the question of ownership in underground water first became definitely settled by the case of *Chasemore* v. *Richards* (1859), 7 H. L. Cas. 349. The plaintiff was the occupier of an ancient mill on the river Wandle, and for more than sixty years he and the preceding occupiers of the mill had used and enjoyed as of right the flow of the river for the purpose of working their mill. The defendant represented the members of the Local Board of Health of Croydon (as the local authority was then styled), who, for the purposes of supplying the town of Croydon with water, sank a well to the depth of seventy-four feet in their own land in the town of Croydon and about a quarter of a mile from the river Wandle, and pumped up large quantities of water from their well. By means of the well and the pumping the local board of health diverted, abstracted, and intercepted underground water (but underground water only) that otherwise would have flowed and found its way into the river Wandle, and so to the plaintiff's mill. The quantity so diverted, abstracted, and intercepted was sufficient to be of sensible value towards the working of the plaintiff's mill. The water so diverted was underground water flowing in no defined channel, but percolating or oozing through the soil, more or less, according to the quantity of

Sect. 6.

NOTE.

rain that might chance to fall. The learned lords who took part in the decision of that case were Lords CHELMSFORD, CRANWORTH, WENSLEYDALE, KINGSDOWN, and BROUGHAM. The judgment of the House of Lords was unanimous. They held that the principles which regulate the rights of owners of land in respect to water flowing in known and defined channels, whether upon or below the surface of the ground, do not apply to underground water which percolates through the strata in no known channels. "The right to running water," said Lord CRANWORTH in the course of his judgment (p. 379), "has always been properly described as a natural right, just like the right to the air we breathe; they are the gifts of nature, and no one has a right to appropriate them. There is no difficulty in enforcing that right, because running water is something visible, and no one can interrupt it without knowing whether he does or does not do injury to those who are above or below him. But if the doctrine could be applied to water merely percolating, as it is said, through the soil, and eventually reaching some stream, it would always be a matter that would require the evidence of scientific men to state whether or not there had been interruption, and whether or not there had been injury. It is a process of nature not apparent, and therefore such percolating water has not received the protection which water running in a natural channel on the surface has always received."

To the like effect was the earlier case of *Acton* v. *Blundell* (1843), 12 M. & W. 324, in which by the sinking of two coalpits underground percolating water had been drained off which otherwise would have reached the well of a cotton spinner at Wigan. Another earlier case, *Dickinson* v. *Grand Junction Canal Co.* (1852), 7 Ex. 282, is to be distinguished, as that case really turned upon the construction of an agreement between the parties and of a private Act of Parliament. This distinction is pointed out by WIGHTMAN, J., who delivered the opinion of the consulted judges in *Chasemore* v. *Richards*. (See 7 H. L. Cas., at p. 369).

An owner of land has an unqualified right to drain it for agricultural purposes in order to get rid of mere surface water, which is casual and follows no regular or defined course (*Rawstron* v. *Taylor* (1855), 11 Ex. 36). This case was soon followed by another, in which it was decided that a landowner has a right to appropriate surface water which flows over his land in no defined channel, although the water is thereby prevented from reaching a watercourse which it previously supplied, and which had for more than fifty years worked the plaintiff's mill (*Broadbent* v. *Ramsbotham* (1856), 11 Ex. 602). ALDERSON, B., in this case, spoke of the water as "water from the heavens," and as water which "squanders itself (so to speak) over the adjoining surface" (see p. 615).

The more important cases which have followed *Chasemore* v. *Richards* will now be examined. In *Dudden* v. *Clutton Union* (1857), 1 H. & N. 627, there was a spring from which the water flowed in a natural stream which turned the plaintiff's mill. The defendants, for the purposes of their workhouse, sank a tank into the ground and caught the water as it rose from the earth. This was taking not underground percolating water, but water after it had arrived at the springhead. The plaintiff therefore succeeded. In *R.* v. *Metropolitan Board of Works* (1863), 3 B. & S. 710, the defendants, by the construction of a sewer under statutory authority, drained certain springs rising in a bed of gravel, and so prevented them from finding their way into a pond, so that it became dry, as did a rivulet and other ponds dependent thereon. It was held that independently of the statute, the landowner was not entitled to compensation, as the effect of the sewer was only to intercept underground percolating water which would otherwise have risen into the pond. On this point, see also *Brain* v. *Marfell* (1880), 41 L. T. 455, and *New River Co.* v. *Johnson* (1860), 2 E. & E. 435. In *Grand Junction Canal Co.* v. *Shugar* (1871), L. R. 6 Ch. 483, it appeared that the Local Board of Tring made a drain which abstracted water which otherwise would have found its way into a pond which helped to supply the canal. The drain abstracted both underground percolating water and also water running in a defined channel. The case did not turn upon any question of abstracting underground percolating water, but it turned entirely upon the question of the abstraction of water running in a defined overground channel, by reason of the faulty construction of a drain. On this latter ground, Lord HATHERLEY, L.C., decided in favour of the plaintiff. The distinction has been clearly pointed out in later cases, viz., by VAUGHAN WILLIAMS, L.J., in *Jordeson* v. *Sutton Southcoates and Drypool Gas Co.*, cited *infra*, and by NORTH, J., in *Bradford Corporation* v. *Pickles*, also cited *infra*. The case of *Ballacorkish Silver, Lead, and Copper Mining Co.* v. *Harrison* (1873), L. R. 5 P. C. 49, was the ordinary case of the withdrawal into a mine of underground percolating water which otherwise would have found its way into a spring. In *Bunting* v. *Hicks* (1894), 70 L. T. 455, there was no taking of underground percolating water, but of water after it had reached the surface, and hence an injunction was granted. The Metropolitan Water Board, as successors of the K. Waterworks Co., were owners of a well and pumping station, situated in the vicinity of a natural stream. The well was lined with steel cylinders to a depth of seventy-six feet from the top, and no water from the adjacent soil could get into the well except below the cylinders. The board pumped water from the well, and thereby reduced the general level of the water in the surrounding soil, in consequence of which some of the water flowing down the stream leaked out through the bed and sides of the stream, and the volume of water in the stream, which reached the property of a riparian owner lower down the stream, was diminished. None of the water which so escaped from the stream ever got into the board's well. In an action for damages for withdrawal of water it was held, distinguishing *Grand Junction Canal Co.* v. *Shugar*, *supra*, that the riparian owner had no cause of action, as the board did not by their pumping appropriate any of the stream water, but only caused it to sink into the ground by withdrawing the support of subterranean water (*English* v. *Metropolitan Water Board*, [1907] 1 K. B. 588; 71 J. P. 313). In *Bradford Corporation* v. *Pickles*, [1895] A. C. 587, the respondent began to sink a shaft on his land near to a spring from which the corporation derived some of their water supply, and also to drive a level through his land for the stated purpose of draining the strata with a view to the working of his minerals. These operations had the effect of diminishing to some extent the amount of water in the spring, and it became apparent that if persevered in, they would result in a considerable and permanent diminution of the water supply. The House of Lords, affirming the judgment of the Court of Appeal, held that the respondent was within his rights in what he had done. Lord HALSBURY, L.C., said: "The acts done or sought to be done by the defendant were all upon his own land, and the interference, whatever it is, with the flow of water is an interference with water which is underground and not shown to be water flowing in any defined stream, but is percolating water, which, but for such interference, would undoubtedly reach the plaintiffs' works, and in that sense does deprive them of the water which they would otherwise get." A further point decided in this case was that, if a man has a right to do a particular act, his motive in doing so is immaterial and cannot render the act unlawful. The case of *Mostyn* v. *Atherton*, [1899] 2 Ch. 360, related to St. Winifred's Well, in the urban district of Holywell in Flintshire. It was a famous well and had been known for centuries. A natural stream flowed from the well to the estuary of the river Dee. On the banks of this stream were situated mills and works making use of the water. The district council, who were in possession of the land from which the water issued, granted to the defendant the right to abstract water from the well for sale, with a right to use certain existing pipes tapping the well which had been inserted by the promoters of a waterworks company formerly projected, but now abandoned. This was not a case of abstracting underground percolating water, and BYRNE, J., granted an injunction. For a Scotch case following on the lines of *Chasemore* v. *Richards*, see *Milton* v. *Glen Moray Glenlivet Distillery Co., Ltd.* (1898), Ct. of Sess. Cas., 1 Fraser, 135.

See further on this subject of underground water the INTRODUCTION at pp. 84 *et seq.*

What is a

In the course of his judgment in *Chasemore* v. *Richards*, Lord CHELMSFORD uses the expressions "certain and definite course," and "a certain and known and

Sect. 6.

NOTE.
defined channel.

defined course, whether in an open visible stream or in a known subterranean channel," as contrasts or antitheses to "water percolating through underground strata, which has no certain course, no defined limits, but which oozes through the soil in every direction in which the rain penetrates," (p. 374). And see *per* POLLOCK, L.C.B., in *Dickinson* v. *Grand Junction Canal Co.* (1852), 7 Ex. 282. In *Ewart* v. *Belfast Poor Law Guardians* (1881), 9 L. R. Ir. 172, the defendants, a sanitary authority, made borings upon certain lands, and thereby obtained a copious underground flow of water. The judges assumed that the water tapped was water flowing in a defined underground channel, but held that it was not also "known," and, therefore, that it was not protected. FITZGIBBON, L.J. (in whose judgment Lord O'HAGAN, L.C., concurred) said: "I assume, . . . that the water did flow underground for some distance at least in a definite, that is, a contracted and bounded channel and stream, but its course was unknown, invisible, and undefined by human knowledge." The judgment was therefore in favour of the guardians. In *Black* v. *Ballymena Township Commissioners* (1886), 17 L. R. Ir. 459, Vice-Chancellor CHATTERTON held on the evidence that there was a defined subterranean channel, and also that it was "known." On the question of what is to be considered a "known" channel, he observed: "The question of fact to be determined in such cases is, whether the water appearing at a given point and then becoming a surface stream comes from subterranean percolation or oozing, or flows in a defined channel or watercourse underground to the point where it so appears; and for the decision of that question it lies on the party asserting his right to the flow to show affirmatively, not as a matter of fact, but as a reasonable inference from known facts, that the water comes to the place of emergence, not by percolation or oozing, but in a defined channel. Beyond this I do not think proof of knowledge can be required without destroying the claim of right to the flow of underground streams altogether."

In *Bradford Corporation* v. *Ferrand* [1902] 2 Ch. 655, FARWELL, J., reviewing the cases, held that no right exists in underground water where the course of the channel, though defined, is unknown.

What is a stream.

"A subterraneous flow of water may in some circumstances possess the very same characteristics as a body of water running on the surface; but, in my opinion, water whether falling from the sky or escaping from a spring which does not flow onward with any continuity of parts, but becomes dissipated in the earth's strata and simply percolates through or along those strata until it issues from them at a lower level through dislocation of the strata or otherwise, cannot with any propriety be described as a stream": *per* Lord WATSON in *McNab* v. *Robertson*, [1897] A. C. 129. In this case, a lessor demised by lease a distillery "together with the right to the water in the said ponds and in the streams leading thereto." The House of Lords (Lord HALSBURY, L.C., dissenting), held that water percolating through the ground towards the pond was not water in any stream leading to the pond. *Cf.* the judgment of POLLOCK, L.C.B., in *Dickinson* v. *Grand Junction Canal Co.* (1852), 7 Ex., at p. 304, and see *Whitehead* v. *Parks* (1858), 2 H. & N. 870.

Springs and steams.

In *Taylor* v. *St. Helens Corporation* (1877) 6 Ch. D. 264, which turned upon the construction of a grant of "streams and springs of water," JESSEL, M.R., said: "Now what are springs and streams? A spring of water, both in law and ordinary language, is, as I understand it, a definite source of water. When we talk of a spring of water, we mean a source of water of a definite, or nearly definite area, the word 'spring' coming from the water springing or bubbling up. It may be an underground spring which supplies a well, and we say that water 'wells up.' It may be an ordinary spring from which a small stream or rivulet runs above the ground. But those are definite things. A spring of water means a natural source of water of a definite and well-marked extent. So that there being springs of water on the land to which this would refer, it appears to me he grants those springs. Then, as regards streams of water, that again is a technical term. A stream of water, in law, is water which runs in a defined course, so as to be capable of diversion; and it has been held, that the term does not include the percolation of water below ground." By the South Shields Waterworks Act, 1788, a company were authorised to enter upon lands within the manor of Westow, and to dig and search for any spring of water, and to convey the water from such springs into South Shields for the use of the inhabitants of the town and the shipping in the harbour. The Act also provided that the company should not take the water from any spring, streams or ponds, so as to deprive the occupiers of the lands of water for their own necessary uses and for the cattle depasturing therein. The company had power to lay down pipes, and the inhabitants, with the consent of the company, might obtain the water by pipes, to communicate with the company's pipes, at certain charges, according to the bore of the pipes:—*Held*, that the owners or occupiers of lands within the manor were not prevented by the Act from sinking wells in such lands, though the effect might be to draw off the water from the company's springs (*South Shields Waterworks Co.* v. *Cookson* (1845), 15 L. J. Ex. 315).

Fouling neighbouring wells.

Notwithstanding the principles settled in the case of *Chasemore* v. *Richards*, it has been held that the owner of a well is entitled to an injunction to restrain his neighbour from so using a cesspool on his land as thereby to pollute the water in the well (*Womersley* v. *Church* (1867), 17 L. T. (N.S.) 190). It was contended for the defendant in this case, that the well was supplied by water percolating through the earth and not flowing through any defined channel, and that the plaintiff had no title to the water until it actually entered his well, and then only in the condition in which it was when it arrived. Lord ROMILLY, M.R., however, granted the injunction with costs. In a subsequent case it appeared that the plaintiff and the defendant were neighbouring landowners, and had each a deep well on his land. The distance between the wells was ninety-nine yards, and the plaintiff's land was at a lower level than the defendant's. The defendant turned sewage from his house into his well, and thus, as was alleged, polluted the water that percolated underground from the defendant's to the plaintiff's land, and, consequently, the water which came into the plaintiff's well from such percolating water, when he used his well by pumping, came adulterated with the sewage from the defendant's well. Is was held, reversing the decision of PEARSON, J., that the plaintiff had a good right of action against the defendant for so polluting the source of supply, although until the plaintiff had appropriated it he had no property in the percolating water under his land, and although he appropriated such water by the artificial means of pumping (*Ballard* v. *Tomlinson* (1885), 29 Ch. D. 115). LINDLEY, L.J., in the course of his judgment, said: "If a man chooses to put filth on his land, he must take care not to let it escape on to his neighbour's land (*Tenant* v. *Goldwin* (1704), 1 Salk. 21, 360); and not to let it poison the air which reaches it. Comyn's Dig. (Action on the Case for Nuisance, A.). So if a man chooses to poison his own well he must take care not to poison waters which other persons have a right to use as much as himself. To hold the contrary, on the ground that the water is not their property until they get it, and that it is poisoned before they get it, is to take an inadequate view of the subject, and to overlook the fact that the law of nuisance is not based exclusively on rights of property. Light is not property, and yet if a man has a right to have it come to his windows, he can maintain an action against those who prevent it from so coming. So air is not property, but a man who poisons the air which another has a right to breathe commits an actionable wrong." The learned judge then, after referring to *Womersley* v. *Church*, *supra*; *Hodgkinson* v. *Ennor*, *ante*, p. 412; and *Laing* v. *Whaley*, *ante*, p. 412, continued: "These decisions show that *primâ facie* one man has no right to foul water which another has a right to get; and if he has a right to get it, the fact that by pumping he draws it partly from the defendant's land is immaterial" (pp. 126, 127). See also *Pennington* v. *Brinsop Hall Coal Co.* (1877), 5 Ch. D. 769; and *King* v. *Oxford Co-operative Society* (1884), 51 L. T. 94, where paraffin oil leaked from barrels stored on the defendant's premises and found its way into the plaintiff's well.

Question of right of

The Court of Exchequer decided that there was no right to support by underground water at common law. Accordingly, where the defendants

Sect. 6.

NOTE.
support of subterranean water.

had made excavations to a great depth for the purposes of a foundation on wet and spongy land, and thereby let down certain cottages of the plaintiff built two years previously on adjoining land of the same character, it was held there was no cause of action (*Popplewell* v. *Hodkinson* (1869), L. R. 4 Ex. 248). In the earlier case of *Elliot* v. *N. E. Rail. Co.* (1863), 10 H. L. Cas. 333, it had been decided that a railway company which had purchased a piece of land for the construction of their line and a railway bridge, were not entitled to the additional support furnished by the water in a drowned mine. An electric lighting company erected a large central station near to the plaintiff's house, and for that purpose excavated from twenty-five to thirty feet below the surface. The plaintiff complained of vibration, subsidence, and consequent cracks in his house. The defendants contended that, if there had been subsidence, it was due to the abstraction of underground percolating water, and that there was no right to the support of such water. Upon that point, KEKEWICH, J. (distinguishing *Popplewell* v. *Hodkinson*), decided that, as there had been twenty years' enjoyment of such support, it was "a case of a statutory right by a prescription equivalent to grant." In the result, he decided that what the defendants had done amounted to a nuisance at common law, but he refused an injunction, thus leaving the plaintiff to his claim for damages. The case ultimately went to the Court of Appeal, and there the sole question was whether or not there should be an injunction, and that was granted. Nothing turned on the question of right to support (*Shelfer* v. *City of London Electric Lighting Co.*, and *Meux's Brewery Co.* v. *City of London Electric Lighting Co.*, [1895] 1 Ch. 287. A gas company in pursuance of their statutory powers proceeded to excavate certain land for the purpose of erecting a gasometer. In doing so, they withdrew underground percolating water from neighbouring land, and along with the water running silt or sand, and thereby caused neighbouring buildings to subside. The Court of Appeal decided that this constituted a nuisance within the meaning of the Gasworks Clauses Acts, 1847 and 1871 (*Jordeson* v. *Sutton, Southcoates and Drypool Gas Co.*, [1899] 2 Ch. 217). In the above case, the proportion of water to silt or sand varied, according to different witnesses, from one-tenth of water to nine-tenths of silt or from one-fifth of water to four-fifths of silt; all the witnesses agreeing that the silt always greatly preponderated over the water. This case was taken by appeal to the House of Lords. After it had been there argued for some days, the parties came to terms. See Jl. of G. L., February 27th, 1900, p. 545, and May 15th, 1900, p. 1318. A decision to the same effect had been given three years earlier in the Supreme Court of Massachusetts (*Cabot* v. *Kingman* (1896), 166 Mass. Rep. 403). In another case where silt was abstracted along with water pumped, and the foundation of the plaintiff's house was injured, it was held that he was entitled to recover compensation (*Fletcher* v. *Birkenhead Corporation*, [1907] 1 K. B. 205. See the facts more fully stated, *ante*, p. 384. See also *Trinidad Asphalt Co.* v. *Ambard*, [1899] A. C. 594, a case relating to a certain stratum of asphalt or pitch near the surface of land. The case of *Popplewell* v. *Hodkinson* was much discussed in the case of *Jordeson;* and much doubt was suggested by the judges of the Court of Appeal as to its extent. In the first place, the whole question whether there is any right of support from underground percolating water is left entirely open for reconsideration, and in the next place, the further question was left open whether such a right may not be acquired by grant express or implied, *i.e.*, by prescription under 2 & 3 Will. 4, c. 71, s. 3.

Each of the owners of two adjoining coal mines, neither being subject to any servitude to the other, has a right to work his own mine in the manner most convenient and beneficial to himself, although the natural consequence may be that some prejudice will accrue to the owner of the adjoining mine, so long as that does not arise from negligent or malicious conduct. The plaintiff and the defendant occupied adjoining collieries. A predecessor of the defendant, but with whom he had no privity, committed a trespass and made holes, called "thyrlings," in a barrier (of coal belonging to the plaintiff) which separated the two collieries. The defendant, in working his own mine, broke down a seam of coal of his own, and the consequence was that the water flowed from his mine into the plaintiff's mine

Note.

through the "thyrlings." It was held that there was no duty incumbent on the defendant to prevent the water from flowing from his mine into the plaintiff's mine (*Smith* v. *Kenrick* (1849), 7 C. B. 515). The owner of the upper of two adjoining mines is not liable for injury by water flowing by gravitation into the lower mine from works conducted by him in the usual and proper manner for the purpose of getting mineral from any part of his mine; but he must not interfere with such gravitation so as to make it more injurious to the lower mine, or advantageous to himself; for if he do so, and be thereby an active agent in sending water to the lower mine, an action will lie against him by the owner of the lower mine for the injury it may occasion (*Baird* v. *Williamson* (1863), 16 C. B. (N.S.) 376).

Right to foul streams.

At common law, and apart from the effect of particular statutes, including the Rivers Pollution Prevention Act, 1876 (39 & 40 Vict. c. 75) (which will be hereafter separately considered), a right to foul or render impure a stream may be acquired by adverse user for twenty years, though no prescription will warrant a *public* nuisance (*R.* v. *Cross* (1812), 3 Camp. 224); but apart from prescription, no one in enjoyment of a stream is entitled to carry on any manufacture or business whereby the water flowing to his neighbour is rendered impure (Co. Litt. 200). Such a right, while it may be gained by user for twenty years, may also be lost by non-user for twenty years (*Mayor* v. *Chadwick* (1840), 11 A. & E. 571). Time will not begin to run until there has been an actionable invasion or infringement of a right, although it is not necessary that actual damages should have been sustained (Angel on Watercourses, sect. 219c).

Where a prescriptive right to foul a stream has been acquired, the fouling must not be considerably enlarged to the prejudice of other people. The fact that a stream is fouled by others is not a defence to a suit to restrain the fouling by one The mere suspension of the exercise of a prescriptive right is not sufficient to destroy the right, without some evidence of an intention to abandon it. Where dyeworks had not been used for more than twenty years, and had been allowed to go to ruin, it was held that any right of fouling a stream attaching to it had been lost (*Crossley* v. *Lightowler* (1867), L. R. 2 Ch. 478). The owner of land on the banks of a river can maintain a suit to restrain the fouling of the water of the river without showing that the fouling is actually injurious to him. The plaintiff, wishing to prevent the water of a river from being fouled by some dyeworks, purchased from the owners of the dyeworks a piece of land on the banks of the river, without communicating to them his object:—*Held*, that, in the absence of any express reservation by the owners of the dyeworks of the right of fouling the river, the plaintiff could maintain an action to restrain it (*ibid.*). See also *Traill* v. *McAllister* (1890), 25 L. R Ir. 524.

An easement to discharge polluted water from a paper mill into a stream extends to a new material used in the manufacture of paper, if the material is proper for the purpose, and does not increase the amount of pollution as against the servient tenement to any substantial or tangible degree (*Baxendale* v. *McMurray* (1867), L. R. 2 Ch. 790). From 1832 to 1877 the refuse of a fellmongery and the washings of dyes used in a coloured rug manufactory had been discharged into a watercourse, which was an arterial drainage work within the jurisdiction of drainage commissioners. In 1878 the fellmongery was abandoned, and the manufacture of leather boards substituted at the same factory. The pollution caused by the discharge of the refuse of the leather manufactory was less in degree than that caused by the fellmongery. The drainage commissioners convicted the owners of the leather board factory under a section of a local Act of polluting the stream, and this conviction was affirmed on appeal to the quarter sessions:—*Held*, that the conviction must be confirmed, for even if the factory-owners had a prescriptive right to foul the stream, it was as fellmongers, and not as leather board manufacturers; and that there was no authority for holding that the variation of the user, although it cast no increase, but even a less burden, on the servient tenement, enabled the factory-owners to substitute a business of a totally different kind to that originally carried on by them, and at the same time claim to maintain their original prescriptive right to pollute the watercourse

Sect. 6.

NOTE.

even if such right did exist (*Clarke* v. *Somersetshire Drainage Commissioners* (1888), 57 L. J. M. C. 96).

A riparian proprietor who has a prescriptive right to take, in a particular way and at a particular place, water from a river, and to return such water to the river in a polluted condition, is not entitled to take the water in any other way or place, nor use even his common law right of taking it in such a way as to add to the pollution of the stream (*McIntyre Brothers* v. *McGavin*, [1893] A. C. 268). Where several manufacturers having their works upon a stream cause a nuisance to a riparian owner by discharging offensive matter into the stream, it is no answer to an action brought by the owner against one of those manufacturers for such manufacturer to say that the share he contributes to the nuisance is infinitesimal and unappreciable. The riparian owner is entitled to have the water in a pure condition, and has a right to take the manufacturers one by one and prevent each from discharging his contribution to that which becomes in the aggregate a nuisance (*Blair* v. *Deakin*, and *Eden* v. *Deakin* (1887), 57 L. T. 522; and see *Thorpe* v. *Brumfitt* (1873), L. R. 8 Ch. 650, and *Lambton* v. *Mellish*, [1894] 3 Ch. 163). Where an injury has been done to the private rights of a person, whether tenant or landlord, that person is entitled to damages, although only nominal, and where in such a case an injury is apprehended, an injunction will be granted as against the party in default. In an action by N., tenant of a certain farm, for damages, and an injunction against T., a sanitary authority, for polluting the plaintiff's stream:—*Held*, that the plaintiff's private right having been injured, he was entitled to nominal damages, and an injunction against T., although T. had only polluted the stream in conjunction with others (*Nixon* v. *Tynemouth Rural Sanitary Authority* (1888), 52 J. P. 504). The 14 Geo. 3, c. 96, which was passed for making and keeping navigable the rivers Aire and Calder, enacted that, "If any person or persons shall wilfully throw any soil . . . into any part of the said rivers . . . or of any drains, trenches, or watercourses thereunto belonging, every such person shall for every such offence forfeit" a sum of money. The appellant was a tanner, having premises on a small natural stream at a point about four miles from one of the rivers, into which it flowed at a place where that river was navigable. In the course of his business he discharged refuse from his works into the natural stream. He was convicted by a stipendiary magistrate of an offence against the foregoing enactment:—*Held*, that the words, "drains, trenches, or watercourses thereunto belonging," applied only to artificial streams made for the purpose of improving the navigation of the rivers, and did not apply to natural streams, and therefore that the conviction was wrong. *Held*, also (*per* BRAMWELL, B.), that inasmuch as the appellant discharged the refuse in the course of his business, he did not "wilfully" throw it into the stream within the meaning of the statute (*Smith* v. *Barnham* (1876), 1 Ex. D. 419).

In *Wood* v. *Sutcliffe* (1851), 21 L. J. Ch. 253, it appeared that the plaintiff had occupied for many years a manufactory for worsted spinning on a stream, and claimed a right of having the water come to his works in a pure state. The defendant erected dyeworks on the same stream, by which the water was polluted. The plaintiff brought an action against the defendant, and recovered a farthing damages, and now applied for an injunction to restrain the defendant from a continuous infringement of his rights. It was held, that a person may, by long user, acquire a right to the water of a stream free from pollution, though he may have no proprietorship in the stream, and may acquire a right to pour polluted matter into a stream as against all new-comers; that a person having established his right at law is not, as a matter of course, entitled to an injunction, particularly where the injunction would not restore the plaintiff to the right he has established, and where the act complained of may be compensated by pecuniary damages; that in this case the evidence proved that, owing to the increase of polluting matter poured into the stream from other sources than that of the defendant's works, the plaintiff never could be reinstated in his original rights; that the damage might be compensated by money; and that the plaintiff had been guilty of such an amount of acquiescence as would disentitle him to an

Sect. 6.

Note.

injunction. See further, *Attorney-General* v. *Proprietors of the Bradford Canal* (1866), L. R. 2 Eq. 71.

There can be no prescriptive right to pollute a stream by the discharge of sewage in such a manner and to such an extent as to be injurious to public health (*Blackburn* v. *Somers* (1879), 5 L. R. Ir. 1; *cf. R.* v. *Cross*, *ante*, p. 423). See further on this subject *Attorney-General* v. *Barnsley Corporation*, [1874] W. N. 37, which was an information and bill on behalf of owners and occupiers of lands on the banks of the river Dearne for an injunction to restrain the corporation of Barnsley from discharging sewage into the river. The defence was that the defendants had acquired a right to foul the stream. The Lords Justices held that there could be no prescriptive right to justify a public nuisance.

In *The Duke of Buccleuch* v. *Cowan* (1876), 5 Ct. of Sess. Cas. (3rd ser.) 214, it was held that "An upper proprietor is not entitled to throw impurities, and especially artificial impurities, into a stream, so as to pollute the water as it passes through the estate of a lower proprietor; that the lower proprietor is entitled to complain of such pollution as renders the water unfit for primary purposes; but that it will be a good defence against such a complaint that the stream has been for time immemorial devoted to secondary purposes, such as manufactories, so as to supersede and abrogate the primary purposes." See report of the case in the House of Lords, 2 App. Cas. 344. In the later case of *Caledonian Rail. Co.* v. *Baird & Co.* (1876), 3 Ct. of Sess. Cas (4th ser,) 839, a proprietor erected a village for the accommodation of miners in his employment on the banks of a stream formerly suitable for primary purposes. Drains were provided to carry off surface water and water from washing-houses through filtering-beds into the stream, other arrangements being made by the proprietor for the removal of excreta and refuse from the miners' cottages, which if attended to by the inhabitants would have prevented such polluting matters from reaching the stream:—*Held*, that, pollution of the stream by the drains being proved, unless the pollution was stopped the pursuer would be entitled to have his rights protected by interdict.

In various public Acts stringent provisions are to be found to prevent the fouling of water. The Gasworks Clauses Act, 1847 (10 & 11 Vict. c. 15), provides for severe penalties and for daily penalties during the continuance of the offence (ss. 21—28). See *ante*, pp. 191—197. In like manner s. 61 of the Act in the text enacts penalties for causing the water of the undertakers to be fouled in any of the ways therein specified, and by ss. 62—67, heavy penalties are imposed for permitting substances produced in the manufacture of gas to flow into the undertakers' works, and provision is made for a daily penalty during the continuance of the offence. See further the other Acts and cases, cited *ante*, p. 192. By the Waterworks Clauses Act, 1863 (26 & 27 Vict. c. 93), power is given to the undertakers to cut off the supply of water to consumers in case of waste, misuse, undue consumption, or contamination of the water, and penalties are also imposed (ss. 16 and 17). See *post*, p. 541.

Nothing in the Public Health Act, 1875 (38 & 39 Vict. c. 55), warrants any local authority in sending sewage into a river to the prejudice of parties having established interests in the water, or so as to create a public nuisance. Section 17 of that Act enacts that—

> "Nothing in this Act shall authorise any local authority to make or use any sewer drain or outfall for the purpose of conveying sewage or filthy water into any natural stream or watercourse, or into any canal pond or lake until such sewage or filthy water is freed from all excrementitious or other foul or noxious matter such as would affect or deteriorate the purity and quality of the water in such stream or watercourse or in such canal pond or lake."

In *Attorney-General* v. *Birmingham, &c. Drainage Board*, [1910] 1 Ch. 48, it was held that the prohibition contained in this section is against conveying such sewage or filthy water as will prejudicially affect the purity of a stream, and that therefore where sewage or other filthy water is conveyed into an

Sect. 6.

NOTE.

already polluted stream, no offence is committed against the section unless the stream is thereby made fouler than it was before.

By s. 332 of the same Act, it is also provided that—

> "Nothing in this Act shall be construed to authorise any local authority to injuriously affect any reservoir canal river or stream or the feeders thereof or the supply quality or fall of water contained in any reservoir canal river stream or in the feeders thereof, in cases where any body of persons or person would, if this Act had not passed, have been entitled by law to prevent or be relieved against the injuriously affecting such reservoir canal river stream feeders or such supply quality or fall of water, unless the local authority first obtained the consent in writing of the body of persons or person so entitled as aforesaid."

Actions to prevent the fouling of streams.

The Public Health (Scotland) Act, 1897 (60 & 61 Vict. c. 38), s. 189, provides that nothing in that Act shall enable any local authority or other person to injuriously affect the supply of water required for the purposes of any waterworks established by or under the provisions of any Act of Parliament, or of the compensation water required to be given by the owners of such waterworks, unless the local authority shall have previously obtained the consent of such owners.

The cases are numerous in which legal proceedings have successfully been taken against local authorities to prevent the discharge of sewage or other noxious matter into streams. The following are some of the more important cases on this subject: *Oldaker* v. *Hunt* (1854), 6 De G. M. & G. 376; *Bidder* v. *Croydon B. of H.* (1862), 6 L. T. (N.S.) 778; *Attorney-General* v. *Metropolitan B. of W.* (1863), 9 L. T. (N.S.) 139; *Attorney-General* v. *Luton L. B.* (1856), 2 Jur. (N.S.) 180; *M. S. & L. Rail. Co.* v. *Worksop L. B.* (1856), 23 Beav. 198; *Spokes* v. *Banbury L. B.* (1865), L. R. 1 Eq. 42; *Attorney-General* v. *Birmingham Corporation* (1858), 4 K. & J. 528; *Cator* v. *Lewisham B. of W.* (1864), 5 B. & S. 115; *R.* v. *Darlington* (1865), 6 B. & S. 562; *Goldsmid* v. *Tunbridge Wells Improvement Commissioners* (1866), L. R. 1 Ch. 349; *Attorney-General* v. *Leeds Corporation* (1870), L. R. 5 Ch. 583; *North Staffordshire Rail. Co.* v. *Tunstall* (1870), 39 L. J. Ch. 131; *Holt* v. *Rochdale Corporation* (1870), L. R. 10 Eq. 354; *Attorney-General* v. *Cockermouth L. B.* (1874), L. R. 18 Eq. 172; *Attorney-General* v. *Richmond* (1866), L. R. 2 Eq. 306; *Attorney-General* v. *Colney Hatch Lunatic Asylum* (1868), L. R. 4 Ch. 146; *Attorney-General* v. *Basingstoke Corporation* (1876), 45 L. J. Ch. 726; *Glossop* v. *Heston and Isleworth L. B.* (1879), 12 Ch. D. 102; *Attorney-General* v. *Dorking Union* (1882), 20 Ch. D. 595; *Attorney-General* v. *Acton L. B.* (1883), 22 Ch. D. 221; *Attorney-General* v. *Clerkenwell Vestry*, [1891] 3 Ch. 527; *Ogilvie* v. *Blything Union* (1892), 67 L. T. 18; *Moncrieffe* v. *Perth Police Commissioners* (1886), Ct. of Sess. Cas. 13 Rettie, 921; *Seafield* v. *Kemp* (1899), 1 F. 402; *Attorney-General* v. *Dorchester Corporation* (1906), 70 J. P. 281; *Harrington* (*Earl of*) v. *Derby Corporation*, [1905] 1 Ch. 205. See also the following cases under the Public Health (London) Act, 1891 (54 & 55 Vict. c. 76); *Thames Conservators* v. *Port Sanitary Authority of Port of London*, [1894] 1 Q. B. 647, and *R.* v. *Mead*, [1894] 2 Q. B. 124.

Where a plaintiff has proved his right to an injunction against a nuisance or other injury, it is no part of the duty of the court to inquire in what way the defendant can best remove it. The plaintiff is entitled to an injunction at once, unless the removal of the injury is physically impossible; and it is the duty of the defendant to find his own way out of the difficulty, whatever inconvenience or expense it may put him to. In such a case a reference before the decree to an expert, as to the existence of the injury, or as to the best mode of removing it, is improper. Whether such a reference as to the best mode of removing the injury would be proper after the decree, *quære*. But when the difficulty of removing the injury is great, the court will suspend the operation of the injunction for a time, with liberty to the defendant to apply for an extension of time. An information was filed at the relation of a local board of health, praying for an injunction to restrain the visiting justices of a county lunatic asylum from allowing the sewage from the asylum to pollute a certain stream. The fact of the pollution of the stream existing, and its being attributable in part to the sewage of the asylum being proved, the court granted an injunction, but suspended its operation for three months to enable the defendants to make the necessary arrangements, with liberty to the defendants to apply for an extension of time (*Attorney-General* v. *Colney Hatch Lunatic Asylum* (1868), L. R. 4 Ch. 146). See also *per* FRY, J., in *Pennington* v. *Brinsop Hall Coal Co.* (1877), 5 Ch. D., at p. 774.

A perpetual injunction was granted to restrain a drainage board from discharging sewage into a river in contravention of s. 17 of the Public Health Act, 1875. The board appealed, but on the appeal they did not contest that the injunction was properly granted on the facts proved to exist at the date of the trial. They, however, obtained adjournments to enable them to complete works which they urged would prevent a contravention of the section. The works were completed at great cost, and an expert who had been appointed by the court, reported in favour of the board as to the sufficiency of the works. In these circumstances, it appearing that there was no longer any contravention of the section, and the board undertaking to use their best endeavours to prevent any future contravention, the court discharged the injunction, the board to pay the costs of the appeal (*Attorney-General* v. *Birmingham, Tame and Rea District Drainage Board*, [1910] 1 Ch. 48).

A decree was made in 1875 against the Corporation of Birmingham as the sanitary authority of Birmingham, granting a perpetual injunction to restrain them from allowing sewage to flow into a river so as to be injurious to health or a nuisance to the plaintiffs; but the injunction was suspended for five years to give the corporation an opportunity to execute certain works. After the expiration of that period the plaintiffs desired to enforce the injunction, but in the meantime, by a provisional order obtained under the provisions of s. 279 of the Public Health Act, the Birmingham, Tame and Rea District Drainage Board had been constituted as the sanitary authority of the district in the place of the corporation. The plaintiffs brought an action against the district board, claiming a declaration that they were entitled to the same benefit of the decree as against the defendants in the present action as if they had been defendants in the former suit. The defendants demurred :—*Held*, that the district board were not made by the Public Health Act subject to any liabilities of their predecessors except those attaching under the Act, and were, therefore, not bound by the decree against them; and that, there being no allegation of any nuisance committed by the district board, the plaintiffs had no cause of action, and that the demurrer must be allowed (*Attorney-General* v. *Birmingham, Tame and Rea Drainage Board* (1881), 17 Ch. D. 685)).

A public body was authorised by Act of Parliament to construct and maintain a system of sewers and drains, and was enabled by compulsory purchase to obtain the necessary lands for the erection of works in a specified spot for the purification of the sewage, and for the conveyance of effluent sewage-water along a specified course terminating in a specified spot. The public body was also prohibited from allowing the sewage to be discharged into a river until after it had been subjected to a process of purification prescribed by the Act :—*Held*, that so long as the public body complied with the requirements of the Act, they were not liable to an action for a nuisance in discharging the effluent sewage-water into the river at the authorised place (*Lee Conservancy Board* v. *Hertford Corporation* (1884), 48 J. P. 628).

Section 27 of the Public Health Act, 1875, empowers any local authority to construct works for the disposal of sewage, "provided that no nuisance be created." By a provisional order, confirmed by Act of Parliament, a local authority were required to carry out within a fixed time sewage disposal works approved by the Local Government Board, and in case of default these requirements were made enforceable in manner provided by s. 299 of the Public Health Act, 1875. The local authority accordingly constructed sewage works approved by the Local Government Board, and the works, though constructed without negligence, created both a public and a private nuisance. It was held that this order was only a direction to exercise the powers of s. 27 within a given time, and did not exempt the local authority from their

Sect. 6.
NOTE.

obligation under that section not to create a nuisance, and an injunction was granted (*Attorney-General* v. *Dorchester Corporation* (1906), 70 J. P. 281; 94 L. T. 682).

For form of order restraining the pollution of a stream, see *Lingwood* v. *Stowmarket Co.* (1865), L. R. 1 Eq. 77, 336; *Attorney-General* v. *Borough of Birmingham* (1858), 4 K. & J. 528; see also *Wood* v. *High and Low Harrowgate Improvement Commissioners* (1874), 22 W. R. 763, where an injunction was granted at the instance of the occupiers of certain bleach works. See, further, Seton on Judgments.

In *Attorney-General* v. *Kingston-on-Thames Corporation* (1865), 34 L. J. Ch. 481, an information was instituted, at the relation of the Conservators of the river Thames, to restrain the corporation of Kingston-on-Thames from altering their drains so as to discharge a greatly increased quantity of sewage into the river. The court, considering upon the evidence that neither present nuisance nor probability of immediate prospective nuisance had been proved, dismissed the information without prejudice to future proceedings in the event of nuisance being subsequently occasioned.

In another case, *Attorney-General* v. *Gee* (1870), L. R. 10 Eq. 131, the injury proved being trifling, the court dismissed, with costs, a bill and information to restrain a local board from discharging sewage into a river. See further, the Rivers Pollution Prevention Act, 1876, *post*, p. 725, and *Harrington* (*Earl of*) v. *Derby Corporation*, [1905] 1 Ch. 205, cited, *post*, p. 730.

River conservators.

On the construction of a public Act passed in the reign of Henry VIII., whereby the corporation of the city of Exeter were empowered to remove obstructions to the navigation of the river Exe, paying compensation to the owners of the soil where the obstructions were situated, it was held, first, that this Act did not confer the conservancy of the river on the corporation; secondly, that it did not entitle the corporation to file a bill in equity to restrain the erection of a pier in the river; and, thirdly, that it did not confer any right or privilege on the corporation within the meaning of s. 14 of the General Pier and Harbour Act, 1861 (24 & 25 Vict. c. 45), so as to prevent the erection of a pier in the river without their consent being obtained (*Exeter Corporation* v. *Earl of Devon* (1870), L. R. 10 Eq. 232).

A railway company was restrained from taking a large quantity of water for the use of their station from a river under the control of conservators, credit being given to the evidence on their part that taking such water would impede the navigation, against the evidence on the part of the company that taking such water would produce no appreciable effect (*Attorney-General* v. *G. E. Rail. Co.* (1871), L. R. 6 Ch. 572). Lord HATHERLEY, L.C., said: "The conservators are the persons to be the judges of that damage. They have no personal interest at all in the matter. They have only their duty to discharge, and are to be so treated in any court before whom the case may come; unless the other side can show a manifest and palpable case of wilfulness in their desire to impede without doing any good to themselves."

By the Thames Conservancy Act, 1857 (20 & 21 Vict. c. cxlvii.), s. 53, the conservators appointed under that Act had a power to grant a licence to a riparian proprietor to make an embankment in front of his own land abutting on the river; but it was held that though such licence might be the owner's justification so far as the public right of navigation was concerned, it would not authorise a licensee, being a riparian owner, to embank in front of his own land so as injuriously to affect the land of another riparian owner. The right of navigating a tidal river is common to the subjects of the realm, but it may be connected with the right to the exclusive access to particular land on the bank of the river, and the latter is a private right to the enjoyment of the land, the invasion of which may form the ground for an action for damages or for an injunction. It came, therefore, within the operation of the saving clause (s. 179) of the Act. The right of a riparian owner to the use of the stream does not depend on the ownership of the soil of the stream. The power granted to the conservators under s. 53 of the Act was held to be qualified and restricted by the provisions of s. 179 (*Lyon* v. *Fishmongers' Co.* (1876), 1 App. Cas. 662). See now the Thames Conservancy Act, 1894 (57 & 58 Vict. c. clxxxvii.). A landing-stage having been built on the banks of the Thames, with the licence of the Thames Conservancy Board, and having caused as it was alleged the water in the plaintiff's mill-tail to be retarded and the course silted up, an injunction was granted (*Lawes* v. *Turner* (1892), 8 T. L. R. 584). As to the stamp duty payable on such licences, see *Thames Conservators* v. *Inland Revenue Commissioners* (1886), 18 Q. B. D. 279).

The defendants were an unpaid body of Trustees created by statute conservators of the Lee, an ancient navigable river, and were "authorised and empowered from time to time at their discretion to cleanse, scour, deepen, enlarge or straighten the channel or course of the said river, and also to set out, open, make, and maintain" certain new cuts or canals thereinafter specified, to communicate with the river and to be used for the navigation, "and also to remove all obstructions and impediments whatsoever to the said navigation." The defendants were also by statute empowered to levy rates or tolls for the use of certain locks and artificial cuts, but were expressly forbidden to receive any toll in respect of such part of the navigation as lay between Bow creek and Old Ford lock, which part of the navigation was an ancient highway, and was by statute declared to be for ever free from toll. The plaintiff's barge, while navigating a part of the river between Bow creek and Old Ford lock struck upon one of several submerged piles, and was injured. The plaintiffs having brought an action for damages, the jury found that the piles were dangerous; that the defendants ought to have been aware of the danger, and had neglected their duty:—*Held*, by POLLOCK, B., that the action could not be maintained, since the defendants were unpaid trustees appointed for public purposes in aid of the common law right of navigating an ancient highway, and the duty of removing obstructions imposed by the statute was discretionary and not compulsory (*Forbes* v. *Lee Conservancy Board* (1879), 4 Ex. D. 116). See *Cracknell* v. *Thetford Corporation* (1869), L. R. 4 C. P. 629.

Amongst other powers granted by their Acts to the Lee Conservancy Board, they had full powers to do what was necessary for carrying into effect the object of their Acts, including powers to purchase land and levy tolls. The conservators executed the powers of the Acts so far as related to the improvement of the river navigation, and the making of towing paths, and they levied tolls. There was no evidence that they had actually purchased any of the land that lay along the course of the navigation, and had been used to form the towing paths:—*Held*, that, as the Acts might be carried into effect without purchasing, the burden of proof lay on the conservators to show that they had purchased; and since they had failed to show it, they were not entitled to be treated as owners of the soil of the towing paths, though they were entitled to an injunction to prevent any owner of adjoining land from so using the towing paths as to obstruct in any way, their free use for the purposes of the navigation (*Lee Conservancy Board* v. *Button* (1881), 6 App. Cas. 685).

See also *Thames Conservators* v. *Port Sanitary Authority of Port of London*, [1894] 1 Q. B. 647. As to the taking of gravel by a riparian owner from the Thames, between high and low water mark, see *Thames Conservators* v. *Smeed*, [1897] 2 Q. B. 334. In this case a definition is given of the phrase, "bed of a river," and an earlier case of *Pearce* v. *Bunting*, [1896] 2 Q. B. 360, is disapproved of. See also *Attorney-General for Dominion of Canada* v. *Attorneys-General for the Provinces of Ontario, Quebec, and Nova Scotia*, [1898] A. C. 700; and *Great Torrington Commons Conservators* v. *Moore Stevens*, [1904] 1 Ch. 347.

The Thames Conservators have no power under the Thames Conservancy Act, 1894, to grant a licence to dredge the upper Thames upon the terms that the licensee may sell the soil so raised for his own benefit (*Palmer* v. *Thames Conservators*, [1902] 1 Ch. 163). It has been held that in exercising their powers of dredging the conservators must do so subject to the statutory rights of the owners of the Thames Tunnel. They were restrained from

Sect. 6.

NOTE.

carrying out any dredging works likely to endanger the tunnel (*East London Rail. Co.* v. *Thames Conservators* (1904), 68 J. P. 302). See also as to the duty of the conservators to keep the river free from obstructions to navigation, *Queens of the River Steamship Co., Ltd.* v. *Easton, Gibb & Co. and Thames Conservators* (1907), 96 L. T. 901.

Notice of action.

Where a stream was being polluted by a public authority, and the remedy sought was not damages, but the summary remedy by injunction, the courts would not refuse the summary remedy on the ground that the formality of notice of action had not been given, though prescribed by statute, *e.g.*, the Metropolis Management Acts, and the Public Health Act, 1875 (*Attorney-General* v. *Hackney L. B.* (1875), L. R. 20 Eq. 626). This decision was followed in *Flower* v. *Low Leyton L. B.* (1877), 5 Ch. D. 347; and in *Bateman* v. *Poplar L. B.* (1886), 33 Ch. D. 360. See now the Public Authorities Protection Act, 1893, *post*, p. 1062.

Where an action against a sanitary authority was *bonâ fide* and in substance brought for an injunction to prevent them from causing a nuisance in the future by continuing to discharge sewage into a stream, but the judge at the trial thought that under the circumstances an injunction was not then needed, because, though a nuisance was caused by such discharge of sewage in an exceptionally dry season (which at the time of the trial had passed away), it was not likely to recur except in such a season, and he accordingly refused an injunction, but gave £25 damages; the Court of Appeal held that he had power to give such damages in substitution for an injunction, in accordance with the Chancery practice under Lord Cairns' Act, though no notice of action had been given as required by s. 264 of the Public Health Act, 1875 (*Chapman* v. *Auckland Union* (1889), 23 Q. B. D. 294).

As to right to support for canals see *Dudley Canal Co.* v. *Grazebrook* (1830), 1 B. & Ad. 59; *Cromford Canal Co.* v. *Cutts* (1848), 5 Rail. Cas. 442; *Birmingham Canal Co.* v. *Cartwright* (1879), 11 Ch. D. 421; *Midland Rail. Co.* v. *Checkley* (1867, L. R. 4 Eq. 19; *M. S. & L. Rail. Co.* v. *Johnson*, 36 Ch. D. 629 n; *L. & N. W. Rail. Co.* v. *Evans*, [1893] 1 Ch. 16; *Knowles* v. *L. & Y. Rail Co.* (1889), 14 App. Cas. 248; *Chamber Colliery Co., Ltd.* v. *Rochdale Canal Proprietors*, [1895] A. C. 564; *New Moss Colliery Co.* v. *M. S. & L. Rail. Co.*, [1897] 1 Ch. 725; *Glamorganshire Canal Co.* v. *Nixon's Navigation Co.* (1901), 85 L. T. 53; *N. British Rail. Co.* v. *Turner's, Ltd* (1904), 41 S. L. R. 706. Much turns on the particular provisions of the special Acts, but in the absence of special provisions the canal company are entitled to subjacent and adjacent support. The Canals Protection (London) Act, 1898 (61 & 62 Vict. c. 16), gives to local authorities powers to ensure the fencing, etc., of dangerous places on the banks or towing paths thereof. For a case turning on the meaning of "waste water" in the private Acts of a canal company, see *Manchester Ship Canal Co.* v. *Rochdale Canal Co.* (1899), 81 L. T. 472; in H. L., *sub nom. Rochdale Canal Co.* v. *Manchester Ship Canal Co.* (1902), 85 L. T. 585. For a case relating to the liability to repair the approaches to an overbridge and the fences, and which turned upon the construction of special Acts, see *Attorney-General* v. *Oxford Canal Navigation* (1903), 72 L. J. Ch. 285. The undertakers of a canal navigation were, under a special Act of William IV., required to afford a supply of water for condensing and other purposes to steam engines in connection with manufactories within 200 yards of the canal. It was held that a generating station was not a "manufactory" within the meaning of this enactment (*Birmingham Corporation* v. *Birmingham Canal Navigation* (1905), 21 T. L. R. 548).

Foreshore.

As to immemorial user of the foreshore in tidal and navigable waters by the owners of fishing boats and other craft, by fixing moorings in the soil for the purpose of attaching their boats to them, see *Attorney-General* v. *Wright*, [1897] 2 Q. B. 318. See also *Original Hartlepool Collieries Co.* v. *Gibb*, cited *ante*, *p.* 414. As to injury by pollution caused to oyster storage beds on the foreshore and along the channel of a tidal creek, see *Foster* v. *Warblington U. D. C.*, [1906] 1 K. B. 648, and *Hobart* v. *Southend-on-Sea Corporation* (1906), 75 L. J. K. B. 305; *Owen* v. *Faversham Corporation* (1909), 73 J. P. 33. As to digging and taking away shingle, see *Anderson* v. *Jacobs*

NOTE.

1905), 93 L. T. 17; *Burton* v. *Hudson*, [1909] 2 K. B. 564. As to when moorings in river beds are permanent occupations of the soil so as to be rateable to the poor rate, see *Watkins* v. *Milton-next-Gravesend Overseers* (1868), L. R. 3 Q. B. 350; *Grant* v. *Oxford L. B.* (1868), L. R. 4 Q. B. 9; *Cory* v. *Greenwich Churchwardens* (1872), L. R. 7 C. P. 499; and *Cory* v. *Bristow* (1877), 2 App. Cas. 262.

Larceny of water.

Water supplied by a water company to a consumer, and standing in his pipes, may be the subject of a larceny at common law (*Ferens* v. *O'Brien* (1883), 11 Q. B. D. 21). As to gas, see *ante*, p. 190.

For actions brought to recover penalties and damages for not sending compensation water, see *Lewis* v. *Swansea Corporation* (1888), 4 T. L. R. 122, 706; and *Beaumont* v. *Huddersfield Corporation* (1902), 67 J. P. 57; both of which cases are referred to fully in the INTRODUCTION, p. 80. See also as to the powers of justices on proceedings being taken to enforce a penalty clause, *Davies-Cooke* v. *Hawarden and District Waterworks Co.* (1907), 71 J. P. 223.

A local board, under cover of legislative powers, cannot make a sewer which will have the effect of polluting the water of a canal. It was held, therefore, that the board must be restrained from permitting sewage communications to be made between the adjoining houses and the main sewer so long as it should discharge itself into the canal (*M. S. & L. Rail. Co.* v. *Worksop B. of H.* (1856), 23 Beav. 198).

A water company having acquired a long lease of a piece of land, with the intention of making a reservoir, afterwards let the same to be used as a rubbish shoot, whereby the surface was raised ten feet. This was held to be "waste," and an injunction was granted (*West Ham Central Charity Board* v. *East London Waterworks Co.*, [1900] 1 Ch. 624).

Errors and omissions in plans, etc., may be corrected by justices, etc., who shall certify the same.

7. If any omission, mis-statement, or wrong description shall have been made of any lands or streams, or of the owners, lessees or occupiers of any lands or streams, described on the plans or books of reference deposited in compliance with the standing orders of either House of Parliament, or in the schedule to the special Act, the undertakers, after giving ten days notice to the owners, lessees, and occupiers of the lands and streams affected by such proposed correction, may apply in England or Ireland to two justices, and in Scotland to the sheriff, for the correction thereof; and if it appear to such justices or sheriff that such omission, mis-statement, or wrong description arose from mistake, they or he shall certify the same accordingly, and shall in such certificate state the particulars of any such omission, mis-statement, or wrong description; and such certificate, with the other documents to which it relates, shall be deposited in England or Ireland with the clerk of the peace, and in Scotland with the sheriff clerk of the several counties in which the lands or streams affected thereby are situated, or, where any such lands or streams are situated in a royal burgh in Scotland, with the town clerk of such burgh; and such certificate shall be kept by such clerks of the peace, sheriff clerks, or town clerks respectively with the other documents to which they relate; and thereupon such plan book of reference, or schedule shall be deemed to be corrected according to such certificate, and the undertakers may make the works in accordance with such certificate, as if such omission, mis-statement, or wrong description had not been made.

Certificate, etc., to be deposited.

It was decided in *Kemp* v. *West of London and Crystal Palace Rail. Co.* (1855), 1 K. & J. 681, that the corresponding section in the Railways Clauses

Sect. 7.

NOTE.

Act was intended to meet the case of any omission of land in the plan, or of description of any owner of it in the books of reference, or the omission of the number or the mis-statement of the acreage or a mistake in the name of the owners, etc., as from an error in copying or the like. In that case the promoters of a proposed railway about to pass through land held by the plaintiffs on a long lease from the freeholder, and by them sublet to an occupying tenant, described it in their book of reference, naming the freeholder as owner and the sub-lessee as occupier, omitting all mention of the plaintiffs, the lessees. The special Act was passed incorporating all the Consolidation Acts of 1845, the plaintiffs not appearing before the committee, and having in fact no notice of the proceedings in Parliament. The lands were afterwards taken by proceedings under the compulsory clauses of the Lands Clauses Act—the plaintiffs not being summoned. The time for exercising the special powers elapsed before the plaintiffs were applied to. WOOD, V.-C., refused to grant an injunction to prevent the railway company from entering on the land. On this subject, see also *Taylor* v. *Clemson* (1844), 11 Cl. & F. 610. If the justices are satisfied that the omission, etc., arose from mistake, it is their duty to grant the necessary certificate; and they may be compelled to do so by *mandamus* (*Ex parte Central Wales Rail. Co.*, Mich. T., 1864, noted in Hodges on Railways, 7th ed., vol. 1, p. 339).

Works not to be proceeded with until plans of all alterations authorised by Parliament have been deposited.

8. The undertakers shall not begin to execute the waterworks unless they shall have previously deposited with the clerk of the peace in England or Ireland, and the sheriff clerk in Scotland, of every county, and the town clerk of every royal burgh in Scotland, in which the waterworks shall be situated, a plan and section of all such alterations from the original plan and section (if any) as shall have been approved of by Parliament, on the same scale and containing the same particulars as the original plan and section of the waterworks, and shall also have deposited with the parish clerks of the several parishes in England, and the clerks of the unions of the several parishes in Ireland, and the schoolmasters of the several parishes in Scotland, in which such alterations shall have been authorised to be made, copies or extracts of or from such plans and sections as shall relate to such parishes respectively.

Upon the question whether the works of a water company are subject to local building Acts or byelaws, see the cases cited *ante*, p. 156.

Clerks of the peace, etc., to receive plans of alterations, etc., and allow inspection.

9. The said clerks of the peace, sheriff clerks, and town clerks, parish clerks, clerks of unions, and schoolmasters shall receive the said plans and sections of alterations, and copies and extracts thereof respectively, and shall keep the same, as well as the said original plans and sections, and shall allow all persons interested to inspect any of the documents aforesaid, and to make copies and extracts of and from the same, in the like manner, and upon the like terms, and under the like penalty for default, as is provided in the case of the original plans and sections by an Act passed in the first year of the reign of her Majesty, intituled "An Act to compel clerks of the peace for counties, and other persons, to take the custody of such documents as shall be directed to be deposited with them under the Standing Orders of either House of Parliament."

7 Will. 4 & 1 Vict. c. 83.

The Act here referred to may now be cited as the Parliamentary Documents Deposit Act, 1837 (Short Titles Act, 1896 (59 & 60 Vict. c. 14)). It provides that:

Clerks of the peace, etc., to

> "Whenever either of the Houses of Parliament shall, by its standing orders already made or hereafter to be made, require that any such

Sect. 9.

maps, plans, sections, books, or writings, or extracts or copies of the same, or any of them, shall be deposited as aforesaid, such maps, plans, sections, books, writings, copies, and extracts shall be received by and shall remain with the clerks of the peace, sheriff clerks, parish clerks, schoolmasters, town clerks, postmasters, and other persons with whom the same shall be directed by such standing orders to be deposited, and they are hereby respectively directed to receive and to retain the custody of all such documents and writings so directed to be deposited with them respectively, in the manner, and for the purposes, and under the rules and regulations concerning the same respectively directed by such standing orders, and shall make such memorials and indorsements on and give such acknowledgments and receipts in respect of the same respectively as shall be thereby directed" (s. 1).

receive the documents herein mentioned, and retain them for the purposes directed by the Standing Orders of the Houses of Parliament.

"All persons interested shall have liberty to, and the said clerks of the peace, sheriff clerks, parish clerks, schoolmasters, town clerks, and postmasters, and every of them, are and is hereby required at all reasonable hours of the day, to permit all persons interested to inspect during a reasonable time, and make extracts from or copies of the said maps, plans, sections, books, writings, extracts and copies of or from the same, so deposited with them respectively, on payment by each person to the clerk of the peace, sheriff clerk, clerk of the parish, schoolmaster, town clerk or postmaster having the custody of any such map, plan, section, book, writing, extract or copy, one shilling for every such inspection, and the further sum of one shilling for every hour during which such inspection shall continue after the first hour, and after the rate of sixpence for every one hundred words copied therefrom" (s. 2).

Clerks of the peace, etc., to permit such documents to be inspected or copied by persons interested.

"In case any clerk of the peace, sheriff clerk, parish clerk, schoolmaster, town clerk, postmaster, or other person shall in any matter or thing refuse or neglect to comply with any of the provisions hereinbefore contained, every clerk of the peace, sheriff clerk, parish clerk, schoolmaster, town clerk, postmaster, or other person shall for every such offence forfeit and pay any sum not exceeding the sum of five pounds; and every such penalty shall, upon proof of the offence before any justice of the peace for the county within which such offence shall be committed, or by the confession of the party offending, or by the oath of any credible witness, be levied and recovered, together with the cost of the proceedings for the recovery thereof, by distress and sale of the goods and effects of the party offending, by warrant under the hand of such justice, which warrant such justice is hereby empowered to grant, and shall be paid to the person or persons making such complaint; and it shall be lawful for any such justice of the peace to whom any complaint shall be made of any offence committed against this Act, to summon the party complained of before him, and on such summons to hear and determine the matter of such complaint in a summary way, and on proof of the offence to convict the offender, and to adjudge him to pay the penalty or forfeiture incurred and to proceed to recover the same, although no information in writing or in print shall have been exhibited or taken by or before such justice; and all such proceedings by summons without information shall be as good, valid, and effectual to all intents and purposes as if an information in writing had been exhibited" (s. 3).

Clerks of the peace, etc., for every omission to comply with the provisions of this Act, liable to the penalty of £5, to be recovered in a summary way.

10. Copies of the said plans and books of reference, or of any alteration or correction thereof or extracts therefrom, certified by any such clerk of the peace, sheriff clerk, or town clerk, which certificate such clerk shall give to all parties interested, when required, shall be received in all courts of justice or elsewhere as evidence of the contents thereof.

Copies of plans and alterations, etc., to be evidence.

11. The undertakers in constructing the waterworks shall not deviate from the line of the works laid down in the said plan more than the

Not to deviate

Sect. 11.

beyond limits defined upon plans, etc.

prescribed number of yards, and where no number of yards is prescribed not more than ten yards, nor in any case to any greater extent than the line of lateral deviation described in the said plans with respect to such works, nor take nor use, for the purpose of such deviation, the lands of any person not mentioned in the books of reference without his previous consent in writing, unless the name of such person shall have been omitted by mistake, and the fact that such omission happened from mistake shall have been certified in manner herein-before provided.

A section somewhat similar (except as to the extent of deviation) is contained in the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), s. 15. Under that section it has been decided that the forbidding a railway company to deviate more than 100 yards from the line delineated on their plans deposited, applies only to the line of railway itself, and does not prevent the company from taking for collateral purposes, land beyond the distance of 100 yards, and beyond the limits of deviation marked on the plans, provided such land be scheduled in the company's local Act, and included in their plans and books of reference (*Doe* d. *Armistead* v. *North Staffordshire Rail. Co.* (1851), 16 Q. B. 526). In measuring the 100 yards, the *medium filium viæ* of the line as made, and the line as shown on the plans, is to be taken as the commencement and termination respectively (*ibid.*). A like decision was come to in *Doe* d. *Payne* v. *Bristol and Exeter Rail. Co.* (1840), 6 M. & W. 320; and see *Crawford* v. *Chester and Holyhead Rail. Co.* (1847), 11 Jur. 917; *Dowling* v. *Pontypool, etc., Rail. Co.* (1874), L. R. 18 Eq. 714; *Finck* v. *L. & S. W. Rail. Co.* (1889), 44 Ch. D. 330; *Prothero* v. *Tottenham and Forest Gate Rail. Co.*, [1891] 3 Ch. 278; and *Cardiff Rail. Co.* v. *Taff Vale Rail Co.*, [1905] 2 Ch. 289.

An agreement was entered into between a landowner and a railway company that the former should not oppose a projected railway on condition that there should be reference to arbitration for, among other purposes, defining the line of approach to his premises from a turnpike road which it was proposed to divert. After the award indicating such approach had been made, it became expedient for the company further to divert the turnpike road, but within the limits of deviation, and consequently necessary to alter the line of the approach to the landowner's premises. It was held by Lord COTTENHAM, that the company were not precluded from making such alteration (*Wood* v. *North Staffordshire Rail. Co.* (1849), 1 Mac. & G. 278).

In *Holyoake* v. *Shrewsbury and Birmingham Rail. Co.* (1848), 5 Rail. Cas. 421, it appeared that a railway company had purchased a part of the plaintiff's land, the value of which was settled by arbitration. The company entered, and were proceeding to make their line in a manner which clearly exceeded their powers of vertical deviation. The plaintiff filed his bill, alleging injury, and praying an injunction. Vice-Chancellor WIGRAM held, that the plaintiff was entitled to an interim injunction, but ordered an action to be brought to try the legal right. On appeal the Lord Chancellor (Lord COTTENHAM) directed the action to be brought immediately, and the motion to stand over, holding that a plaintiff ought to satisfy the court that he has sustained substantial damage from the violation of a legal right, in order to entitle himself to an injunction.

Undue delay or acquiescence may deprive a landowner of the right to complain of unwarranted lateral deviation. See *per* the Lord Chancellor in *Holyoake* v. *Shrewsbury and Birmingham Rail. Co.*, *supra*, and *Hopkins* v. *G. N. Rail. Co.* (1848), 11 L. T. (o.s.) 306.

See further the notes to s. 12.

Undertakers subject to

12. Subject to the provisions and restrictions in this and the special Act, and any Act incorporated therewith, the undertakers may execute any of the following works for constructing the waterworks; (that is to say,)

provisions of this and the special Act, may execute the works herein named.

They may enter upon any lands and other places described on the said plans and in the said books of reference, and take levels of the same, and set out such parts thereof as they shall think necessary and dig and break up the soil of such lands, and trench and sough the same, and remove or use all earth, stone, mines minerals, trees, or other things dug or gotten out of the same:

They may from time to time sink such wells or shafts, and make, maintain, alter, or discontinue such reservoirs, waterworks, cisterns, tanks, aqueducts, drains, cuts, sluices, pipes, culverts, engines, and other works, and erect such buildings, upon the lands and streams authorised to be taken by them, as they shall think proper, for supplying the inhabitants of the town or district within the prescribed limits with water:

They may from time to time divert and impound the water from the streams mentioned for that purpose in the special Act, or the said plans or books of reference, and alter the course of any such streams not being navigable, and also take such waters as may be found in and under or on the lands to be taken for constructing the works:

Undertakers to make compensation for damages.

Provided always, that in the exercise of the said powers the undertakers shall do as little damage as can be, and in all cases where it can be done shall provide other watering places, drains, and channels for the use of adjoining lands, in place of any such as shall be taken away or interrupted by them, and shall make full compensation to all parties interested for all damage sustained by them through the exercise of such powers.

Section 12 provides for "full compensation to all parties interested for all damage sustained." See also s. 6, *ante*, p. 382, and the Lands Clauses Act, 1845. The cases on this subject will be found collected *ante*, pp. 383 *et seq.*

In *New River Co.* v. *Johnson*, cited on p. 418, the company, in the execution of certain works authorised by a local Act incorporating s. 12, *supra*, intercepted water, which would otherwise have percolated through the strata of earth into a well upon the premises of the respondent, and drained off water which had accumulated in the well. Upon a complaint before justices, in order to recover compensation for the damage sustained, the company were ordered to pay a sum of money and costs. It was held, on appeal, that the order was wrong, for that, inasmuch as no action would lie against the company in respect of either quantity of water, supposing no Act authorising the execution of the works had been passed, the claim for compensation could not be sustained.

As to accommodation works required by the special Act to be constructed, see s. 16, *post*, p. 441.

Notices given and plans and sections deposited in pursuance of the standing orders of the Houses of Parliament previous to an application for an Act are not to be regarded in construing that Act afterwards, unless they are so referred to as to be incorporated therewith (*N. B. Rail. Co.* v. *Tod* (1846), 12 Cl. & F. 722). In *Edinburgh Street Tramways Co.* v. *Black* (1873), L. R. 2 H. L. Sc. 336, the company were, by s. 5 of their Act, authorised "to make, form, lay

Sect. 12.

NOTE.

down, and maintain the tramways hereinafter described in the lines, and according to the levels shown on the deposited plans and sections, and in all respects in accordance with those plans and sections." The House of Lords again decided that "where there is such a reference as this to the plans and sections in an Act of Parliament, they are to be held as incorporated into the Act." See *per* Lord WATSON, at p. 340. *Cf. Attorney-General* v. *G. E. Rail. Co.* (1873), L. R. 6 H. L. 367; and *Beardmer* v. *L. & N. W. Rail. Co.* (1849), 1 Mac. & G. 112. In *Huddersfield Corporation* v. *Jacomb* (1874), L. R. 10 Ch. 92, the corporation had served the usual notice on a landowner before applying to Parliament for power to take his land. The Act, when obtained, gave them power to take more of his land than was described in the notice. It was held that the corporation were not prevented from taking more land than was described in the notice. MELLISH, L.J., in giving judgment, observed: "It is now settled law that what was contained in the notice to the landowner as to the width which the conduit was to be cannot affect the corporation, even if it got into the deposited plans, unless it was contained in the Act of Parliament. It is quite clear that the Act does not contain any such restriction as to the actual width which the conduit is to have; and even if there was a restriction as to the width of the conduit, the corporation are not, in purchasing the lands, confined to the precise number of feet that may be taken up by the conduit. It may be convenient for them, with reference to their works, to have some feet of land on each side, and therefore upon the first point I think it is clear that they have not exceeded their powers." The corporation of Yarmouth were authorised by provisional order confirmed by Parliament to construct a pier according to certain deposited plans, which showed that the pier, when constructed, would be physically inconsistent with the existence of an alleged public right of access to the seashore. It was held that if the alleged right of way had ever existed it was extinguished by necessary implication (*Yarmouth Corporation* v. *Simmons* (1878), 10 Ch. D. 518. See also *Mackett* v. *Herne Bay Commissioners* (1878), 37 L. T. 812).

As to the meaning of the phrase "delineated upon the deposited plans," see *Dowling* v. *Pontypool Rail. Co.* (1874), L. R. 18 Eq. 714, and *Coats* v. *Caledonian Rail. Co.* (1903), 6 F. 1042. By an Act obtained by the Regent's Canal Company, they were empowered to make and maintain an enlargement of a certain reservoir in the lines and upon the lands delineated on the deposited plans and sections. It was held that the sections, as well as the plans, were incorporated in the Act and prescribed a vertical as well as a lateral limit within which the works were to be kept. The embankment having been raised to a height exceeding the authorised height, it was also held that, no injury having been occasioned to any individual, and there being none which was imminent or of irreparable consequence, a neighbouring landlord was not entitled to an injunction, but that the Attorney-General in such a case was so entitled (*Ware* v. *Regent's Canal Co.* (1858), 3 De G. & J. 212).

Where the promoters of a public undertaking have authority from Parliament to interfere with private property on certain terms, any person whose property is interfered with by virtue of that authority has a right to require that the promoters shall comply with the letter of the enactment so far as it makes provision on his behalf. Nor can any court remodel arrangements sanctioned, or relax conditions imposed, by Act of Parliament. Deviation, in its ordinary and natural sense, and as used in Acts of Parliament, means shifting the work in its integrity from one site to another which may be deemed more suitable. It does not imply a right not only to alter the situation of the work, but in doing so to dispense with a half or two-thirds of it. A local and personal Act empowered commissioners to take water from a river for the supply of a township on condition of their executing certain works, and (*inter alia*) a reservoir to supply compensation water to millowners, and a conduit, the reservoir to be constructed by an embankment across the river. The Act and the relative plans and sections described the position of the reservoir, its contour and capacity, and the height of the embankment, and provided that in constructing the authorised works the commissioners might, subject to the provisions of the Act, deviate from the lines of the works to any extent not exceeding the limits of lateral deviation shown on the deposited plans, and from the levels shown on the deposited sections, in the case of the reservoir, to any extent of lesser height which would enable the commissioners to give a sufficient supply of water for compensation purposes; but the commissioners should not, in the exercise of the power of lateral deviation thereby given, construct any embankment or wall of any reservoir of a greater height above the general surface of the ground than that shown on the plans with reference to the corresponding embankment or wall and six feet in addition. In constructing the reservoir, the commissioners curtailed it by more than one-third of its length, and nearly two-thirds of its capacity, and placed the embankment higher up the river than the point fixed by the Act, and so that the capacity could not be enlarged in the event of the supply of compensation water proving insufficient. In constructing the conduit the commissioners disregarded in material points the directions of the Act as to the course and serviceableness of the conduit, and constructed a conduit which they alleged was "a substantial equivalent" to the millowners. The millowners having brought an action against the commissioners, it was held, reversing the decision of the Irish Court of Appeal (27 L. R. Ir. 179), Lords MORRIS and HANNEN dissenting, that although no actual damage was proved, the millowners were entitled to a declaration that the reservoir and conduit were not in accordance with the provisions of the Act, and to an injunction restraining the commissioners from taking or using the waters of the river or from interfering with the flow of the river otherwise than as authorised by the Act (*Herron* v. *Rathmines and Rathgar Improvement Commissioners*, [1892] A. C. 498).

In the exercise of their statutory powers a water company sunk a shaft in land adjacent to the plaintiff's house, and for this purpose employed certain lift pumps, the noise of which seriously interfered with the plaintiff's comfort. The plaintiff having commenced an action for nuisance, the company substituted centrifugal pumps, which diminished the noise of the pumping. When the sinking of the shaft was commenced, it became necessary to lower and lengthen the pumps from time to time, but at the date when the centrifugal pumps were substituted, the sinking of the shaft had arrived at a point at which this operation had ceased to be necessary. The company might have used centrifugal pumps from the commencement, but they were less convenient on account of the difficulty of lowering and lengthening them, and on account of the increased labour attending their use, and they were not the pumps ordinarily used in sinking shafts:—*Held*, that the annoyance being temporary and for a lawful object did not amount to a nuisance at law:—*Held*, further, that the authority conferred on the company to sink the shaft included all things reasonably necessary for the execution of the work (*Harrison* v. *Southwark and Vauxhall Water Co.*, [1891] 2 Ch. 409). *Cf. Knight* v. *Isle of Wight Electric Light and Power Co.* (1904), 68 J. P. 266, and *Colwell* v. *St. Pancras Borough Council*, [1904] 1 Ch. 707. An act is not "necessary" within s. 16 of the Railways Clauses Consolidation Act, 1845, merely because it enables the company to execute their works more economically (*Fenwick* v. *East London Rail. Co.* (1875), L. R. 20 Eq. 544).

The Waterworks Clauses Act (s. 12) does not empower a company to execute any works which are not authorised by the special Act of such company. The South Staffordshire Waterworks Company, before applying to Parliament, deposited plans showing that a certain field would be affected by a tunnel passing forty-five feet below the service, and gave a notice to the owner accordingly. The company obtained its Act, authorising it to construct its works according to the plans, and afterwards proposed to take the field, sink a well, and erect pumping machinery thereon. It was held that the company were not authorised to take or use the field permanently for any other purpose than that indicated upon the deposited plans (*Simpson* v. *South Staffordshire Waterworks Co.* (1865), 34 L. J. Ch. 380. See remarks on this case by MALINS, V.-C., in *Corporation of Huddersfield* v. *Jacomb* (1874), L. R. 17 Eq. at p. 487; affirmed L. R. 10 Ch. 92).

A waterworks company were incorporated by a special Act, and empowered to take certain land, and to make and maintain in certain definite situations

Sect. 12.

NOTE.

the waterworks mentioned in the Act for the purpose of supplying a definite area with water. In addition to the land above described, the company were also authorised to purchase by agreement a limited number of acres of land, which they might hold for the purposes of the Act, and the general purposes of the undertaking. The company had, under this later power, bought some additional land, and they proposed to sink wells and erect pumping stations on this additional land, which was situated some miles distant from the originally authorised works. An action was brought on the relation of several riparian owners on an adjoining river, and they claimed an injunction to restrain the water company from sinking wells and erecting pumping stations on the land so acquired on the ground that the proposed works were *ultra vires*. The company relied on the power to purchase and hold additional land for the purposes of the undertaking, and contended that they were entitled on their own lands to sink wells and draw off water just as any other landowner could do, and that as they proposed to do so for the purpose of supplying water they were acting wholly within their powers. It was held that the additional land could only be used for purposes ancillary to the main undertaking; that the undertaking which was authorised was that specifically described in the special Act; that it was only by means of these works that they could take, divert, store, and use water; and that the additional land could only be used for subsidiary works or conveniences to assist in carrying on the works specifically authorised (*Attorney-General* v. *Frimley and Farnborough District Water Co.*, [1908] 1 Ch. 727. See also *Marriott* v. *East Grinstead Gas and Water Co.*, [1909] 1 Ch. 70; cited at pp. 439, 454, and *Attorney-General* v. *South Staffordshire Waterworks Co.*, 25 T. L. R. 408; in which the decision in the *Frimley Case* was followed. In the last mentioned case the works had been erected and in operation for some time and it was urged that delay had barred the remedy. The Court, however, held otherwise, but suspended the operation of the injunction in order to enable the water company to obtain a special Act sanctioning the works.

In the following case the *Frimley Case, supra,* was distinguished :—

A water company, who under their earlier Acts had certain general powers for the sinking of wells, were empowered by an Act of 1904 to construct additional waterworks. The Act of 1904 recited the deposit of plans, incorporated (by s. 3) the Waterworks Clauses Act, 1847, in general terms, defined (by s. 4) the waterworks to be the works authorised by the company's earlier Acts and the present Act, and then proceeded (by s. 5) to empower the company to acquire additional lands not exceeding a certain acreage anywhere within their limits of supply, and (by s. 6) to construct a further reservoir in a different part of the company's area. Section 10 provided that the company might by agreement acquire and hold for the purposes of their undertaking additional lands within the limits of supply, not exceeding fifteen acres, and might on such lands execute any of the works and exercise any of the powers mentioned in or conferred by s. 12 of the Waterworks Clauses Act, 1847, which section (*inter alia*) authorise the sinking of wells. In pursuance of the powers claimed to have been conferred on them by the last-mentioned section the company acquired land about six miles away from their reservoir (but within the area of supply) and commenced to sink a well for the purpose of obtaining a new water supply to the reservoir. The plaintiff, in an action, claimed an injunction to restrain the company from constructing or using upon the additional land "a well or other works for the purpose of raising, collecting, or storing water and for carrying the same away for the purposes of their undertaking." It was held that the company were entitled to sink a well at any place at which a well was proper and necessary in connection with the waterworks undertaking authorised by the special Act, as that Act conferred upon them the right to execute the works and exercise the powers mentioned in or conferred by s. 12 of the Waterworks Clauses Act, 1847 (*Attorney-General* v. *Barnet District Gas and Water Co.* (1910), 74 J. P. 193).

It will be seen, therefore, that the solution of questions of this kind must be found in the wording of the special Act or Acts of the company in respect

Sect. 12.

NOTE.

of whose undertaking the question arises. In this connection it may be useful to refer to variations which have appeared in the Model Water Bill during recent years, as, generally speaking, this Bill, as annually brought up to date, fixes the form in which clauses must be framed in order that they shall be acceptable to Parliament. In the Bill for 1900 there was a clause (No. 3) providing that undertakers might upon any lands for the time being belonging to them make and maintain (*inter alia*) such wells as might be necessary or convenient in connection with or subsidiary to the works shown on the deposited plans. In the Bill for 1907 this power was limited to the lands shown on the deposited plans. In the following year there appeared a clause (No. 8) providing that undertakers should not sink any well upon or construct any works for taking or intercepting water from any lands acquired by them unless the works and the lands upon which the same were to be constructed were specified in that (*i.e.*, the new Act) or some other Act of Parliament. In the Model Bill for 1910, the clause (No. 8) is now worded as follows:

"The *Corporation* shall not construct any works for taking or intercepting water from any lands acquired by them unless the works are authorised by and the lands upon which the same are to be constructed are specified in this or some other act of Parliament."

See, further, the INTRODUCTION.

Where a waterworks company's Act authorised them to divert the water of a stream by means of an open channel filled with stones, but imposed no limit as to quantity, and the company proceeded to carry out the diversion by means of a culvert, whereby a larger quantity of water would be taken, another company (who were entitled to the water of a stream into which the diverted stream had flowed) applied to restrain them from violating the terms of the Act in regard to the mode of diversion, the Lords Justices refused an injunction, on the ground that private persons seeking injunction in such cases must show a private interest and not merely an interest as one of the public (*Mayor, etc. of Liverpool* v. *Chorley Waterworks Co.* (1852), 2 De G. M. & G. 852).

An Act for supplying with water the town and port of Cardiff and the neighbourhood, after reciting that the town of Cardiff and the neighbourhood were insufficiently supplied with water, incorporated a company and gave it the usual powers, and enacted that the limits of the Act for the supply of water should comprise "the whole of the town and port of Cardiff, and the parishes and places within and adjoining to such town"; it was held, that the word "port" was used in the popular sense, and did not extend to the district fixed by the commissioners of the treasury as the port of Cardiff, for the purposes of the customs duties (*Cardiff* (*Mayor, etc.*) v. *Cardiff Waterworks Co.* (1859), 5 Jur. (N.S.) 953). The company were proceeding to lay down pipes which they alleged were necessary for the supply of Cardiff, but which they admitted they intended to use for the purpose of carrying water beyond the limits of their powers. At the suit of the Board of Health for Cardiff the court restrained the company from laying down pipes under the streets of Cardiff for the purpose of supplying with water any parish or place not being part of the port of Cardiff, or any parish or place within or adjoining such town (*ibid.*). The principle of the two last mentioned cases as to an owner being entitled to sue in respect of his private rights was recently applied in *Marriott* v. *East Grinstead Gas and Water Co.*, [1909] 1 Ch. 70, cited fully at p. 454.

The proviso in the above section, that in the exercise of their powers the undertakers "*shall do as little damage as can be*," relates to the mode of doing works authorised to be done, but does not regulate what those works should be. See *per* Lord CAMPBELL, C.J., in *R.* v. *East and West India Docks, etc. Rail. Co.* (1853), 2 El. & Bl. 466; and see *Fenwick* v. *East London Rail. Co.* (1875), L. R. 20 Eq. 544. In order to sustain an action, special damage must be shown (*Watkins* v. *G. N. Rail. Co.* (1851), 16 Q. B. 961).

Sect. 12.

NOTE.

In a case under the corresponding section in the Railway Clauses Act (s. 16), it was held that the power conferred on the company by that section "is confined to matters which are not only done in the construction of the railway, but which are necessary to its construction" (*R.* v. *Wycombe Rail. Co.* (1867), L. R. 2 Q. B. 310; following *Attorney-General* v. *G. N. Rail. Co.* (1850), 4 De G. & S. 75). See also *Earl Beauchamp* v. *G. W. Rail. Co.* (1868), L. R. 3 Ch. 745; *Biscoe* v. *G. E. Rail. Co.* (1873), L. R. 16 Eq. 636; and *Sadd* v. *The Maldon, Witham and Braintree Rail. Co.* (1851), 20 L. J. Ex. 102, where it was said by POLLOCK, C.B., that "the distinction attempted to be made between works of necessity and works of convenience utterly fails." The power conferred on a railway company by s. 16 of the Railways Clauses Consolidation Act, to divert the course of a river or road, "in order the more conveniently to carry the same over or under or by the side of the railway, as they may think proper," is to be taken as cut down and qualified by a proviso that it be an act necessary for making, maintaining, altering or repairing and using the railway. Such a power, therefore, only authorises such a diversion when the road or river presents an actual obstacle to the construction of the line, and not in a case where the diversion is merely for the purpose of saving the company expense (*Pugh* v. *Golden Valley Rail. Co.* (1880), 15 Ch. D. 330). See also *Marquess of Breadalbane* v. *West Highland Rail. Co.* (1895), Ct. of Sess. Cas., 22 Rettie 307. An injunction will be granted where, in the exercise of powers of construction, more damage is done than is reasonably necessary, or where those powers are otherwise being exceeded (*Manser* v. *Northern and Eastern Counties Rail. Co.* (1841), 2 Rail. Cas. 380; *Ware* v. *Regent's Canal Co., supra; Dodd* v. *Salisbury and Yeovil Rail. Co.* (1859), 1 Giff. 158). But substantial damage must be shown in order to justify the interference of the court (*Holyoake* v. *Shrewsbury and Birmingham Rail. Co.* (1848), 5 Rail. Cas. 421; and see *Wandsworth B. of W.* v. *L. & S. W. Rail. Co.* (1862), 31 L. J. Ch. 854; and *Wandsworth B. of W.* v. *United Telephone Co.* (1884), 13 Q. B. D. 904). A municipal corporation were authorised to construct catchwaters, conduits, etc., through the plaintiff's estate, and from time to time to make good any damage done to the estate or the owner and tenants. They constructed a certain bywash, which after an unusually heavy storm caused a great deal of water to pass on to the plaintiff's land. The bywash was properly constructed under the authority of their Act of Parliament:—*Held*, that if any damage was caused by the overflow the plaintiff's remedy was by compensation and not by injunction (*Fielden* v. *Morley Corporation*, Jl. of G. L., August 9th, 1898, p. 319).

In 1838 an agreement was entered into between the Shaws Water Company and the police trustees of Greenock, respecting the supply of water for the use of the inhabitants. Prior to this agreement the town had been supplied with water by the police trustees, exercising statutory powers. The undertaking of the Shaws Water Company (which was a company with statutory powers) was to supply the police trustees with a defined quantity "of pure and wholesome water, equal in quality to the water then supplied by the police trustees," in consideration of which undertaking the police trustees, on the other hand, assigned to the water company certain rights, engaging on their part to refrain from and discontinue the supplying of water to public works or manufactories, or to private houses. In 1851, certain sugar refiners in Greenock, desiring to bring salt water from the harbour to their works, and with this object to lay down pipes in the streets of Greenock, and permission to do this having been granted by the police commissioners, the company sought to obtain an interdict (injunction) against the commissioners, but it was held that the subject-matter of the contract related to fresh water only, and therefore that the giving permission to take salt water was no breach of the contract (*Shaws Water Co.* v. *Magistrates of Greenock* (1855), 2 Macq. H. L. Cas. 151).

Penalty for obstructing construction of works.

13. Every person who shall wilfully obstruct any person acting under the authority of the undertakers in setting out the line of the works, or pull up or remove any poles or stakes driven into the ground for the purpose of setting out the line of such works, or deface or destroy any works made for the same purpose, shall be liable to a penalty not exceeding five pounds for every such offence.

Penalty for illegally diverting water.

14. After the streams or supplies of water hereby or by the special Act authorised to be taken by the undertakers shall have been so taken, every person who shall illegally divert or take the water supplying or flowing into the streams so taken, or any part thereof, or who shall do any unlawful act whereby the said streams or supplies of water may be drawn off or diminished in quantity, and who shall not immediately repair the injury done by him, on being required so to do by the undertakers so as to restore the said waters to the state in which they were before such act, shall forfeit to the undertakers any sum which shall be awarded in England or Ireland by two justices, and in Scotland by the sheriff, not exceeding five pounds for every day during which the said supply of water shall be diverted or diminished by reason of any act done by or by the authority of such person, and any sum so forfeited shall be in addition to the sum which he may be lawfully adjudged liable to pay to the undertakers for any damage which they may sustain by reason of their supply of water being diminished; and the payment of the sum so forfeited shall not bar or affect the right of the undertakers to bring or raise an action at law against such person for the damage so committed.

As to the recovery of penalties, see s. 85, *infra*.

Preservation of existing rights.

15. Provided always, that nothing herein contained shall prevent the owners and occupiers for the time being of lands through or by which such streams shall flow from using the waters thereof in such manner and to such extent as they might have done before the passing of the special Act, unless they shall have received compensation in respect of their right of so using such water.

As to the amount and nature of the user to which the owners and occupiers of lands through or by which streams flow are entitled, see notes to s. 6, *ante*, pp. 382 *et seq.*

Accommodation Works.

And with respect to the construction of works for the accommodation of lands adjoining the waterworks, be it enacted as follows:

Differences as to the construction of accommodation works to be settled by justices.

16. Where by the special Act the undertakers shall be required to erect any works for making good the interruption caused to any lands adjoining or near the waterworks, or otherwise, for the accommodation of such lands, then if any difference shall arise respecting the construction of any such accommodation works, or the kind or size or sufficiency thereof, or respecting the maintenance thereof, the same shall be determined in England or Ireland by two justices, and in Scotland by the sheriff, and such justices or sheriff shall also appoint the time within which such accommodation works shall be begun and finished by the undertakers.

See the case of *Blagrave* v. *Bristol Waterworks Co.* (1856), 1 H. & N. 369, cited in the notes to s. 6, p. 393. A somewhat similar provision is contained in the Railways Clauses Consolidation Act, 1845, s. 69; but there is this difference, that the section in the text is prefaced by the words, "Where by the special Act the undertakers shall be required to erect any works for making good,"

Sect. 16.

NOTE.

etc. There is a general provision as to the accommodation works at the end of s. 12, p. 435. Under s. 69 of the Act of 1845, it has been decided that it is *ultra vires* of a compensation jury to award the expense of accommodation works to a landowner, the enforcing of the construction of such works being exclusively within the province of the justices (*South Wales Rail. Co.* v. *Richards* (1849), 18 L. J. Q. B. 310; *S. C. sub nom. R.* v. *South Wales Rail. Co.* (1849), 13 Q. B. 988). Nor is it the province of the justices to decide whether or not there should be any accommodation works, their powers being limited by the above section to the kind, number, dimensions, etc., of such works (*R.* v. *Waterford and Limerick Rail. Co.* (1852), 2 Ir. L. R. (N.S.) 580). As to what are accommodation works within the meaning of the Railways Clauses Act, see *R.* v. *Fisher* (1862), 3 B. & S. 191; *Rhondda and Swansea Rail. Co.* v. *Talbot,* [1897] 2 Ch. 131; and see also *R.* v. *Waterford and Limerick Rail. Co., supra.* As to how far the amount of compensation is affected by the accommodation works which have been or can be afforded, see *R.* v. *Brown* (1867), L. R. 2 Q. B. 630; and *Earl of Darnley* v. *L C. & D. Rail. Co.* (1867), L. R. 2 H. L. 43. The court will refuse to exercise a concurrent jurisdiction with the justices (*Hood* v. *N. E. Rail. Co.* (1870), L. R. 11 Eq. 116). The justices in settling the nature of accommodation works can only take into account the present condition of the land (*per* COCKBURN, C.J., in *R.* v. *Brown* (1867), L. R. 2 Q. B., at p. 632). Where a level crossing was made to accommodate the severed portions of an owner's land, and that owner sold the severed portions to different people, nothing being said in the conveyances as to the level crossing, it was held that the right to use the same ceased (*Midland Rail. Co.* v. *Gribble,* [1895] 2 Ch. 827).

When a level crossing is made across a railway for the accommodation of adjoining land, it may not be used so as substantially to increase the burden of the easement by altering or enlarging its character, nature, or extent, as enjoyed at the time the railway was constructed (*G. N. Rail. Co.* v. *McAlister,* [1897] 1 Ir. R. 587; *G. W. Rail. Co.* v. *Talbot,* [1902] 2 Ch. 759; *Taff Vale Rail. Co.* v. *Gordon Canning,* [1909] 2 Ch. 48).

If undertakers fail to execute such works, persons aggrieved may perform the same, and charge the expense to the undertakers.

17. If the undertakers shall for fourteen days next after the time appointed by such justices or sheriff for the beginning of any such accommodation works fail to begin such works, or, having begun such works, fail diligently to execute the same in a sufficient manner the person aggrieved by such failure may execute such works or repairs; and the reasonable expenses thereof shall, on demand, be repaid by the undertakers to the person by whom the same shall so have been executed; and if there be any dispute about the amount or nature of such expenses the same shall be settled in England or Ireland by two justices, and in Scotland by the sheriff.

Mines.

And with respect to mines be it enacted as follows:

Undertakers not entitled to mines unless previously purchased.

18. The undertakers shall not be entitled to any mines of coal, ironstone, slate, or other minerals under any land purchased by them, except only such parts thereof as shall be necessary to be dug or carried away or used in the construction of the waterworks, unless the same shall have been expressly purchased, and all such mines, excepting as aforesaid, shall be deemed to be excepted out of the conveyance of such lands, unless they shall have been expressly named therein and conveyed thereby.

It is provided by the Public Health Act, 1875 (Support of Sewers Amendment Act, 1883 (46 & 47 Vict. c. 37), s. 3, that ss. 18 to 27, both inclusive, of this Act, with respect to mines shall, in relation to any sanitary work of a local authority, be deemed (with certain modifications) to be incorporated with that Act and with the Sanitary Act under the authority of which such sanitary work has been or is constructed or is maintained. See *post*.

NOTE.

A section similar to that in the text is contained in the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), s. 77, and in the Railways Clauses (Scotland) Act, 1845 (8 & 9 Vict. c. 33), s. 70. The owner of land granting to a railway company the right to make and maintain a tunnel through his land is entitled to work his minerals therein in accordance with ss. 77 & 78 of the Railways Clauses Act, and the railway company have no right to the adjacent or subjacent support of the minerals (*Fletcher* v. *G. W. Rail. Co.* (1860), 5 H. & N. 680; and see *Dudley Canal Co.* v. *Grazebrook* (1830), 1 B. & Ad. 59). See also *Pountney* v. *Clayton* (1883), 11 Q. B. D. 820, where a purchaser from the railway company of superfluous land was also held to have no right to adjacent or subjacent support. A landowner granting to a railway company the right to make and maintain a tunnel through his land, is in the same position with respect to his right to work mines under ss. 77 and 78 as if the company had actually purchased the land (*L. & N. W. Rail. Co.* v. *Ackroyd* (1862), 31 L. J. Ch. 588). After notice given by the owner and failure of the undertakers to take the minerals and pay compensation, the owner is entitled to work them up to and under the railway, working them in a proper manner, and according to the usual manner of working such mines in the district (*G. W. Rail. Co.* v. *Bennett* (1867), L. R. 2 H. L. 27). And in this case the House of Lords affirmed (what had been decided in earlier cases, see *supra*) that under their statutory purchase the company could not claim the right of an ordinary purchaser of the surface to subjacent and adjacent support, the statute having created a specific law for such matters, by which alone the rights of the company and the mine-owner are regulated (*ibid.*). In 1875 the M. Corporation purchased by agreement under the powers of a special Waterworks Act of 1847 (1), an estate from S., who reserved to himself the minerals thereunder, with full powers to work the same without making compensation; (2) an adjoining estate from T., including the minerals. In 1875 the corporation obtained a further special Act which incorporated the Waterworks Clauses Act, 1847, and under this special Act they constructed a reservoir partly on the S. land and partly on the T. land. By s. 22 of the Waterworks Clauses Act, 1847, *post*, p. 448, if the owner, lessee, or occupier of any mines lying under the reservoirs of the undertakers or within forty yards therefrom, be desirous of working the same he must give the undertakers notice in writing of his intention so to do thirty days before the commencement of working, and if it appear to the undertakers, after an inspection of the mines, that the working of the mines is likely to damage their works, and they be willing to pay compensation for the mines to the owner, lessee, or occupier thereof, then he shall not work the same; and by s. 23, *post*, p. 450, if, before the expiration of the thirty days the undertakers do not state their willingness to pay compensation to such owner, lessee, or occupier, he may work the mines as if that Act and the special Act had not been passed. The appellants, who were lessees of the mines under the S. land, gave notice to the corporation of their intention to work the mines under and adjacent to the reservoir, but the corporation gave no counter notice of their willingness to pay compensation for the mines, and accordingly the appellants worked the mines and caused a subsidence of the T. land. In an action to restrain the appellants from so working their mines as to damage the T. land, it was held that the mining sections (18—27) of the Waterworks Clauses Act, 1847, did not deprive the corporation of their common law right to lateral support for the surface of the T. land, and that they were entitled to an injunction in respect of the appellants' workings both within and without the forty yards limit (*New Moss Colliery Co.* v. *Manchester Corporation*, [1908] A. C. 117). Where a railway company, prior to the Act of 1845, purchased free from the conditions of that Act, and the owner granted a conveyance of the land reserving minerals, the House of Lords decided that on the principle that the owner could not derogate from his grant, the conveyance gave a right by implication to all reasonable subjacent and adjacent support (*Caledonian Rail. Co.* v. *Sprot* (1856), 2 Macq. H. L. 449). See to the like effect *Elliot*

Sect. 18.

NOTE.

v. *N. E. Rail. Co.* (1863), 10 H. L. Cas. 333; *Caledonian Rail. Co.* v. *Lord Belhaven* (1857), 3 Macq. H. L. 56; *N. E. Rail. Co.* v. *Crosland* (1862), 32 L. J. Ch. 353; and *L. & N. W. Rail. Co.* v. *Walker*, [1903] A. C. 289. For cases turning on the special language of Inclosure Acts see *Consett Waterworks Co.* v. *Ritson* (1888), 22 Q. B. D. 318, 702; and *Butterknowle Colliery Co.* v. *Bishop Auckland Industrial Co-operative Co., Ltd.*, [1906] A. C. 305.

Where a railway company under the Railways Clauses Consolidation (Scotland) Act, 1845, gave notice to leave unworked certain minerals lying under or near the railway, and compensation was duly settled and paid, the railway company demanded a conveyance of the minerals so left unworked on the ground that the property in the minerals had become vested in them. It was held that the company were not entitled to such a conveyance (*Duke of Hamilton's Trustees* v. *Caledonian Rail. Co.* (1905), 7 F. 847).

The word minerals has received a very wide interpretation by the courts. In *Midland Rail. Co.* v. *Checkley* (1867), L. R. 4 Eq. 19, it was held that minerals included everything below the surface available for agricultural purposes, which could be made useful for any purpose, and included the right of quarrying as well as underground working. And in *Hext* v. *Gill* (1872), L. R. 7 Ch. 699, MELLISH, L.J., in the course of his judgment, said: "Many authorities, some at law and some in equity, have been brought before us to show what is the meaning of the word minerals. The result of the authorities, without going through them, appears to be this, that a reservation of minerals includes every substance which can be got from underneath the surface of the earth for the purpose of profit, unless there is something in the context or in the nature of the transaction to induce the court to give it a more limited meaning." Where the reservation is not contained in grant or contract but is statutory, see *G. W. Rail. Co.* v. *Blades*, [1901] 2 Ch. 624.

In *Earl of Rosse* v. *Wainman* (1848), 2 Ex. 800, not only lead ore, ironstone, and other substances containing metals, but also fossils and stone dug in quarries, and also a stratum of stone were held to be minerals. Further, as to stone, see *Midland Rail. Co.* v. *Checkley* (1867), L. R. 4 Eq. 19; *Dixon* v. *Caledonian Rail. Co.* (1889), 5 App. Cas. 820; *Micklethwait* v. *Winter* (1851), 6 Ex. 644; and *Greville* v. *Hemingway* (1902), 87 L. T. 443. As to slate, see *Duchess of Cleveland* v. *Meyrick* (1867), 37 L. J. Ch. 125. As to freestone, see *Bell* v. *Wilson* (1866), L. R. 1 Ch. 303; and *Glasgow & S. W. Rail. Co.* v. *Bain* (1893), Ct. of Sess. Cas., 21 Rettie, 134; *cf. Nisbet Hamilton* v. *N. B. Rail. Co.* (1886), Ct. of Sess. Cas., 13 Rettie, 454; and *Earl of Hopetoun* v. *N. B. Rail. Co.* (1893), Ct. of Sess. Cas., 20 Rettie, 704. As to china clay, *Hext* v. *Gill* (1872), L. R. 7 Ch. 699; *Shaftesbury* v. *Wallace*, [1897] 1 Ir. 381; *G. W. Rail. Co.* v. *Carpalla United China Clay Co.*, [1909] 1 Ch. 218; and on appeal, [1910] A. C. 83; and as to brick-earth and clay, *Earl of Jersey* v. *Neath Guardians* (1889), 22 Q. B. 555; *Church* v. *Inclosure Commissioners* (1862), 11 C. B. (N.S.) 664. As to common clay see *N. B. Rail. Co.* v. *Turners, Ltd.* (1904), 41 S. L. R. 706. As to coprolites, *Attorney-General* v. *Tomline* (1877), 5 Ch. D. 750. As to gravel, see *per* JESSEL, M.R., in *Errington* v. *Metropolitan Rail. Co.* (1882), 19 Ch. D. 559; and *cf. In re Metropolitan District Rail. Co. and Cotton's Trustees* (1881), 45 L. T. 103. As to gravel and sand, see *Scott* v. *Midland Rail. Co.*, [1901] 1 Q. B. 317. As to limestone, see *Midland Rail. Co.* v. *Robinson* (1889), 15 App. Cas. 19. As to sandstone, see *North British Rail. Co.* v. *Budhill Coal and Sandstone Co.*, [1910] A. C. 116.

In *Midland Rail. Co.* v. *Haunchwood Brick and Tile Co.* (1882), 20 Ch. D. 552, it appeared that the defendants had a bed of clay used for making a peculiar kind of brick, and that there were three or four feet of surface earth overlying, and that the clay was entirely got by open workings. The railway was made in a cutting in the bed of clay itself, so that the ballast, sleepers, and rails were laid upon the clay. The contention of the company was that the governing word in s. 77 of the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), was not "minerals," but "mines," and that an open working was not a mine. KAY, J., decided that this was a mine within the

Sect. 18.

Note.

meaning of s. 77, and might, unless the company were willing to make compensation to the landowner, be dug and worked by him. This case was followed in *Midland Rail. Co.* v. *Miles* (1886), 33 Ch. D. 632. The point next arose in a Scotch case—*Lord Provost, etc. of Glasgow* v. *Farie* (1888), 13 App. Cas. 657. The Corporation of Glasgow (having the supply of water in their hands, and their Acts having incorporated therewith the Waterworks Clauses Act, 1847) purchased and took a conveyance of a "piece of ground," with a reservation of "the whole coal and other minerals in the said lands in terms of the Waterworks Clauses Act, 1847." At the time of the purchase it was known that the land contained clay. The corporation constructed a reservoir and other works to the value of £52,000 on the land so purchased. The respondent being desirous of working the clay, the corporation contended that the seam lay very near the surface of the ground at an average of two feet only, and, therefore, it could not be worked by mining, and that on his adjoining land the respondent worked the clay by means of an open quarry into the seam. The respondent's point was that the clay was a mineral in the sense of the Act of 1847 and of the conveyance. Lord Halsbury, L.C., was of opinion that, whatever might be the law applicable in England upon such facts, as to which he reserved his opinion, this was a case to be decided by Scotch law, and that by that law it had been held that "mines and minerals" did not include freestone which could only be obtained by quarrying (*Menzies* v. *Breadalbane* (1818), 19 F. C. 531, and *Hamilton* (*Duke of*) v. *Bentley* (1841), 3 Ct. Sess. Cas., 2nd series, 1121). Lord Watson was of opinion that the legislature "intended the words 'mines of coal, ironstone, slate, and other minerals' to have the same meaning in all the three countries"; that every substance, being a mineral within the meaning of these clauses, is reserved to the owner irrespective of the method by which it may be wrought; that "mines" must be taken to signify "all excavations by which the excepted minerals may be legitimately worked and got"; but in this particular case he held that the enactments in question described the excepted mines of minerals as lying under the land, and contemplated that the purchaser under compulsory powers should become owners of "the land," and he came to the "conclusion that the expression 'the land' cannot be restricted to vegetable mould or to cultivated clay, but that it naturally includes, and must be held to include, the upper soil, including the subsoil, whether it be clay, sand, or gravel; and that the exceptional depth of the subsoil, whilst it may enhance the compensation payable at the time, affords no ground for bringing it within the category of excepted minerals." Lord Macnaghten was also in favour of the corporation, but on the ground that open workings were not mines within the meaning of s. 77. Lord Herschell dissented, and was of opinion that "the reservation must be taken to extend to all such bodies of mineral substances, lying together in seams, beds, or strata, as are commonly worked for profit and have a value independent of the surface of the land." The judgment of the majority of the House of Lords was, therefore, in favour of the corporation. See *Todd, Birleston & Co.* v. *N. E. Rail. Co.*, cited *infra*. A somewhat similar question came before the House for decision in the following year:—*Midland Rail. Co.* v. *Robinson* (1889), 15 App. Cas. 19. In this case the materials sought to be worked were ironstone and limestone, and the company contended that they were not "mines and minerals" within the meaning of s. 77 and following sections, because they were to be got by open quarrying instead of underground workings. Lords Herschell and Watson were of opinion that they were nevertheless "mines" within the Act. Lord Macnaghten dissented, retaining the opinion he had expressed in *Fairie's Case*. The judgment of the House was, therefore, in favour of the respondent. In *Ruabon Brick and Terra Cotta Co.* v. *G. W. Rail. Co.*, [1893] 1 Ch. 427, it appeared that underneath the railway company's line lay a bed of valuable clay, which came up nearly to the surface of the land, being only covered by a layer of surface soil, or "fey," varying from three to eight feet in thickness, and that the custom in the district, where there were various works of the same description as that of the plaintiffs', was to get the clay by open quarrying, and not by underground workings. The railway company (pp. 441, 442),

Sect. 18.

NOTE.

admitted that the clay must be treated as a mineral within the mineral sections of the Railways Clauses Act, and that the usual manner of working this particular kind of mineral was from the surface. But they contended "that when the surface has been sold for a statutory purpose the mine-owner is not entitled to come upon that surface and take it away"; and it was admitted that the mine-owner "may quarry and work from underneath until he lets down the surface." The Court of Appeal (affirming the judgment of KEKEWICH, J.) decided that the mine-owner was entitled to work the clay from under the land conveyed to the company, "and for that purpose was entitled to enter upon the said land of the defendants so conveyed as aforesaid, and to remove the ballast, fey, or surface soil lying or being above such clay." For the sequel to this case, see *R.* v. *G. W. Rail. Co.* (1893), 62 L. J. Q. B. 572. See also *In re Lord Gerard and L. & N. W. Rail Co.*, [1895] 1 Q. B. 459.

The principles governing *Hext* v. *Gill* (*ante*, p. 444), and similar cases which relate to reservation of minerals by grant or contract are not applicable where the reservation is by statute, *e.g.*, the Railways Clauses Consolidation Act, 1845, s. 77. Therefore, clay forming the substance or subsoil, and constituting "the land" purchased by a railway company is not a "mineral" within that section (*G. W. Rail. Co.* v. *Blades*, [1901] 2 Ch. 624). This decision was approved by the Court of Appeal in *Todd, Birleston & Co.* v. *N. E. Rail. Co.*, [1903] 1 K. B. 603.

See a recent Scotch case relating to sandstone, where most of the authorities were reviewed, *North British Rail. Co.* v. *Budhill Coal and Sandstone Co.*, [1910] A. C. 116.

In 1830, under the powers of a special Act of 1825, land was conveyed to a tramway company for the purpose of a horse tramway authorised by the Act, which reserved to the owner of the land conveyed the subjacent mines with power to work them, but so as not to injure the tramway. By a special Act of 1855, the tramway was vested in another company thereby incorporated with power to alter the tramway into a railway of the modern type. That Act incorporated the Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), and repealed the Act of 1825, but without prejudice to anything done under it, and to all rights and liabilities which, if the repealing Act were not passed, would be incident to or consequent on anything so done. Under that Act of 1855 a line of railway suitable for locomotive engines and carriages was laid down and worked over the land comprised in the conveyance of 1830. In 1892, the defendants, the present owners of the subjacent mines, gave the plaintiffs, the present owners of the railway, notice under s. 78 of the Railways Clauses Consolidation Act, of their intention to work the mines, and, on the plaintiffs declining to pay compensation, proceeded to work the mines, and in so doing caused subsidences of the surface and railway. Thereupon the plaintiffs brought an action for an injunction, claiming to be entitled, by virtue of the conveyance of 1830, to an easement or right of support, and to be under no liability to purchase the mines under the Railways Clauses Consolidation Act:—*Held*, that the plaintiffs were entitled, under the conveyance, to a right of support from the subjacent mines without payment of compensation; that such right had not been lost by the alteration of the old tramway into a railway; that the Act of 1855 did not operate to alter the express contract entered into in 1830 by the predecessors of the plaintiffs and defendants; and that the plaintiffs were entitled to an injunction (*G. W. Rail. Co.* v. *Cefn Cribbwr Brick Co.*, [1894] 2 Ch. 157).

Where an Act consolidating the provisions of various Acts relative to canal navigation in the Trent and Mersey districts, directs that questions relating to compensation for not working mines should be tried before a justice of assize, it was held that the Chancery Division had no jurisdiction to try the action (*Hanley and Bucknall Coal Co.* v. *North Staffordshire Rail Co.* (1891), 64 L. T. 656).

Where a corporation were under an Act empowered to make a conduit for water through a field at some distance below the surface, it was held that the vendor was not entitled to compensation for severance of minerals where they were not required, by the provisions of the Waterworks Clauses Act, 1847, to purchase them (*In re Corporation of Huddersfield and Jacomb* (1874), L. R. 17 Eq. 476; and on appeal, L. R. 10 Ch. 92).

Sect. 18.

NOTE.

Where the defendants' lease contained a reservation of "all mines and minerals," and the defendants were boring for the purpose of obtaining water beneath the surface of the land, and had bored through certain strata of red rock and coal of from six to eight inches in thickness, which it was admitted could not be commercially worked to a profit at the present time, BYRNE, J., granted an injunction, holding that they fell within the reservation in the lease as being substances which had "a use and a value of their own independent of and separable from the rest of the soil" (*Johnstone* v. *Crompton & Co.*, [1899] 2 Ch. 190).

In land demised to a gas company for ninety-nine years, with a reservation to the lessor of all mines and minerals, for the erection of a gasholder and other buildings, a prehistoric boat embedded in the soil six feet below the surface was discovered by the lessees in the course of excavating for the foundation of the gasworks:—*Held*, that the boat, whether regarded as coming within the reservation of minerals, or as part of the soil in which it was embedded, or as a chattel, did not pass to the lessees by the demise, but was the property of the lessor, though he was ignorant of its existence at the time of granting the lease (*Elwes* v. *Brigg Gas Co.* (1886), 33 Ch. D. 562). *Cf. South Staffordshire Water Co.* v. *Sharman*, [1896] 2 Q. B. 44.

For a case in which a question arose as to right to support of water pipes by subjacent minerals, and which turned upon the construction of certain private Acts and a conveyance, see *Edinburgh District Water Trustees* v. *Clippen's Oil Co., Ltd.* (1901), 3 F. 156, affirmed H. L., [1904] A. C. 64.

Map and plan of underground works of undertakers to be made.

19. The undertakers shall from time to time, within six months from the time at which any pipes, conduits, or underground works shall have been laid down or formed by them, cause a survey and map to be made of the district within which any such pipes or underground works shall be laid, on a scale not less than one foot to a mile, and shall cause to be marked thereon the course and situation of all existing pipes or conduits for the collection, passage, or distribution of water and underground works belonging to them, in order to show all such underground works within the said district, and shall, within six months from the making of any alterations or additions, cause the said map to be from time to time corrected, and such additions made thereto as may show the line and situation of all such pipes, conduits, and underground works as may be laid down or formed by them from time to time after the passing of the special Act; and such map and plan, or a copy thereof, with the date expressed thereon of the last time when the same shall have been so corrected as aforesaid, shall be kept in the office of the undertakers, and shall be open to the inspection of all persons interested in the same within the said district.

There is no corresponding section in the Gasworks Clauses Acts, 1847 and 1871.

The preparation and deposit of this map is a condition precedent to the right of the undertakers to recover from the owner of minerals lying under the pipes for damage caused to the pipes by the working of the minerals by ordinary methods (*South Staffordshire Waterworks Co.* v. *Mason* (1887), 56 L. J. Q. B. 255). As to when the owner of minerals may be liable for injury caused by the working, see s. 23, *post*.

Sect. 19.

NOTE.

Cf. s. 88 of City of London Gas Act, 1868 (31 & 32 Vict. c. cxxvi.), *ante* p. 307, s. 20 of the Public Health Act, 1875, and s. 3 of the Public Health (Support of Sewers) Act, 1883, *post*, p. 941.

Copies of such map or plan to be deposited with clerk of the peace, etc.

20. The undertakers shall from time to time within three months from the time at which any such map or plan, or any such correction thereof or addition thereto, shall have been made as aforesaid, deposit with the clerks of the peace in England or Ireland, and with the sheriff clerks in Scotland, of every county, and the town clerk of every burgh in Scotland, in which such district or any part thereof may be situate, and also with the parish clerks of the several parishes in England, and clerks of the union of the several parishes in Ireland, and the schoolmaster of the several parishes in Scotland, in which such underground works shall be situate, copies of the said map or plan, with all such particulars, and all such corrections and additions as aforesaid, so far as relates to such counties, burghs, and parishes respectively.

Clerks of the peace, etc., to receive and keep copies of the map, etc., and allow inspection. 7 Will. 4, & 1 Vict. c. 83.

21. The said clerks of the peace, sheriff clerks, and town clerks, parish clerks, clerks of the union, and schoolmasters shall receive the said copies of the said map and plan respectively, and shall keep the same, and shall allow all persons interested to inspect the same, and take copies or extracts of and from the same, in the like manner, and upon the like terms, and under the like penalty for default, as is provided in the case of maps and plans deposited under an Act passed in the first year of the reign of her Majesty, intituled, "An Act to compel clerks of the peace for counties, and other persons, to take the custody of such documents as shall be directed to be deposited with them under the Standing Orders of either House of Parliament."

See provisions of 7 Will. 4 & 1 Vict. c. 83, *ante*, p. 432. This Act may now be cited as the Parliamentary Documents Deposit Act, 1837 (Short Titles Act, 1896).

Mines lying near the works not to be worked until owners give notice to undertakers of their intentions.

22. Except where otherwise provided for by agreement between the undertakers and other parties, if the owner, lessee, or occupier of any mines or minerals lying under the reservoirs or buildings belonging to the undertakers, or under any of their pipes or works which shall be under ground, and shall be described in the map or plan which shall be so kept and deposited as hereinbefore mentioned, or within the prescribed distance, if any, and if no distance be prescribed, within forty yards therefrom, be desirous of working the same, such owner, lessee, or occupier shall give the undertakers notice in writing of his intention so to do thirty days before the commencement of working; and upon the receipt of such notice it shall be lawful for the undertakers to cause such mines to be inspected by any person appointed by them for the purpose, and if it appear to the undertakers that the working of such mines or minerals is likely to damage the said works, and if they be willing to make compensation for such mines to such owner, lessee, or occupier thereof, then he shall not work the same; and if the undertakers and such owners do not agree as to the amount of such

Upon receipt of notice undertakers may take the mines, making compensation to the owners.

compensation, the same shall be settled as in other cases of disputed compensation. **Sect. 22.**

See *Smith* v. *G. W. Rail. Co.* (1877), 3 App. Cas. 165, decided on a corresponding section in the Railways Clauses Consolidation Act, 1845, and notes to s. 18, pp. 442 *et seq.*

A receipt for compensation paid in respect of minerals left unworked is not chargeable with *ad valorem* stamp duty (*G. N. Rail. Co.* v. *Commissioners of Inland Revenue,* [1901] 1 Q. B. 416).

In an arbitration under the Lands Clauses Acts and the Waterworks Clauses Act, 1847, to assess the compensation payable to the owner of coal mines in respect of his being prevented from working seams of coal lying under and near to the reservoir of a waterworks company, the arbitrator is entitled to take into consideration, as an element in determining the amount of compensation to be paid, a rise in the value of coal which has occurred between the date of the company's notice to treat and the making of his award (*In re an arbitration between The Bwllfa and Merthyr Dare Steam Collieries* (1891), *Ltd., and The Pontypridd Waterworks Co.,* [1903] A. C. 426).

In an arbitration under the corresponding section of the Railways Clauses Consolidation Act, 1845, an arbitrator awarded a sum for compensation and also a sum as interest from the date of the company's notice to that of the award upon the amount directed by him to be paid as compensation. The Court of Appeal decided that the case was not one of sale and purchase and that until the amount to be paid as compensation was ascertained, no implication as to the right to interest could arise (*Richards and G. W. Rail. Co., In re an arbitration between,* [1905] 1 K. B. 68).

A coal company who held a lease entitling them to carry away all the coal under certain lands for the term of twenty-one years, gave notice under s. 78 of the Railways Clauses Consolidation Act, 1845, to a railway company of their intention to work coal under the railway. The railway company thereupon required them to leave certain coal unworked. It would not have been possible for the coal company within the term of their lease to work all the coal under the lands leased to them, and the only result of the railway company's requirement was that they were compelled to work other coal under such lands at an increased cost:—*Held*, that the compensation payable under s. 78 of the Railways Clauses Consolidation Act, 1845, to the coal company and the reversioners was the profit which they would have made, respectively, if the coal to which the railway company's requirements related had been worked, and not the damage caused to them by the interference with the working of the coal under the leased lands (*Re Eden and others and the N. E. Rail. Co.,* [1907] A. C. 400). See also *Rugby Portland Cement Co.* v. *L. & N. W. Rail. Co.,* [1908] 2 K. B. 606.

As to question between tenant for life and remainderman, see *In re Fullerton's Will,* [1906] 2 Ch. 138.

Section 22, *supra*, is qualified in important particulars by the Public Health Act, 1875 (Support of Sewers) Amendment Act, 1883 (46 & 47 Vict. c. 37), so far as regards "sanitary works" as defined by that Act. See the Act, *post.*

As to the right of support for gas pipes, see *ante*, pp. 171 *et seq.*

Where an owner or lessee of minerals under a water pipe contravened the above enactment by working within the prohibited area before giving notice, it was held that he was not thereby debarred from afterwards giving notice as required by the statute (*Edinburgh and District Water Trustees* v. *Clippen's Oil Co., Ltd.* (1898), Ct. of Sess. Cas., 25 Rettie, 504). In an application for interdict by water undertakers under s. 23 to prevent a mineral owner who had been working the limestone within forty yards of a pipe by the method known as stoop-and-room from removing the stoops, it was proved that in the case of other minerals worked in the same way, it was usual to remove the stoops, but it was not proved that there was such usage in the

Sect. 22.

NOTE.

case of limestone :—*Held*, that the complainer had failed to show that to do so would be an unusual manner of working (*ibid.*). See also *Edinburgh and District Water Trustees* v. *Clippen's Oil Co., Ltd.* (1899), Ct. of Sess. Cas., 1 Fraser, 899.

Under the powers of an Act of 1819, a water company, in 1821, opened a track and laid a pipe for the supply of water from the Crawley Spring to the City of Edinburgh, a portion of which pipe passed through the lands of Pentland and Straiton. In 1898, the Edinburgh and District Water Trustees (who had succeeded to the powers of the water company) commenced an action against the owners of Straiton and the tenants of the minerals in Pentland to have it declared that they were entitled to support for their pipe, and that the defenders were not entitled so to work the minerals as to injure or to bring down the pipe, and for interdict. For the defenders it was contended that there was no right of support for the pipe under the Act of 1819 or at common law. The Court of Session decided (1) that the Act of 1819, on a sound construction of it, contained clauses under which the owners of lands in whose ground the pipe was laid were entitled to claim compensation for any injury thereby occasioned to them ; (2) that after the lapse of seventy years from the date when the pipe was laid it must be assumed, either that compensation had been paid or that the right thereto had been waived; and (3)—following *L. and N. W. Rail. Co.* v. *Evans*, [1893] 1 Ch. 16—that the statutory right to lay the pipe carried with it a right of support for the pipes and interdict was granted (*Clippen's Oil Co., Ltd.* v. *Edinburgh and District Water Trustees* (1900), 3 Fraser, 156, affirmed H. L., [1904] A. C. 64).

In 1877 the Edinburgh and District Water Trustees under the powers of an Act of 1872, which incorporated the Waterworks Clauses Act, 1847, laid another pipe known as the Moorfoot pipe. In crossing certain land the Moorfoot pipe was laid side by side with the before-mentioned Crawley pipe and less than two feet apart, so that if the one were exposed to injury by subsidence the other could not escape. The oil company, who were entitled to the minerals under the land, gave notice of their intention to work the minerals under the Moorfoot pipe and the water trustees served a counter notice requiring the oil company to abstain from working, and stating that they were prepared to treat for compensation " for the same in so far as you are entitled thereto." The parties then went to arbitration, the water trustees contended that the oil company were not entitled to compensation for the minerals under the Moorfoot pipe as the oil company were bound to keep them unworked for the support of the Crawley pipe. The umpire awarded substantial compensation, viz., £8,079 in respect of shale and limestone and £2,250 in respect of freestone. The action was brought to enforce payments of these sums. The House of Lords, affirming the decision of the First Division, held that the compensation awarded might be recovered, and declined to disturb the award (*Edinburgh and District Water Trustees* v. *Clippen's Oil Co., Ltd.* (1902), Ct. of Sess. Cas. 4 Fraser, 40, H. L.)

As to the ownership of mines and minerals under disturnpiked roads or highways, and the conditions under which they may be worked, see s. 27 of the Highways and Locomotives (Amendment) Act, 1878 (41 & 42 Vict. c. 77), s. 27. As to the measure of damages where a road is let down by subsidence, see *Lodge Holes Colliery Co.* v. *Wednesbury Corporation*, [1908] A. C. 323.

If company unwilling to treat for payment of compensation, owner may work the mines.

Owners to make good damage occasioned by

23. If before the expiration of such thirty days the undertakers do not state their willingness to treat with such owner, lessee, or occupier for the payment of such compensation, it shall be lawful for him to work the said mines, and to drain the same, by means of engines or otherwise, as if this Act and the special Act had not been passed, so that no wilful damage be done to the said works, and so that the said mines be not worked in an unusual manner ; and if any damage or obstruction be occasioned to the works of the undertakers by the working of such mines in an unusual manner, the same shall be forthwith repaired or removed (as the case may require), and such damage made good by the owner, lessee, or occupier of such mines or minerals, and at his own expense; and if such repair or removal be not forthwith done, or if the undertakers shall so think fit, without waiting for the same to be done by such owner, lessee, or occupier, it shall be lawful for the undertakers to execute the same, and recover from such owner, lessee, or occupier the expense occasioned thereby by action in any of the superior courts.

Sect. 23.

working the mines in an unusual manner.

See *Edinburgh and District Water Trustees* v. *Clippen's Oil Co., Ltd.* (1901), cited *supra.*

Mining communications.

24. If the working of any such mines under the said works of the undertakers or within the above-mentioned distance therefrom be prevented as aforesaid by reason of apprehended injury to such works, it shall be lawful for the respective owners, lessees, and occupiers of such mines to cut and make such and so many airways, headways, gateways, or water levels through the mines, measures, or strata, the working whereof shall be so prevented as may be requisite to enable them to ventilate, drain, and work any mines or minerals on each or either side thereof, but no such airway, headway, gateway, or water level shall be of greater dimensions or sections than the prescribed dimensions or sections, and where no dimensions are prescribed eight feet wide and eight feet high, nor shall the same be cut or made upon any part of the said works so as to injure the same.

Company to make compensation to owner, lessee, or occupier of mines for expenses incurred by reason of mines being worked.

Disputes to be settled by arbitration.

25. Except where otherwise provided for by agreement, the undertakers shall from time to time pay to the owner, lessee, or occupier of any mines of coal, ironstone, and other minerals extending so as to lie on both sides of any reservoirs, buildings, pipes, conduits, or other works, all such additional expenses and losses as shall be incurred by such owner, lessee, or occupier by reason of the severance of the lands over such mines or minerals by such reservoirs or other works, or of the continuous working of such mines or minerals being interrupted as aforesaid, or by reason of the same being worked under the restrictions contained in this or the special Act, and for any mines or minerals not purchased by the undertakers which cannot be obtained by reason of making and maintaining the said works, or by reason of such apprehended injury from the working thereof as aforesaid; and if any dispute or question shall arise between the undertakers and such owner, lessee, or occupier as aforesaid touching the price of such minerals, the same shall be settled by arbitration in such manner as is provided by the Lands Clauses Consolidation Act, if the undertaking shall be situate in England or Ireland, and by the Lands Clauses Consolidation (Scotland) Act, if the undertaking shall be situate in Scotland.

The provisions of the Lands Clauses Consolidation Act, 1845, will be found *in extenso*, *post*, p. 1158.

The Railways Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), contains a similar enactment (s. 81). Under it, it has been held that in estimating

Sect. 25.

NOTE.

compensation, an arbitrator is entitled to take into account not only the losses or expenses incurred by a mine-owner by reason of his land being severed, and the working of his mines being interrupted, but also additional losses or expenses not then actually sustained or incurred, but which would necessarily be sustained or incurred in working the mines, and which were capable of being immediately estimated with reasonable certainty (*Whitehouse* v. *Wolverhampton and Walsall Rail. Co.* (1869), L. R. 5 Ex. 6).

In *Holliday* v. *Corporation of Wakefield*, [1891] A. C. 81, the House of Lords decided that a mine-owner, part of whose minerals was taken by a waterworks undertaking, was not entitled in the arbitration which followed to claim compensation not only for the coal taken but also compensation for prospective injury, which may be caused by his not being able at some future date to work his mine to its utmost. He must wait for compensation until the injury arises. In this case, the corporation, by a special Act which incorporated the Act of 1847, were authorised to construct a reservoir at Ardsley. The appellants, by two leases, had demised to them four seams of coal (known as the Cannel, the Doggy, the Little and the Middleton) underlying certain lands, and they were empowered to sink pits and exercise other rights on the surface. They were working the last three, but had not commenced to work the Cannel seam. The corporation acquired certain lands, including land the coal under which was demised by the leases referred to. After certain notices given by the appellants the corporation gave the appellants notice to treat for thirty-five acres of the Middleton seam, and also for their surface rights over certain lands defined by the notice. In the arbitration the appellants claimed compensation not only for the coal taken, but also "compensation in respect of the injurious affecting of their seams of coal, and for so much of their seams not purchased by the respondents as could not be worked by reason of the making and maintaining of their works, or by reason of the apprehended injury in the working thereof." The umpire ultimately stated his award in the form of a special case. He found that the workings of the appellants had not as yet approached the reservoir in such a manner as to cause any present risk to the appellants' mines or seams from the existence of the reservoir, assuming it to be filled with water. That if the appellants were free to work their mines without risk of interruption from the respondents' works, they could and would have got the whole of the Middleton and Cannel coal under the reservoir, and within forty yards of the boundary, within the terms of their leases, and that if the respondents purchased and obtained *in situ* the thirty-five acres of the Middleton seam which they had given notice to take, and no other coal in that or any other seam, the appellants, by reason of the respondents' works, and of apprehension of injury therefrom, to the Cannel seam, could not work or get more than 50 per cent. of the cannel and black coal under the reservoir or within twenty yards of its boundary. He also found that a prudent lessee working without right to compensation would be compelled by reason of such apprehension of injury to abstain from working or getting more than 50 per cent. of the cannel and black coal in the area above described, and that there was no reason to apprehend injury, present or future, from the respondents' works to any part of the Doggy seam, or of the Little seam, or to any part of the Cannel seam, if 50 per cent. of the cannel and black coal in the defined area were retained *in situ*, or to any part of the Middleton seam. The question submitted for the opinion of the court was "whether by virtue of the Waterworks Clauses Act or of the Lands Clauses Act, or otherwise, the claimants are entitled upon this arbitration to claim and to recover compensation for the prospective prevention of the working of more than 50 per cent. of the cannel and black coal within the defined area." The House of Lords decided (affirming the decision of the Court of Appeal) that the mine-owners were not entitled to claim or to recover compensation for the prospective prevention of the working of more than 50 per cent. of the coal within the defined area: inasmuch as though the word "lands" in s. 6 of the Act of 1847 includes "mines," the mine-owners were not injuriously affected within the meaning of s. 6; neither could they at present claim or recover under the mines clauses of that Act, ss. 18—27. See *Smith* v. *G. W. Rail. Co.* (1877), 3 App. Cas. 165.

NOTE.

A railway company has been held to be responsible for injuries sustained by reason of water escaping from a stream in flood-time or collected from rain falling on the railway, and flowing along a cutting of the railway and percolating through the substratum into mines beneath, although such mines had not been worked at the time of the formation of the railway (*Bagnall* v. *L. & N. W. Rail. Co.* (1862), 31 L. J. Ex. 480). For other cases of damage to mines through the inflow or percolation of water, see notes to s. 6, *ante*, pp. 382 *et seq.*

The following lucid summary of the effect of the several sections of this Act relating to minerals is taken from the judgment of FRY, L.J., in *Holliday* v. *Wakefield Corporation* (1888), 20 Q. B. D., at pp. 716, 717, referred to by the Lord Chancellor on the hearing by the House of Lords of the appeal in that case, [1891] A. C. at p. 93 : "Under s. 18 the undertakers are not required to purchase mines or minerals under or near their works, but the statute leaves undertakers and mine-owners in the position of adjoining owners ; and except so far as the rights of either are interfered with by subsequent sections, those rights continue to be those of adjoining owners. Does the Act give a right of compensation to the owner of subjacent land who apprehends that an injury will arise should he work the minerals in such land? I pass over s. 19 and the two following sections, and come to s. 22. Under that a notice from the mine-owner that he is going to work under or within the prescribed distance of the works puts the undertakers to an election whether they will purchase the minerals or not. If they decline to purchase, then the owner may work the minerals as provided by s. 23, provided no wilful damage is done and the mines are worked in the usual manner. Section 24 assumes the purchase by the company of a portion of the subjacent mine arising out of the apprehended injury to the works—that is, the injury referred to in s. 22, as apprehended by the undertakers as likely to arise to the works from the working of the minerals. The only persons who can apprehend an injury up to this point are clearly the undertakers. Then follows s. 25, which it should be noted is one sentence. There is one set of persons who are to pay, namely, the undertakers, and one payee, the owner, lessee, or occupier of mines extending so as to lie upon both sides of any reservoir, buildings, pipes, conduits, or other works. There are five matters in respect of which payments are to be made: first, the severance of lands over the mines, that is, of surface lands ; secondly, the interruption of the continuous working of the mine, that is, the interruption which arises from the taking of a portion of the minerals which but for that the owner would have worked ; thirdly, the restrictions on working, such as those in s. 23 on working in anything but the usual manner; fourthly—and here there is no new sentence—the value of mines or minerals not purchased by the undertakers, but which cannot be got by reason of the works ; and fifthly, the apprehended injury from the working as aforesaid, that is, the injury referred to in ss. 22 and 24, as apprehended by the undertakers. It seems to me to follow that an injury which a mine-owner apprehends and which the undertakers do not is nowhere provided for. The reason for the omission seems to me to be that unless the undertakers purchase the mineral, the taking away of which would be injurious, the mine-owner is at liberty to work it."

Power to company to enter and inspect the working of mines, after giving notice of the same.

26. For better ascertaining whether any such mines are being worked or have been worked so as to damage the said works, it shall be lawful for the undertakers, after giving twenty-four hours notice in writing, to enter upon any lands through or near which the said works are situate, and wherein any such mines are being worked or are supposed to be, and to enter into and return from any such mines or the works connected therewith, and for that purpose it shall be lawful for them to make use of any apparatus or machinery belonging to the owner, lessee, or occupier of such mines, and to use all necessary means for discovering the distance from the said works to the parts of such mines which are being worked or about to be worked.

Sect. 27.

Nothing to prevent undertakers from being liable to actions for injury done to mines.

27. Nothing in this or the special Act shall prevent the undertakers from being liable to any action or other legal proceeding to which they would have been liable for any damage or injury done or occasioned to any mines by means or in consequence of the waterworks, in case the same had not been constructed or maintained by virtue of this Act or the special Act.

Laying of Pipes.

And with respect to the breaking up of streets for the purpose of laying pipes, be it enacted as follows :

Power to break up streets, etc., under superintendence and to open drains.

28. The undertakers, under such superintendence as is hereinafter specified, may open and break up the soil and pavement of the several streets and bridges within the limits of the special Act, and may open and break up any sewers, drains, or tunnels within or under such streets and bridges, and lay down and place within the same limits pipes, conduits, service pipes, and other works and engines, and from time to time repair, alter, or remove the same, and for the purposes aforesaid, remove and use all earth and materials in and under such streets and bridges, and do all other acts which the undertakers shall from time to time deem necessary for supplying water to the inhabitants of the district included within the said limits, doing as little damage as can be in the execution of the powers hereby or by the special Act granted, and making compensation for any damage which may be done in the execution of such powers.

Sections 28 and 29 are similar to ss. 6 and 7 of the Gasworks Clauses Act, 1847. See notes on those sections, *ante*, pp. 163—180.

In regard to liability for injuries directly or indirectly consequent upon the exercise of the powers above given, see cases cited *ante*, pp. 435 *et seq.*

This section only enables a water company to lay pipes under streets in connection with the undertaking authorised by their special Acts, and if they are being laid in connection with unauthorised works, the owner of the soil can sue the water company in trespass, raise the question of *ultra vires*, and obtain an injunction without joining the Attorney-General (*Marriott* v. *East Grinstead Gas and Water Co.*, [1909] 1 Ch. 70).

Apart from statutory powers enabling them in that behalf, no company or person is entitled to break up streets, roads, etc., for the purpose of laying pipes. The cases on this subject are collected *ante*, pp. 163 *et seq.*

In *Chapman* v. *Fylde Waterworks Co.*, [1894] 2 Q. B. 599, the Court of Appeal held that this section gave power to undertakers to lay and repair service pipes, and that they only, and not the owner or occupier, were entitled to break up the streets for the purpose of repairing pipes. See, further, the cases cited with this case at p. 484, *post.*

An owner of some houses in Ramsgate, being dissatisfied with the waterworks company, proceeded to construct works for supplying water to his houses, and obtained the permission of the highway board to lay down pipes along the highway. He laid the pipes in the soil of a road adjoining the land of the plaintiff, who also owned the *solum* of the highway *ad medium filum;* and the plaintiff applied for an injunction to restrain the continuance of the pipes. This injunction was granted, it being held (affirming the decision of JESSEL, M.R.) that the plaintiff was not left to his remedy at law, and was not required to establish his right at law; and that the facts that the soil under the highway was of no value to the owner, and that his motive for applying to the court was not connected with the enjoyment of his land, were held not to be reasons against the granting of the injunction (*Goodson* v. *Richardson* (1874), L. R. 9 Ch. 221). The

Sect. 28.

NOTE.

principle of this case was applied in *Marriott* v. *East Grinstead Gas and Water Co.*, *ante*, p. 454.

The corporation of Preston, who had no parliamentary powers for the purpose, supplied water to the adjoining urban district of Fullwood, and claimed the right to enter upon and break up the streets of Fullwood, whenever occasion should require for the purpose of repairing their water pipes, relying, as regarded some of the streets, on alleged irrevocable licences granted by the predecessors of the local board of Fullwood (*i.e.*, the surveyors of highways); and, as regarded other streets, on prescription:—*Held*, (1) that the claim of the corporation was to commit a nuisance; (2) that it was not in the power of the surveyors of highways to grant the alleged licences; (3) that therefore, as a grant could not be presumed, the corporation could not obtain the right claimed by prescription (*Preston Corporation* v. *Fullwood L. B.* (1886), 53 L. T. 718). See this case more fully referred to, *ante*, p. 168. The power given by s. 28 includes any works which the undertakers may deem necessary for the purpose of regulating the supply of water, and is not confined to the laying down of apparatus underground, but enables the undertakers to place such works on the surface of the street as may not be inconsistent with the substantial reinstatement of the road or pavement in its previous condition or create a nuisance (*East London Waterworks Co.* v. *Vestry of St. Matthew, Bethnal Green* (1886), 17 Q. B. D. 475). See, further, *post*, p. 484.

A waterworks company under their Act laid down one of their mains along and under a turnpike road, made under an Act which declared the soil to be in the owners of the adjoining land, subject only to the right to use and maintain the road. K. was owner of land on both sides, at a spot where the road was carried across a valley on an embankment, and being desirous of connecting his land on either side, K. employed the plaintiff, at an agreed sum, to make a tunnel under the road. In doing the work it was discovered that there was a leak in the defendant's main higher up the road; and on the plaintiff digging out the earth, the water from the leak flowed down upon the work and delayed it, so as to cause pecuniary damage to the plaintiff, for which he brought an action against the defendants. It was held, that, assuming K. could have maintained an action against the defendants for injury to his property (as to which the court gave no opinion), the damage sustained by the plaintiff by reason of his contract with K. having become less profitable, or a losing contract, in consequence of the injury to K.'s property, gave the plaintiff no right of action against the defendants (*Cattle* v. *Stockton Waterworks Co.* (1875), L. R. 10 Q. B. 453).

Under s. 28, qualified as it is by s. 29, the undertakers are not authorised to cut through plates lying on the top of a girder railway bridge carrying a public road, for the purpose of suspending their pipes to the girders (*Glasgow Corporation* v. *Glasgow and S. W. Rail. Co.*, [1895] A. C. 376). They may, however, dig a trench and lay pipes resting on a bridge (see *Taff Vale Rail. Co.* v. *Cardiff Gas Light and Coke Co.* (1907), 71 J. P. 350, a case decided on the corresponding section (s. 6) of the Gasworks Clauses Act, 1847).

"Tunnels" in the above section means tunnels similar in character to sewers and drains, and does not apply to a railway tunnel. Therefore, where public water commissioners had statutory authority to lay a line of water pipes in a street underneath which a line of railway passed, it was held that it was *ultra vires* of the commissioners to break open the brickwork forming the arch of the roof of the railway tunnel and to lay therein an iron trough carrying their water pipe (*Caledonian Rail. Co.* v. *Corporation of Glasgow* (1901), Ct. of Sess. Cas., 3 Fraser, 526).

By a special Act obtained in 1874, the Edinburgh water trustees were empowered to introduce a water supply to the city from Moorfoot, and to construct the necessary works, including an aqueduct termed "Conduit No. 2," upon the lines delineated in the deposited plans. Section 30 enacted that the trustees might "from time to time alter, enlarge, or increase the number of pipes for conveying water to the city," and might also "from time to time extend their existing works, mains, and pipes." In 1897 the water

Sect. 28.

NOTE.

trustees proposed to lay a line of pipes 2,200 yards long, connecting at each end with Conduit No. 2 (which had been duly constructed under the powers conferred by the Act), but deviating from the course of that conduit:—*Held*, that s. 28 of the Act of 1847 was intended to enable the undertakers to carry out the undertaking authorised by their special Act, in details not specially dealt with in that Act, but that it was not intended to empower them to alter works specifically authorised by the special Act, and, therefore, that the proposed alteration was not authorised by s. 28 (*Clippen's Oil Co., Ltd.* v. *Edinburgh and District Water Trustees* (1897), Ct. of Sess. Cas., 25 Rettie, 370). By the Edinburgh and District Waterworks Act, 1869 (37 & 38 Vict. c. clvi.), the undertaking of the company which had previously supplied the Edinburgh district with water was transferred to trustees. The Act declared "the limits of the Act" to be certain districts named, which did not include the parish of Lasswade, and "all places within the limits of supply of the company." By a further Act of 1876 (s. 31), the water trustees were authorised to enter into contracts for the supply of water in the parish of Lasswade as follows:—"After affording a constant supply of water within the limits of the fourth-recited Act, and also affording a supply to Musselburgh, under this Act, the trustees may contract or arrange with any local authorities, or with any other persons within the parish of Lasswade in the county of Edinburgh, for the supply of water from their present sources of supply, or by means of their works authorised by the fourth-recited Act and this Act, to such local authorities or persons, not exceeding in the whole one hundred thousand gallons per day, and to receive and take such price as may be agreed on, and in case of difference as shall be fixed by the sheriff of the county of Midlothian: Provided always, that the trustees shall not be required to afford any such supply to premises higher than five hundred feet above the level of the sea: Provided also, that the said supply shall be subject to the same conditions with regard to withdrawal thereof to which the supply to the said town of Dalkeith is by this Act subject." This Act contained no definition of limits. In 1897 the Edinburgh water trustees proposed to lay a pipe under roads in the parish of Lasswade, not for the supply of water to Lasswade, but solely in connection with the Edinburgh water supply:—*Held* (1) that the definition of the water district in the Act of 1869, as including "all places within the limits of supply of the company" could not be read as including all places which might in the future be brought within the limits of supply of the trustees; and (2) that as the pipe was not intended for the purpose of supplying the parish of Lasswade with water, it was not a work within the limits of the special Act of 1876 (*ibid.*). A. presented a note of suspension and interdict against the Edinburgh water trustees laying down a pipe under roads which crossed a mineral field of which he was in part lessee and in part proprietor. Interim interdict having been refused, the pipe was completed during the proceedings under the supervision of an engineer appointed by the court. The laying of the pipe was ultimately found to be illegal, and A. then presented a supplementary note craving the court to ordain the water trustees to remove it. The trustees lodged answers alleging that they were applying to Parliament for a bill to authorise them to maintain and use the pipe, and that there was danger of the existing water supply being interrupted owing to the subsidence consequent on mineral workings. They undertook not to allow any water to stand in the new pipe, or to send water through it, unless the existing supply were interrupted. They craved the court to allow the pipe to remain meantime. The court being of opinion that there was no sufficient ground for apprehending the interruption of the existing supply, granted the prayer of the supplementary note (*ibid.*).

Ownership of *solum* of roads and streets.

The *solum* of roads and streets belongs *primâ facie* to the adjacent owners of the land on either side. Lord MANSFIELD, in *Goodtitle* v. *Alker* (1757), 1 Burr., at p. 143 (adopting 1 Roll. Abr. 392, B. pl. 1, 2), thus states the law as to highways: "The king has nothing but the passage for himself and his people; but the freehold and all profits belong to the owner of the soil." Where a piece of land which adjoins a highway is conveyed by general words, the presumption of law is that the soil of the highway *usque ad medium filum* passes by the conveyance, even though reference is made to a plan annexed, the measurement and colouring of which would exclude it (*Berridge* v. *Ward* (1861), 10 C. B. (N.S.) 400). ERLE, C.J., in giving judgment, said, "A close is conveyed which, though set out by measurement and referred to as coloured red in the plan annexed to the conveyance, abuts on a highway, and there being nothing to exclude the presumption of law that half of such highway *usque ad medium filum* should pass with the conveyance of the close, I am of opinion that it does so pass. The cases of *Simpson* v. *Dendy*(1860), 8 C. B. (N.S.) 433, and *Lord* v. *Commissioners for City of Sydney* (1859), 12 Moo. P. C. C. 473, are authorities to that effect, and the law on the subject is uniform." WILLIAMS, J., in the same case, said, "I am of opinion that where a close of land adjoins a highway, half of the latter passes with the land although the close be defined." The presumption applies whether the road is a public or a private one (*Holmes* v. *Bellingham* (1859), 7 C. B. (N.S.) 329). The presumption is equally applicable to streets in a town as to highways in the country; and this presumption is not rebutted by the fact that the vendor is the owner of the soil beyond the *medium filum viæ;* in such a case the presumption is that the conveyance passes the soil of the highway so far as it is vested in the vendor (*In re White's Charities, Charity Commissioners* v. *London Mayor*, [1898] 1 Ch. 659). See also *Haynes* v. *King*, [1893] 3 Ch. 439. As to the application of the rule to a conveyance of land bounded by the seashore, see *Mellor* v. *Walmsley*, [1905] 2 Ch. 164; and as to the application of the rule where a railway forms a boundary, see *Thompson* v. *Hickman*, [1907] 1 Ch. 550.

The presumption of law that the owner of the land abutting on a highway is also the owner of the soil of the highway *usque ad medium filum viæ* may be rebutted by evidence. In a suit between the lords of the manor and the corporation of Leeds, it was held (reversing the decision of Lord ROMILLY, M.R.) that the soil of Briggate, an ancient street in the borough of Leeds, belonged to the lords of the manor, there being sufficient evidence to rebut the presumption of ownership in the owners of the adjoining houses (*Beckett* v. *Corporation of Leeds* (1872), L. R. 7 Ch. 421). See also *Pryor* v. *Petre*, [1894] 2 Ch. 11; *University College, Oxford* v. *Oxford Corporation* (1904), 68 J. P. 471; and *Mappin Brothers* v. *Liberty & Co.*, [1903] 1 Ch. 118.

Cases as to presumption, and the rebuttal of the presumption, as to lands adjoining a river are collected at pp. 405 *et seq.*, *ante*.

The presumption of law above referred to prevails also in Scotland (*Ayr Magistrates* v. *Dobbie* (1898), Ct. of Sess. Cas., 25 Rettie, 1184).

In *Lade* v. *Shepherd* (1735), 2 Str. 1004, an action of trespass was successfully maintained by the owner of the soil for building a bridge across a ditch "the end whereof rested on the highway." And the grass and trees growing on the sides of the highway were held to be the property of the owners of the soil (*Turner* v. *Ringwood Highway Board* (1870), L. R. 9 Eq. 418; *Curtis* v. *Kesteven C. C.* (1890), 45 Ch. D. 504). In the case of a highway, though of varying width, but with fences on each side, the right of way *primâ facie* extends to the whole space between the fences. See the cases collected at p. 163, *ante*. Hence the placing of telegraph posts on the greensward at the side of a highway, so as to obstruct the right of passage which the public have over the whole space between the fences, is an indictable nuisance (*R.* v. *United Kingdom Telegraph Co.* (1862), 31 L. J. M. C. 166). Depasturing cattle upon a highway, on one side of which the plaintiff had land, was held to be a trespass on that part of the soil of the highway which belonged to the plaintiff (*Stevens* v. *Whistler* (1809), 11 East, 51). Where the trustees of a turnpike road set up a claim to the *solum*, Lord KENYON, C.J., held that "the soil was not vested in them, but remained in the persons who were entitled to it before the Act passed by which they were appointed. The trustees have only the control of the highway" (*Davison* v. *Gill* (1800), 1 East, at p. 69). While ownership of land adjoining either side of a public road is *primâ facie* evidence of a right to the soil extending to the centre of the road, a recent right founded on an inclosure under an Act, does not make a distinction with regard to the general law (*Cooke* v. *Green* (1823),

Sect. 28.

NOTE.

11 Price, 736). "The owner who dedicates to public use as a highway a portion of his land, parts with no other right than a right of passage to the public over the land so dedicated; and may exercise all other rights of ownership, not inconsistent therewith; and the appropriation, made to and adopted by the public, of a part of the street to one kind of passage and another part to another, does not deprive him of any rights, as owner of the land, which are not inconsistent with the right of passage by the public": *per* MELLOR, J., in *St. Mary, Newington* v. *Jacobs* (1871), L. R. 7 Q. B., at p. 53. See *Harrison* v. *Duke of Rutland,* [1893] 1 Q. B. 142.

A railway company, in 1848, purchased freehold land of the plaintiff, adjoining a turnpike road, for the purpose of diverting the existing road and substituting a new one. In 1849, after having made the new road, they took possession, with the full knowledge of the plaintiff, of a portion of the old road not occupied by but adjoining their railway, and which by the diversion had ceased to form part of the turnpike road. At the time of the conveyance both the plaintiff and the defendants thought that the soil of the old road was vested in the turnpike trustees, and it was not included in the conveyance which referred to the map deposited by the defendants with the clerk of the peace, in which the road was described as a distinct property, reputed to belong to the trustees. By the local Acts regulating the management of the road, it appeared that it had been from time to time widened, and power was given to the trustees to purchase land for that purpose; but it did not appear that the soil of this particular portion had ever been purchased by the trustees under their Acts. In 1858 the plaintiff brought ejectment for this portion:—*Held*, first, that the presumption of the plaintiff's ownership of the road as owner of the adjacent soil, was not rebutted by the local Acts, so as to cast upon him the *onus* of showing that the land forming this part of the road had not been purchased by the trustees; secondly, that, although ordinarily by a conveyance of lands adjacent on both sides of a turnpike road the road would pass, though not referred to in the conveyance, the road under the circumstances of this case did not pass; thirdly, that the effect of the General Turnpike Act (3 Geo. 4, c. 126), coupled with the Railways Clauses Consolidation Act, was not to place the defendants in the position of trustees of the new road, and so to transfer to them the soil of the diverted road (*Marquis of Salisbury* v. *G. N. Rail. Co.* (1859), 5 C. B. (N.S.) 174).

As to the meaning of the word "tunnels" in the text, see *Caledonian Rail. Co.* v. *Glasgow Corporation* (1901), 38 S. L. R. 376.

Effect of vesting streets, etc., in local authorities.

The Public Health Act, 1875 (38 & 39 Vict. c. 55), s. 149, provides that "all streets being or which at any time become highways repairable by the inhabitants at large . . . . shall vest in and be under the control of the urban authority." In *Coverdale* v. *Charlton* (1878), 4 Q. B. D. 104, it was held by the Court of Appeal that a certain highway, being a "street" within the meaning of this Act, so far vested in the local board that they could demise the right of pasturage thereon to the plaintiff. "'Street,' comprehends what we may call the surface, that is to say, not a surface bit of no reasonable thickness, but a surface of such a thickness as the local board may require for the purpose of doing to the street that which is necessary for it as a street, and also of doing those things which commonly are done in or under the streets; and to that extent they had a property in it": *per* BRAMWELL, L.J., at p. 118. And, in the same case, BRETT, L.J., at p. 121, said: "'Street' means more than the surface, it means the whole surface and so much of the depth as is or can be used, not unfairly, for the ordinary purposes of a street. It comprises a depth which enables the urban authority to do that which is done in every street, namely, to raise the street and to lay down sewers (for at the present day, there can be no street in a town without sewers), and also for the purpose of laying down gas and water pipes. 'Street,' therefore, in my opinion, includes the surface and so much of the depth as may be not unfairly used, as streets are used." As to the above *dictum* of BRAMWELL, L.J., see the judgment of Lord HALSBURY, L.C., in *Tunbridge Wells Corporation* v. *Baird,* [1896] A. C., at p. 439. An urban district council has power to remove encroachments upon any highway vested in it by s. 149 of the Public Health Act, 1875, without first taking proceedings summarily or by indictment of the person alleged to have encroached (*Reynolds* v. *Presteign U. D. C.*, [1896] 1 Q. B. 604). See also *Louth Urban District Council* v. *West* (1896), 60 J. P. 600. Under the Local Government Act, 1894, s. 26, it is the duty of a district council to prevent the stopping or obstruction of any right of way.

By s. 11 (6) of the Local Government Act, 1888 (51 & 52 Vict. c. 41), it is provided that main roads and the materials thereof, and all drains belonging thereto, shall, except when an urban authority retains the powers and duties of maintaining and repairing the same, vest in the county council.

By the London Government Act, 1899 (62 & 63 Vict. c. 14), which applies to the area included in the administrative county of London, metropolitan borough councils have been established, and they are invested with the powers of the old vestries which have ceased to exist, including their powers as road authority. As to main roads and other highways theretofore repairable by the London County Council, see now s. 6 (1), (2) of the Act of 1899, set out *ante*, p. 179.

The Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), s. 96, provides that ". . . . all streets being highways . . . . shall vest in and be under the management and control of the vestry or district board of the parish or district," etc. In *Rolls* v. *Vestry of St. George the Martyr, Southwark* (1880), 14 Ch. D. 785, arising under this section, Jessel, M.R., followed the decision in *Coverdale* v. *Charlton, supra.* It appeared in that case that the plaintiff having, with the sanction of the Metropolitan Board of Works, made a new street over his land within the metropolitan district, upon which land were two old streets, N. Street and A. Street, an order was made at quarter sessions for stopping up part of N. Street as unnecessary, and an order was also made for diverting a part of A. Street, and opening the new street in lieu thereof. The vestry of the parish gave notice to the plaintiff that he must not convert to his own use the stopped-up part of N. Street, nor stop up A. Street or convert any part of the soil of it to his own use till he had purchased the same from the vestry. It was held by the Master of the Rolls, that the case was governed by *Coverdale* v. *Charlton, supra;* and that, under s. 96, the surface of the streets and the soil to such a depth as was required for the purposes of a road was in the vestry, so that when the streets were stopped up or diverted they could sell them under s. 154; and that the plaintiff had no right to deal with the soil without purchasing it from the vestry. On appeal, the Court of Appeal held that under the Act of 1855 all streets being for the time being highways are vested in the vestry, but only so long as they are highways, and that when they cease to be highways by being legally stopped up or diverted the interest of the vestry determines. And it was further held, that the plaintiff was entitled to convert to his own use the stopped-up part of N. Street and the diverted part of A. Street, subject, as to A. Street, to his first obtaining a certificate, under the Highway Act, 1835 (5 & 6 Will. 4, c. 50), s. 91, that the substituted street had been completed and put into good condition and repair.

Where the Public Health Act, 1875 (38 & 39 Vict. c. 55), or any local Act, vests a street in the urban authority, it only vests in them such property in the soil of the street as is necessary for the control, protection and maintenance of the street as a highway for public use, and confers upon them no authority to make excavations in the soil below the surface for the purpose of public conveniences (*Tunbridge Wells Corporation* v. *Baird*, [1896] A. C. 434).

It was held in a later case that this decision as to the extent to which the soil of a street is vested in a local authority, under s. 149 of the Public Health Act, 1875 (38 & 39 Vict. c. 55), applies to the similar vesting in a local authority under s. 96 of the Metropolis Management Act, 1855 (18 & 19 Vict. c. 120). Where an electric lighting company had illegally broken up the surface of a street within the district of a vestry in the metropolis and placed

Sect. 28.

NOTE.

their pipes and wires at a depth of about two feet below the surface, it was held that the vestry were not by virtue of s. 96, the owners of the soil of the street at that depth, and that, although the company had acted illegally in breaking up the street, the vestry could not maintain an action for a mandatory injunction to compel the company to remove their pipes and wires, there being no continuing trespass upon or interference with any right of the vestry (*Vestry of St. Mary, Battersea* v. *County of London and Brush Provincial Electric Lighting Co., Ltd.*, [1899] 1 Ch. 474). For the unwarranted breaking up of the street, the company were summoned at the police court, and fined £2 and £2 2*s*. costs (Jl. of G. L., February 21st, 1899, pp. 431, 446 ; Electrician, February 24th, 1899, p. 621).

The Regent's Park Road was originally constructed by turnpike trustees appointed under a local Act of Parliament passed in 1826. The site, or part of the site, of the road where the plaintiffs' wires crossed it was originally glebe land, and was in 1828 conveyed to the trustees in fee simple by the rector of the parish, under the Turnpike Roads Act of 1822. The plaintiffs carried two guide or supporting wires across the road at a height of thirty-four feet. These wires were intended to support a cable carrying a supply of electricity to the house of one of the plaintiffs' customers. The road became vested in the defendants under s. 149 of the Public Health Act, 1875 :—*Held*, that the fact that originally the fee simple was conveyed to the trustees was no evidence that the soil *ad inferos* and the air *ad superos* were, or are, necessary for "street purposes," and so vested in the defendants. The extent of the "area of uses" is a question of fact; and, so long as they did not encroach upon that area, the plaintiffs were entitled to carry their wires across the street (*Finchley Electric Light Co.* v. *Finchley U. D. C.*, [1903] 1 Ch. 437; 67 J. P. 97).

A road constructed under certain special Acts authorising a ferry, became, by statutory authority, transferred to and vested in a local authority. The land through which the road ran was, by statutory authority, vested in a dock company, who proposed to carry a pipe or drain under the road for the purposes of their undertaking. The local authority sought to restrain them :—*Held*, that the road was vested in the local authority only for the purposes of a road, and that they had no right to the subsoil, and, consequently, that no injunction could be granted (*Poplar Corporation* v. *Millwall Dock Co.* (1904), 68 J. P. 339).

By s. 26 of the Public Health Act, 1875, a penalty is imposed upon any person who, in any urban district, without the written consent of the urban authority "causes any vault, arch, or cellar to be newly built or constructed under the carriage-way of any street," and authorises the urban authority to cause any such structure to be pulled down or otherwise dealt with. The defendants, being lessees of land on both sides of and adjoining a certain street, made an arched concrete tunnel under the street for the purpose of laying pipes conveying electrical mains across the floor of the tunnel. Afterwards they changed their minds and dug through the concrete floor and laid the pipes in the clay below the concrete. Afterwards the defendants removed the top of the arch of the tunnel and filled up the tunnel with ballast and concrete. In an action at the instance of the urban council for a declaration that they were entitled to cause the arch to be removed, FARWELL, J., held, on the evidence, that the tunnel might be removed without interfering with the pipes, and in a cross action at the instance of the defendants he granted an injunction against interference with the pipes. (*Walker U. D. C.* v. *Wigham, Richardson & Co., Ltd.; Wigham, Richardson & Co., Ltd.* v. *Walker U. D. C.* (1902), 66 J. P. 152).

The Public Health (London) Act, 1891 (54 & 55 Vict. c. 76), which applies to the administrative county of London, by s. 44 authorises sanitary authorities to provide and maintain public lavatories and ashpits and public sanitary conveniences, etc., in situations where they deem the same to be required, and for this purpose enacts that "the subsoil of any road, exclusive of the footway adjoining any building, or the curtilage of a building, shall be vested in the sanitary authority." Where a sanitary authority under the powers of this Act constructed public sanitary conveniences in the subsoil of a street with underground approaches or subways having an entrance on both sides of the street by means of a staircase, with the result that it was possible for the public to use the subway as a means of passing from one side of the street to the other, it was held by the House of Lords (reversing the decision of the Court of Appeal), that the discretion of the sanitary authority could not in the circumstances be interfered with (*Westminster Corporation* v. *L. & N. W. Rail. Co.*, [1905] A. C. 426).

A local authority erecting underground lavatories are liable to the land tax in respect thereof (*Westminster Corporation* v. *Johnson; Same* v. *Fuller*, [1904] 2 K. B. 737).

A local authority, by a special Act which incorporated the Lands Clauses Acts, were authorised to erect and maintain "on in over or under" any street in which their tramways were laid, posts for the purpose of working the tramways by electrical power. They erected a post which was sunk to a depth of six feet in the pavement forming part of a street. The pavement and the soil beneath it at that spot were the property of the plaintiff, subject to a right which had been acquired by the public to use the pavement as a public footpath. The local authority gave no notice to treat, and did not obtain the consent of the plaintiff before erecting the post:—*Held*, that the erection of the post was authorised by the special Act, and that it was not necessary to give notice to treat to the plaintiff (*Escott* v. *Newport Corporation*, [1904] 2 K. B. 369).

See further as to the rights of action of a local authority in respect of a street vested in them, *Lodge Holes Colliery Co., Ltd.* v. *Wednesbury Corporation*, [1908] A. C. 323.

By the Act of incorporation of a Canadian company, it was declared that the company "may lay its wires . . . . underground as the same may be necessary and in so many streets squares highways lanes and public places as may be deemed necessary for the purpose of supplying electricity and gas for light power and heating, the whole however without doing any unnecessary damage and providing all proper facilities for free passage through the said streets squares highways lanes and public places while the works are in progress":—*Held*, by the Privy Council, that the power to break up the surface of streets, and to excavate them for the purposes above stated, was plainly involved, and that an injunction obtained by the respondents to restrain the municipality from interfering therewith was properly granted (*City of Montreal* v. *Standard Light and Power Co.*, [1897] A. C. 527).

Effect of vesting sewers in local authorities.

By the Oldham Borough Improvement Act, 1865 (28 & 29 Vict. c. cccxi.), several Acts, and amongst them certain provisions of the Public Health Act, 1848, affecting the improvement of the borough, were reduced into one Act, and by s. 59 all the sewers were vested in the corporation. It was decided that this section conferred an absolute property in that part of the subsoil occupied by any sewer, and not merely an easement or right of sewerage (*Taylor* v. *Corporation of Oldham* (1876), 4 Ch. D. 395). See also *Ystradyfodwg and Pontypridd Main Sewerage Board* v. *Benstead*, [1906] 1 K. B. 294; affirmed in H. L., [1907] A. C. 264; *Pemsel and Wilson* v. *Tucker*, [1907] 2 Ch. 191. As to the question of support of sewers, see Public Health Act, 1875 (Support of Sewers) Amendment Act, 1883, and the note to s. 1 thereof, *post*.

As to the ownership of the *solum* of the towing path made by canal companies or conservators of a river navigation, see *Conservators of River Lee Navigation* v. *Button* (1881), 6 App. Cas. 685; and as to the dedication of such towing paths as public highways, see *R.* v. *Leake* (1833), 5 B. & Ad. 469; and *Grand Junction Canal Co.* v. *Petty* (1888), 21 Q. B. D. 273.

Where a gas or water company, local authority, or others, having a statutory right to break up streets, employ a contractor to do the work, a duty may remain on them towards the public to prevent damage arising from the execution of the work. See the cases on this subject collected *ante*, at p. 170.

The pipes of a water company once laid can only be interfered with by

Sect. 28.

NOTE.

other parties when acting in pursuance of statutory authority. Thus local authorities are empowered by the following section of the Public Health Act, 1875 (38 & 39 Vict. c. 55):

Power to require gas and water pipes to be moved.

> 153. Where for any purpose of this Act any urban authority deem it necessary to raise, sink, or otherwise alter the situation of any water or gas pipes mains plugs or other waterworks or gasworks laid in or under any street, they may by notice in writing require the owner of the pipes mains plugs or works to raise sink or otherwise alter the situation of the same in such manner and within such reasonable time as is specified in the notice; the expenses of or connected with any such alteration shall be paid by the urban authority; and if such notice is not complied with the urban authority may themselves make the alteration required:
>
> Provided—
>
> That no such alteration shall be required or made which will permanently injure any such pipes mains plugs or works or prevent the water or gas from flowing as freely and conveniently as usual; and
>
> That where under any local Act of Parliament the expenses of or connected with the raising sinking or otherwise altering the situation of any water or gas pipes mains plugs or other waterworks or gasworks, are directed to be borne by the owner of such pipes or works, his liability in that respect shall continue in the same manner and under the same condition in all respects as if this Act had not been passed.

The Burgh Police (Scotland) Act, 1892 (55 & 56 Vict. c. 55), contains similar powers (s. 149), but s. 149 has been amended by the Burgh Police (Scotland) Act, 1903, s. 104, and Schedule, so as to apply only to pipes in any new street.

Railway companies also are authorised to interfere with the mains and pipes of a water company. Section 18 of the Railway Clauses Consolidation Act, 1845 (8 & 9 Vict. c. 20), authorises them, for the purpose of constructing the railway, to raise, sink, or otherwise alter the position of water pipes, "so as the same respectively be done with as little detriment and inconvenience to such company . . . . as the circumstances will admit." It must be done under the superintendence of the water company if they think fit to attend after receiving not less than forty-eight hours' notice. They may not remove or displace any mains or pipes (other than private service pipes), syphons, plugs, or other works belonging to a water company, until they have laid down others in lieu thereof (s. 19). They may not lay down any such pipes contrary to the regulations of the water company's Act, nor leave a covering of less than eighteen inches from the surface of the road over such mains or pipes (s. 20). They must make good all damage done to the property of the water company, and make "full compensation to all parties for any loss or damage which they may sustain by reason of any interference with the mains, pipes," etc. (s. 21). Where railway works are carried over any mains or pipes of a water company, the railway company are bound at their own expense to construct and maintain a sufficient culvert (s. 22). If the railway company by any such operations interrupt the supply of any water they are liable to a penalty of twenty pounds for each day (s. 23). Furthermore, in making the railway the company cannot deviate from the levels beyond the limits fixed by s. 20 without the consent of, amongst others, any water company whose works are affected by such deviation. In making a railway, the levels shown upon the deposited plans cannot be deviated to a greater extent than five feet (or in towns, villages, or land continuously built upon, two feet) without the previous consent of owners, occupiers, and others, including water companies affected by such deviation. See ss. 11 and 12 of 8 & 9 Vict. c. 20; and *cf.* s. 4 of 26 & 27 Vict. c. 92.

The Telegraph Act, 1863 (26 & 27 Vict. c. 112), gives powers similar to those contained in the Railways Clauses Act. The provisions of this Act are extended by the Telegraph Act, 1892 (55 & 56 Vict. c. 59), s. 8, to "pneumatic and other tubes used for the purpose of transmitting telegraphic messages or maintaining telegraphic communication." The Tramways Act, 1870 (33 & 34 Vict. c. 78), s. 30, gives power to a tramway company to interfere with gas or water pipes, subject to certain restrictions, as to which, see *ante*, p. 176. See also the Electric Lighting Act, 1882 (45 & 46 Vict. c. 56), s, 15, and the elaborate provisions on this subject contained in ss. 17, 18 of the schedule to the Electric Lighting (Clauses) Act, 1899 (62 & 63 Vict. c. 19).

The Towns Improvement Clauses Act, 1847 (10 & 11 Vict. c. 34), also confers certain powers with reference to interference with water pipes, as to which see ss. 61, 62; and by s. 13 provision is made for a plan, showing the course of pipes, being prepared and kept.

As to the metropolis, see *ante*, p. 179.

Not to enter on private land without consent.

29. Provided always, that nothing herein contained shall authorise or empower the undertakers to lay down or place any pipe, conduit, service pipe, or other work in any land not dedicated to public use without the consent of the owners and occupiers thereof, except that the undertakers at any time may enter upon and lay or place any new pipe in the place of an existing pipe in any land wherein any pipe hath been already lawfully laid down or placed in pursuance of this or the special Act, or any other Act of Parliament, and may repair or alter any pipe so laid down.

See *Glasgow Corporation* v. *Glasgow and S. Western Rail. Co.*, [1895] A. C. 376; *Caledonian Rail. Co.* v. *Glasgow Corporation*, (1901), 3 Fraser, 526; and *Taff Vale Rail. Co.* v. *Cardiff Gas, Light and Coke Co.* (1907), 71 J. P. 350; cited at p. 180, *ante*; and see notes to s. 7 of Gasworks Clauses Act, 1847, *ante*, p. 163.

A public footpath, although not repairable by the inhabitants at large, is "land dedicated to public use" within the meaning of this section, so that pipes in connection with authorised works can be laid without the consent of the owner of the soil (*Marriott* v. *East Grinstead Gas and Water Co.*, [1909] 1 Ch. 70).

Where a local authority under the provisions of the Public Health Act, 1875 (38 & 39 Vict. c. 55), supply water to their district, they have the same powers in regard to water mains as they have with regard to sewers, and the definition of "street" under that Act is wide enough to include a private road. Accordingly, where without any notice to the plaintiff, and without any consent on his part, a local authority commenced to break up a private road of the plaintiff's situated within their district, for the purpose of laying water mains, and the plaintiff brought an action claiming an injunction, the Court of Appeal held that the plaintiff's private road was a "street" under the Act of 1875, and that ss. 16 and 54 of that Act empowered the defendants to do what they did (*Hill* v. *Wallasey L. B.*, [1894] 1 Ch. 433).

A local authority in Scotland, in pursuance of the Public Health (Scotland) Acts, agreed with the owner of certain private land to lay fireclay pipes therein for the purposes of bringing in a water supply and paid the agreed money compensation. Finding the clay pipes inefficient, they subsequently laid down iron pipes in the same line without removing the fireclay pipes. The court refused to interdict the local authority, holding that the operations were in the nature of repairs to the existing pipes, and that the landowner could suffer no damage from the fireclay pipes being allowed to remain (*Bridges* v. *Police Commissioners of Fraserburgh* (1887), 25 S. T. R. 151).

Notice to be served on persons having control, etc.,

30. Before the undertakers open or break up any street, bridge, sewer, drain, or tunnel, they shall give to the persons under whose control or management the same may be, or to their clerk, surveyor, or other officer, notice in writing of their intention to open or break

Sect. 30.

before breaking up streets or opening drains.

up the same, not less than three clear days before beginning such work, except in cases of emergency arising from defects in any of the pipes or other works, and then so soon as is possible after the beginning of the work or the necessity for the same shall have arisen.

See notes to s. 8 of Gasworks Clauses Act, 1847, *ante*, p. 182.

Streets or drains not to be broken up except under superintendence of persons having control of the same.

31. No such street, bridge, sewer, drain, or tunnel shall, except in the cases of emergency aforesaid, be opened or broken up, except under the superintendence of the persons having the control or management thereof, or of their officer, and according to such plan as shall be approved of by such persons or their officer, or in case of any difference respecting such plan, then according to such plan as shall be determined by two justices; and such justices may, on the application of the persons having the control or management of any such sewer or drain, or their officer, require the undertakers to make such temporary or other works as they may think necessary for guarding against any interruption of the drainage during the execution of any works which interfere with any such sewer or drain: Provided always, that if the persons having such control or management as aforesaid, and their officer, fail to attend at the time fixed for the opening of any such street, bridge, sewer, drain, or tunnel, after having had such notice of the intention of the undertakers as aforesaid, or shall not propose any plan for breaking up or opening the same, or shall refuse or neglect to superintend the operation, the undertakers may perform the work specified in such notice without the superintendence of such persons or their officer.

If persons having the control, etc., fail to superintend, undertakers may perform the work without them.

In the case of *Edgeware H. B.* v. *Colne Valley Water Co.* (1877), 46 L. J. Ch. 889, it appeared that the defendants had given the plaintiffs notice of their intention to open and break up the soil and pavement of certain roads within their limits, and to lay down their water pipes thereunder, and had indicated, on a large scale ordnance map, the line in which they proposed to lay their pipes. They had not, however, so indicated the position of their pipes as to enable the plaintiffs to judge whether they would be laid under the centre or either of the sides of the road, nor at what depth, or with what gradient, they would be laid; nor had they submitted any "plan" of their own for the approval of the plaintiffs; and they contended that they could not indicate the precise line until they actually commenced working, and that the "plan" referred to meant "method," or "manner" and not "map." Vice-Chancellor HALL, however, held that the position and depth of the proposed pipes ought to form part of the "plan" submitted by the defendants to the highway authorities under the above section, so as to enable them to judge whether what was proposed should be allowed to proceed, and was a plan which ought to be approved, or whether recourse should be had to the two justices; and no "plan" having been approved, and the defendants not having gone to the two justices, the Vice-Chancellor granted an injunction, the chairman of the highway board giving the usual undertaking as to damages. This case was approved of and followed in the Court of Appeal in *East Molesey L. B.* v. *Lambeth Waterworks Co.*, [1892] 3 Ch. 289, where it was held that the plan must be not merely of the "breaking up" of the road, but must also show the mode in which the underground work is intended to be executed, so as to enable the road authority to judge whether the proposed work ought to be done without modification. If the road authority after receiving such a plan do not, in case of disapproval, themselves make some counter-proposal by plan or otherwise, as to the mode of carrying out the work, so as to create a "difference" to be determined by two justices under the section, the

Note.

company may proceed with the work independently of the road authority. As to when a plan can be considered as "approved, see *Yabbicom* v. *King*, [1899] 1 Q. B. 444. In that case a local authority were empowered to make byelaws for the regulation of buildings within their jurisdiction, and such byelaws were properly made and were in force. It was held that the local authority, though they had in fact approved the plans, had no power to do so in contravention of the byelaws. See also *In re McIntosh and Pontypridd Improvement Commissioners* (1892), 61 L. J. Q. B. 164; *Baxter* v. *Bedford Corporation* (1885), 1 T. L. R. 434; and *cf. Ayr Harbour Trustees* v. *Oswald* (1883), 8 App. Cas. 623.

Streets, etc., broken up, to be reinstated without delay.

32. When the undertakers open or break up the road or pavement of any street or bridge, or any sewer, drain, or tunnel, they shall with all convenient speed complete the work for which the same shall be broken up, and fill in the ground, and reinstate and make good the road or pavement, or the sewer, drain, or tunnel, so opened or broken up, and carry away the rubbish occasioned thereby, and shall at all times whilst any such road or pavement shall be so opened or broken up, cause the same to be fenced and guarded, and shall cause a light sufficient for the warning of passengers to be set up and kept there against, every night during which such road or pavement shall be continued open or broken up, and shall, after replacing and making good the road or pavement which shall have been so broken up, keep the same in good repair for three months thereafter, and such further time, if any, not being more than twelve months in the whole, as the soil so broken up shall continue to subside.

See note to s. 28, pp. 454 *et seq.*, and *East London Waterworks Co.* v. *St. Matthew, Bethnal Green* (1886), 17 Q. B. D. 475, cited *post*, p. 484.

See also the notes under s. 10 of the Gasworks Clauses Act, 1847, *ante*, p. 183.

Although there is power to sue a company for a penalty, they are liable to be sued for negligence in replacing a road, if such negligence results in injury to a person using the road (*Hartley* v. *Rochdale Corporation*, [1908] 2 K. B. 594).

Penalty for delay in reinstating streets, etc.

33. If the undertakers open or break up any street or bridge, or any sewer, drain, or tunnel, without giving such notice as aforesaid, or in a manner different from that which shall have been approved of or determined as aforesaid, or without making such temporary or other works as aforesaid, when so required, except in the cases in which the undertakers are authorised to perform such works without any superintendence or notice, or, if the undertakers make any unnecessary delay in completing any such work, or in filling in the ground, or reinstating and making good the road or pavement, or the sewer, drain, or tunnel, so opened or broken up, or in carrying away the rubbish occasioned thereby, or if they neglect to cause the place where such road or pavement has been broken up to be fenced, guarded, and lighted, or neglect to keep the road or pavement in repair for the space of six months next after the same is made good, or such further time as aforesaid, they shall forfeit to the persons having the control or management of the street, bridge, sewer, drain, or tunnel in respect of which such default is made a sum not exceeding five pounds for every such offence, and an additional

Sect. 33.

sum of five pounds for each day during which any such delay as aforesaid shall continue after they shall have received notice thereof.

In case of delay, other parties may reinstate and recover the expenses.

34. If any such delay or omission as aforesaid shall take place, the persons having the control or management of the street, bridge, sewer, drain, or tunnel in respect of which such delay or omission shall take place may cause the work so delayed or omitted to be executed, and the expense of executing the same shall be repaid to such persons by the undertakers; and such expenses may be recovered in the same way as damages are recoverable under this and the special Act.

See hereon *Metropolitan Water Board* v. *Westminster Corporation*, and other cases decided with reference to reinstatement by local authorities in the metropolis, cited *ante*, pp. 184 *et seq.*

Supply of Water.

And with respect to the supply of water to be furnished by the undertakers, be it enacted as follows:

A constant supply of water to be kept for domestic purposes at high pressure.

35. The undertakers shall provide and keep in the pipes to be laid down by them a supply of pure and wholesome water, sufficient for the domestic use of all the inhabitants of the town or district within the limits of the special Act, who, as hereinafter provided, shall be entitled to demand a supply, and shall be willing to pay water rate for the same; and such supply shall be constantly laid on at such a pressure as will make the water reach the top story of the highest houses within the said limits, unless it be provided by the special Act that the water to be supplied by the undertakers need not be constantly laid on under pressure; and the undertakers shall cause pipes to be laid down and water to be brought to every part of the town or district within the limits of the special Act whereunto they shall be required by so many owners or occupiers of houses in that part of the town or district as that the aggregate amount of water rate payable by them annually, at the rates specified in the special Act, shall be not less than one-tenth part of the expense of providing and laying down such pipes; provided that no such requisition shall be binding on the undertakers, unless such owners or occupiers shall severally execute an agreement binding themselves to take such supply of water for three successive years at least.

In so far as this section applied to the Metropolitan Water Board, it was repealed by the Metropolitan Water Board (Charges) Act, 1907, which is set out *in extenso*, *post*, p. 684. See the Act for the substituted obligation imposed upon the Board.

Sect. 25 of the Metropolitan Act affords some guidance as to the meaning of "domestic purposes," but, although as regards the metropolis some of them may be now obsolete, all the cases upon the subject are still retained in the following note.

As to laying of communication pipes by inhabitants, see ss. 48 *et seq.*, *post*, p. 494.

For neglect or refusal to supply water to any "owner or occupier entitled under this or the special Act to receive a supply of water" the undertakers are liable to a penalty (s. 43, and *cf.* ss. 36, 44, and 53). The water rates are payable quarterly in advance (see further hereon the notes to s. 70, *post*). The owner or occupier does not become "entitled" until he has paid or tendered the water rate (s. 53). See *Sheffield Waterworks Co.* v. *Brooks*, cited *post*, p. 490. As to whether an action will lie, see the cases collected in the notes to s. 36

Sect. 35.

Note.

of the Gasworks Clauses Act, 1871, *ante*, p. 241. For a case in which the householder provided no cistern and the water company turned off the water periodically for cleaning, see *Jackson* v. *Farnham Water Co.* (1887), 5 T. L. R. 632.

For a case under the above section, which turned primarily on the construction of certain local Acts, see *Bilston Urban District Council* v. *Earl of Dudley*, Jl. of G. L., May 17th, 1904, p. 453; affirmed C. A., Jl. of G. L., December 27th, 1904, p. 984.

Pure and wholesome water.

In the case of *Milnes* v. *Mayor, etc. of Huddersfield* (1886), 11 App. Cas. 511, the plaintiff sought to recover damages under this section in respect that water, otherwise pure and wholesome, became contaminated by passing through leaden service pipes. It appeared that by s. 66 of their special Act the defendants were entitled to prescribe the material to be used for service pipes, and they by their byelaws prescribed that the material might be either lead or cast-iron. "The material invariably used by the defendants for service pipes had been lead; and lead service pipes had been laid down to the plaintiff's house by the defendants on the application of the landlord and the plaintiff, without objection on the part of either to the material selected." See 10 Q. B. D. 125. The service pipes so laid became the property of the consumer and not of the defendants, notwithstanding a byelaw which provided that "the connecting pipes and works from the street main to the consumer's premises shall at all times be under the control and management of the corporation, and shall be deemed to belong to them. . . ." The water, which was pure and wholesome in the mains of the defendants, was supplied by them to the plaintiff, but in its passage from the mains through the service pipes it was contaminated by the lead, and he using the water suffered from lead poisoning. The action was brought for injuries sustained from impure and unwholesome water. Mathew, J., held that the plaintiff had no cause of action (10 Q. B. D. 124). The Court of Appeal unanimously affirmed this judgment (12 Q. B. D. 443). On appeal to the House of Lords the case was there twice argued. It was held that the obligation imposed by s. 35 was to supply water which was pure and wholesome in the mains; and by Lords Blackburn, Bramwell, Fitzgerald, Halsbury, and Ashbourne (the Earl of Selborne and Lord Watson dissenting), that having complied with that obligation the undertakers were not (negligence being out of the case) liable to the plaintiff in the action. By the Earl of Selborne and Lord Watson it was held that the defendants were liable, on the ground that the water contained some special and peculiar solvent of lead which made it poisonous after passing through leaden pipes, although that solvent might be absolutely inoperative and innocuous to anyone who might drink the water before it came in contact with lead (11 App. Cas. 511). It would appear to follow from the decision of the Divisional Court, in *Simpson* v. *South Oxfordshire Water Co.*, [1908] 1 K. B. 917, that an action will lie in respect of an impure supply of water. See also an article in 69 J. P. at p. 158, and *Frost* v. *Aylesbury Dairy Co., Ltd.*, [1905] 1 K. B. 608.

In an information and action by the Attorney-General on relation of Mayor, etc. of Tynemouth to restrain a statutory water company from supplying water pumped from a colliery on the ground that this was not an authorised source, and also that the water was impure, an injunction was granted (*Attorney-General* v. *North Shields Waterworks Co.*, Times, May 12th, 1892 [C. A.]).

See also *Attorney-General* v. *Rhymney, etc. Water Co.* (1907), 71 J. P. 435; *Attorney-General* v. *Pontypridd Waterworks Co.*, [1908] 1 Ch. 388.

In modern water Acts a clause is generally inserted enabling the local authority to supply in the event of the undertakers failing to furnish a sufficient supply after the lapse of a certain number of years. The following form is taken from the "Model Bills and Clauses," as amended, 1910:

Power to local authority, etc., to

> "If at any time after the expiration of *five* years from the commencement of this Act the *corporation* are not furnishing or prepared on demand to furnish a sufficient supply of water in accordance with the

Sect. 35.

NOTE.

supply water in case company fails to supply.

provisions of this Act throughout the district of any local authority within the limits of supply, the local authority of such district may provide a supply in the whole or any part of their district within the limits of supply in accordance with the provisions of the Public Health Act, 1875, or any company, body, or person may apply for an Act of Parliament or provisional order for the purpose of supplying water in any part of such district not sufficiently supplied by the *corporation*, as if in either case *this Act* had not passed.

"If any difference shall arise between the *corporation* and any such local authority, company, body or person as to the sufficiency of the supply of water in any part of such district, such difference shall be settled by an arbitrator to be appointed on the application of either party by the [Local Government Board or Board of Trade according as the undertakers are a local authority or a company]."

What is "domestic use."

The term "domestic use" is nowhere defined in the Act. In 1858 the question arose whether water for a horse and for washing carriages came within domestic use. The Chesterfield Waterworks Company's Act required the company to furnish to occupiers of houses who should demand a supply of water "for domestic use" a sufficient supply thereof, at certain rents. The Act provided that "a supply of water for domestic purposes shall not include a supply of water for machinery, railways, or for any other trade or business whatsoever, or for watering gardens, or for fountains, or for any ornamental purposes whatsoever." The Act incorporated the Waterworks Clauses Act, 1847. An occupier was assessed upon his house and premises, including a coach-house, stable and yard. He kept for private use a carriage in the coach-house and a horse in the stable; and on the premises he applied, for the horse and for washing the carriage, water supplied by the company for domestic use; it was held by the Queen's Bench that he was entitled to do so, the water being within the meaning of the Act applied to domestic use; Lord CAMPBELL, C.J., remarking: "It seems to me that it does not at all matter whether the water was used for washing the appellant's own carriage or the go-cart of his children" (*Busby* v. *Chesterfield Waterworks and Gaslight Co.* (1858), E. B. & E. 176).

What is not included in "domestic purposes."

After the above decision, the Waterworks Clauses Act, 1863 (26 & 27 Vict. c. 93), s. 12, provided that "A supply of water for domestic purposes shall not include a supply of water for cattle, or for horses, or for washing carriages, where such horses or carriages are kept for sale or hire or by a common carrier, or a supply for any trade, manufacture, or business, or for watering gardens, or for fountains, or for any ornamental purpose." This Act only applies to waterworks to which any special Act thereafter passed and incorporating that Act relates (s. 2). It does not, therefore, apply to the case of undertakers who have not incorporated the Act of 1863. It is usually incorporated with Provisional Orders (Water) under the Gas and Waterworks Facilities Acts. It has recently been held that water supplied to and used by a medical man for washing a motor car and for other purposes in connection therewith, the motor car being used by him for the purposes of his profession, is not within the meaning of s. 12 of the Act of 1863 (*Harrogate Corporation* v. *Mackay*, [1907] 2 K. B. 611).

"Domestic use" and "domestic purposes."

There have been many decisions bearing on the subject of what is covered by the words "domestic use"; but special regard should be had in most of the cases, to the terms of the special Acts. It is not easy to give a comprehensive definition of what is "domestic use" or "domestic purpose." In the *Chesterfield Case* (1858), E. B. & E. 176, ERLE, J., said: "I do not find any definite line to mark the meaning of domestic use and purposes," and in *Low's Case*, cited *infra*, JESSEL, M.R., said: "Then the next question is, what 'domestic purposes' mean? I cannot tell exactly any more than Mr. Justice ERLE could. It may be defined roughly to include all the water that the occupiers of a house or a building in which they dwell, use for the health, comfort, and enjoyment of themselves apart from any trade or business purpose." But such a definition as this is qualified by s. 12 of the Waterworks Clauses Act, 1863, which defines what domestic purposes shall not include, and which is operative

NOTE.

where that Act is incorporated with the special Act. But for that Act, domestic purposes would include water for "a cow in a cowstall within the curtilage, the milk being used for house purposes": *per* JESSEL, M.R., in *Low's Case.* In the *Chesterfield Case* Lord CAMPBELL said: "A supply of water for domestic purposes does include a supply of water for the carriage and horse of the appellant, considering that the carriage and horse were kept by the appellant for his private use, and were kept on the premises." In *Low's Case*, JESSEL, M.R., referring to that passage, said: "What distinction can be made between a horse so kept and a dog or cat or other animal upon the premises?" Domestic brewing and washing were considered to be domestic purposes by JAMES, L.J., in *Wilts and Berks Canal Co.* v. *Swindon Waterworks Co.* (1874), L. R. 9 Ch. 457. In the *Chesterfield Case*, Lord CAMPBELL further said that "it does not matter whether the water was used for washing the appellant's carriage or a go-cart for his children, which might be kept in an outhouse belonging to the premises." In *Low's Case*, JESSEL, M.R., said as regards baths that "they might possibly be included" in domestic purposes; but this is a matter which is now specificially dealt with in all special Acts of recent years. The North-Eastern County School, Barnard Castle, was a charity administered under a scheme settled by the Charity Commissioners in 1882. Under this scheme the school was not carried on for profit. There were 300 boarders and 50 day boys. The governors constructed a swimming bath for the use of the boys. A swimming master was appointed to teach the boys swimming, and a fee was charged for the use of the bath. The fee was compulsory in the case of the boarders, and was charged to such only of the day boys as used the bath. The Court of Appeal held, on the facts, that the water was not required for domestic purposes, and that the bath was really constructed and was required for the purposes of the business of the school, and not for domestic purposes of the school considered as the *domus* or home of the boys. VAUGHAN WILLIAMS, L.J., doubted, but assented to the appeal being allowed on the ground that the bath was used for the purpose of making the teaching of the school more effectual, and not for the purpose of making the occupation of the house more convenient. But he stated that he did not intend to decide that a supply of water to a swimming bath was necessarily in every case a supply for non-domestic purposes" (*Barnard Castle U. D. C.* v. *Wilson*, [1902] 2 Ch. 746). The judgments in this case should be referred to for the tests to be applied in determining whether or not a supply is for "domestic purposes." Since the last-mentioned decision it has in some Acts been specially provided that water for domestic purposes shall not include water for swimming baths (see, *e.g.*, New Hunstanton Improvement Act, 1903 (3 Edw. 7, c. xcvi.). Water supplied to a house the occupier of which carries on therein the business of a lodging-house keeper, and used solely for the domestic purposes of himself and the boarders who are lodged and boarded in the house, is water for domestic purposes (*Pidgeon* v. *Great Yarmouth Waterworks Co.*, [1902] 1 K. B. 310).

A waterworks company's special Act provided that the company should, at the request of occupiers of houses, furnish them with a supply of water for domestic purposes at specified rates, but that the company should not be compelled to supply water to any dwelling-house otherwise than by agreement where any part of such house was used for any trade, manufacture, or business for which water was required. The company supplied water to the plaintiff's house, which was used as a boarding school. It was held that the keeping of the school was not carrying on a business for which water was required within the meaning of the special Act, and that the plaintiff was entitled to be supplied with water at the rate specified for the supply of water for domestic purposes (*Frederick* v. *Bognor Water Co.*, [1909] 1 Ch. 149; 72 J. P. 501).

See also *South-West Suburban Water Co.* v. *St. Marylebone Guardians* and *Chester Waterworks Co.* v. *Chester Union*, cited *post*, pp. 472, 473.

Water used for amateur photography was held by justices to be domestic (*Stockport Corporation* v. *Wright*, Jl. of G. L., November 19th, 1901, p. 1323). On a case stated the Divisional Court sent back the case to the justices to be more fully stated (see Jl. of G. L., April 29th, 1902, p. 1111).

Sect. 35.

NOTE.

Clinkers produced in the furnaces of boilers belonging to an hotel used to generate steam for the purpose of supplying power for the electric lighting and for warming and cooking and other purposes of the hotel, are not refuse of a trade, manufacture, or business within the meaning of the 128th section of the Metropolis Management Act, 1855, and therefore the scavengers, under s. 125 of the Act, are bound to remove them without payment (*Vestry of St. Martin's* v. *Gordon*, [1891] 1 Q. B. 61).

In a case under s. 4 of the Boiler Explosions Act, 1882, and s. 2 of the Boiler Explosions Act, 1890, which except from the operation of those Acts boilers "used exclusively for domestic purposes," it was held that a boiler used to heat offices or business premises upon which the owner does not reside, and also to supply warm water for the purpose of cleaning the offices and for the household purposes of a resident caretaker was within the exception (*Smith* v. *Miller*, [1894] 1 Q. B. 192). See also the following cases as to the meaning of the expression "house refuse": *London and Provincial Laundry Co.* v. *Willesden L. B.*, [1892] 2 Q. B. 271; and *Westminster Corporation* v. *Gordon Hotels Co.*, [1906] 2 K. B. 39. See also the cases in the remainder of this note against the marginal notes, "Pleasure gardens," "Workhouse," "Baths," etc.

Pleasure gardens attached to dwelling-house.

Section 68 of the Bristol Waterworks Act, 1862 (25 & 26 Vict. c. xxx.), enacts that the company shall furnish to every occupier of a private dwelling-house within their limits a sufficient supply of water for the domestic use of such occupier, at certain annual rents or rates according to the "annual rack-rent or value of the premises supplied," such supply (by s. 71) not to include, among other things, a supply of water "for watering gardens by means of a tap, tube, pipe, or other such like apparatus;" and s. 32 of the Bristol Waterworks Amendment Act, 1865 (28 & 29 Vict. c. xxvi.), enacts that "if any dispute shall arise as to the amount of the annual rent or value of any dwelling-house or premises supplied with water by the company, such dispute shall be decided by two justices, provided that the amount of the annual rack-rent or value to be fixed by such justices shall not be less than the gross sum assessed to the poor rate, or less than the rent actually paid for such dwelling-house or premises." A dwelling-house and garden in the occupation of the owner were assessed to the poor-rate as follows: "Gross estimated rental, £240; rateable value, £204." It was proved that the value of the house without the garden would be 10 per cent. less, and that the owner contracted to pay, and did pay, £1 1*s.* annually for the watering by means of a pipe and tap in the garden which surrounded the dwelling-house, and was occupied and assessed therewith:—*Held*, upon a case stated by the justices, that the words "gross sum assessed to the poor rate" meant the "gross estimated rental," and not "rateable or net value;" and that the water rent was chargeable upon the gross estimated rental of "the premises," including the pleasure garden occupied with the house, and not merely upon the dwelling-house itself, the extra charge for the garden supply being for using a pipe and tap (*Bristol Waterworks Co.* v. *Uren* (1885), 15 Q. B. D. 637). In the course of a considered judgment, the court, on the first point, distinguished this case from that of *Dobbs* v. *Grand Junction Waterworks Co.* (1883), 9 A. C. 49, and held that the case of *Brown* v. *Richmond Waterworks Co.* (1883) (not reported) was well decided (p. 646); and on the second point they held that water used for the "mere amenities of the house, such as, in this case, the watering of the pleasure garden surrounding and attached to and occupied with the house, may legitimately and fairly be held to be used for domestic purposes within the meaning of the statute." . . . "It is, however, urged that in this case the consumer has contracted to pay, and does pay, 21*s.* per annum for watering his garden by means of a special tap, as is provided for by s. 71 of the Bristol Waterworks Act, 1862. This is so; but it does not seem to us that this fact should alter the area upon which, and consequently the amount upon which, the water rent should be assessed. If a consumer desires to use such an amount of additional water as a special tap, tube, or pipe will supply, there is nothing, as it seems to us, unreasonable in holding that he should pay for such accommodation in excess of what he would otherwise pay." The correct title of the unreported case referred to is not *Brown* v. *Richmond*

Waterworks Co., but *Brown* v. *Bristol Waterworks Co.*, under which title it will be found reported in the Jl. of G. L. for May 29th, 1883, vol. 41, p. 972. It came before the Queen's Bench Division on a case stated, and turned on s. 32 of the Bristol Act of 1865 above quoted. The contention there was, as in *Uren's Case*, that the words of the Act, "provided that the annual amount of rack-rent or value to be fixed by the justices shall not be less than the gross amount assessed to the poor rate or less than the rent actually paid for such dwelling-houses or premises," really meant in effect the same thing as "rateable value"; but the court rejected this contention. The case of *Low* v. *Lambeth Waterworks Co.*, which is referred to in the judgment in *Uren's Case*, is unreported, but the judgment of JESSEL, M.R. (as transcribed from the shorthand writer's notes), will be found in Cripps' "Position of the London Water Companies," pp. 113—121. The facts of this case appear to be as follows:—The Lambeth Waterworks Act, 1848 (11 & 12 Vict. c. vii.), by s. 39 provided that "A supply of water for domestic purposes shall not include a supply of water for baths, horses, cattle, or for washing carriages, or for any trade or business whatever," nothing being said in this section as to water for gardens. The question was whether such water for a garden attached to the plaintiff's house came within "domestic use." The plaintiff sought a mandatory injunction to compel the water company to supply his house and garden with water. JESSEL, M.R. (following the earlier case of *Weale* v. *West Middlesex Waterworks Co.* (1820), 1 Jac. & W. 358), held that mandatory injunction was not the proper remedy, assuming the plaintiff to be entitled to have the water. In the course of his judgment the learned judge examines the arguments for and against the contention that water for a garden came within "domestic use." In conclusion, he said, "It may be very difficult, and I am not bound to define the term—I am only asked whether it does or does not include a specific thing—and looking at the whole of the Act together, I think (although, as I said before, I do not pretend to say that other people may not think otherwise, and may legitimately and fairly think otherwise) that 'domestic purposes' in this particular Act of Parliament does not include watering gardens." To this case, SMITH, J., several times referred in his judgment in *Uren's Case*. He said (p. 648): "Section 71 of the Bristol Waterworks Act, 1862, seems to us to contemplate that the supply of water to a private dwelling-house for some garden purposes might well be considered as for domestic use; for it therein enacts what shall not be considered as domestic purposes; though, as was pointed out by Sir GEORGE JESSEL in *Low* v. *Lambeth Waterworks Co.*, every purpose not enumerated in that section cannot be considered a domestic purpose. The case of *Busby* v. *Chesterfield Waterworks Co.* shows that, upon the statute then in question, water used for washing a private carriage, and watering a private carriage horse, may well be considered as a domestic use; the court in that case would not adopt the argument that 'domestic use' meant solely the use by the family for the consumption and cleanliness of those resident within the house. In *Low* v. *Lambeth Waterworks Co.*, Sir GEORGE JESSEL held that the word 'house' in that Act meant the tenement supplied with water, and not merely the house itself." *

The Grand Junction Waterworks Act, 1852 (15 & 16 Vict. c. clvii), s. 46, provides that a supply of water for domestic purposes shall not include water "for gardens." On an application under s. 68 of the Waterworks Clauses Act, 1847, to determine a dispute as to the value of a tenement supplied with water, consisting of a dwelling-house and garden with outhouses, occupied as a residence, and comprising about half-an-acre, the justices found as a fact that a portion of the garden might be separately let, and being of opinion that, in arriving at the annual value of the tenement supplied with water they had to determine what quantity of garden should reasonably go with the house, they held that the annual value was the value of the premises exclusive of such portion as might be separately let. On a case stated:—*Held*,

---

* The Bristol Water Act, 1865 (28 & 29 Vict. c. xxvi.), by s. 2 incorporated the Waterworks Clauses Act, 1863, and s. 12 of the latter Act enacts that a supply for domestic purposes shall not include a supply of water for watering gardens. This fact does not appear to have been referred to in the course of *Uren's Case*.

Sect. 35.

NOTE.

that the justices had no jurisdiction to exclude that portion of the garden, and the assessment must be raised to the annual value of the whole of the premises as occupied (*Grand Junction Waterworks Co.* v. *Davies*, [1897] 2 Q. B. 209). In the course of this case, HAWKINS, J., said: "The reported cases mentioned to us in the course of the argument do not throw much light on the question immediately before us, still, they may be usefully referred to. In *West Middlesex Waterworks Co.* v. *Coleman* (1885), 14 Q. B. D. 529, the question was, whether, where water was supplied for domestic purposes to a house occupied as a licensed public-house, the licence should be taken into consideration; the company contended that the annual value of the premises as a licensed public-house should be taken as a basis for the water rate, and therefore the fact that the premises were licensed should be taken into consideration, and that the rate should not be based on their value for domestic purposes only, but as they stood, and occupied as they were; and this contention was held to be correct. In *Bristol Waterworks Co.* v. *Uren* (1885), 15 Q. B. D. 637, A. L. SMITH, J., intimated the view of himself and MATHEW, J., to be, that a garden forming part of the amenities of a dwelling-house, and occupied with it, should be treated as added to the house in assessing the value of the house. In this I entirely agree. In the latter case, the case of *Low* v. *Lambeth Waterworks Co.* (not reported), decided by Sir GEORGE JESSEL, M.R., in July, 1875, was referred to, but it does not seem to have been reported in any of the regular reports. We think, therefore, the justices were wrong, and the assessment must be raised to £100."

Supply to a workhouse.

In *Liskeard Union* v. *Liskeard Waterworks Co.* (1881), 7 Q. B. D. 505, the facts were that by the Liskeard Waterworks Act, 1860 (23 & 24 Vict. c. xiii.), (which incorporated the general Act of 1847), the company were by s. 33 bound to supply water "for domestic purposes" at a minimum rate, to be increased if any house *should be occupied* by more than one family. Section 34 provided that "a supply of water for domestic purposes as aforesaid shall include a supply for one water-closet in each such house, but shall not include a supply of water for railway purposes, or for baths, washhouses, or public purposes . . . ." The Liskeard Poor Law Union comprised twenty-three parishes, and the average number of inmates in the workhouse was 160. For this workhouse, the guardians, in accordance with the Act of 1847 and the special Act, required a supply of water "for domestic purposes." The company refused to furnish the supply, contending that the water required for such a place was "for public purposes." They also contended that the inmates of the workhouse did not constitute one family within the meaning of s. 33, but that the workhouse was occupied by various persons who constituted distinct families. The court decided that the water was required for domestic, and not for public purposes, and also that the paupers of the workhouse were one family within the meaning of the statute, Lord COLERIDGE, C.J., observing: "Every large family is partly made up of persons quite unconnected by ties of blood or marriage, and the number of those so connected may bear a very small proportion to the whole number of persons collected together, as, for instance, in the case of a school, where a number of persons of different families are collected from different places, but under one head, and one roof, and are for all practical purposes one family."

In *South West Suburban Water Co.* v. *St. Marylebone Union*, [1904] 2 K. B. 174, BUCKLEY, J., decided (1) that a school erected and maintained by the Guardians of the St. Marylebone Union for the education of children from the workhouse of the parish was a dwelling-house within the meaning of the Waterworks Clauses Acts, 1847 and 1863; (2) that the work carried on there was a business; and on this point he cited *Rolls* v. *Miller* (1884), 27 Ch. D. 71 (decided upon the construction of a covenant); but he further held that although that which was carried on upon the premises was a business, it was, in his opinion, perfectly consistent, that in business premises water might be wanted for domestic purposes." The guardians demanded a supply of water for domestic purposes but refused to comply with the regulations lawfully made by the water company. It was held that they were not entitled to the supply until they had complied with the regulations. Water had been used at the school for the following purposes, as to which the learned judge gave his opinion upon the question of whether the supply came under the head of domestic purposes, viz.: (*a*) garden and greenhouse supply. It was held that this was governed by s. 12 of the Act of 1863. (*b*) Automatic flushing cisterns with a continuous action by day and by night. It was held that the water, though taken for domestic purposes was taken in a manner and to an extent contrary to the regulations. (*c*) A continuous and continually running supply for urinals. The learned judge applied the same observations as under (*b*). (*d*) Hydrants, intended for purposes of fire but used for washing purposes by attaching a hose and washing the yards and baths of the premises. This was held to be a domestic purpose, but was in breach of a regulation. (*e*) Three large Lancashire boilers used (1) for heating water for warming the building by circulation. This was held to be a domestic purpose; (2) for purposes of power to drive machinery of two classes, viz.: machinery used in the laundry for pumping, and pumping machinery for raising water from certain wells. It was held that the supply for purposes of power was not a domestic purpose. The question of whether a customer could be limited under s. 50 (*post*, p. 494) of the Act of 1847 to one service pipe of half-inch bore, also arose in this case. It appeared that the water company had made regulations which permitted the use of a pipe of three-quarters of an inch bore. The learned judge on this point said "as regards the bore of the service pipe, s. 50 of the Act of 1847 provides that it shall not exceed the prescribed limits, and where no limit is prescribed shall not exceed half an inch, except with the consent of the undertakers. No. 12 of the plaintiffs' regulations allows a bore of half an inch or three-quarters of an inch for the service of a supply for domestic purposes. The defendants are, I think, entitled (if and when they put themselves in a position to take a domestic supply) to use a pipe of three-quarters of an inch bore, but not a larger bore without the plaintiffs' consent. I find nothing to limit them to one such pipe. They are entitled to so many pipes of a bore of three-quarters of an inch as are necessary for obtaining a sufficient supply within s. 53 of the Act of 1847." Notice of appeal was given in the case, but the appeal was afterwards abandoned. See also *Dublin Corporation* v. *South Dublin Guardians*, *post*, p. 495.

By the Chester Waterworks Act, 1857, s. 43, the water company were bound to supply water to dwelling-houses in their district for domestic purposes at certain rates based on the annual value of such dwelling-houses, and by s. 47 they were bound to supply water for other than domestic purposes at such rate and upon such terms and conditions as might be agreed upon, or, failing agreement, upon such terms as might be determined by two justices, provided that the supply for domestic purposes should not be in any way interfered with or endangered. By the Chester Waterworks Act, 1874, s. 22, "no person shall be entitled to require nor shall the company be bound to supply any dwelling-house with water (otherwise than by meter or special agreement) where any part of such dwelling-house is used for any trade or business for which water is required." The Chester Guardians maintained a workhouse where water was used for boilers, for purposes of power to engines for driving ventilating and drying fans, for wringer and washing machines, and to drive a donkey-engine for pumping rain-water; for watering pigs and washing piggeries, the pigs being kept primarily to consume refuse, but such pigs being also fed with meal and sold when fattened; for engines used to heat a shed where wood was chopped, such wood being sold; for watering vegetable and flower gardens, and heating greenhouses; for heating infirmary, surgery, mortuary and chapel; for flushing waterclosets and for ordinary drinking, washing, and sanitary purposes for the inmates and others in the workhouse:—*Held*, that the guardians did not use any part of the workhouse for any trade or business for which water was required, and that therefore, s. 22 of the Act of 1874 did not apply; that the guardians were entitled to a supply of water for domestic purposes at the domestic rate, and a separate supply for non-domestic purposes, at a rate and upon the terms and conditions to be agreed upon or determined by two justices as provided by s. 47 of the Act of

Sect. 35.

NOTE.

1857; but that the guardians were not entitled to require the company to supply the workhouse with water for purposes other than domestic purposes, unless and until they had agreed with the company as to the terms and conditions of such supply or, failing agreement, the terms and conditions had been determined by two justices as provided for by s. 47 of the Act of 1857, and they had made provision for the segregation of the two supplies (*Chester Waterworks Co.* v. *Chester Union* (1908), 72 J. P. 121; 98 L. T. 701).

Baths.

In the *Sheffield Waterworks Co.* v. *Bingham* (1880), Jl. of G. L., November 16th, 1880, vol. 36, p. 769, it appeared that the company's special Act of 1853 provided, by s. 79, that the company were "required to furnish a sufficient supply of water to every inhabitant occupying a private dwelling-house." Section 81 provided that in certain cases (among others) "persons requiring a supply of water for baths, ponds, or pools, or closets . . . such supply shall be furnished" at certain specified rates. Section 82 limited the rate chargeable in any one year in respect of waterclosets. The defendant had a fixed bath in his house, and claimed to be entitled to use the company's water for the bath as part of the domestic supply, and therefore without additional payment. JESSEL, M.R., decided that, on the construction of the above-mentioned sections, the company were entitled to additional payment for fixed baths and for waterclosets. The Court of Appeal, consisting of Lord SELBORNE, L.C., and BRETT and COTTON, L.JJ., affirmed the judgment (Jl. of G. L., July 19th, 1881, vol. 38, p. 129). See a later case of *Sheffield Waterworks Co.* v. *Bingham*, cited *infra*, p. 476. In *Weaver* v. *Corporation of Cardiff* (1883), 48 L. T. 906, the facts were that the Cardiff Waterworks Act of 1853 required the company to "furnish a sufficient supply of water for their domestic uses." Section 43 provided that: "A supply of water for domestic purposes as aforesaid . . . shall not include a supply of water for railway purposes, or for baths, washhouses, or public purposes . . . ." The plaintiff had a fixed bath in his house. The company demanded, in addition to the ordinary water rate, an extra charge for the supply to this bath, on the ground that a supply for such a purpose was not a supply for domestic purposes within the meaning of the Act. A divisional court decided that it was; FIELD, J., observing: "It seems to me that the word 'baths' must, with reference to the context, be taken to mean a public establishment of baths and washhouses, and that the public purposes should be read as meaning other public purposes. The respondents relied by analogy upon a case of the *Sheffield Waterworks Co.* v. *Bingham* (1880) [not then reported, but now see 25 Ch. D. 446 n], which was a decision of the Court of Appeal upon the construction of another private Act. It is sufficient to say that the words of the private Act in that case are not similar to those in the present. It is, therefore, distinguishable. I am, therefore, of opinion, upon a true construction of this Act, that a supply of water to a bath, although fixed, is included in the supply of water for domestic purposes, and that the plaintiff, therefore, was not liable to pay the extra charge which the defendants sought to impose upon him." This decision was not followed by CHITTY, J., in *Walker* v. *Lambeth Waterworks Co.* (1894), 63 L. J. Ch. 874. The company in this case were required by their Act of 1848 to furnish a sufficient supply for "domestic uses," and by s. 39 it was provided that "a supply of water for domestic purposes shall not include a supply of water for baths, horses, cattle, or for washing carriages, or for any trade or business whatsoever." It was held that the word "baths" included a fixed bath, and was not to be interpreted as confined to public baths.

Supply to a warehouse.

The case of *Cooke* v. *New River Co.* (1889) turned upon the construction of four sections (ss. 35, 38, 40, and 41) of the New River Act of 1852, as to which it was observed by Lord HERSCHELL, L.C.: "It has been my lot to attempt to construe many Acts of Parliament which were obscurely worded, but I do not think I ever met with one upon which it was more impossible to put a satisfactory construction than the statute with which we have to deal in the present case." The case related to a water supply to a warehouse used for storing carpets, and in which no one slept or took his meals, though about fifty persons were employed between the hours of

Sect. 35.

NOTE.

business from 8 a.m. to 8 p.m. Until shortly before the commencement of the litigation the company supplied water to the premises by two pipes. One pipe was for working the hydraulic lift, and the water was supplied by meter, under an agreement of November, 1871, between the plaintiffs and the company. The other pipe supplied water for drinking purposes, and for the purpose of being used in urinals, water-closets, and washhand basins and for washing the house. There was no meter on this pipe, and the plaintiffs were charged according to the rateable value of the premises. In 1886 the plaintiffs gave notice to the company to determine the agreement of November, 1871, and called upon the company to supply the premises with water for all purposes by meter. This the company refused to do, contending that for the lift the plaintiffs were not entitled to water except by agreement, and that for water supplied for water-closets, lavatories, and washing, being domestic purposes, the company were entitled to be paid according to the annual value of the house as a dwelling-house. The plaintiffs brought this action, claiming a declaration that they, as consumers of water supplied by the defendants, were entitled to have water supplied by meter for working the lift, and also for all other purposes in connection with the premises. In the court of first instance, KEKEWICH, J., decided (36 Ch. D. 641)—(1) That such a warehouse was not a dwelling-house within the meaning of s. 35, and that the company could not insist on charging according to the rateable value of the warehouse for water supplied to it for domestic purposes; and (2) that the company were obliged to supply to such a warehouse water for domestic purposes and also for the hydraulic lift, charging for the water by meter according to s. 41. The Court of Appeal reversed this decision (38 Ch. D. 56), holding that a person requiring a supply of water for domestic purposes, and also for purposes for which no rate is fixed by the Act of 1852, is not entitled, under s. 41, to require the company to supply by meter the water for domestic purposes as well as the water for other purposes. An opinion was expressed (though it was not necessary to be decided) that any house in which water was required for domestic purposes, or for any other purposes for which rates were fixed by the special Act, was a "dwelling-house" within the meaning of the Act. In the House of Lords (14 App. Cas. 698) the decision was affirmed, but on the very special ground that the plaintiff was not a "consumer of water" within the meaning of s. 41. See the sections set out in 36 Ch. D., at pp. 642, 643 n.

Sect. 12 of the Waterworks Clauses Act, 1863, does not exclude premises even if occupied purely for "business" purposes, and in which no one or only a caretaker sleeps, from the right to have a supply for "domestic purposes," such as for supplying hand-basins or flushing water-closets (see *South-Western Suburban Water Co.* v. *St Marylebone Union*, [1904] 2 K. B. 174, per BUCKLEY, J., at p. 179).

Supply by meter for baths.

By the Sheffield Waterworks Act, 1853 (16 & 17 Vict. c. xxii.), s. 79, the company were required "to furnish a sufficient supply of water to every inhabitant occupying a private dwelling-house, or part of a dwelling-house," and were authorised to charge therefor certain rates calculated upon the rent. Sect. 81 provided that in the case of persons requiring a supply of water for baths such supply should be furnished by the company at a rate not exceeding tenpence for every 1,000 gallons up to 500,000 gallons, and so on, which rate was by a later Act increased by 25 per cent. for a period ef twenty-five years. There was no section in the Act prescribing any method of measuring the quantity of water used. By s. 12 of the Company's Act of 1860, provision was made for the appointment of competent persons to be inspectors of meters, and consumers of water were rendered liable to a penalty for omission to remedy defects in their meters, notice of which should have been given by an inspector, and the company were empowered to make regulations for preventing the waste of water. The company had drawn up and circulated a scale of composition rates for water supplied to baths, varying according to the value of the house. The adoption of this scale by the consumer was optional and voluntary. Where the consumer preferred it the company also supplied meters. This Act gave rise to much

Sect. 35.

NOTE.

litigation. In the first place it was contended by some consumers that "baths" in s. 81 meant public baths. That point having been decided against them in *Sheffield Waterworks Co.* v. *Bingham* (1880), Jl. of G. L., November 16th, 1880, vol. 36, p. 769, and 25 Ch. D. 446 n, the next point taken for the consumers was that the company were bound to fix meters at their own expense. In the case just cited, JESSEL, M.R., had held that the consumer was not bound to put up any meter, and that he might prove the quantity of water used without measurement, as by showing that a bath required so much and was used so many times a year. And in *Sheffield Waterworks Co.* v. *Carter*, and *Same* v. *Brooks* (1882), 8 Q. B. D. 632, CAVE and MATHEW, JJ., in a divisional court, held that a consumer was not bound to put up a meter at his own expense, or hire one from the company as a condition precedent to his right to require a supply of water for a bath. The foregoing cases were afterwards brought under review in *Sheffield Waterworks Co.* v. *Bingham* (No. 2) (1883), 25 Ch. D. 443. PEARSON, J., there held that the measurement of the water used could only be effected by some sufficient automatic self-registering meter or other instrument, or in some other equally accurate mode, and he further held that, upon the construction of the Acts, it was not correct to treat the company as supplying the water to the consumer, but that it was the consumer who was entitled to draw off from the main what water he required, and to fix pipes and apparatus at his own expense for the purpose of measuring the water so taken by him. The learned judge guarded his judgment by saying: "I do not intend to decide that a meter is necessary . . . I am not going to decide that any particular meter should be used. . . . All I am going to decide is that Mr. Bingham must at his own expense measure the water and record that measurement, and that he must give, of course, all facilities to the company to ascertain that he has measured the water, and that he has measured it in some way or other which is an accurate way of taking the measurement." This decision was not appealed from. The rights and obligations of the parties having been thus established, it is believed some few persons elected to take their bath supplies by meter, but that the great majority accepted the company's composition rates. The decision in the last-mentioned case was followed in *Dublin* (*Corporation of*) v. *Bray Commissioners*, [1900] 2 I. R. 88.

In 1887, under the Sheffield Corporation Water Act, 1887 (50 & 51 Vict. c. clxxviii.), the Sheffield Corporation purchased the undertaking of the water company.

In a case decided in 1829 it appeared that a tenant, acting as if he were the owner of a house, made a contract with a water company to supply the premises with water at the basement story. In his absence from London his men, in order to save themselves the labour of pumping, secretly had a pipe put on the company's high service pipe so as to draw off the water at a higher level and in greater quantities than were agreed for. In this way the company were injured in respect that water was obtained in greater quantities than was agreed for, and at a higher level. When sued for damages the tenant set up that he was not the owner of the house, and that he had not authorised the act of his men; but under the circumstances, Lord TENTERDEN, C.J., held that he must have known of what had been done, and, therefore, must be considered as having adopted it, and, therefore, that he was liable in damages to the water company (*West Middlesex Waterworks Co.* v. *Suwerkrop* (1829), 4 C. & P. 87).

A corporation obtained parliamentary power to collect all the water from the gathering grounds of a certain district, but became bound by their Act to supply to a neighbouring township not less than 25,000 gallons, nor more than 75,000 gallons of water per day, at the price of sixpence per 1,000 gallons, and the amount to be supplied between the maximum and minimum limits was to be at the option of the township. It was held that the township in question might enforce the supply of more than 25,000 gallons per day for the purpose of selling a part of it, at a profit, to another township (*Corporation of Halifax* v. *Upper Soothill L. B.* (1874), 31 L. T. (N.S.) 6).

Pressure.

The statutory requirements as to the supply of water at pressure contained in s. 35, *supra*, do not apply to the supply of water in bulk, and the duty of

Note.

the waterworks company ends with the supply of water at a given point (*Wombwell U. D. C.* v. *Dearne Valley Waterworks Co.* (1907), 71 J. P. 415).

See *Liverpool Corporation* v. *Brady* (1897), 14 T. L. R. 11, a case which turned on the construction of certain special sections in the Liverpool Water Acts relating to constant supply, and *Dublin Corporation* v. *Bray Township Commissioners*, [1902] 2 Ir. R. 88, which also turned on the construction of special enactments.

Penalty for neglect to lay pipes for supply of water for domestic use. Proviso.

36. If for twenty- eight days after demand in writing made to the undertakers, and tender made of an agreement, signed by such number of owners or occupiers as aforesaid, to take and pay for a supply of water for three years or more, the undertakers shall refuse or neglect to lay down pipes in the manner hereinbefore directed, and to provide such supply of water as aforesaid, or as provided by the special Act, they shall forfeit to each of such owners and occupiers the amount of rate which he would be liable to pay under such agreement, and also the further sum of forty shillings for every day during which they shall refuse or neglect to lay down such pipes or to provide such supply of water : Provided always, that the undertakers shall not be liable to any penalty for not supplying water if the want of such supply shall arise from frost, unusual drought, or other unavoidable cause or accident.

This section is wider in its operation than the marginal note suggests. See the notes to ss. 42 and 43, *post*, and the notes to s. 36 of the Gasworks Clauses Act, 1871, *ante*, p. 241.

This section has been repealed so far as it applied to the Metropolitan Water Board by the Metropolitan Water Board (Charges) Act, 1907, *post*, p. 684. See s. 12 of that Act which contains the substituted provision.

Supply of water to be kept for cleansing sewers, etc., and for other public purposes.

37. In all the pipes to which any fire-plug shall be fixed the undertakers shall provide and keep constantly laid on, unless prevented by frost, unusual drought, or other unavoidable accident, or during necessary repairs, a sufficient supply of water for the following purposes; (that is to say), for cleansing the sewers and drains, for cleansing and watering the streets, and for supplying any public pumps, baths, or washhouses, that may be established for the free use of the inhabitants, or paid for out of any poor rates or borough rates levied within the limits of the special Act ; and such supply shall be provided at such rates, in such quanties, and upon such terms and conditions, as may be agreed upon by the town commissioners and the undertakers, or, in case of disagreement, as shall be settled in England or Ireland by two justices, and in Scotland by the sheriff, until in either case an inspector shall have been appointed, and after the appointment of such inspector, by the inspector so appointed.

In the case of *The Guardians of the Poor of the Oldham Union* v. *Oldham Corporation* (1854), 2 W. R. 590, it appeared that the Oldham poor law union comprised eight townships, and that the union workhouse was maintained out of the common fund of the union, consisting of the aggregate of the poor rates within those townships. In 1853 the Oldham Corporation Gas and Water Act was passed, but it extended to only four of those townships and to two others not within the union. By s. 58 of that Act, "the corporation shall at all times afford an ample supply of gas and water without charge to all hospitals and infirmaries within the limits of the Act, and all baths and washhouses, and all buildings within those limits respectively *maintained at*

Sect. 37.

NOTE.

the expense of the borough rates or the rates for the relief of the poor or other rates raised within those limits." It was held, that the corporation were not bound to supply gas and water gratuitously to the union workhouse, as it was not maintained by rates wholly raised within the limits of the Act.

A local board of health, empowered by their private Act to supply a town with water at certain rates, supplied an ornamental fountain (which had been presented to the town by one of the inhabitants and erected in one of the public streets) with water for the use of cattle in the cattle market on market days, and for horses, if yoked, when passing to and fro. The board had a fixed charge per horse for water supplied to persons keeping horses who might choose to have water laid into their stables. The respondent, in order to evade payment of this charge, took his horse from his stable to the fountain to drink. Upon a complaint against him for so doing, under s. 59, the magistrates being of opinion that the local board had no power to erect the fountain on the public highway except for the gratuitous use of the public, and that, therefore, the water supplied to such fountains came within the exception in the above clause, refused to convict. The Court of Common Pleas, however, held that the decision of the magistrates was wrong, for that whether the fountain were a public nuisance or not, the board were at liberty to supply it with water on their own conditions. The case was accordingly sent back to be reheard (*Hildreth* v. *Adamson* (1860), 8 C. B. (N.S.) 587). ERLE, C.J., observed: "The local board stand upon their rights and say that the magistrates were wrong. The magistrates say that the water was provided for the gratuitous use of the public, for this reason, that the fountain was placed on a public highway, and was an indictable obstruction unless the placing it there was justified under the 78th section of the Public Health Act, 1848 (11 & 12 Vict. c. 63), and they assume, therefore, that it was placed there under the authority of that section. They consider that the 78th section justifies the placing it there; but on that point I give no opinion. It may be that the 78th section does justify it. But whether the fountain is or is not an indictable obstruction is a question quite distinguishable from the question whether the water supplied to it is for the gratuitous use of the public. A man might place buckets of water on a stand in the middle of a highway for the use of horses passing on the road, and station a man there to prevent all others from using it, and he might be liable to an indictment for doing it; but it would be idle to say that he had dedicated the water to all the public. I think, therefore, that the respondent had no right to take the water against the will of the local board."

By the New River Company's Act, 1852 (15 & 16 Vict. c. clx.), s. 35, the company must supply houses within their limits with sufficient water for domestic purposes at certain fixed rates. By s. 38, domestic purposes are not to include engines or railway purposes, or baths, cattle, or fountains, or flushing sewers or drains, or any trade or business requiring an extra supply of water. By s. 41, the company shall, at the request of any consumer of water for purposes other than the purposes for or in respect of which the rates or charges are thereinbefore provided or limited, or at their own instance, afford a supply of water by means of a meter, and charge for the same at certain limited rates according to the quarterly consumption. The general Act of 1847 was incorporated with the Act of 1852. The Metropolitan Board of Works demanded from the company a supply of water by meter under s. 41 of the Act of 1852 for watering the roads and gardens on the Victoria Embankment, such supply being required only during one-third of the year and the driest weather. It was held, that the company was not bound to afford this supply at the limited rates fixed by s. 41; but that they were entitled to claim rates for such supply to be fixed by agreement or settlement under the section in the text (*Metropolitan B. of W.* v. *New River Co.* (1877), 37 L. T. 124). See now the substituted provisions of the Metropolitan Water Board (Charges) Act, 1907, (ss. 29 and 31), *post*, p. 698, as to the rate for the supply by the board of water for public purposes, and see that Act generally as to the charges for other purposes.

See also *Purnell* v. *Wolverhampton New Waterworks Co.*, cited *post*, p. 488; and *Finchley L. B.* v. *Barnet District Gas and Water Co.* (1893), 9 T. L. R. 264.

NOTE.

Fire-plugs.

Undertakers to affix public fire-plugs in mains.

38. The undertakers, at the request of the town commissioners, shall fix proper fire-plugs in the main and other pipes belonging to them, at such convenient distances, not being more than the prescribed distance, or, if no distance be prescribed, not more than one hundred yards from each other, and at such places as may be most proper and convenient for the supply of water for extinguishing any fire which may break out within the limits of the special Act; and in case of any difference of opinion as to the proper position or number of such fire-plugs, it shall be settled by such inspector as aforesaid, when appointed, and in the meantime by two justices in England or Ireland, and by the sheriff in Scotland.

The request must be under seal of the Local authority. See *per* LINDLEY, M.R., in *Grand Junction Waterworks Co.* v. *Brentford L. B.*, [1894] 2 Q. B. at p 740. The undertakers are not bound to affix fire-plugs except at the request of the local authority under s. 38 (and the Public Health Act, 1875 (38 & 39 Vict. c. 55), s. 66), or of the owner or occupier of works or manufactory under s. 41. If the undertakers affix fire-plugs without request of the local authority, the latter are not bound to pay for the same or for repairs under s. 40 (*ibid.*)

As to the "inspector," see the interpretation clause, *ante*, p. 381.

Duty of urban authority to provide fire-plugs.

By the Public Health Act, 1875, s. 66, it is provided that "Every urban authority shall cause fire-plugs and all necessary works machinery and assistance for securing an efficient supply of water in case of fire to be provided and maintained, and for this purpose they may enter into any agreement with any water company or person; and they shall paint or mark on the buildings and walls within the streets words or marks near to such fire-plugs to denote the situation thereof, and do such other things for the purposes aforesaid as they may deem expedient."

Position of rural authority as to fire-plugs.

It will be observed that by s. 66 of the Public Health Act, *supra*, only urban authorities are placed under the obligation to provide fire-plugs, and as there is no other distinct enabling section, rural district councils are given no express powers under the Act for the provision of fire-plugs, hydrants and other appliances for furnishing water for fire brigade purposes. Where, however, a rural district council provide a public water supply for a parish in their district they may be presumed to have power to fix fire hydrants in the mains as part of the works of water supply which they may carry out under s. 51. In other cases, if power to provide hydrants is required by a rural district council, they should apply to the Local Government Board for an order under s. 276. In view of the imperative character of s. 66, it is the Board's practice to restrict such orders to the particular parish or parishes in which the appliances are shown to be required, and in which the council are prepared to take action at once.

Fire-engines and brigades.

As to the powers of an urban authority to provide fire-engines, see s. 171 (2), (incorporating ss. 30—33 of the Towns Police Clauses Act, 1847), the Parish Fire-engines Act, 1898, and s. 90 of the Public Health Acts Amendment Act, 1907.

Rural Authorities may obtain powers in this behalf by means of an urban powers order under s. 276, and independently of such powers, action may be taken parochially in *rural* parishes by the parish council, lighting inspectors, or by overseers, as the case may be, under one or other of the following enactments: The Lighting and Watching Act, 1833 (s. 44), the Poor Law Amendment Act, 1867 (s. 29), the Local Government Act, 1894 (s. 6 (1) (c) (ii.)), the Parish Fire-engines Act, 1898, and the Public Health Acts Amendment Act, 1907 (s. 90).

The superintendent of the fire brigade of an urban district having called in the services of another fire brigade on the occasion of a fire, it was held

Sect. 38.

NOTE.

that the superintendent had implied authority to employ those services, and that the urban district council were liable to make reasonable remuneration (*James* v. *Staines U. D. C.* (1900), 83 L. T. 426).

Although s. 33 of the Town Police Clauses Act, which is incorporated in the Public Health Act, 1875, authorises an urban authority to make a charge for the services of a fire brigade when the fire engine is sent outside their district, a charge cannot be made for the attendance of a fire-engine and fire brigade within their district (*Bridlington L. B.* v. *Bower* (1873), 38 J. P. 73).

Duty of London county council in metropolis.

By the Metropolitan Fire Brigade Act, 1865 (28 & 29 Vict. c. 90), the duty of extinguishing fires and protecting life and property in case of fire within the metropolis was entrusted to the Metropolitan Board of Works, and they were authorised to establish a fire brigade. Sect. 32 transferred to them all the powers then exercised by any local body or officer within the metropolis as respects fire-plugs. The operation of this section is subject to the provisions of the Metropolis Water Act, 1871, s. 34; see *post*, p. 555. By the Local Government (England and Wales) Act, 1888 (51 & 52 Vict. c. 41), s. 40 (8), the powers, duties, and liabilities of the Metropolitan Board of Works were transferred to the London County Council.

Hydrants, fire-plugs, and other apparatus, provided by a metropolitan waterworks company, pursuant to the Metropolitan Fire Brigade Act, 1865 (28 & 29 Vict. c. 90), s. 32, and the Metropolis Water Act, 1871, s. 34, for supply of water in case of fire, may be used by the waterworks company for purposes other than the supply of water for extinguishing fires, cleansing sewers and drains, cleansing and watering streets, or supplying public pumps, baths, and washhouses, without the consent of the London County Council, and may, by permission of the company, be used by persons other than the company (*London C. C.* v. *East London Waterworks Co.*, [1900] 1 Q. B. 330).

Fire-plugs, etc.

Liability of water companies in relation to fire-plugs.

Where, by a frost of a severity rarely felt in England, a fire-plug, which had resisted the frost for twenty-five years, was forced out, and the water escaped from the main, but owing to the stopper above the plug being covered with ice and snow the water could not rise to the surface, but was forced through the brickwork round the neck of the main, and made its way into the plaintiff's cellar, where it did damage: it was held, that the company were not liable, since the accident arose from a frost of extraordinary severity, the effects of which the company could not foresee or be expected to guard against, and consequently that there was no negligence on their part (*Blyth* v. *Birmingham Waterworks Co.* (1856), 11 Ex. 781). But although a water company is not liable for the unforeseen results of an extraordinary frost, yet the company is bound to take reasonable care to provide against the consequences of ordinary frost (*Steggles* v. *New River Co.* (1865), 13 W. R. 413). Therefore, where it was known that the effect of frost would be to cause the plugs in the water pipes to start, and thus to let the water out at the side, and some precautions might have been taken, if not to prevent this, at all events to prevent the water from escaping through the soil, and no such precautions having been taken, the plugs started in a frost of extraordinary severity, and the water, thus escaping, ran through the soil, into a cellar: it was held that there was some evidence of negligence on which a jury might hold the company liable (*ibid.*).

By a local Act, a waterworks company was bound, at the request of the town improvement commissioners, to fix fire-plugs into their mains, and to repair and keep them in proper order, at the cost of the improvement commissioners, in whom the property in the plugs was vested by virtue of their improvement Act. In consequence of the cap of one of the fire-plugs provided under the Act being broken, a horse placed his foot in the plug-hole and was lamed:—*Held*, that the waterworks company, and not the commissioners, were liable for the injury (*Bayley* v. *Wolverhampton Waterworks Co.* (1860), 6 H. & N. 241). Here it will be observed that the fire-plug was out of repair.

In *Moore* v. *Lambeth Waterworks Co.* (1886), 17 Q. B. D. 462, it appeared that a fire-plug had been lawfully fixed in a highway by the defendants.

Originally the top of the fire-plug had been level with the pavement of the highway, but in consequence of the ordinary wearing away of the highway the fire-plug projected half an inch above the level of the pavement. The fire-plug itself was in perfect repair. The plaintiff, whilst passing along the highway, fell over the fire-plug and was hurt. It was held by the Court of Appeal that, as the fire-plug was in good repair, and had been lawfully fixed in the highway, no action by the plaintiff would lie against the defendants.

In *Dawson & Co.* v. *Bingley U. D. C.* (1910), 75 J. P. 17, the plaintiffs sought from the defendants damages alleged to have been occasioned by their negligence in covering up a fire-plug with a layer of earth and in not properly indicating the position of the fire-plug, whereby the efforts of a fire brigade to extinguish a fire on their premises were retarded. A plate with the letters and figures "F. P. 22 ft." had been put in the road by the defendants, but the plug was some feet out of position in relation to the plate, although the plug could have been seen if not covered up. The road had not been taken over by the local authority. A jury found that the authority were negligent in not keeping the plug level with the surface of the road and in not indicating its situation, but that there was no evidence that they had covered up the fire-plug. They also found that this negligence caused delay in extinguishing the fire, and awarded damages. On further consideration, it was held that the action failed, as the defendants were not responsible for the covering up the plug, and because the incorrect indicating plate was not the *causa causans* of the damage.

The plaintiffs appealed, and the Court of Appeal held that the finding of the jury as to the indication plate was a finding of misfeasance, and allowed the appeal (75 J. P. N. 124).

In *Hancock* v. *Southwark and Vauxhall Waterworks Co.*, [1889] W. N. 198, the plaintiff brought an action to recover damages for injuries inflicted on a child owing to the bursting of a fire-plug attached to one of the defendants' mains. The company contended that the remedy, if any, was for penalties under s. 43 of the Act of 1847. Charles, J., decided that on the facts the injury did not arise from neglect to "maintain or repair," and that even if it had, that section referred only to cases of failure on the part of the defendants to fulfil the statutory duty of keeping the pipes full in case of fire, and had not the effect of exonerating them from the common law obligation of exercising statutory powers without negligence.

In *Humphreys* v. *Southwark and Vauxhall Water Co.*, Jl. of G. L., May 7th 1889, vol. 53, p. 861, the plaintiff sued in the county court for damage to goods exposed for sale on the footway through a fire-plug being blown out and a consequent escape of water. The company maintained that the cause of the mischief was the use by the vestry of a steam-roller which had damaged the fire-plug and box. The company applied at chambers for a *certiorari* to remove the action to the High Court, on the ground that important points of law were involved in the case. Mathew, J., granted a *certiorari*, on condition that if the company succeeded they should not ask for costs on the High Court scale, but that if the plaintiff succeeded he should have costs on that scale. The company appealed to a divisional court against this condition, but the order of Mathew, J., was adhered to.

In *Hendra* v. *Chelsea Waterworks Co.* (1891), 8 T. L. R. 101; the plaintiff brought her action to recover damages for personal injuries caused by the alleged negligence of the company in placing an open fire-plug in the footpath of Bagley Lane, Fulham. The evidence showed that the fire-plug was fixed in the following way: A piece of elm wood about two feet in depth, called a box, had a hole bored through the centre, and a bush with an opening of 2⅞ inches diameter driven into it. The plaintiff, while walking along the footpath, caught her heel in the open hole of the plug, which tripped her up, and she injured her wrist. It was attempted to be made out on behalf of the plaintiff that the company were guilty of negligence in placing an open instead of a covered fire-plug, and it was said that modern fire-plugs were covered, some in square boxes with covers, and others with a hinged flap-covering. The

Sect. 38.

NOTE.

evidence for the company showed that they had 5,000 of such fire-plugs, all of the same pattern, and that other water companies used the same pattern, and that there were 40,000 such fire-plugs about London, sometimes in the pathway, but mostly in the roadway. Evidence was given as to the disadvantage, etc. of having covers, which, it was said, were liable to get rusted, frozen down, or set fast with mud or dirt, and it was also said that a hinged cover was more dangerous than an open plug. A. L. SMITH, J., in charging the jury, is reported to have said: "Was the fire-plug, when put down (as it was not contended that it got out of order), a public nuisance, or was it reasonably safe for the persons lawfully passing and repassing along the highway? When they were considering the question of nuisance or no nuisance, there was one important fact, viz., that in the metropolis there were 40,000 of these plugs, and how many millions of persons had walked over them since they had been put down." The jury found for the defendants.

In *Osborn* v. *Metropolitan Water Board* (1910), 74 J. P. 190, the plaintiff put the toe of her boot into a stop-cock box in the pavement of a highway, and, falling to the ground, sustained personal injuries. The stop-cock box, was placed in the pavement under their statutory authority by the Lambeth Waterworks Company, one of the predecessors of the Metropolitan Water Board. It appeared that the box was 2½ inches in diameter and 3½ inches deep down to the top of the spindle in it. It also appeared that a large number of boxes of this kind, without a cover, had been in existence in the pavements of London for many years, and that it was the custom of the water board, after using a box to fill it up with a wisp of hay or straw with earth or mud above. At the time of the accident the box in question was not quite filled with the wad. The wad was not flush with the top of the box. In an action by the plaintiff for damages for negligence and for nuisance against the water board, the county court judge held that the box had been originally properly constructed, but that it had not been properly maintained by the defendants, and that it constituted a nuisance. On appeal it was held (1) that the box had been properly constructed; (2) that there was a duty on the water board to the public, after using the box, to put in a wad and fill it up; and (3) that there was no duty on the water board from time to time to cure the wearing down of the wad. On these rulings it was held that the county court judge might find on the facts that the proper inference was that the last time the box had been used by the water board no wad had been put in, or that an inferior and insufficient wad had been put in, and that as a result the accident happened. Accordingly, the appeal was dismissed.

In *Rosenbaum* v. *Metropolitan Water Board* (1910), 74 J. P. 378, the plaintiff caught the heel of her shoe in a stop-cock box and sustained personal injuries. For some time it had been the practice of the servants of the board to stop up each hole with a plug or wad of straw with earth or mud above it. These plugs were renewed three times a year. On the occasion of the accident it was proved that the plug of straw had become so worn as to leave a hole some two inches deep. It was held that there was a duty on the water board to the public to keep the holes properly plugged with straw, and that, having failed to discharge this duty, they were liable in damages. On appeal, a new trial was ordered on the ground that the question whether the box was a danger without the straw had not been considered. *Osborn's Case, supra*, was observed upon (see 75 J. P. 12).

In *Bond* v. *Wandsworth Borough Council and the Metropolitan Water Board*, Jl. of G. L., July 19th, 1910, vol. cxii., p. 202, the plaintiff claimed damages for injuries sustained by her through the alleged negligence of the defendants. The plaintiff, in passing along the road, caught her foot in a hole in the pavement which had been cut by the council to receive a stop-cock and box which had been furnished by the board for the purpose of giving a supply of water to the adjoining house. The council were about to make up the road and invited the board to have the water fittings brought to the necessary level before the pavement was placed in position; and this having been done, workmen on behalf of the council adjusted the stop-cock and box in position. The county court judge held that there was no liability

Sect. 38.

NOTE.

on the council to maintain the stop-cock and box in repair and dismissed the action as against them. With regard to the alleged liability of the board it was held that the board were relieved from liability by the Metropolitan Water Board (Charges) Act, 1907, which Act shifted the responsibility on to the private owners who requested the board to furnish their property with a supply of water. But see *Batt* v. *Metropolitan Water Board*, cited *post*, p. 691.

In *Stockings* v. *Lambeth Waterworks Co.*, Jl. of G. L., March 10th, 1891, vol. 57, p. 454, it appeared that the plaintiff was walking down Great Dover Street when his foot caught in the hole of a fire-plug box, with the result that he was thrown violently to the ground and permanently injured. It appeared that the vestry had recently renewed the pavement and raised the fire-plug to the level of the street. From some cause, however, it had sunk 1¾ inches. The company contended that the form of box used was the ordinary and proper one, which experience had shown to be safe, and that if anyone was liable it was the vestry. CAVE, J., charged the jury that the question was whether or not the fire-plug was dangerous to the public at the time it was laid down; that the defendants could not be held liable simply because the vestry had interfered with the road; that there was no enactment providing that when the vestry interfered with the roads the water company were to take up and reset the fire-plugs; that their statutory duty was discharged when they properly put down the plug originally; and that if it afterwards became dangerous owing to the action of the vestry the defendants were not liable. The jury found a verdict for the plaintiff, and judgment was entered for £175, the amount agreed upon as damages. An appeal was dismissed, see 7 T. L. R. 460. See also *Moore* v. *Lambeth Waterworks Co.*, cited *ante*, p. 480.

In June, 1907, the plaintiff slipped from a water-box in a highway from which the surrounding flags had subsided, and was injured. In an action for damages against the defendants, the water authority of the district, the county court judge found that the defendants, after breaking up the highway at this spot in October, 1904, in pursuance of their statutory powers, had (through their agents) put back the ground in such a way that there was a subsidence within their year of liability under s. 32 of the Waterworks Clauses Act, 1847, and that such subsidence was not effectively made good within that year, which ended in October, 1905, or before the accident. He held that the defendants' breach of duty brought about the accident, and, notwithstanding the concurrent liability of the highway authority to repair the highway, gave judgment for the plaintiff for £40. The defendants had in point of fact agreed with the highway authority to do all necessary repairs on their behalf during their year of liability:—*Held*, that there was evidence to support the findings of the county court judge, and that on these findings his decision was right (*Hartley* v. *Rochdale Corporation*, [1908] 2 K. B. 594).

Where an urban authority complained before the justices that the company had a pipe in a certain street and neglected to fix therein a proper fire-plug, and it appeared that the pipes were insufficient in size to carry a proper fire-plug, and the company offered to put a larger pipe if the authority paid for it, which they refused to do, and in the opinion of the justices, empowered by s. 38 to settle the proper position of the fire-plugs in the district, it was essential that a fire-plug should be placed there; it was held, on a case stated, that there was nothing in the Act of 1847 to compel the water company to provide at their own expense a pipe of sufficient size for an effective fire-plug (*R.* v. *Wells Water Co.* (1886), 55 L. T. 188).

Stop-cocks on service pipes.

The defendants, a water company, laid a communication pipe from their main to the consumer's house. In the communication pipe there was a stop-cock and box communicating with the surface of the road, the aperture of which was left uncovered. The plaintiff, who at the time was lame, was walking along the road with the assistance of a staff, and not seeing the aperture put the staff into it and fell and received the injuries complained of. At the trial there was evidence that the aperture was dangerous to passers-by; but it was alleged on the part of the defendants that the property

Sect. 38.

NOTE.

in the stop-cock box was in the consumer, and that by statute the consumer was bound to maintain and repair it. The learned judge at the trial nonsuited the plaintiff:—*Held,* that inasmuch as there was evidence of negligence on the part of the defendants the nonsuit was wrong. MATHEW, J., said: "The only question here is, was there any evidence upon which the jury might reasonably arrive at a conclusion that the defendants are liable? The article in question was supplied by the defendants, was put near the consumer's premises, and therefore on the public pavement, and was used from time to time by the defendants during the occupancy of the consumer. There was evidence that it was dangerous to passers-by. There was thus a nuisance created; and the verdict of the jury ought to have been taken upon it. In my opinion, therefore, the case was wrongly withdrawn from the jury. There must, therefore, be a new trial." GRANTHAM, J., concurred. New trial accordingly ordered (*Strute* v. *Southwark and Vauxhall Water Co.* (1889), 53 J. P. 424).

In *Chapman* v. *Fylde Waterworks Co.*, [1894] 2 Q. B. 599, a stop-cock had been inserted in a service pipe by the company at the request of the householder, who paid the cost. The plaintiff was tripped up by the cover, which had a flap which was out of repair and projected above the footway. The jury found that the cover was out of repair, and that the accident was caused by the negligence of the party whose duty it was to keep the stop-cock and cover in repair. DAY, J., decided that by s. 19 of the Act of 1863 the householder was practically prevented from repairing, and that the company were authorised to repair, and hence that they had the control. He therefore gave judgment against the company. The Court of Appeal affirmed this decision, holding that although an owner or occupier was entitled to break up the street for the purpose of laying or removing a service pipe, he was not entitled to do so for the purpose of repairing the service pipe, and that the right to do so rested exclusively with the water company. The decision in this case was distinguished in *Grand Junction Waterworks Co.* v. *Rodocanachi*, *post*, p. 565. It was followed by a Divisional Court in *Colne Valley Water Co.* v. *Hall* (1907), 71 J. P. 173. In the last-mentioned case, a communication pipe connecting a main of a water company with the premises of a consumer lay under a highway. The company did not prove that such pipe was the property of the consumer. It was held that the liability to repair the pipe was upon the company, and this decision was affirmed on appeal (see 72 J. P. 25). The Divisional Court held that the liability to repair was upon the company, even if the pipe was proved to be the property of the consumer; but the Court of Appeal declined to decide that question. See a criticism on the decision in 72 J. P., at p. 97. See also *Parnell* v. *Portsmouth Waterworks Co.*, *post*, p. 493.

In *East London Waterworks Co.* v. *Vestry of St. Matthew, Bethnal Green* (1886), 17 Q. B. D. 475, the Court of Appeal decided that ss. 28 and 32 of the Act of 1847 authorised the placing, in the pavement of a street, of covers or guard boxes to protect stop valves placed for the purpose of regulating the supply of water in the communication pipes by which water was supplied to premises in the street, such covers or guard boxes not creating a nuisance or being inconsistent with the substantial reinstatement of the pavement. And the vestry having removed such covers or guard boxes, the company were held entitled to recover damages. In this case the facts were as follows: Among the regulations made in pursuance of the Metropolis Water Acts, 1852 (15 & 16 Vict. c. 84) and 1871 (34 & 35 Vict. c. 113), is the following: "Every communication pipe for the conveyance of water to be supplied by the company into any premises shall have at or near its point of entrance into such premises, and if desired by the consumer within such premises, a sound suitable stop valve of the screw-down kind with an area of waterway not less than that of a half-inch pipe, and not greater than that of the communication pipe, the size of the valve within these limits being at the option of the consumer. If placed in the ground such stop valve shall be protected by a proper cover and guard box." The plaintiffs, claiming to act under this regulation, placed stop valves in the communication pipes supplying water to certain houses in the Bethnal Green Road, and placed such stop valves outside the houses in the ground at or near the point of entrance of such pipes, not within the premises but on the public footway. For the purpose of protecting the said stop valves, and obtaining convenient access to them, and of detecting waste, the plaintiffs placed in the pavement above the said stop valves and on the public footway certain covers and guard boxes as provided by the above regulation. The plaintiffs, after completing the work of placing the covers and guard boxes, filled in the ground and reinstated and made good the pavement so far as was possible during the continuance of the covers and guard boxes, but the footway was not completely repaved in so far as the insertion of the guard boxes was inconsistent with a complete repaving, but only so far as the existence of the covers and guard boxes made it inconsistent. The defendants, claiming to act as the street authority under the Metropolis Management Acts, removed the covers and guard boxes in order to make the footway pavement continuously of the same material and construction as it was before the operations of the plaintiffs. The question for the court was whether the water company were entitled to maintain the action. In his judgment Fry, L.J., referring to s. 28 of the Act of 1847, said: "I think the words 'which the undertakers shall deem necessary for supplying water,' are to be read not as referring only to what is necessary merely for the actual supply of water, but as including any matter reasonably necessary in connection therewith, as, for instance, anything necessary for the prevention of the waste or misuse of water. Anything that is necessary to the successful conduct of the undertaking seems to me, in this sense, to be necessary for the supply of water."

By a local Waterworks Act passed in 1858 it was provided that, for the purpose of preventing waste of the water, all persons supplied with water by the waterworks company should provide "proper ball or stop-cocks or other necessary apparatus for regulating such supply," and that in case any such person neglected to provide such apparatus after being required to do so, the company might cut off the water from his premises. At the date of that Act the supply of water provided by the company was intermittent. By another Act, passed in 1888, the company were required to provide a constant supply of water. It then, for the first time, became necessary, for the prevention of waste, that a system should be adopted of inserting in each communication pipe an apparatus, called a screw-down valve, whereby the water could be shut off from any premises in which there were indications of the water being permitted to run to waste:—*Held*, that the "ball or stop-cocks" required by the Act of 1858 were things connected with the consumer's cistern, and that screw-down valves were not included in those words; further, that such a screw-down valve was not an apparatus for regulating the supply within the meaning of that Act, and that the company could not justify cutting off the water from the premises of a person who neglected to comply with a notice requiring him to insert such a valve in his communication pipe (*Ward* v. *Folkestone Waterworks Co.* (1890), 24 Q. B. D. 334). In this case it appeared that the company, in their Act of 1888, s. 6, took power themselves to fix the "stop valves of the screw-down kind" in the communication pipes; and there was nothing in that Act to compel the consumers to do the work.

Liability of local authorities in relation to fire-plugs.

In actions against local authorities as highway authorities some special considerations arise. It has long been settled law that no action for damages will lie against a surveyor of highways for injuries received by reason of the highway being out of repair, the remedy being by indictment (*Russell* v. *Men of Devon* (1788), 2 T. R. 667). "It is now beyond doubt the law that where a person, though lawfully using a highway, is damaged, either as regards himself, his horse or his carriage, merely by reason of the non-repair of a highway, he has no action at law for damages against anyone. . . . . In the year 1870 it had been held by the Court of Queen's Bench in *Gibson* v. *Mayor of Preston* (1870), L. R. 5 Q. B. 218, that a local authority who were constituted surveyors of highways by the Public Health Act, 1848, had the same immunity from actions for damages as a surveyor of highways; and the House of Lords, in *Cowley* v. *Newmarket L. B.*, [1892] A. C. 345, affirmed *Gibson's Case*, and conclusively settled that no action for damages will lie against any local board for merely allowing their

Sect. 38.

NOTE.

highways to get out of repair": *per* A. L. SMITH, L.J., in *Thompson* v. *Mayor, etc. of Brighton*, [1894] 1 Q. B., at p. 338. See also *Sanitary Commissioners of Gibraltar* v. *Orfila* (1890), 15 App. Cas. 400; *Municipality of Pictou* v. *Geldert*, [1893] A. C. 524; *Municipal Council of Sydney* v. *Bourke*, [1895] A. C. 433; *Maguire* v. *Liverpool Corporation*, [1905] 1 K. B. 767; *cf. Barnett* v. *Poplar Borough Council*, [1901] 2 K. B. 319; and *Smith* v. *West Derby Local Board*, and other cases cited at p. 487.

In *Kent* v. *Worthing L. B.* (1882), 10 Q. B. D. 118, it appeared that the iron cover of a valve connected with a water main was properly fixed in a highway by the defendants, but in consequence of the ordinary wearing away of the highway the valve cover projected an inch above it. The plaintiff's horse using the highway stumbled over the valve cover and was hurt. In an action against the defendants, who were both the water authority and the highway authority, for the injury to the horse, it was held that it was the duty of the defendants to make such arrangements that works under their care should not become a nuisance to the highway, and that the plaintiff was entitled to recover. This case, however, after having been much questioned in *Moore* v. *Lambeth Waterworks Co., supra*, was ultimately overruled by the Court of Appeal in *Thompson* v. *Mayor, etc. of Brighton*, and *Oliver* v. *L. B. of Horsham*, [1894] 1 Q. B. 332. In *Thompson's Case* it appeared that a manhole had been inserted in the road by the corporation as the sewer authority. It had a proper cover, and there was no fault in its construction, nor was it at all out of repair. The roadway had become worn down so that the cover of the manhole projected above an inch and a half above the surface of the road. The foot of the plaintiff's horse struck the cover and the plaintiff was thrown down and seriously injured. In *Oliver's Case* the local board as sewer authority had inserted a sewer grating in the road. The grating was properly constructed and in good repair. The accident to the plaintiff's horse, which tripped against the grating, was attributed solely to the neglect of the local board, who were the road authority, to keep up the road to the level of the grating. The judges were unanimous in overruling *Kent* v. *Worthing L. B.*, and in holding that the plaintiffs could not recover in either of the cases. See *Winslow* v. *Bushey U. D. C.* (1908), 72 J. P. 259.

In *Borough of Bathurst* v. *Macpherson* (1879), 4 App. Cas. 256, the Privy Council decided that an action might be successfully maintained against the highway authority who had constructed a barrel drain into which ran an open drain, the brickwork of which having broken away, and not having been repaired, a hole was caused into which the plaintiff's horse fell. The *ratio decidendi* is thus stated by Sir BARNES PEACOCK: "Their lordships are of opinion that under these circumstances the duty was cast upon them" (the municipality of Bathurst) "of keeping the artificial work which they had created in such a state as to prevent its causing a danger to passengers on the highway, which, but for such artificial construction, would not have existed, or, at the least, of protecting the public against the danger when it arose, either by filling up the hole or fencing it." *Cf. Municipal Council of Sydney* v. *Bourke*, cited *supra*, and *Lambert* v. *Lowestoft Corporation*, [1901] 1 K. B. 590. In *White* v. *Hindley L. B.* (1875), L. R. 10 Q. B. 219, the plaintiff's horse trod on a grid or grating put in the road by the defendants as sewer authority for the purpose of draining the surface water off the road into the sewer. The grid was in a defective state, and gave way, whereby the injury arose. It was held, although the defendants were not liable as surveyors of the highway, they were liable as owners of the sewer, of which the grid formed part, for negligence in not keeping the grid in a proper state. This case was followed in *Blackmore* v. *Vestry of Mile End Old Town* (1882), 9 Q. B. D. 451, where it appeared that a water meter (which was the property of a water company, and was used for measuring the water supplied by the company to the defendants for watering the streets) was placed by the defendants in a box of theirs sunk in the footway of one of the streets and covered with an iron flap. The defendants were, by s. 96 of the Metropolis Management Act, 1855 (18 & 19 Vict. c. 120), the surveyors of highways, and by s. 116 were authorised to cause the streets in their parish to be watered. The plaintiff whilst walking along the street stepped on the iron flap, and by reason of its having been worn smooth and become slippery and dangerous, he fell and was injured. In an action by him against the defendants for damages for such injury :—*Held*, that though the defendants might not be liable as surveyors of the highway for negligence in not keeping the iron flap in a proper state, they were liable in their capacity as the authority for watering the street, in which capacity they had placed the iron flap there. See this case commented on in *Moore* v. *Lambeth Waterworks Co.* (1886), 17 Q. B. D. 462.

In *Smith* v. *West Derby L. B.* (1878), 3 C. P. D. 423, it was held that the defendants, being both highway and sewer authority, were liable as sewer authority for negligence in filling in a trench in which their sewer was laid. See also *Cox* v. *Vestry of Paddington* (1891), 64 L. T. 566; *Steel* v. *Dartford L. B.* (1891), 60 L. J. Q. B. 256; *Whyler* v. *Bingham R. D. C.* [1901] 1 K. B. 45; *Shoreditch Corporation* v. *Bull* (1904), 68 J. P. 415; and *Hawthorn* v. *Kannullink*, [1906] A. C. 105.

A local board, apart from the Highways and Locomotives (Amendment) Act, 1878 (41 & 42 Vict. c. 77), cannot be indicted for non-repair of a highway within their district, but the indictment must be against the inhabitants (*R.* v. *Mayor, etc. of Poole* (1887), 19 Q. B. D. 602); but under s. 10 of that Act an indictment will lie (*R.* v. *Mayor, etc. of Wakefield* (1888), 20 Q. B. D. 810).

By s. 171 of the Public Health Act, 1875 (38 & 39 Vict. c. 55), incorporating s. 32 of the Town Police Clauses Act, 1847 (10 & 11 Vict. c. 89), an urban authority "may employ a proper number of persons to act as firemen, and may make such rules for their regulation as they think proper." The respondent, a member of a fire brigade provided by an urban authority, was instructed by his foreman to exclude all persons from certain premises, where the brigade was engaged in extinguishing a fire. He refused admission to the appellant, a member of a volunteer fire brigade, who thereupon endeavoured to force an entrance, and in so doing assaulted the respondent :—*Held*, that the effect of the statutes was to give to the brigade provided by the urban authority control over the premises, that the appellant was lawfully excluded, and could not justify his attempt to force an entrance, and therefore was rightly convicted of an assault (*Carter* v. *Thomas*, [1893] 1 Q. B. 673). See further as to control at fires, s. 89 of the Public Health Acts Amendment Act, 1907, which, however, only becomes operative when put in force in any district by an order of the Home Secretary.

Undertakers to repair fire-plugs, and deposit keys thereof at engine houses, etc.
